tech 06 | Introduction

Psychology is the science that studies human behavior, tries to give explanations to the behaviors we perform, and infers which behavior is more likely to occur under certain circumstances, The specialty of Forensic Psychology studies all this applied to the field of justice.

The objective of the Postgraduate Certificate in Judicial Expertise and Forensic Psychological Assessment is to cover a field of research that is booming thanks to the professionals who want to continue their training in this area. This Postgraduate Certificate is intended to provide knowledge about the multiple topics that are developed within the Forensic Psychology, as well as the explanation and implementation of various questionnaires used in professional practice that help to know the current pathologies in the individual, to be able to make the assessment of them when appropriate.

In this training, topics related to the world of Forensic Psychology and its relationship with the courts will be studied. Specifically, it has several theoretical blocks where topics related to the Realization of judicial expertise in the psychological field will be developed.

In addition, this 100% online training will allow students to continue with their training while they carry out other obligations in their daily lives, as they can organize themselves and choose when and where to study, since they only need a device with an internet connection. The professionals should join this community of learners and will notice how their career progresses.

This Postgraduate Certificate in Judicial Expertise and Forensic Psychological Assessment contains the most complete and up-to-date program on the market. The most important features include:

- The development of case studies presented by experts in psychology and scientific research
- Its graphic, schematic and eminently practical contents provide scientific and practical information on those disciplines that are essential for the practice of research
- New developments and innovations in research in the different fields of Psychology
- Practical exercises where self-assessment can be used to improve learning
- Algorithm-based interactive learning system for decision-making in the situations that are presented to the student
- Special emphasis on research methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Update your knowledge through the Postgraduate Certificate in Judicial Expertise and Forensic Psychological Assessment"

This Postgraduate Certificate is the best investment you can make in the selection of a refresher program for two reasons: in addition to updating your knowledge in Judicial Expert Witness and Forensic Psychological Assessment, you will obtain a degree from TECH Global University"

The program includes in its teaching staff professionals belonging to the field of legal and forensic psychology, who bring to this training the experience of their work, in addition to recognized specialists from leading scientific societies.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive program designed to learn in real situations.

The design of this program is based on Problem-Based Learning, by means of which the psychologist must try to solve the different professional practice situations that arise. For this purpose, the professional will be assisted by an innovative interactive video system developed by renowned experts in the field of Judicial Expertise and Forensic Psychological Assessment with extensive experience.

Increase your decision-making confidence by updating your knowledge through this Postgraduate Certificate.

The professional should take the opportunity to learn about the latest advances in Judicial Expertise and Forensic Psychological Assessment and develop in this exciting field.

tech 10 | Objectives

General Objectives

- To broaden the knowledge of Psychology applied to the legal field
- To facilitate the acquisition of knowledge about Forensic Psychology, as well as to assess the different cases presented
- To promote the acquisition of skills and abilities in the forensic field
- To encourage the study of this training through a theoretical-practical basis

Specific Objectives

- To review the history of Forensic Psychology and its applications in the clinical and experimental setting
- To determine the limits of the intervention and admission of expert reports
- To understand the problem of causality and risk and protective factors in psychological harm
- To identify the emotional sequelae in cases of child sexual abuse and gender violence

Take the step to get up to date on the latest developments in Judicial Expertise and Forensic Psychological Assessment"

tech 14 | Structure and content

Module 1. Judicial Expertise - Psychological Assessment

- 1.1. Forensic Psychological Expertise1.1.1. Identifying Injuries
- 1.2. Identification of Sequelae
- 1.3. Forensic Psychological Reports
- 1.4. Quantification of Lesions
- 1.5. Quantification of Sequelae

A unique, key, and decisive experience to boost your professional development"

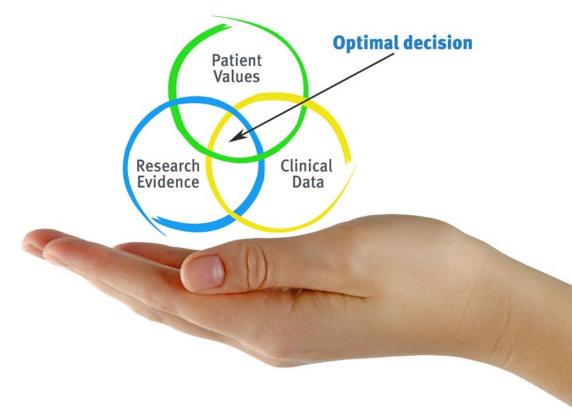

tech 18 | Methodology

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- 1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
- 2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

tech 20 | Methodology

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 21 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

tech 22 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

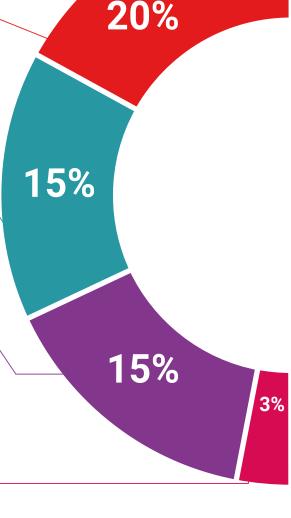

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

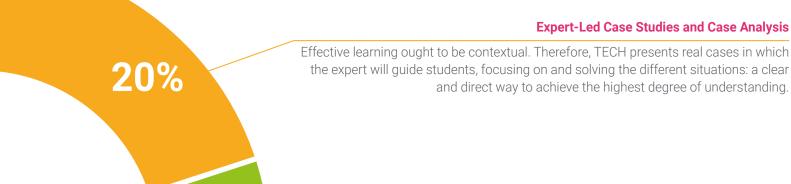

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

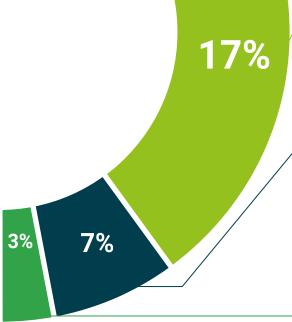

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 26 | Certificate

This program will allow you to obtain your **Postgraduate Certificate in Judicial Expertise** and **Forensic Psychological Assessment** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003.
