01 Introduction

Education for Development aims to prepare citizens in sustainable and effective development for the whole community. It may not be a widespread concept, but it is one of the priority actions in the field of International Cooperation. In this context, developing intervention strategies in this area is essential for psychologists who wish to specialize in this field.

If you wish to acquire the latest knowledge in this field, you should not think twice and join this community of learners.

Psychologists working in development cooperation should update their knowledge to discover the main Intervention Strategies in Developmental Education"

tech 06 | Introduction

To speak of Education for Development is to speak of the future of societies. A future centered on sustainable growth, in which all the actors involved have to contribute with their knowledge for a common objective: Preserve natural resources for the sustainability of future generations.

To promote this objective, TECH has designed this comprehensive program on Intervention Strategies in Developmental Education, thanks to which students will learn where, how and when this concept arises, the challenges it has to face and the strategic lines of action, among other aspects.

In this way, students in this program will learn about specific organizations that work for environmental law, such as UNEP, or the existence of various humanitarian movements whose mission is to enforce the objectives set at international summits.

It should be taken into account that all the work carried out within the framework of Education for Development is guided by specific guidelines to be followed, as set out in the Master Plan of the Intervention Strategies in Developmental Education, which must be applied to the projects carried out in different regions of the world.

One of the main advantages of this Postgraduate Certificate is that, as it is a 100% online program, the Psychologists will be able to combine the study of this comprehensive program with the rest of his daily obligations, choosing at all times where and when to study. A high-level program that will take these professionals to the highest level in their field.

International Guest Director

Piotr Sasin is an international expert with experience in non-profit management, specializing in humanitarian assistance, resilience and international cooperation for the development of peoples. Indeed, he has worked in complex and challenging environments, helping communities affected by conflict, displacement and humanitarian crises. In addition, his focus on social innovations and participatory planning has allowed him to implement long-term solutions in vulnerable areas, significantly improving living conditions.

He has also held key roles as Director of Refugee Crisis Response at CARE, where he has led humanitarian initiatives to support displaced people in various regions. He has also worked as Country Director at People in Need, where he was responsible for coordinating community development and rapid emergency response programs. In turn, his role as Country Representative at the Terre des Hommes Foundation has allowed him to manage projects focused on child protection.

Consequently, at the international level, he has been recognized for his ability to manage large-scale projects in the field of international development cooperation, collaborating with governments, NGOs and multilateral agencies in various regions. Likewise, his leadership has been instrumental in promoting resilience in communities affected by disasters, fostering local empowerment through urban planning and sustainable development. In this way, he has been praised for his focus on conflict mitigation and his ability to build strategic partnerships.

Ultimately, Piotr Sasin has a strong academic background, with a Master's degree in Urban Planning and Regional Development, as well as a Bachelor's degree in Ethnology and Anthropological Culture, both degrees from the University of Warsaw in Poland. Thereby, his research has focused on international cooperation and sustainable planning in humanitarian crisis contexts.

05 **Methodology**

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

tech 26 | Methodology

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- 1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
- 2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

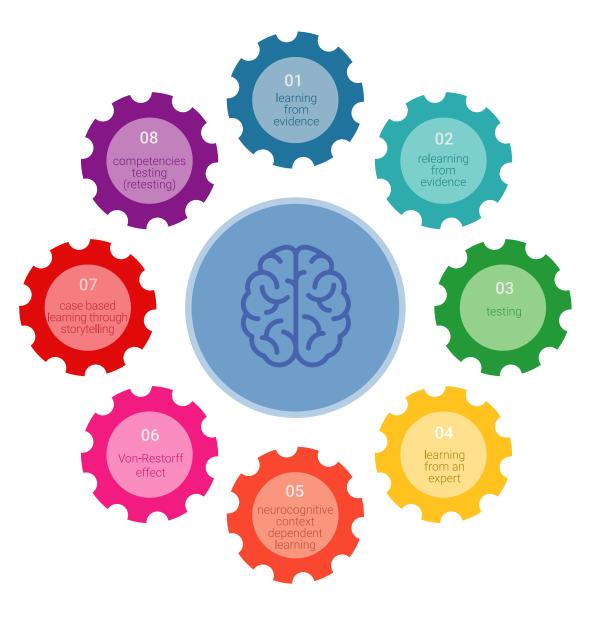

tech 28 | Methodology

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 29 tech

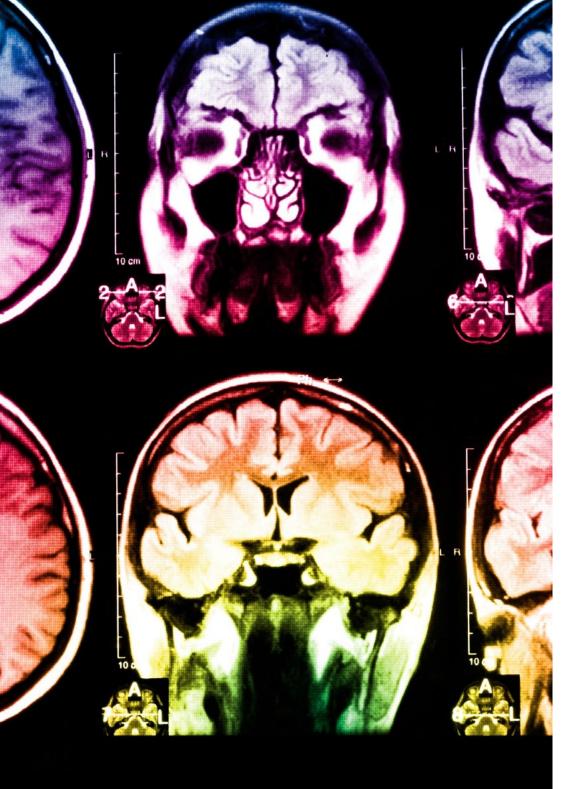

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.
