## tech 06 | Introduction

The work in neuropsychology is complex. It covers a broad spectrum of intervention that requires the professional to have very specific training in the various branches of brain development. This discipline, deeply linked to neurology and the physiological study of the brain, is affected by the changes that the evolution of knowledge in this scientific branch achieves. For professionals, this means an intense challenge of continuous updating that allows them to be at the forefront in terms of approach, intervention and monitoring of the cases that may arise in their practice.

Throughout this program, the student will review all the current approaches to the work practiced by neuropsychologists with regard to the different challenges posed by their profession.

The functioning of memory, language, the relationship between laterality and cognitive development, sensoriality and many other aspects, will be the topics of work and study that the student will be able to integrate in their training. A high-level step that will become a process of improvement, not only on a professional level, but also on a personal level.

This challenge is one of TECH's social commitments: to help highly qualified professionals to specialize and develop their personal, social and work skills during the course of their training.

We will not only take you through the theoretical knowledge we offer, but we will introduce you to another way of studying and learning, one which is simpler, more organic and more efficient. We will work to keep you motivated and to create in you a passion for learning. And we will push you to think and develop critical thinking.

This **Postgraduate Certificate in Dyslexia, Dyscalculia and Hyperactivity** contains the most complete and up-to-date program. The most important features include:

- The latest technology in online teaching software
- A highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- Practical cases presented by practicing experts
- State-of-the-art interactive video systems
- Teaching supported by telepractice
- Continuous updating and recycling systems
- Autonomous learning: full compatibility with other occupations
- Practical exercises for self-evaluation and learning verification
- Support groups and educational synergies: questions to the expert, debate and knowledge forums
- Communication with the teacher and individual reflection work
- Availability of the contents from any fixed or portable device with internet connection
- Complementary documentation banks permanently available, even after the course

A program created for professionals who aspire for excellence, and that will enable you to acquire new skills and strategies easily and effectively"

Learn about and integrate into your work the new programs for working with dyslexia in education"

Our teaching staff is made up of working professionals. In this way we ensure that we provide you with the up-to-date training we are aiming for. A multidisciplinary team of physicians with training and experience in different environments, who will develop theoretical knowledge effectively, but, above all, will bring their practical knowledge derived from their own experience to the program: one of the differential qualities of this Postgraduate Certificate.

This mastery of the subject is complemented by the effectiveness of the methodological design of this Postgraduate Certificate. Developed by a multidisciplinary team of e-learning experts, it integrates the latest advances in educational technology. In this way, you will be able to study with a range of comfortable and versatile multimedia tools that will give you the operability you need in your training.

The design of this program is based on Problem-Based Learning: an approach that conceives learning as a highly practical process. To achieve this remotely, we will use telepractice learning: with the help of an innovative interactive video system, and learning from an expert, you will be able to acquire the knowledge as if you were actually dealing with the scenario you are learning about. A concept that will allow you to integrate and fix learning in a more realistic and permanent way.

An effective and proactive way to offer students new ways to improve and progress.

Learning the specific needs and ways of working with cases of dyscalculia in schoolchildren.

## tech 10 | Objectives

#### **General Objectives**

- Qualify professionals for the practice of neuropsychology in education in the development of children and young people
- Learn how to carry out specific programs to improve school performance
- Access the forms and processes of research in neuropsychology in the school environment
- Increase the capacity for work and autonomous resolution of learning processes
- Study the attention to diversity from the neuropsychological approach.
- Learn about the different ways to implement enrichment systems for learning methodologies in the classroom, especially aimed at diverse students
- Analyze and integrate the knowledge necessary to foster student's school and social development

## **Specific Objectives**

- Incorporate the necessary knowledge to detect and intervene in the classroom in cases of dyscalculia, dyslexia and ADHD
- Understand the incidence of comorbidity in this context
- Learn about the possibilities of neurotechnology applied to dyslexia, ADHD and dyscalculia

Take the opportunity to learn about the latest advances in this field in order to apply it to your daily practice"

## tech 14 | Course Management

#### Management

#### Ms. Sánchez Padrón, Nuria Ester

- Degree in Psychology from the University of La Laguna
- Master's Degree in General Health Psychology from the University of La Rioja
- Training in Emergency Psychological Care
- Training in Psychological Care in Penitentiary Institutions
- Teaching and training experience
- Experience in educational attention to children at risk

## tech 18 | Structure and Content

#### Module 1. Dyslexia, Dyscalculia and Hyperactivity

- 1.1. Conceptualization of Dyslexia
  - 1.1.1. Introduction
  - 1.1.2. Definition
  - 1.1.3. Neuropsychological Bases
  - 1.1.4. Characteristics
  - 1.1.5. Subtypes
  - 1.1.6. Summary
  - 1.1.7. Bibliographic References
- 1.2. Neuropsychological Assessment of Dyslexia
  - 1.2.1. Introduction
  - 1.2.2. Diagnostic Criteria for Dyslexia
  - 1.2.3. How to Evaluate?
  - 1.2.4. Interview with the Tutor
  - 1.2.5. Reading and Writing
  - 1.2.6. Neuropsychological Assessment
  - 1.2.7. Assessment of Other Related Aspects
  - 1.2.8. Summary
  - 1.2.9. Bibliographic References
- 1.3. Neuropsychological Intervention of Dyslexia
  - 1.3.1. Introduction
  - 1.3.2. Variables Involved
  - 1.3.2. Neuropsychological Field
  - 1.3.3. Intervention Programs
  - 1.3.4. Summary
  - 1.3.5. Bibliographic References
- 1.4. Conceptualization of Dyscalculia
  - 1.4.1. Introduction
  - 1.4.2. Definition of Dyscalculia
  - 1.4.3. Characteristics
  - 1.4.4. Neuropsychological Bases
  - 1.4.5. Summary
  - 1.4.6. Bibliographic References

