p. 32

tech 06 | Introduction

Home hospitalization has brought numerous benefits, both for patients, who can be treated in their homes while being accompanied by their family, and for healthcare centers, which have more beds available for patients who truly need to be hospitalized due to the type of care they require.

This type of healthcare hospitalization is growing in recent years, also due to the increase in the aging population, which suffers from more chronic diseases that can be treated outside hospital facilities, thanks to the technological advances that

have taken place in healthcare. But in addition to technological developments, physiotherapists need to manage these home hospitalization units properly, so that these resources are used as efficiently as possible. This Postgraduate Certificate in Home Hospitalization Unit Management is specifically designed to help physiotherapists update their knowledge in this field through the latest educational technology, enabling them to make more accurate diagnoses.

This program is focused on deepening the understanding of all aspects which make home hospitalization unique and different from other medical specialties. It also demonstrates the weaknesses and future opportunities we have ahead of us, making the most of new educative technology available.

The syllabus is presented in a rigorous shape with the latest scientific evidence and clinical cases in which to advance our knowledge, in order to share experiences and innovative techniques that are already performed in different home hospitalization units in other locations

This **Postgraduate Certificate in Home Hospitalization Unit Management** contains the most complete and up-to-date scientific program on the market. Its most notable features are:

- The development of more than 100 case studies presented by experts in home hospitalization unit management
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- Latest advances on the role of physiotherapists in home hospitalization
- Practical exercises where the self-assessment process can be carried out to improve learning.
- Algorithm-based interactive learning system for decision-making in the situations that are presented to the student
- With special emphasis on evidence-based medicine and research methodologies in home hospitalization
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

A unique, essential and decisive learning experience to boost your professional development"

This program is the best option you can find to continue your education in home hospitalization, as it includes over 100 practical cases, making it easier for you to study and apply the concepts learned"

The teaching staff is made up of prestigious and renowned Spanish professionals, with long careers in health care, teaching and research, who have worked in different hospitals throughout the country, garnering professional and teaching experience that is delivered in an extraordinary way in this Postgraduate Certificate.

The methodological design of this Postgraduate Certificate, developed by a multidisciplinary team of e-learning experts, integrates the latest advances in educational technology. It incorporates numerous multimedia educational tools that allow the professional, based primarily on the scientific method, to tackle real problems encountered in their clinical practice. This approach will enable them to continue progressing in acquiring knowledge and developing skills that will impact their future professional work.

