01

Introduction

The need to insert hypnosis into Psychotherapy, regardless of the theoretical model being used, was the core thesis of many studies that sought to improve patients who were not capable of doing so through cognitive restructuring.

“

This Postgraduate Certificate is unique since it has the will to answer all these questions as well as systematize intervention programs in a hypnotic state, without the need to disassociate from the knowledge and tools of models such as psychoanalysis, cognitive behavioral, strategic or interpersonal”

In the same way, it was highlighted that many authors, both contemporary and from past times, unknowingly used hypnotic technology, or if they knew it, they gave it another name. Among other things, one can imagine, because they feared being rejected by the scientific community. Without a doubt, those more astute students would naturally ask themselves: What for?, How such insertion is made? What special characteristics must the therapist have to perform such insertion? What benefits are obtained?

"The insertion of clinical hypnosis in Psychotherapy is for psychologists an enrichment of the resources already existing in Psychotherapy, since it unblocks alleys with no apparent exit (resistance to treatment, alexithymia, language, etc.) and uses the natural language of emotions and structures that intervene in most human disorders that require specialized treatment."

Expand your knowledge through the Postgraduate Certificate in Clinical Hypnosis in psychotherapy, in a practical way and adapted to your needs"

This **Postgraduate Certificate in Clinical Hypnosis In Psychotherapy** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ Clinical cases presented by experts in psychology. The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ The latest diagnostic and therapeutic techniques in the Clinical Hypnosis in Psychotherapy
- ♦ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- ♦ With special emphasis on evidence-based psychology and research methodologies in psychology
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

“

This program is the best investment you can make when selecting a refresher program, for two reasons: in addition to updating your knowledge in Clinical Hypnosis in Psychotherapy you will obtain a Postgraduate Certificate from TECH Technological University”

Forming part of the teaching staff is a group of professionals in the world of psychology, who bring their work experience to this course, as well as a group of renowned specialists, recognised by esteemed scientific communities.

Thanks to its multimedia content developed with the latest educational technology, they will allow the professional a situated and contextual learning, that is to say, a simulated environment that will provide an immersive learning programmed to prepare in real situations.

This program is designed around Problem-Based Learning, whereby the physicians must try to solve the different professional practice situations that arise during the course. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of psychology with extensive teaching experience.

The Postgraduate Certificate includes real clinical cases and exercises to bring the development of the Postgraduate Certificate closer to the psychologist's clinical practice.

Make the most of the opportunity to update your knowledge in Clinical Hypnosis in Psychotherapy through classical methods to improve your patient care.

02

Objectives

The principal objective of the program is the development of both theoretical and practical learning, so that the professional can master, in a practical and rigorous way, the study of the Clinical Hypnosis in Psychotherapy.

“

This updating program will provide you with a sense of confidence in the practice of psychology, which will help you grow both personally and professionally”

General Objectives

- Describe and develop the Insertion of Clinical Hypnosis in Psychotherapy
- Understand and master the neurological and biochemical laws of clinical hypnosis
- Train and describe the arsenal of technology that allows the patient to change his or her traumatic memories into memories of remembrance
- Make the psychologist a professional who can be in front of the patient knowing how to make the patient move from suffering to satisfaction
- Master the bonding relationship that is established between the patient and the therapist (reciprocal interaction)

Make the most of this opportunity and take the step to get up to date on the latest developments in Clinical Hypnosis in Psychotherapy”

Specific Objectives

- ◆ Know that the reality for the patients is what they record in their brain, and not so much what could have happened
- ◆ Contain with safety and craft
- ◆ Empower the student not to have protocols for disorders, but to make a different intervention protocol for each patient
- ◆ Know how to disconnect the patient from his thoughts and place him in his bodily sensations
- ◆ Getting the patient to be able to imagine his or her desires
- ◆ Appreciate the importance of love and emotion in the solution
- ◆ Not to be so much in solving as in building
- ◆ Take into account not only what produced the problem, but also what maintains it
- ◆ Organize the patient's own mechanisms to manage their conflict
- ◆ Propose from the first moment, to be present, to accompany and to intervene in the traumatic emotional memory, in return the patient is the one who executes the whole process

03

Course Management

This program includes highly regarded health professionals in the field of psychology in its teaching staff, who bring the experience of their work to this training.

In addition, renowned specialists, members of prestigious national and international scientific communities, are involved in designing and preparing the program.

