Introduction

Throughout human history, the study of being, the soul, and the body has been a discipline centered on metaphysical inquiry and the nature of human reality. Who are we? This knowledge inevitably intertwines with the anthropologies of other sciences and with various branches of psychology itself. This training program will place you in an active mode of reflection, seeking the meaning of existence in a course that is essential for the most up-to-date psychologists.

“

Argumentation and human rights constitute the core focus of this high-level Postgraduate Certificate, enabling you to enhance your teaching excellence”

This program addresses psychology from a global perspective while remaining fully accessible, always maintaining a special emphasis on the needs of educators. Students can expect to complete the program with a comprehensive understanding of the most fundamental philosophical topics, ranging from the purely theoretical and metaphysical to the most practical and active dimensions of human existence.

In today's job market, professionals from other fields who complement their training with advanced studies in thought and argumentation are highly valued and sought after. The philosopher's ability to view matters from a different angle—to think, as the English-speaking world would say, outside the box—is an essential asset in the professional sphere.

On a personal level, psychology helps us see things, as the great Spinoza expressed it, *sub specie aeternitatis*—that is, through a lens of eternity—recognizing that within the vast context of the world and the universe, our actions are at once significant and insignificant.

The role of psychology as a discipline that offers consolation in the face of the hardships and misfortunes of this world has always been fundamental; moreover, it allows us to better understand our nature, our actions, our morality, and our being. Ultimately, psychology helps us grow as individuals, mature as persons, act more responsibly as citizens, and improve our performance in the workplace.

Through this training you will have the opportunity to access the most important developments in thought related to psychology applied to education. Throughout a curriculum that is both comprehensive and highly specialized, you will acquire the knowledge and practices necessary for teaching this discipline or applying it within other areas of your life.

An opportunity designed to provide significant added value to your professional profile.

This **Postgraduate Certificate in Argumentation and Human Rights for Psychologists** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The latest technology in online teaching software
- ♦ A highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- ♦ Practical cases presented by practising experts
- ♦ State-of-the-art interactive video systems
- ♦ Teaching supported by telepractice
- ♦ Continuous updating and recycling systems
- ♦ Autonomous learning: full compatibility with other occupations
- ♦ Practical exercises for self-assessment and learning verification
- ♦ Support groups and educational synergies: questions to the expert, debate and knowledge forums
- ♦ Communication with the teacher and individual reflection work
- ♦ Content that is available from any fixed or portable device with an Internet connection
- ♦ Complementary documentation repositories permanently available, even after completion of the Postgraduate Certificate

The essential didactic approaches for teaching psychology, gathered in a complete and highly effective Postgraduate Certificate

“*A Postgraduate Certificate of high educational and technological quality in which you will find the support of highly developed and interactive online resources*”

Our teaching staff is composed of psychology professionals who are active specialists in the field. In this way we ensure that we deliver the educational update we are aiming for. A multidisciplinary team of qualified and experienced professionals will develop the theoretical knowledge efficiently and, above all, will contribute to the Postgraduate Certificate the practical expertise derived from their own professional experience—one of the distinctive qualities of this educational program.

The effectiveness of our methodological design enhances mastery of the subject matter. Developed by a multidisciplinary team of e-learning experts, it integrates the latest advances in educational technology. In this way, you will be able to study with a range of , comfortable and versatile multimedia tools that will give you the operability you need in your education.

The design of this program is based on Problem-Based Learning: an approach that conceives learning as a highly practical process. To achieve this remotely, with the help of an innovative interactive video system, and through the telepractice and learning from an expert systems, you will be able to acquire the knowledge as if you were facing the case you are learning at that moment. This concept will enable you to integrate and consolidate learning in a more realistic and lasting way.

A curriculum designed to provide you, in a short period of time, with the skills necessary to apply the knowledge from this Postgraduate Certificate to your teaching practice immediately.

Train with the world's largest online university and enjoy a high-level educational experience.

