01 Introduction

The incorporation of professional physiotherapists in top-level clubs has raised the prestige of the profession, as well as giving value to the functions it performs throughout the competition season. This in turn has led to the incorporation of new technologies and techniques that favor both diagnosis and treatment. In this scenario, TECH develops a program that provides professionals with a direct update of their knowledge through a practical internship, in a reference center and guided by an expert specialized in the sports area.

Incorporate into your daily practice the most relevant advances in the area of Sports Physiotherapy thanks to a distinctive, unique and effective hands-on experience"

The high competitiveness of athletes sometimes leads them to push themselves to the limit in each training and competition. That is why the work of a physiotherapist is key both in improving performance and in recovery from high intensity efforts. New devices and techniques have significantly improved treatments, while at the same time boosting the work of physiotherapists.

Given this reality, it is undeniable that professionals must be constantly updating their knowledge in an area where practice is fundamental. For this reason, TECH has developed this Internship Program, which offers graduates a unique experience, integrating them for 3 weeks in a prestigious clinical center. A real scenario, where you will be accompanied by professionals specialized in Sports Physiotherapy, who will take you to learn the latest techniques and methods used in the present.

All this in an excellent professional environment that will allow you to verify the daily work in a unique and intensive environment and that focuses mainly on practical actions, which must be carried out by any professional in this area who wishes to expand their skills and abilities in the services provided to athletes at the highest level. A unique opportunity that only TECH offers you.

02

Why Study an Internship Program?

In the educational market there are multiple programs that provide theoretical knowledge, but they are far from the real needs of professionals. That is why TECH has developed this Internship Program, which seeks, through an intensive stay, to facilitate the updating of techniques and procedures used in Sports Physiotherapy. All this, also in a relevant clinical center, whose staff includes excellent professionals who will tutor the graduate. In this way, this institution offers a program that meets the real needs of professionals, immersing them from the beginning in a unique practical experience.

You will carry out an intensive internship, where you will be side by side with the best specialists in Sports Physiotherapy"

1. Updating from the latest technology available

New technologies have made it possible to incorporate in the consultations of physiotherapists, devices that allow better diagnosis and invasive and non-invasive treatments. Therefore, and with the objective of bringing the professional closer to these advances, TECH has developed this Internship Program, where the professional will enter a cutting-edge clinical environment, thereby gaining access to the latest technological advances in the field of Sports Physiotherapy.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

During this practical process, professionals will not be alone, since from the beginning of this program they will have a physiotherapist specialized in Sports Physiotherapy, who will show them the most advanced techniques and tools. All this, in a first class environment that will lead you to know the latest developments in this area and incorporate them into your daily practice.

3. Entering First-Class Clinical Environments

In its commitment to offer a quality program, TECH rigorously selects all the centers available for the Internship Program. Thanks to this, specialists will have guaranteed access to a prestigious clinical environment in the area of Sports Physiotherapy. In this way, they will be able to acquire an update of the exhaustive and exquisite work that is carried out in first level centers.

4. Putting the acquired knowledge into daily practice from the very first moment

This program is focused from the beginning to offer professionals the practical activities they need to be able to carry out an effective update in Sports Physiotherapy. TECH is different from other educational programs and provides a 100% practical experience that will allow the graduate to develop in a professional environment, along with physiotherapists who have a high specialization in this area.

5. Expanding the boundaries of knowledge

TECH offers a unique opportunity for physiotherapy professionals to have access to a prestigious center and be surrounded by specialists who have developed their careers in the recovery and specific treatment of athletes. An incomparable setting, where you can update your practical knowledge, which you will only find in the programs designed by this educational institution.

You will have full practical immersion at the center of your choice"

03

Objectives

The practical program proposed for this internship aims to provide the professional with all the tools to master, in a practical and rigorous way, the latest treatments and advances in the discipline. In this way, from this approach, the professional will be able to integrate these techniques in their daily practice, expanding their skills in the field of Sports Physiotherapy.

General Objectives

- Update the techniques and treatments used to address common sports injuries
- Be up to date with technological advances and new devices used in Sports Physiotherapy
- Approach sports injuries with the most rigorous and precise methodology, in order to obtain the most appropriate result according to the patient's characteristics and the moment of competition in which they are.

