Introduction

Nowadays, stress and family problems are a reality in many people's lives, generating negative consequences on their physical and emotional well-being. Family therapy and stress management are fundamental to help these people regain their balance and quality of life. Technological and scientific advances in this area now allow for a more complete and effective approach to therapy. TECH's Family and Stress Therapy program offers comprehensive education that covers both theoretical and practical aspects, enabling professionals to acquire necessary skills to provide quality care to their patients.

“

This Hybrid Professional Master's Degree in Family Therapy and Stress will enable you to improve your skills in stress management and family dynamics, making you a valuable resource for mental and emotional health of families"

Family therapy and stress management are fundamental to help people regain their balance and quality of life. Technological and scientific advances in this area now allow for a more complete and effective approach to therapy.

In Family Therapy and Stress field, new techniques and methods have been developed that allow for a more precise and personalized approach to patients' problems. From artificial intelligence application in the anxiety and stress assessment, to the use of solution-focused brief therapy, effective tools have been developed to improve people's quality of life. These advances have led to creation of specific training programs, such as TECH's Hybrid Professional Master's Degree in Family Therapy and Stress.

This program is intended to provide comprehensive education in Family Therapy and Stress, covering both theoretical and practical aspects. The program has expert teachers and a 3-week practical program in reference hospital centers, which makes this a unique opportunity to grow professionally and make a difference in people's lives. During this internship, students will be able to see real patients and apply knowledge acquired in a state-of-the-art clinical setting.

In addition, TECH's Hybrid Professional Master's Degree in Family Therapy and Stress offers an innovative methodology that combines theoretical part online with face-to-face practical experience, which allows for greater flexibility and adaptability to participants' schedules. This way, students can acquire necessary knowledge and skills to provide quality care to their patients, without compromising their personal and professional lives.

This **Hybrid Professional Master's Degree in Family Therapy and Stress** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Development of more than 100 clinical cases presented by Psychology professionals, experts in Family Therapy and Stress and university professors with extensive experience
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Managing dynamics of therapeutic time to optimize session time and use it efficiently to achieve therapeutic objectives
- ♦ A personalized and effective approach for each particular case, considering specific characteristics of each family
- ♦ Presentation of practical workshops on diagnostic and therapeutic techniques in stressed patient
- ♦ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout course
- ♦ Clinical practice guidelines on approach to different pathologies caused by stress
- ♦ With a special emphasis on evidence-based medicine and research methodologies in Family Therapy and stress management
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ In addition, you will be able to perform a clinical internship in one of the best hospitals in the country

“

Take an intensive 3-week internship in a prestigious center and acquire all the knowledge to grow personally and professionally”

In this Professional Master's Degree proposal of a professionalizing nature and blended learning modality, program is intended to update Psychology professionals who develop their functions in specialized centers, and who require a high level of qualification. Contents are based on latest scientific evidence, and oriented in a didactic way to integrate theoretical knowledge in psychological intervention, and theoretical-practical elements will facilitate knowledge updating and will allow decision making in patient management.

Thanks to their multimedia content developed with latest educational technology, they will allow the psychology professional to obtain situated and contextual learning, that is, a simulated environment that will provide immersive learning programmed to prepare for real situations. This program's design is focused on Problem-Based Learning, by means of which students must try to solve different professional practice situations that will arise throughout the program. For this purpose, it will be assisted by an innovative interactive video system created by renowned experts.

This Hybrid Professional Master's Degree in Family Therapy and Stress provides you with the opportunity to expand your knowledge and enhance your clinical practice.

The 100% online theoretical part of the Hybrid Professional Master's Degree in Family Therapy and Stress will allow you to study from anywhere and at any time.

02

Why Study this Hybrid Professional Master's Degree?

Family Therapy and Stress is a discipline in constant evolution and growth, and demand for specialized professionals in this area is increasing. Therefore, it is necessary to update and acquire the most updated and effective knowledge and skills in Family Therapy and Stress field. Practical experience in a recognized clinical center and with guidance of expert tutors for 3 weeks will allow the student to put into practice everything learned in TECH's Hybrid Professional Master's Degree in Family and Stress Therapy and gain valuable clinical experience for their professional career.

“

This specific program in the study of Family Therapy and Stress gives you the opportunity to get qualified in psychological evaluation of family system in an advanced way"

1. Updating from the latest technology available

Family Therapy and Stress field has also experienced technological advances in recent years, such as the application of Artificial Intelligence in the assessment of stress and anxiety. The 3-week Internship Program in a hospital center will allow you to immediately apply knowledge acquired in Hybrid Professional Master's Degree in Family Therapy and Stress"

07

Clinical Internship

Once the online theory portion of Hybrid Professional Master's Degree in Family Therapy and Stress has been completed, students will have opportunity to complete hands-on experience at a recognized clinical center. During this stage, they will be supported by a tutor who will guide them through the whole process, from preparation to execution of clinical internship. This tutor will be available to students to resolve any doubts or problems that may arise, and to ensure that they are acquiring necessary skills and competencies to practice in Family Therapy and Stress field as effectively as possible.