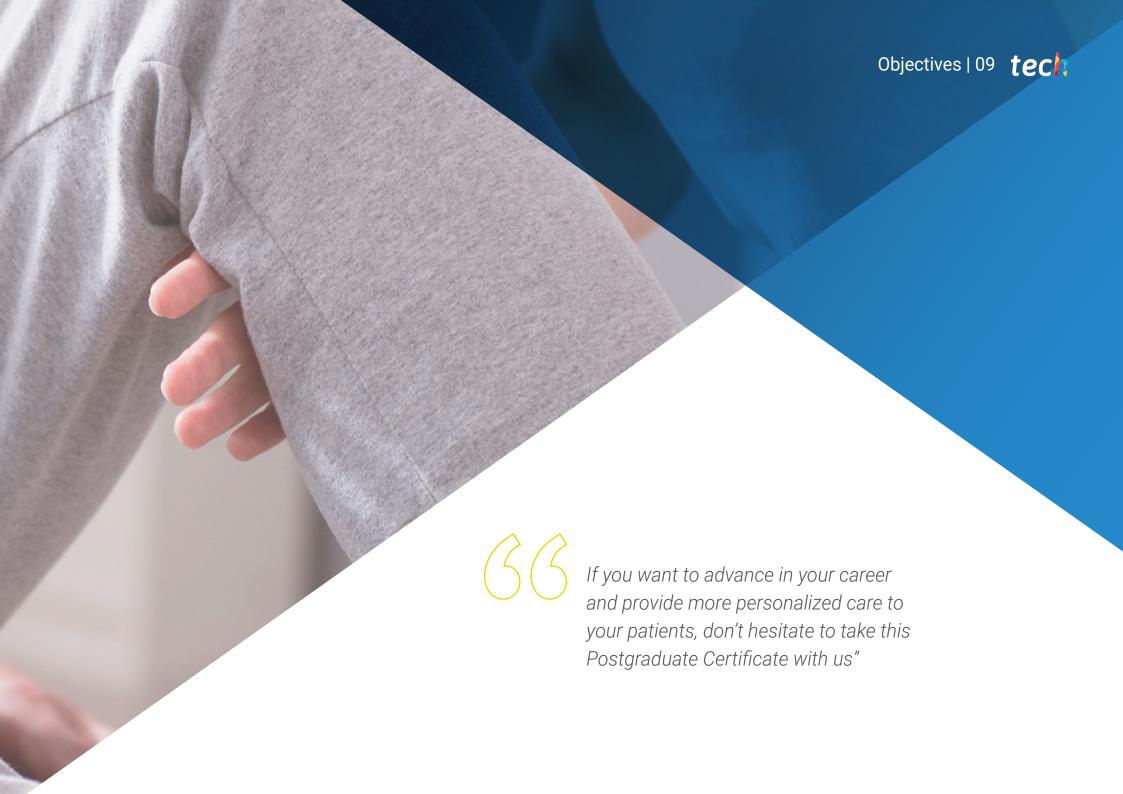

This Postgraduate Certificate stands out in every aspect of its content, including videos, self-assessments, clinical cases, and modular exams, which have been thoroughly reviewed, updated, and integrated by the instructors and expert team. This ensures a gradual and pedagogical learning process that will help students achieve the objectives of the academic program.

Increase your decision-making confidence by updating your knowledge through this Postgraduate Certificate.

Get qualified with the best faculty of teachers who apply all their knowledge through the latest educational technology on the market.

tech 10 | Objectives

General Objective

• Update physiotherapists, through the best scientific evidence for the management of the home hospitalization unit, as an effective and efficient alternative to conventional hospitalization

