01

Introduction

The changes that occur annually in the legislative framework affecting the pharmaceutical industry and the production of cosmetics oblige professionals involved in this area to update their knowledge on a regular basis in order to always comply with current regulations. For this reason, and with the objective of facilitating the fulfillment of this mission, TECH and its team of experts have developed this complete, austere and multidisciplinary program. Thanks to it, the graduate will be able to know in detail the latest international legislative modifications for the manufacture, distribution, import and export of products through 150 hours of the best theoretical, practical and additional content 100% online.

“

TECH has designed this program for you to learn in detail the latest developments related to the international legislative framework and cosmetic production in a 100% online way”

According to the proverb, "ignorance of the rule does not exempt you from complying with it" This is applicable to any context, including pharmacy For this reason, professionals engaged in the manufacture, distribution, importation and/or importation of cosmetic products must know in detail the legislative framework applicable in the country of origin and destination, in order to avoid penalties.

Being a field in constant change due to the temporality of the laws, keeping up to date sometimes becomes a complex task for many professionals in this area, which is why TECH has considered necessary the development of a program that allows them, in a 100% online way, to update their knowledge easily, quickly and comfortably This is a qualification distributed in 150 hours with which the graduate will be able to delve into the novelties of the different European, American and Asian regulations applicable to this field.

In addition, it is presented as a certificate in which the professional will find, apart from the theoretical syllabus, additional material in different formats, with which he/she will be able to deepen in the aspects that they consider more relevant for his/her work performance. All this content will be available from the beginning of the academic experience and can be downloaded to any device with an internet connection for consultation, even after the course has concluded.

This **Postgraduate Certificate in International Legislation on Cosmetic Products** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ◆ Practical cases presented by experts in Cosmetic Science and Technology
- ◆ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where self-assessment can be used to improve learning
- ◆ Its special emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

You will have 150 hours of the best theoretical, practical and additional content, including self-knowledge exercises so that you can evaluate your progress during the course of the program"

“

Thanks to the versatility and flexibility that TECH offers you with this program, you will be able to combine your course with any other professional or academic activity"

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. This will be done with the help of an innovative system of interactive videos made by renowned experts.

Would you like to keep up to date with the requirements for cosmetic registration in countries such as the United States? With this Postgraduate Certificate you will be able to do it.

A Postgraduate Certificate that delves into the latest developments related to the requirements of the cosmetics manufacturing laboratory in Europe.

02 Objectives

The objective of this course is none other than to provide students with all the teaching tools that will enable them to achieve their own goals in their professional sector. TECH and its team of experts have invested dozens of hours in creating a complete, up-to-date, austere and top-quality qualification, adapted to the most demanding market specifications. Therefore, by passing the course, the student will have achieved all the necessary skills to master the new developments related to the International Cosmetic Products Legislation.

“

A specific and austere program with which you will be able to exceed your professional expectations thanks to the intensive improvement of your pharmaceutical skills”

General Objectives

- ◆ Develop and analyze the trajectory of European and Extra-European Cosmetic Legislation
- ◆ Analyze ingredient inventory: examine the “nomenclature ingredient” and identify basic “functions of ingredients”
- ◆ Determine what a cosmetic “laboratory” is and the requirements of its activities
- ◆ Analyze cross-cutting legislation

Specific Objectives

- ◆ Identify the figure of the “person in charge”
- ◆ Comprehend Cosmetic Regulation from a practical point of view
- ◆ Define the functions of the Cosmetic Regulation department
- ◆ Analyze and present the Natural Products standard: ISO-Certifications
- ◆ Identify and apply international standards for CPNP discharge

“

In this Postgraduate Certificate you will find the best academic tools so that you can achieve your objectives in a guaranteed way”

03

Course Management

TECH considers it essential to include in all its program a faculty specialized in the area in which it is developed. For this reason, the teaching team for this Postgraduate Certificate has selected a group of pharmacists with a broad and extensive professional experience in the sector. They are also active specialists, so they know in detail the latest developments related to the International Legislative Framework related to the manufacture and distribution of cosmetic products.