“

*Learn the latest advances in Clinical Hypnosis
in Psychotherapy from leading professionals”*

Management

Dr. Aguado Romo, Roberto

- ◆ Psychologist specialized in clinical psychology at CEP centers in Madrid, Bilbao and Talavera
- ◆ Specialist in Forensic and Legal Psychology
- ◆ Psychologist of the Courts 1 and 2 of Toledo
- ◆ Coordinator in Toledo of emergency intervention and psychological assistance plan
- ◆ Master's Degree in Time-Limited Psychotherapy and Health Psychology
- ◆ Expert in Adult Psychotherapy
- ◆ Director of the Postgraduate Diploma in Psychodiagnosis and Legal Expertise from the European Institute of Time-Limited Psychotherapies
- ◆ Coordinator of the gender violence plan at the national level of the Society for Time Limited Psychotherapies

Professors

Dr. De Dios González, Antonio

- ♦ POSITION: Director the Psychology Department of the Hospital Quirón de Marbella, Spain
- ♦ Director the Psychology Department of the Hospital Quirón de Marbella, Spain
- ♦ Director of Avatar Psychologists
- ♦ Master in Time-Limited Psychotherapy and Health Psychology by the European Institute of Time-Limited Psychotherapies
- ♦ Transpersonal Therapist by the Spanish School of Transpersonal Development
- ♦ Master's degree in Neuro-Linguistic Programming (N.L.P.) by Richard Bandler's Society of Neuro-Linguistic Programming
- ♦ Specialist in Clinical Hypnosis and Relaxation

Dr. Martínez-Lorca, Manuela

- ♦ Doctorate in Psychology from the University of Castilla-La Mancha
- ♦ Specialist in Clinical Hypnosis and Relaxation
- ♦ Doctorate in Psychology from the University of Castilla-La Mancha
- ♦ Lecturer in the Department of Psychology at the UCLM
- ♦ Master's degree in Time-Limited Psychotherapy and Health Psychology by the European Institute of Time-Limited Psychotherapy

Dr. Otero, Veronica

- ♦ POSITION: European specialist psychologist in Psychotherapy at the CEP health center in Bilbao
- ♦ Expert in Intervention with Time-Limited Psychotherapy in Childhood and Adolescent Disorders by the European Institute of Time-Limited Psychotherapies and the Official College of Psychologists of Bizkaia
- ♦ Expert in Clinical Hypnosis and Relaxation by the European Institute of Limited Time Psychotherapies and the Official College of Psychologists of Bizkaia
- ♦ Expert in Intervention with Time-Limited Psychotherapy in Anxiety, Affective and Chronic Pain Disorders by the European Institute of Time-Limited Psychotherapies and the Official College of Psychologists of Bizkaia
- ♦ Expert in Reciprocal Interaction Therapy by the European Institute of Limited Time Psychotherapies and the Official College of Psychologists of Bizkaia
- ♦ Expert in Intervention with Limited-Time Psychotherapy in Psychosomatic Disorders by the European Institute of Limited Time Psychotherapies and the Official College of Psychologists of Bizkaia
- ♦ Degree in Psychology from the University of Deusto

Ms. Zabala Baños, María Carmen

- ♦ POSITION: Specialist in Health Psychology
- ♦ European specialist psychologist in Psychotherapy by the EFPA in the CEP center of Talavera de la Reina
- ♦ Psychosocial and Work Rehabilitation Specialist
- ♦ Clinical Hypnosis and Relaxation Expert
- ♦ Master in Time-Limited Psychotherapy and Health Psychology by the European Institute of Time-Limited Psychotherapies
- ♦ Master's Degree in Clinical and Health Psychology
- ♦ Professor of Psychology and Health Psychology at the University of Castilla-La Mancha

Dr. Fernández Sánchez, Angel

- ♦ POSITION: Director of the Evaluation and Psychotherapy Center of Madrid, Spain
- ♦ European specialist psychologist in Psychotherapy from the EFPA. Health Psychologist
- ♦ Specialist in Clinical Hypnosis and Relaxation
- ♦ Master's Degree in Clinical and Health Psychology
- ♦ Tutor in charge of the Psychodiagnosis and Psychological Intervention area of the CEP
- ♦ Head of studies on the Professional Master's Degree in Time-Limited Psychotherapy and Health Psychology

04

Structure and Content

The structure of the contents has been designed by a team of professionals who know about the implications of specialization in daily practice in the field of psychology. They are aware of the current relevance of training to be able to act correctly in cases of patients with mental pathologies and psychological needs and are committed to quality teaching through new educational technologies.

“

This Postgraduate Certificate in Clinical Hypnosis in Psychotherapy contains the most complete and up-to-date program on the market”

Module 1. Role of Clinical Hypnosis in Time-Limited Psychotherapy

- 1.1. Clinical Hypnosis as an Exploratory Tool
- 1.2. Neurological Resemblance of Clinical Hypnosis and Trauma
- 1.3. Axes of Clinical Hypnosis in TLP
- 1.4. What Does it Feel Like to be in a Hypnotic State?
- 1.5. Different Methods of Hypnotic Induction at the Present Time
- 1.6. Psychoeducational Phase
- 1.7. Hypnotic Induction Phase with Classical Techniques
- 1.8. Complete Process with Ericksonian or Post Ericksonian inductions
- 1.9. Complete process with induced head movements (MCI © R. Aguado 2004-07)

“

A unique, key, and decisive experience to boost your professional development”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

The Postgraduate Certificate in Clinical Hypnosis in Psychotherapy guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Clinical Hypnosis in Psychotherapy** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Clinical Hypnosis in Psychotherapy**

Official N° of Hours: 200 h.

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
