“

A program developed through the Relearning methodology, thanks to which, you will not have to invest extra hours in memorizing without losing out on wide and specialized knowledge acquisition"

Module 1. Basic Skills and Psychological First Aid

- 1.1. Self-Management, The Management of One's Own Emotions
 - 1.1.1. What is Self-Management?
 - 1.1.2. The Self-Management of Emotions
 - 1.1.3. Managing Emotions
- 1.2. Being proactive
 - 1.2.1. Concept of Proactivity
 - 1.2.2. Hypothesis of Proactivity
 - 1.2.3. Adaptation
- 1.3. Concept of Listening
 - 1.3.1. Introduction to the Concept of Listening
 - 1.3.2. Types of Listening
 - 1.3.3. Active Listening in Psychological Therapy
- 1.4. Applied Communication Skills
 - 1.4.1. Introduction to Communicative Skills
 - 1.4.2. Main Communication Skills
 - 1.4.3. Components
- 1.5. Communication Techniques
 - 1.5.1. Technique for Communication in Emergency Situations
 - 1.5.2. Communication Strategies
 - 1.5.3. Assertive Communication
- 1.6. Communication to Children in Emergency Situations
 - 1.6.1. First Contact
 - 1.6.2. Direct Attention
 - 1.6.3. The Intervention
 - 1.6.4. Subsequent Recall
- 1.7. Communication with other Groups
 - 1.7.1. Special Groups
 - 1.7.2. Communication with the Elderly
 - 1.7.3. Communication with Disabled People
 - 1.7.4. Communication with Foreign People
- 1.8. Importance and Objectives of First Aid
 - 1.8.1. Introduction to the Concept of First Aid
 - 1.8.2. Main Objectives of First Aid
 - 1.8.3. Why is First Aid Important?
- 1.9. Introduction to Basic Concepts
 - 1.9.1. Commonly used Terms in Emergency Situations
 - 1.9.2. Common Emergency Situations
- 1.10. Most Common Pathologies in Psychosocial Emergency Situations
 - 1.10.1. Pathologies in Emergency Situations
 - 1.10.2. Pathological Development after the Crisis

Be a proactive psychologist and demonstrate your commitment to the mental health of your patients by enrolling in a program that will elevate your therapeutic skills to the highest professional level"

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high-quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically assess and re-assess students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical and effective way to help students progress in their learning.

05

Certificate

The Postgraduate Certificate in Basic Skills and Psychological First Aid guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.
