Introduction

The use of hyperbaric oxygenation treatment takes physiotherapy intervention to a much higher level of effectiveness. However, in order to put these treatments into practice, it is necessary for the professional to have a thorough knowledge of their bases and principles, as well as the specific indications for each case. In this sense, TECH professionals, fulfilling their commitment to offer high quality education, have designed this program that will focus on providing physiotherapists with the necessary knowledge to perform a treatment based on hyperbaric medicine with excellent results.

“

All the fundamentals of the use of Hyperbaric Oxygenation in the field of physiotherapy, unified in a highly effective educational program"

The creation of new generation hyperbaric chambers, which are more accessible to use due to their cost and installation in public and private health institutions, has led different professionals to incorporate this tool into their daily practice.

The Postgraduate Diploma in Hyperbaric Medicine. Fundamentals, Effects and Indications of HBOT will allow the healthcare professional to delve into the use of these mechanisms. The program develops a solid and updated specialization in hyperbaric oxygen therapy, which will help the physician to develop competencies and skills necessary to identify and adequately solve different cases of pathologies or therapeutic practices for which hyperbaric oxygenation can be effective and efficient.

The specialization begins with a brief historical overview of the beginning of Hyperbaric Medicine, the first indications of what would become a hyperbaric chamber and the empirical discovery of the beneficial effects of the combination of increased pressure and oxygen on human physiology. The student will be introduced to the beginning of the scientific period of Hyperbaric Medicine and the development of underwater medicine, as well as the accompaniment of diving medicine in the understanding and development of this treatment in clinical applications in different countries.

The basics of HBOT will also be presented in a practical and simple way. The physical laws of Henry, Dalton, and Boyle and Mariotte are explained in order to incorporate the concept of volumetric and solumetric effect. In addition, the mathematical model of Krogh is presented, which allows to know the effect of oxygen perfusion radius at different treatment pressures. In addition, the different types of hypoxia are detailed so that the student can understand the hypoxic bases of the different pathologies and recognize the therapeutic applications of hyperoxia.

On the other hand, the professional will get to know, through this program, the most relevant physiological effect: vasoconstriction, angiogenesis, collagen synthesis, osteogenesis, neuroprotection, peripheral regeneration, bactericide effects, anti-inflammatory effects, as well as antioxidants.

Finally, the last module of this Postgraduate Diploma reaffirms and emphasizes the contraindications of HBOT and adverse events, and presents the safety of HBOT. Clinical cases drawn from the experience of different professionals and teachers of this specialization are also shown.

This **Postgraduate Diploma in Hyperbaric Medicine. Fundamentals, Effects and Indications of HBOT** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ The development of practical cases presented by experts in Hyperbaric Medicine in the field of physiotherapy
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ News on Hyperbaric Medicine in the field of physiotherapy
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Special emphasis on innovative methodologies in Hyperbaric Medicine
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Don't miss this opportunity to study in the biggest private online university"

“

This Postgraduate Diploma is the best investment you can make in the selection of a refresher program for two reasons: in addition to updating your knowledge in Hyperbaric Medicine. Fundamentals, Effects and Indications of HBOT, you will obtain a qualification from TECH Technological University"

The program includes, in its teaching staff, professionals belonging to the field of Hyperbaric Medicine and physiotherapy, who bring to this program the experience of their work, as well as recognized specialists from prestigious societies and universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be supported by an innovative interactive video system created by renowned and experienced experts. Fundamentals, Effects and Indications of HBOT and with great experience.

This specialization has the best teaching material in the sector, which will allow you a contextual study that will facilitate your learning.

This Postgraduate Diploma is 100% online, so you can study at the same time that you combine your professional work.

02 Objectives

The program in Hyperbaric Medicine. Fundamentals, Effects and Indications of HBOT is oriented to educate in the applications of hyperbaric oxygenation treatment and expose the scientific evidence in the different specialties in the field of physiotherapy. All this, with the aim of educating the best professionals in the sector who are able to work optimally with those patients who, by the nature of their pathology, can be successfully treated through the treatments offered by hyperbaric medicine.

“

This Postgraduate Diploma is the best option to learn about the latest advances in hyperbaric medicine applied to your work as a physiotherapist"

General Objectives

- ♦ Disseminate the usefulness of hyperbaric oxygenation treatment in physiotherapeutic treatments
- ♦ Teach physiotherapy professionals the fundamentals, mechanisms of action, indications, contraindications and applications of hyperbaric oxygen
- ♦ Study the degree of evidence published and the recommendations and indications of the different scientific societies related to Hyperbaric Medicine in the field of physiotherapy
- ♦ Recognise the potential applications of hyperbaric oxygen in different clinical cases and the benefits that can be achieved with the treatment, as well as performing the indication and detection of the contraindications

An intensive specialization that will allow you to become a Postgraduate Diploma in Hyperbaric Medicine. Fundamentals, Effects and Indications of HBOT in a short time frame and with the greatest flexibility"