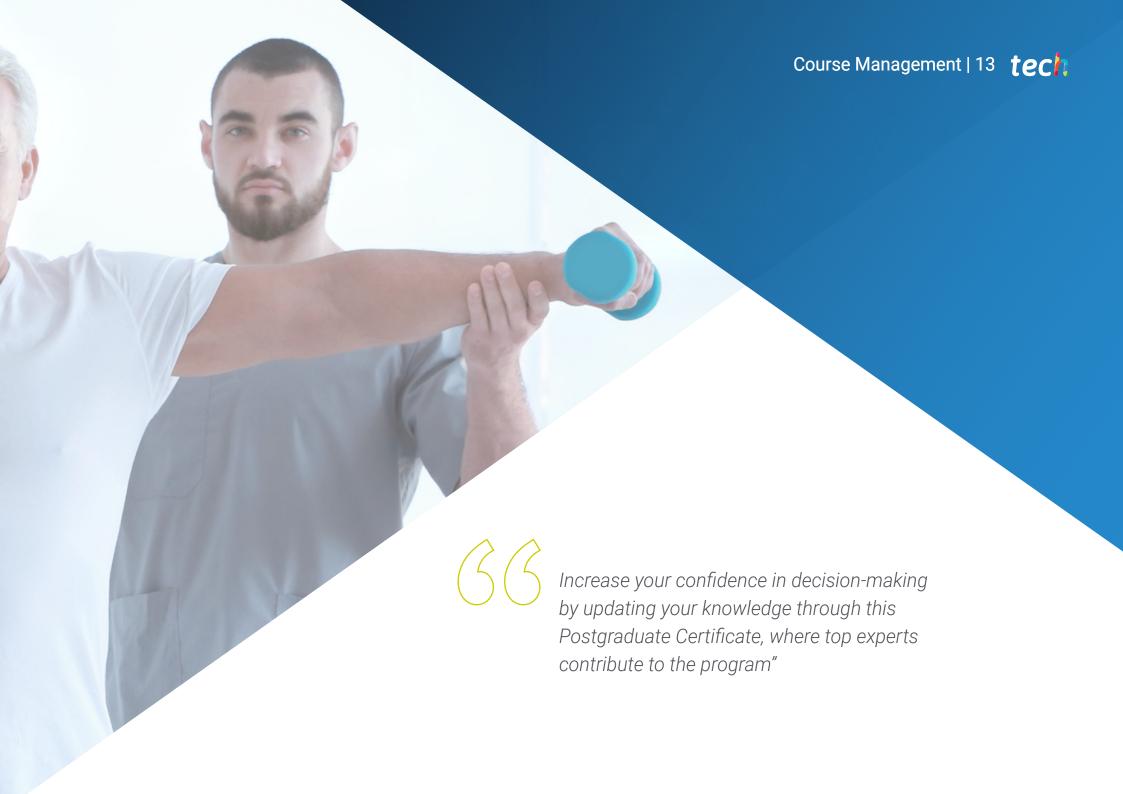

Specific Objectives

- Assess patient for admission or transfer to primary care
- Manage discharges, transfers and hospital readmissions
- Manage cases according to medical history and legality

tech 14 | Course Management

Management

Dr. Lafuente Sanchis, Manuel Pablo

- Head of the Home Hospitalization and Palliative Care Service at La Ribera University Hospital, Valencia
- Specialist in Family and Community Medicine at the Virgen de los Lirios Hospital, Alcoy
- Clinical Simulation Instructor, Catholic University of Murcia
- University Professor in Nursing Studies
- University Expert in Palliative Care, International University of La Rioja
- University Expert in University Teaching from the Catholic University of Valencia
- Bachelor's Degree in Medicine and Surgery from the University of Valencia
- Member of Spanish Society of Home Hospitalization, Spanish Society of Clinical Simulation

Faculty

Dr. Martín Marco, Antonio

- Internal Medicine Specialist at Arnau de Vilanova Hospital, Valencia
- Attending Physician in the Home Hospitalization and Palliative Care Unit
- Head of Teaching and Research in the Palliative Care in Unit
- Master's Degree in Emergency Medical Care
- Master's Degree in Emergency Medical Care
- Degree in Medicine and Surgery from the University of Zaragoza
- Member of: Spanish Society of Medical Oncology and Spanish Society of Internal Medicine

Dr. Jara Calabuig, Irina

- Alzira Health Care Physician at La Bassa Health Center
- Physician at La Fàbrica Health Center
- Physician at the Muro d' Alcoi Health Center Auxiliary Clinics
- Physician at the Banyeres de Mariola Health Center
- Teaching collaborator in continuous care at La Fàbrica Health Center (Alcoy), Cocentaina and Carlet
- Specialist in Family and Community Medicine at the Virgen de Los Lirios Hospital
- Degree in Medicine and Surgery from the University of Reus Spain
- Master's Degree in Palliative Care from the University of Valladolid
- Member of: Palliative Care Working Group. SEMERGEN

Dr. Tarraso Gómez, María Luisa

- Assistant Physician of the Home Hospitalization and Palliative Care Unit of La Ribera University Hospital
- Specialist Physician of the Pain Unit at La Ribera University Hospital
- Specialist in Family and Community Medicine. Residency at Dr. Peset Hospital
- Master's Degree in Palliative Care from the University of Valladolid
- Bachelor's Degree in Medicine and Surgery from the University of Valencia
- Member of: Valencian Society of Home Hospitalization and Palliative Group of the Spanish Multidisciplinary Pain Society

Dr. Duart Clemente, Cristina

- Specialist in Family and Community Medicine in the Valencia Health System
- Specialist of the Valencian Provincial Directorate of Disability Assessment Team
- Specialist in Family and Community Medicine at La Ribera University Hospital
- Master's Degree in Palliative Care from the University of Valladolid
- Degree in Medicine and Surgery from the University of Navarra

Dr. Ciancotti Oliver, Lucía

- Attending Physician in the Preventative Medicine Unit at the Ribera University Hospital, Valencia
- Technician of Health Promotion and Prevention of the stages of life
- Specialist in Family and Community Medicine at the Lluis Alcanyis Hospital, Valencia
- Specialist in Preventive Medicine, Public Health and Hygiene Dr. Peset University Hospital, Valencia
- Bachelor's Degree in Medicine and Surgery from the University of Valencia
- Master's Degree in Public Health and Healthcare Management, University of Valencia
- Member of: Spanish Society of Preventive Medicine, Public Health and Hygiene

tech 16 | Course Management

Dr. Bou Monterde, Ricardo

- Medical Epidemiologist specialized in Preventive Medicine and Public Health
- Head of Epidemiology and Preventive Medicine at La Ribera University Hospital, Valencia
- Epidemiologist at the Department of Health of Catalonia
- Doctor in Medicine and Surgery from the University of Catalonia
- Master's Degree in Clinical Trials from the School of Hygiene and Tropical Medicine, University of London