02 Objectives

TECH Global University aims to train highly qualified professionals for the workplace. An objective that is complemented, moreover, in a global manner, by promoting human development that lays the foundations for a better society. This objective is focused on helping medical professionals reach a much higher level of expertise and control. A goal you will be able to consider achieved through a Postgraduate Certificate of high intensity and precision.

“

In this Postgraduate Certificate, you will learn the importance of teaching psychology, enabling you to respond confidently and effectively to all questions and inquiries regarding its relevance”

General Objectives

- ♦ Acquire advanced competencies for initiating and deepening research in the various branches of psychology, according to the student's chosen area of specialization
- ♦ Develop a high reflective and critical capacity in philosophical questions and topics, both from a historical and systematic point of view, in order to provide students with a clear understanding of the topics within current schools of thought, which will also be useful for research
- ♦ Master the methodological bases and knowledge that allow for the integration of multiple bodies of philosophical knowledge in a personal work project
- ♦ Have a fluent command of interdisciplinarity, as a basic element of philosophical reflection in its essential openness to other fields of culture and knowledge, and in the development of a reflective understanding of the conceptual foundations of these other fields

Specific Objectives

- ♦ Study the theoretical foundations of logic
- ♦ Learn the contexts of argumentation
- ♦ Recognize descriptive and evaluative concepts
- ♦ Analyze the foundation of human rights
- ♦ Develop an understanding of our relationship with nature and the artificial
- ♦ Conduct a study of political concepts and debate
- ♦ Study the relationship between art and politics
- ♦ Learn protocols and developments for teaching human rights
- ♦ Analyze the state of human rights and torture
- ♦ Analyze the state of human rights and war

This Postgraduate Certificate has been designed to enable you to achieve its competencies in a simple and effective manner, with maximum flexibility so that you are the one who decides when, how, and how much you study

03

Structure and Content

The contents of this program have been developed by the different professors of this course, with a clear purpose: to ensure that our students acquire each and every one of the skills they require to become true experts in this field.

The content of this course enables University you to learn all aspects in the different disciplines involved in this field: A complete and well-structured program that will take you to the highest standards of quality and success.

“

A comprehensive educational program, structured in well-developed teaching units, oriented towards efficient and swift learning that is compatible with your personal and professional life”

Module 1. Argumentation and Human Rights

- 1.1. What Is Logic?
 - 1.1.1. Epistemology
 - 1.1.2. Conceptual Development
- 1.2. Contexts of Argumentation
 - 1.2.1. Concept and Usefulness
 - 1.2.2. Contexts of Argumentation
 - 1.2.3. Differential Characteristics
- 1.3. Descriptive Concepts and Value Concepts
 - 1.3.1. Definition
 - 1.3.2. The Descriptive Concept
 - 1.3.3. The Evaluative Concept
- 1.4. Justification and Human Rights
 - 1.4.1. Definition of Justification From a Philosophical Perspective
 - 1.4.2. Human Rights: Strength and Relevance
- 1.5. Our Relationship With Nature and the Artificial
 - 1.5.1. Nature From a Philosophical Perspective
 - 1.5.2. The Artificial in Contrast to the Natural
- 1.6. Political Concepts and Debate
 - 1.6.1. The Political Concept and Its Social and Human Relevance
 - 1.6.2. The Development of Political Debate
- 1.7. Art and Politics
 - 1.7.1. The Relationship Between Art and Politics: Basic Developments
 - 1.7.2. Art as Ideological Expression
- 1.8. Teaching Human Rights
 - 1.8.1. Human Rights in Contemporary Social Development
 - 1.8.2. Human Rights Didactics
- 1.9. Human Rights and Torture
 - 1.9.1. Contextualization
 - 1.9.2. Sociological Consequences
- 1.10. Human Rights and War
 - 1.10.1. Contextualization
 - 1.10.2. Sociological Consequences

“

Learn, throughout ten lessons, the key notions in Argumentation and Human Rights for Psychologists, essential for the psychological development of any educational approach”

04

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule"

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

05 Certificate

The Postgraduate Certificate in Argumentation and Human Rights for Psychologists guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a diploma for the **Postgraduate Certificate in Argumentation and Human Rights for Psychologists** endorsed by TECH Global University, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