Specific Objectives

Module 1. Introduction to Hyperbaric Medicine

- ♦ Introduce the world history of Hyperbaric Medicine and the operation and differences in the types of hyperbaric chambers that exist today
- ♦ Describe the current state of new indications and applications based on the development of evidence, the evolution of the different models and types of hyperbaric chambers, and the origin of scientific societies related to the specialty
- ♦ Develop the concept of oxygen toxicity, contraindications and adverse effects related to the discoveries of its mechanism of action (e.g., The Bert Effect)
- ♦ Present the new concept of Hyperbaric Medicine for physiotherapy, which includes treatment with lower pressures, its indications, limitations and potential future applications

Module 2. Fundamentals of the Hyperbaric Oxygenation Treatment (HBOT)

- ♦ Study the fundamentals of Hyperbaric Oxygenation Treatment (HBOT) and the mechanisms to achieve hyperoxia
- ♦ Present the physical laws involved and Krogh's mathematical model that supports the effect of treatment at different pressures
- ♦ Describe the differences between the volumetric and solumetric effect of HBOT and its limitations in the treatment of different diseases
- ♦ Present the types of hypoxia described and the scenarios of hypoxia-related disorders in different pathologies

Module 3. Physiological Therapeutic Effects of HBOT

- ♦ Studying the effects of hyperoxia on a mitochondrial level and the physiological benefits it triggers
- ♦ Describe the importance of mitochondrial reactivation with HBOT and its potential effect on different related pathologies with mitochondrial dysfunction
- ♦ Present the physiological effects that are triggered with HBOT and the production of reactive oxygen species
- ♦ Relate these physiological effects with different indications of HBOT
- ♦ Learning the analysis of different clinical cases which can benefit from the therapeutic effects of HBOT

Module 4. Indications and Contraindications. Integrative Module

- ♦ Study HBOT indications validated by the different societies of Hyperbaric Medicine and emerging indications based on the physiological therapeutic effects of HBOT
- ♦ Describe the adverse events that are expected from HBOT with different treatment pressures
- ♦ Present the contraindications of HBOT
- ♦ Discuss different clinical cases based on the integration of validated applications and the potential future applications of HBOT

03

Course Management

The program includes in its teaching staff reference experts in Hyperbaric Medicine and physiotherapy, who bring to this program the experience of their years of work. Additionally, other recognized specialists participate in its design and preparation, which means that the program is developed in an interdisciplinary manner. All this, with the aim of providing the physiotherapy professional with a series of transversal competencies ideal to implement and put into practice hyperbaric treatments successfully in their patients.

“

Leading professionals in the field have come together to teach you the latest advances in Hyperbaric Medicine in the field of physiotherapy”

DESCOMPRESIÓN

Management

Dr. Cannellotto, Mariana

- Medical Director of the network of Hyperbaric Medicine centers BioBarica Argentina
- Vice President of AAMHEI
- Specialist in Clinical Medicine
- Specialist in Hyperbaric Medicine, School of Medicine

Dr. Jordá Vargas, Liliana

- Scientific Director of the Argentine-Spanish Association of Hyperbaric Medicine and Research (AAMHEI and AEMHEI)
- Scientific Director-BioBarica Clinical Research. International Network of BioBaric Hyperbaric Medicine Centers
- Degree in Biochemistry. National University of Córdoba, Argentina
- Microbiology Specialist
- Head of Microbiology, CRAI North, Cucaiba, Argentina

Professors

Dr. Verdini, Fabrizio

- ♦ Institutional Relations AAMHEI
- ♦ Clinical Doctor
- ♦ Diploma in Public Health Management
- ♦ Master's Degree in Healthcare Management

Dr. Ramallo, Rubén Leonardo

- ♦ Director of the AAMHEI Medical Clinic Commission
- ♦ Specialist in Internal Medicine. Residency in Internal Medicine, Córdoba Hospital
- ♦ Medical Surgeon Faculty of Medical Sciences. National University of Córdoba. Argentina
- ♦ Master's Degree in Psychoimmunoneuroendocrinology. Favaloro University

Dr. Emilia Fraga, Pilar María

- ♦ FINES Teacher
- ♦ AAMHEI Pedagogical Assistant

04

Structure and Content

The structure of the contents of this educational program has been designed by the best professionals in the field of Hyperbaric Medicine and Physiotherapy who, with extensive experience and recognized prestige in the profession, have poured all their knowledge to enable you to achieve excellence. This team of professionals endorses its knowledge through the volume of cases reviewed, studied and diagnosed, and with a wide mastery of new technologies applied to hyperbaric medicine. This will ensure that the knowledge you receive is based on experience and will equip you with the necessary skills to successfully practice the profession.