“

The teaching team will be available during the 6 weeks of the course to guide you and answer any questions you may have during the course"

Management

Dr. Mourelle Mosqueira, María Lourdes

- ◆ Expert researcher in Cosmetic Science
- ◆ Technical Director at Balcare
- ◆ Researcher of the FA2 group of the Applied Physics Department of the University of Vigo
- ◆ Author of publications on Cosmetic Science
- ◆ Lecturer in undergraduate and graduate programs related to Cosmetic Science
- ◆ President of the Iberoamerican Society of Thalassotherapy
- ◆ Secretary of the Galician Society of Thermal Peloids
- ◆ PhD in Applied Physics, University of Vigo
- ◆ Degree in Pharmacy, University of Santiago de Compostela
- ◆ Diploma in Nutrition and Dietetics, University of Granada

Professors

Ms. Aguado Ruiz, Belén

- ◆ Cosmetic Safety Advisor at ABAR Cosmetics
- ◆ Technical Director at Larrosa Laboratorios
- ◆ Quality Department Director at Gaher Química
- ◆ Cosmetic Safety Supervisor at LAB&CLIN ALLIANCE
- ◆ Cosmetics Technical Expert at Bellssan Healthcare
- ◆ International Professional Master's Degree in Toxicology from the Official College of Chemists of Seville
- ◆ Degree in Chemistry from the University of Alcalá de Henares

04

Structure and Content

TECH uses the best academic tools and the effective and innovative Relearning methodology in all of its programs. In addition, it guarantees a series of minimum hours of additional material in different formats, so that students can not only contextualize the information developed in the syllabus, but also deepen in those aspects they consider more interesting or relevant for their work performance. All this is what makes qualifications like this one the best in the market, thanks to which the pharmacist will be able to update his knowledge, contributing to improve his professional future through a 100% online program.

“

A unique opportunity to get up to date on ISO Standards and Certifications for good practice in the manufacture of cosmetic products"

Module 1. International Legislation on Cosmetic Products

- 1.1. Regulations in Europe
 - 1.1.1. European Regulations-Legislation
 - 1.1.2. Regulation 1223/2009
 - 1.1.3. Borderline Products
- 1.2. Cosmetics Manufacturing Laboratory Requirements in Europe
 - 1.2.1. Registering Manufacturing Activities
 - 1.2.2. Good Manufacturing Practices
 - 1.2.3. Standard Operating Procedures
- 1.3. Requirements for Importers, Distributors and Providers Placing the Product on the Market
 - 1.3.1. Definitions Based on European Legislation
 - 1.3.2. Obligation Based on European Legislation
 - 1.3.3. Product Notification Portal Registration
- 1.4. Cosmetic Laboratory Areas
 - 1.4.1. Department Definitions
 - 1.4.2. Materials and Personnel Flow
 - 1.4.3. Industrial Equipment and Instrumentation
- 1.5. Regulatory Department: functions
 - 1.5.1. Safety Assessor
 - 1.5.2. Safety Assessment and Product Dossier
 - 1.5.3. Safety Assessment: Studies
- 1.6. ISO Standards and Certifications
 - 1.6.1. Good Manufacturing Practices
 - 1.6.2. Natural Cosmetic Products
 - 1.6.3. Quality

- 1.7. Regulations: USA, Latin America and Asia
 - 1.7.1. U.S. Legislation
 - 1.7.2. Latin American Legislation
 - 1.7.3. Legislation in Asia
 - 1.7.4. Export Requirements
- 1.8. Cross-cutting legislation
 - 1.8.1. REACH Legislation
 - 1.8.2. CLP Legislation
 - 1.8.3. Other Legislation: Toys, Biocides, Others
- 1.9. Other Legislation
 - 1.9.1. European Legislation: Borderline Products
 - 1.9.2. Personal Care Products
 - 1.9.3. Aerosol Legislation
- 1.10. Registration Requirements for Cosmetic Products in Other Countries (FDA, USA)
 - 1.10.1. Customs Services
 - 1.10.2. Labeling Requirements
 - 1.10.3. Differences in Definition between Cosmetics and Medication

“*You decide when and from where to connect: you will be able to access the virtual Classroom from any device with internet connection without a defined schedule*”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will be confronted with multiple simulated clinical cases based on real patients, in which they will have to investigate, establish hypotheses and ultimately, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Pharmacists learn better, more quickly and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, attempting to recreate the actual conditions in a pharmacist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Pharmacists who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Pharmacists will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 115,000 pharmacists have been trained with unprecedented success in all clinical specialties, regardless of the surgical load. This pedagogical methodology is developed in a highly demanding environment, with a university student body with a high socioeconomic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is created specifically for the course by specialist pharmacists who will be teaching the course, so that the didactic development is highly specific and accurate.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Video Techniques and Procedures

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current pharmaceutical care procedures. All of this, first hand, and explained and detailed with precision to contribute to assimilation and a better understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

The Postgraduate Certificate in International Legislation on Cosmetic Products guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in International Legislation on Cosmetic Products** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in International Legislation on Cosmetic Products**
Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