Dr. Torrijos Pastor, Antonio

- Physician in Home Hospitalization La Ribera University Hospital
- Outpatient Emergency Physician at Carlet Integrated Health Center
- Specialist in Family and Community Medicine at the Marina Baixa Hospital, Alicante
- Degree in Medicine and Surgery from the University of Cádiz
- University Master's Degree in Palliative Care from the University of Valladolid
- Master's Degree in Clinical Medicine Research from the Miguel Hernández University
- Member of: SVMFYC Home Care Working Group, SEMERGEN Palliative Care Working Group and SEMFYC National Mental Health Working Group.

Dr. Santander López, Jorge

- Assistant Physician of the Home Hospitalization and Palliative Care Unit at La Fe Hospital
- Specialist in Family and Community Medicine
- Specialist in Home Hospitalization and Palliative Care
- Degree in Medicine and Surgery from the University of Mendoza, Argentina
- University Expert in Pain

Course Management | 17 tech

Dr. Flor Bustos, Loida

- Specialist in Family and Community Medicine
- Assistant Physician of the Family and Community Medicine Area of the Manises Hospital
- Specialist Physician of the Home Hospitalization and Palliative Care Unit at La Ribera University Hospital, Valencia
- PhD in Medicine and Surgery from the University of Valencia

Take the opportunity to learn about the latest advances in this field in order to apply it to your daily practice"

tech 28 | Structure and Content

Module 1. General Aspects. Research and Teaching

- 1.1. Process Management
 - 1.1.1. Pre-Admission Assessment
 - 1.1.2. Admission
 - 1.1.3. Discharge and Transfer to Primary Care
 - 1.1.4. Re-Admission
 - 1.1.5. Case Management
- 1.2. Electronic Medical Records, Specifics of HHU (Mobility and Accessibility)
 - 1.2.1. Telemedicine
- 1.3. Quality Indicators
 - 1.3.1. Management Indicators
 - 1.3.2. Clinical Indicators
- 1.4. Research in HHU
 - 1.4.1. Future and Present Lines of Work in the HHU
- 1.5. Undergraduate and Postgraduate Teaching
 - 1.5.1. Undergraduate Teaching
 - 1.5.2. Postgraduate Teaching
- 1.6. Future Perspectives
 - 1.6.1. Future Challenges
- 1.7. Telemedicine
 - 1.7.1. Concept and Considerations
- 1.8. Case Management
 - 1.8.1. Nursing Management of Hospital Cases
 - 1.8.2. Nursing Management of Community Cases
 - 1.8.3. Management of Medicine-Based Cases

Take advantage of the opportunity to learn the latest advancements in this field and apply them to your daily practice"

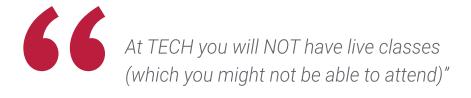

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want"

tech 26 | Study Methodology

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule"

The effectiveness of the method is justified by four fundamental achievements:

- 1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
- 2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Study Methodology | 29 tech

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

Case Studies

Students will complete a selection of the best case studies in the field. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Testing & Retesting

We periodically assess and re-assess your knowledge throughout the program. We do this on 3 of the 4 levels of Miller's Pyramid.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence for future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical and effective way to help students progress in their learning.

tech 34 | Certificate

This private qualification will allow you to obtain a diploma for the **Postgraduate Certificate in Home Hospitalization Unit Management** endorsed by TECH Global University, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Certificate in Home Hospitalization Unit Management

 ${\sf Modality:} \ \textbf{online}$

Duration: 6 weeks

Accreditation: 5 ECTS

has successfully passed and obtained the title of:

Postgraduate Certificate in Home Hospitalization Unit Management

This is a private qualification of 150 hours of duration equivalent to 5 ECTs, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024