#### Structure and Content | 19 tech

- 1.5. Neuropsychological Assessment of Dyscalculia
  - 1.5.1. Introduction
  - 1.5.2. Objectives of Assessment
  - 1.5.3. How to Evaluate?
  - 1.5.4. Report
  - 1.5.5. Diagnosis
  - 1.5.6. Summary
  - 1.5.7. Bibliographic References
- 1.6. Neuropsychological Interventions of Dyscalculia
  - 1.6.1. Introduction
  - 1.6.2. Variables Involved in the Treatment
  - 1.6.3. Neuropsychological Rehabilitation
  - 1.6.4. Intervention in Dyscalculia
  - 1.6.5. Summary
  - 1.6.6. Bibliographic References
- 1.7. Conceptualization of ADHD
  - 1.7.1. Introduction
  - 1.7.2. ADHD Definition
  - 1.7.3. Neuropsychological Bases
  - 1.7.4. Characteristics of Children with ADHD
  - 1.7.5. Subtypes
  - 1.7.6. Summary
  - 1.7.7. Bibliographic References
- 1.8. Neuropsychological Assessment of ADHD
  - 1.8.1. Introduction
  - 1.8.2. Objectives of Assessment
  - 1.8.3. How to Evaluate?
  - 1.8.4. Report
  - 1.8.5. Diagnosis
  - 1.8.6. Summary
  - 1.8.7. Bibliographic References

- .9. Neuropsychological Interventions of ADHD
  - 1.9.1. Introduction
  - 1.9.2. Neuropsychological Field
  - 1.9.3. Treatment of ADHD
  - 1.9.4. Other Therapies
  - 1.9.5. Intervention Programs
  - 1.9.6. Summary
  - 1.9.7. Bibliographic References
- 1.10. Comorbidity in Neurodevelopmental Disorders
  - 1.10.1. Introduction
  - 1.10.2. Neurodevelopmental Disorders
  - 1.10.3. Dyslexia and Dyscalculia
  - 1.10.4. Dyslexia and ADHD
  - 1.10.5. Dyscalculia and ADHD
  - 1.10.6. Summary
  - 1.10.7. Bibliographic References
- 1.11. Neurotechnology
  - 1.11.1. Introduction
  - 1.11.2. Applied to Dyslexia
  - 1.11.3. Applied to Dyscalculia
  - 1.11.4. Applied to ADHD
  - 1.11.5. Summary
  - 1.11.6. Bibliographic References
- 1.12. Guidance for Parents and Teachers
  - 1.12.1. Introduction
  - 1.12.2. Guidance on Dyslexia
  - 1.12.3. Guidance on Dyscalculia
  - 1.12.4. Guidance on ADHD
  - 1.12.5. Summary
  - 1.12.6. Bibliographic References

## tech 22 | Methodology

#### At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

#### The effectiveness of the method is justified by four fundamental achievements:

- 1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
- 2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## tech 24 | Methodology

#### **Relearning Methodology**

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

#### Methodology | 25 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

## tech 26 | Methodology

This program offers the best educational material, prepared with professionals in mind:

#### **Study Material**

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### **Latest Techniques and Procedures on Video**

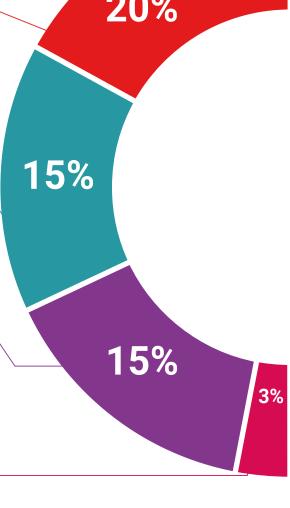

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

#### **Interactive Summaries**

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### **Additional Reading**

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

## Testing & Retesting reledge throughout the

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

## Classes

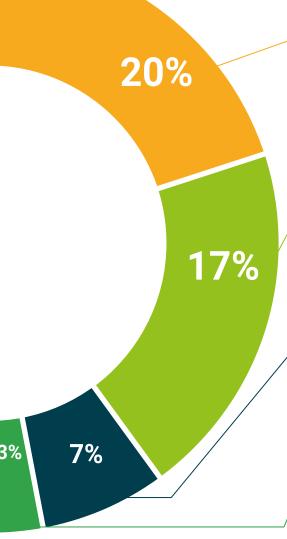

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### **Quick Action Guides**

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

## tech 32 | Certificate

This program will allow you to obtain your **Postgraduate Certificate in Dyslexia, Dyscalculia** and **Hyperactivity** endorsed by **TECH Global University**, the world's largest online university.

**TECH Global University** is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Certificate in Dyslexia, Dyscalculia and Hyperactivity

Modality: online

Duration: 6 weeks

Accreditation: 6 ECTS

Mr./Ms. \_\_\_\_\_, with identification document \_\_\_\_\_ has successfully passed and obtained the title of:

#### Postgraduate Certificate in Dyslexia, Dyscalculia and Hyperactivity

This is a program of 180 hours of duration equivalent to 6 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024

<sup>\*</sup>Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.

Certificate: TECH Global University

Schedule: at your own pace

Credits: 6 ECTS

Exams: online