“

Boost your career with this program that includes a 100% online theoretical curriculum and a TECH Family Therapy and Stress Internship Program"

This Internship Program in Family Therapy and Stress includes a stay in a clinical center of international reference, where the student will have opportunity to work with an adjunct specialist for 3 weeks. This practical stay will allow participants to work with real patients and to apply the most innovative diagnostic procedures and plan latest generation of therapy for each pathology.

The Internship Program is designed to develop and perfect necessary competencies for provision of psychological care in areas and conditions that require a high level of qualification and is oriented to specific training for practice of activity in a safe environment for patients and high professional performance.

The space where program will take place is a leader in innovation, as it is focused on the latest scientific evidence and constant evaluation of its processes to provide quality care to its patients, making it the ideal teaching scenario for this innovative experience in improvement of professional 21st century medical competencies. It is undoubtedly a unique opportunity for students to learn by working.

The practical part will be performed with student's active participation performing

activities and procedures of each area of competence (learning to learn and learning to do), with accompaniment and guidance of professors and other fellow students that facilitate teamwork and multidisciplinary integration as transversal competences for the praxis of Psychology (learning to be and learning to relate to others).

The procedures described below will form basis of practical part of the program, and their implementation is subject both to patient suitability and to center's availability and workload, with proposed activities being the following:

Gain an in-depth understanding of advances in Family Therapy and Stress with a three-week program at a recognized clinical center"

Module	Practical Activity
Psychodiagnosis and psychological evaluation of family system	Observe family members' behavior during a dinner or meeting.
	Conduct individual interviews with each family member
	Elaborate a genogram to identify family patterns
	Conduct Psychological Tests with each family member
Stress Management in Families	Teach relaxation techniques to family members
	Encourage effective communication among family members.
	Help the family identify and manage sources of stress.
	Building resilience in the family
Types of expertise and contexts surrounding psychological expertise	Conduct a psychological evaluation in the context of a custody trial.
	Making a psychological assessment in the context of a gender-based violence trial
	Conduct a mental capacity assessment in the context of a guardianship trial.
	Making a psychological assessment in the context of a juvenile criminal responsibility trial
Application of different techniques in the patient with stress	To show importance of applying diaphragmatic breathing techniques.
	Encourage practice of mindfulness meditation techniques.
	Encourage regular physical activity
	Teach cognitive restructuring techniques
Modes of Intervention in family problems	Observe and record family behavior during the sessions.
	Help design specific intervention plans for the family
	Participate in therapy sessions and support the lead therapist.
	Perform specific tasks for the family, such as helping to design an effective communication plan.

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

For this purpose, this educational entity is committed to acquire a liability insurance that covers any eventuality that may arise during the stay.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. This way, the professional will not have to worry in case they have to deal with an unexpected situation and will be covered until the end of the practical program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTORING: During the Hybrid Professional Master's Degree, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Hybrid Professional Master's Degree, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION:Professionals who pass the Hybrid Professional Master's Degree will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: the Hybrid Professional Master's Degree shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Hybrid Professional Master's Degree. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. NOT INCLUDED: The Hybrid Professional Master's Degree will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

08

Where Can I Do the Clinical Internship?

The Hybrid Professional Master's Degree includes a practical qualification in a recognized clinical center, where the student will apply knowledge acquired in the approach of family groups with conflict situations. In order to guarantee accessibility to this Certificate, TECH offers the possibility of internships in different organizations in different parts of the country. This way, the institution reinforces its commitment to quality education within the reach of all those interested in specializing in this field.

“

Complete your theoretical education with the best practical stay in the market. Only in this way will you achieve success in your daily practice"

The student will be able to take the practical part of this Hybrid Professional Master's Degree in the following centers:

Psychology

Hospital HM Modelo

Country	City
Spain	La Coruña

Address: Rúa Virrey Osorio, 30, 15011, A Coruña

Network of private clinics, hospitals and specialized centers distributed throughout Spain.

Related internship programs:

- Anaesthesiology and Resuscitation
- Palliative Care

Psychology

Hospital HM Rosaleda

Country	City
Spain	La Coruña

Country City
Spain Toledo

Address: Av. de Irlanda, 21, 45005, Toledo

Network of private clinics, hospitals and specialized centers distributed throughout Spain.

Related internship programs:

- Electrotherapy in Rehabilitation Medicine
- Hair Transplantation

“

It deepens in the most relevant theory in this field, subsequently applying it in a real work environment”

09

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

10

Certificate

The Hybrid Professional Master's Degree in Family Therapy and Stress guarantees, in addition to the most rigorous and updated education, access to a Hybrid Professional Master's Degree issued by TECH Technological University.

“

*Successfully complete this program
and receive your university certificate
without having to travel or fill out
laborious paperwork”*

This **Hybrid Professional Master's Degree in Family Therapy and Stress** contains the most complete and updated program on the professional and academic scene.

Once the student has passed the tests, they will receive by mail, with acknowledgement of receipt, corresponding Hybrid Professional Master's Degree Certificate issued by TECH.

In addition to the Postgraduate Certificate, you will be able to obtain a certificate, as well as a certificate of program content. For this purpose, you should contact your academic advisor, who will provide you with all the necessary information.