Specific Objectives

- ♦ Plan the diagnostic, functional, therapeutic and preventive means that guarantee the full functional recovery of the injured person
- ♦ Maximize therapeutic resources in the process of caring for the athlete
- ♦ Integrate therapeutic exercise in health promotion, both in healthy and sick populations
- ♦ Develop models of care based on the most up-to-date evidence in the most frequent sports settings
- ♦ Intervene in sphincteric dysfunctions and sports
- ♦ Use percutaneous and musculoskeletal electrolysis techniques
- ♦ Apply percutaneous ultrasound-guided neuromodulation
- ♦ Assess and intervene in spinal injuries
- ♦ Intervene in upper and lower limb injuries
- ♦ Work with manual techniques in sports physiotherapy
- ♦ Perform global postural reduction techniques
- ♦ Apply therapeutic exercise as injury prevention
- ♦ Program therapeutic exercises for the recovery of sports injuries

04

Educational Plan

In this practical program, the physiotherapist will have the opportunity to attend a prestigious physiotherapy center for 3 weeks, from Monday to Friday and with 8 hours consecutive shifts. In addition, they will have an assistant professional who will accompany them in each case they attend. In this way, they will be able to put their theoretical knowledge into action, performing innovative therapeutic procedures.

In this internship program, of a completely practical nature, the activities are aimed at developing and perfecting the competencies necessary for the provision of physiotherapeutic care in areas and conditions that require a high level of qualification, and which are oriented to the specific training for the exercise of the activity, in an environment of safety for the patient and high professional performance.

Therefore, in this period, graduates will have a series of activities that involve the skills they must have to deal with high-performance athletes and sports enthusiasts. In this way, students will put into practice invasive techniques such as percutaneous electrostasis in tendinopathies and muscle injuries, as well as the exploration of muscle injuries in upper and lower limbs.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other training partners to facilitate teamwork and multidisciplinary integration as transversal competences for the practice of Sports Physiotherapy (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the internship, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Receive specialized education in an institution that can offer you all these possibilities, with an innovative academic program and a human team that will help you develop your full potential"

Module	Practical Activity
Invasive techniques in sports: percutaneous electrolysis	Perform diagnosis and treatment in sports patients
	Perform invasive physiotherapy techniques in athletes through the neuromechanical model
	Perform percutaneous ultrasound-guided electrostasis in athletes
	Practice percutaneous electrostasis in tendinopathies and muscle injuries
Treatment of spine, instability and injuries	Outline strategies for addressing proprioceptive dysfunctions and neuroplastic changes at the CNS level
	Diagnose dysfunctions in accuracy, dissociation and movement quality
	Perform lumbar instability testing
	Collaborate in the performance of observational movement control analysis
	Perform muscle activation pattern assessment tests and muscle endurance tests
Treatment of upper limb and sports injuries	Provide support in the treatment and exploration of muscle injuries of the upper limb
	Diagnose upper limb muscle injuries by imaging
	Carry out diagnosis of glenohumeral dislocation
	Perform physiotherapy treatment of glenohumeral dislocation
	Assess and treat joint and ligament injuries of the elbow
Lower limb treatment and sport	Assist in the treatment and examination of dysfunction/pain and trauma of the hip region
	Perform treatment of adductor-related groin pain
	Perform a functional assessment of the knee, through the neuro-orthopedic approach
	Carry out physiotherapeutic treatment of repetitive stress syndrome
	Outline a physiotherapeutic treatment strategy for iliotibial band syndrome
	Treat goosefoot bursitis through physiotherapeutic treatment
	Perform clinical and complementary tests of ankle ligament injuries in contact sports
	Address metatarsalgia
	Perform functional and podiatric assessment of the painful sole of the foot
Perform joint techniques in upper and lower limbs	
Manual techniques in Sports Physiotherapy	Approach the patient with osteopathic techniques of the dorsal spine
	Provide support in performing osteopathic techniques of the lumbar spine
	Manage pelvic osteopathic techniques

05 Where Can I Do the Internship Program?

In order to provide the best education and preparation to its students, TECH has been willing to broaden the educational horizons so that this Internship Program can be delivered in various prestigious centers worldwide. This is a unique opportunity for the student to continue to grow in their professional area, together with the best physiotherapists specialists in the sector.

The time has come to grow in your career and for this, you have a program focused on improving your skills as a sports physiotherapist"

The student will be able to do this program at the following centers:

Physiotherapy

Clínica Viriato

Country: Spain City: Madrid

Address: Calle Viriato, 29, 28010, Madrid

Clinic specialized in General Medicine, Aesthetic Medicine, Dentistry and Body Rehabilitation

- Related internship programs:**

06 General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program in Sports Physiotherapy** contains the most complete and up-to-date program in the professional and academic landscape.

After the student has passed the assessments, they will receive their corresponding Internship Program diploma issued by TECH Technological University via tracked delivery*.

The certificate issued by TECH will reflect the grade obtained in the test.

Title: **Internship Program in Sports Physiotherapy**