“

This Postgraduate Diploma in Hyperbaric Medicine. Fundamentals, Effects and Indications of HBOT contains the most complete and up-to-date scientific program on the market”

Module 1. Introduction to Hyperbaric Medicine

- 1.1. History of Hyperbaric Medicine
- 1.2. First Hyperbaric Chambers
- 1.3. Discovery of Oxygen
- 1.4. Scientific Period of Hyperbaric Medicine
- 1.5. Types of Hyperbaric Chambers Revitalair Technology Chambers
- 1.6. Technical and Therapeutic Safety of the New Generation Hyperbaric Chambers
- 1.7. Hyperbaric Medicine Societies in the World and the Evolution of the Indications
- 1.8. Introduction to the Basis of Hyperbaric Oxygenation
- 1.9. Introduction to the Adverse Effects and Contraindications
- 1.10. Current Concept of Hyperbaric Oxygenation Treatment Medium Pressure, Micro pressure and Hyperbaria

Module 2. Fundamentals of the Hyperbaric Oxygenation Treatment (HBOT)

- 2.1. Physiological Bases of HBOT
- 2.2. Dalton, Henry, Boyle and Mariotte Physical Laws
- 2.3. Physical and Mathematical Bases of the Diffusion of Oxygen within Tissue in the Different Treatment Pressures. Krogh Model
- 2.4. Physiology of Oxygen
- 2.5. Physiology of Respiration
- 2.6. Volumetric and Solumetric Effect
- 2.7. Hypoxia Types of Hypoxia
- 2.8. Hyperoxia and Treatment Pressure
- 2.9. Hyperoxia Effective in Wound Healing
- 2.10. Bases of the Intermittent Hyperoxia Model

Module 3. Physiological Therapeutic Effects of HBOT

- 3.1. Introduction to the Physiological Therapeutic Effects
- 3.2. Vasoconstriction
 - 3.2.1. Robin Hood Effect
 - 3.2.2. Effect of HBOT on Blood Pressure and Heart Rate
- 3.3. Stem Cells and Oxygen
 - 3.3.1. Liberation of Stem Cells with HBOT
 - 3.3.2. Importance of Stem Cells on Wound Healing
 - 3.3.3. Oxygen in the Differentiation of Stem Cells
- 3.4. Oxygen in the Synthesis of Collagen
 - 3.4.1. Synthesis and Types of Collagen
 - 3.4.2. Oxygen in the Synthesis and Maturing of Collagen
 - 3.4.3. HBOT and Collagen in Healing
- 3.5. Angiogenesis and Vasculogenesis
 - 3.5.1. Degenerative Angiogenesis and Hyperbaric Oxygen
- 3.6. Osteogenesis
 - 3.6.1. HBOT and Osteogenesis and Bone Resorption
- 3.7. Mitochondrial Function, Inflammation and Oxidative Stress
 - 3.7.1. Mitochondrial Dysfunction in the Pathogenesis of Different Pathologies
 - 3.7.2. HBOT and Mitochondrial Function
- 3.8. Oxidative Stress and Hyperbaric Oxygen
 - 3.8.1. Oxidative Stress in Different Pathologies
 - 3.8.2. Oxidative Stress in Hyperbaric Oxygen
- 3.9. Anti-inflammatory Effect in Hyperbaric Oxygen
 - 3.9.1. Hyperbaric Oxygen and Inflammation
- 3.10. Antimicrobial Effect in Hyperbaric Oxygen
 - 3.10.1. Bacterial Effect of Oxygen
 - 3.10.2. Hyperbaric Oxygen and *Biofilm*
 - 3.10.3. Hyperbaric Oxygen and the Immune Response
- 3.11. Oxygen and Neurone Function
 - 3.11.1. Oxygen and Peripheral Axonal Regeneration
 - 3.11.2. Oxygen and Neuroplasticity

Module 4. Indications and Contraindications: Integrative Module

- 4.1. Absolute and Relative Contraindications of HBOT
- 4.2. Adverse Effects of Hyperoxia
- 4.3. Neuronal and Pulmonary Oxygen Toxicity
- 4.4. Neurotoxicity/Neuroexcitability
- 4.5. Objective and Subjective Barotrauma
- 4.6. Special Care for Patients who Receive HBOT at Different Pressures
- 4.7. Indications by Consensus of the European Committee of Hyperbaric Medicine
- 4.8. Emerging Medical Applications Off Label and Medicare Indications
- 4.9. Management in Hyperbaric Medicine Centers HBOT in Public and Private Health
- 4.10. Cost- Benefit Relationship of the Application of HBOT HBOT Cost Utility

A complete compendium of knowledge that will allow you to act as an expert in the field”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Physiotherapists/kinesiologists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions of professional physiotherapy practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Physiotherapists/kinesiologists who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the physiotherapist/kinesiologist to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

The physiotherapist/kinesiologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we trained more than 65,000 physiotherapists/kinesiologists with unprecedented success in all clinical specialties, regardless of the workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Physiotherapy Techniques and Procedures on Video

TECH brings students closer to the latest techniques, the latest educational advances and to the forefront of current Physiotherapy techniques and procedures. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Diploma in Hyperbaric Medicine: Fundamentals, Effects and Indications of HBOT guarantees students, in addition to the most rigorous and up-to-date education, access to a certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Diploma in Hyperbaric Medicine. Fundamentals, Effects and Indications of HBOT** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diploma** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the University Expert, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Diploma in Hyperbaric Medicine. Fundamentals, Effects and Indications of HBOT**

Official Nº of Hours: **450 h.**

Endorsed by the NBA

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
