# Introduction

Bullying is a serious problem that can have negative consequences for the mental and emotional health of students. That is why it is essential for psychologists to know the reasons behind this type of problem, as well as how to intervene at different educational levels. In order to provide professionals with the necessary tools to face this problem, this program was created. It is a 100% online university program that provides students with intensive learning in just 6 weeks on the analysis and intervention against bullying. All this with a comprehensive curriculum and teaching resources accessible 24 hours a day.

“

*Acquire resources that you can use for proper  
Conflict Management in School Bullying"*

Bullying manifests itself in various forms, including physical and verbal violence such as hitting, name-calling, teasing and intimidation, among others. Unfortunately, these extreme situations are becoming more and more frequent. In addition, the use of new technologies has contributed to the expansion of the problem. In view of this situation, the role of the psychologist is fundamental in the early detection of the problem, as well as in its management and prevention, with the aim of avoiding its persistence and minimizing its negative effects.

For this reason, TECH, together with a team of experts, has created this program that contains the most relevant and current information on the theory of conflict applied to this type of situation, the planning of interventions and the promotion of active listening, as well as the importance of follow-up and support. Thus, in just 6 weeks, students will be able to access various pedagogical resources that will facilitate their understanding so that they can immediately integrate the knowledge into their practice.

It is also taught under the most effective methodology, the *Relearning* method. Consisting in the reiteration of the contents throughout the academic itinerary, it allows the graduates to reduce the hours of memorization and achieve a much more effective learning in a short period of time.

This academic option offers an excellent opportunity to obtain a complete update and its correct application, which will allow students to grow professionally and personally in the field of psychology, especially applied to work with children and adolescents. In addition, this mode of study provides greater freedom for self-management, allowing access to the syllabus at any time of the day without the need to attend classes with fixed schedules.

This **Postgraduate Certificate in Conflict Management in School Bullying** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of case studies presented by experts in Psychology, Personality Psychology and Psychopathology

# Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

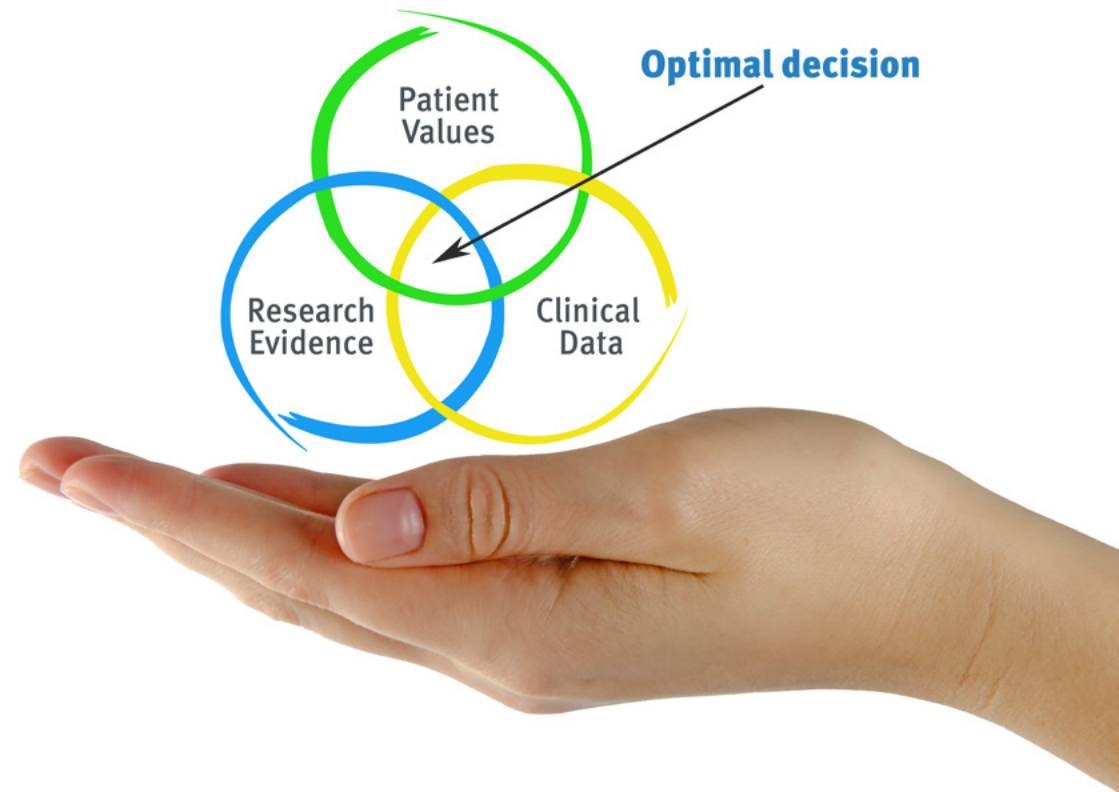

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

*With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.*

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

**The effectiveness of the method is justified by four fundamental achievements:**

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

*The psychologist will learn through real cases and by solving complex situations in simulated learning environments.*

*These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

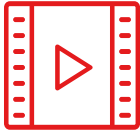

*Relearning will allow you to learn with less effort  
and better performance, involving you more  
in your training, developing a critical mindset,  
defending arguments, and contrasting opinions: a  
direct equation for success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.
