01

Introduction to the Program

The growing diversity of needs in the educational field demands innovative methodologies that effectively address learning difficulties. Recent UNESCO research indicates that 35% of children with specific needs do not receive adequate attention in the classroom, directly impacting their academic performance and emotional well-being. In response to this, emerging alternatives are being developed that promote holistic development and optimize the acquisition of knowledge. For this reason, TECH Global University has developed this university program that will provide the most innovative and inclusive strategies. All of this will be delivered through a 100% online methodology and a completely updated curriculum.

“

With this Postgraduate Certificate, you will master the Management of Emerging Difficulties and Emerging Educational Alternatives. Enroll now and take your professional career to the next level!”

Child Psychology plays a fundamental role in the comprehensive care of minors, as it helps to understand their differences in terms of abilities, interests, learning styles, and sociocultural contexts. Today, professionals must respond to an environment where diversity is the norm, not the exception, and requires inclusive models based on a biopsychosocial approach.

Given this reality, psychologists and allied professionals in the educational and socio-health fields need to update their skills to identify specific needs, design intervention plans, and provide effective support both individually and at the socio-family and educational levels.

To meet this purpose, TECH Global University has developed the Postgraduate Certificate in Management of Emerging Difficulties. Emerging Educational Alternatives, which will integrate innovative tools and methodologies focused on inclusive care. Through a comprehensive and updated syllabus, this program will provide complete training that combines theoretical aspects with practical application in various professional environments.

Moreover, this 100% online university program will allow psychologists to access updated and flexible content, compatible with their professional responsibilities. In this way, graduates will not only optimize their intervention skills in educational and social contexts but also strengthen their competencies to promote equitable, democratic, and discrimination-free environments, in line with the current challenges of global society.

This **Postgraduate Certificate in Management of Emerging Difficulties: Emerging Educational Alternatives** contains the most complete and up-to-date university program on the market. Its most notable features are:

- ♦ The development of practical cases presented by experts in Education and Psychology
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an internet connection

With the training received here, you will implement innovative methodologies to address the most common learning difficulties"

“

You will enhance your professional profile by mastering the management of emerging difficulties in learning”

The faculty includes professionals from the fields of Education and Psychology, who share their practical experience in this program, along with renowned specialists from reference societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive learning experience designed to prepare for real-life situations.

This program is designed around Problem-Based Learning, whereby the student must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

You will become an expert in innovative educational alternatives with a real impact in the classroom.

You will learn how to integrate technologies and active methodologies into the diversity care process.

02

Why Study at TECH?

TECH is the world's largest online university. With an impressive catalog of more than 14,000 university programs, available in 11 languages, it is positioned as a leader in employability, with a 99% job placement rate. In addition, it has a huge faculty of more than 6,000 professors of the highest international prestige.

“

Study at the largest online university in the world and ensure your professional success. The future begins at TECH”

The world's best online university, according to FORBES

The prestigious Forbes magazine, specialized in business and finance, has highlighted TECH as "the best online university in the world" This is what they have recently stated in an article in their digital edition in which they echo the success story of this institution, "thanks to the academic offer it provides, the selection of its teaching staff, and an innovative learning method oriented to form the professionals of the future".

The best top international faculty

TECH's faculty is made up of more than 6,000 professors of the highest international prestige. Professors, researchers and top executives of multinational companies, including Isaiah Covington, performance coach of the Boston Celtics; Magda Romanska, principal investigator at Harvard MetaLAB; Ignacio Wistumba, chairman of the department of translational molecular pathology at MD Anderson Cancer Center; and D.W. Pine, creative director of TIME magazine, among others.

The world's largest online university

TECH is the world's largest online university. We are the largest educational institution, with the best and widest digital educational catalog, one hundred percent online and covering most areas of knowledge. We offer the largest selection of our own degrees and accredited online undergraduate and postgraduate degrees. In total, more than 14,000 university programs, in ten different languages, making us the largest educational institution in the world.

The most complete syllabuses on the university scene

TECH offers the most complete syllabuses on the university scene, with programs that cover fundamental concepts and, at the same time, the main scientific advances in their specific scientific areas. In addition, these programs are continuously updated to guarantee students the academic vanguard and the most demanded professional skills. and the most in-demand professional competencies. In this way, the university's qualifications provide its graduates with a significant advantage to propel their careers to success.

A unique learning method

TECH is the first university to use Relearning in all its programs. This is the best online learning methodology, accredited with international teaching quality certifications, provided by prestigious educational agencies. In addition, this innovative academic model is complemented by the "Case Method", thereby configuring a unique online teaching strategy. Innovative teaching resources are also implemented, including detailed videos, infographics and interactive summaries.

The official online university of the NBA

TECH is the official online university of the NBA. Thanks to our agreement with the biggest league in basketball, we offer our students exclusive university programs, as well as a wide variety of educational resources focused on the business of the league and other areas of the sports industry. Each program is made up of a uniquely designed syllabus and features exceptional guest hosts: professionals with a distinguished sports background who will offer their expertise on the most relevant topics.

Leaders in employability

TECH has become the leading university in employability. Ninety-nine percent of its students obtain jobs in the academic field they have studied within one year of completing any of the university's programs. A similar number achieve immediate career enhancement. All this thanks to a study methodology that bases its effectiveness on the acquisition of practical skills, which are absolutely necessary for professional development.

Google Premier Partner

The American technology giant has awarded TECH the Google Premier Partner badge. This award, which is only available to 3% of the world's companies, highlights the efficient, flexible and tailored experience that this university provides to students. The recognition not only accredits the maximum rigor, performance and investment in TECH's digital infrastructures, but also places this university as one of the world's leading technology companies.

The top-rated university by its students

Students have positioned TECH as the world's top-rated university on the main review websites, with a highest rating of 4.9 out of 5, obtained from more than 1,000 reviews. These results consolidate TECH as the benchmark university institution at an international level, reflecting the excellence and positive impact of its educational model.

03

Syllabus

The syllabus of this Postgraduate Certificate will address innovative educational alternatives for managing learning difficulties, integrating technological tools applied to the classroom, animal-assisted therapies, mindfulness, and chess as pedagogical resources. It will also emphasize the use of medication in educational settings and the effectiveness of various alternative therapies. With this approach, graduates will acquire the skills to implement inclusive and sustainable strategies that promote equity and improve academic performance in diverse school environments.

“

*You will discover emerging therapies
such as mindfulness, chess, and
animal-assisted therapies”*

Module 1. Emerging Educational Alternatives for the Management of Learning Difficulties

- 1.1. Introduction
- 1.2. Information and Communication Technology Applied to Learning Difficulties and Attention to Diversity
- 1.3. Animal-Assisted Therapies, Learning Disabilities, and Attention to Diversity
- 1.4. Mindfulness, Learning Disabilities, and Attention to Diversity
- 1.5. Chess, Learning Disabilities, and Attention to Diversity
- 1.6. Medication, Learning Disabilities, and Attention to Diversity
- 1.7. The Effectiveness of Alternative Therapies

“

*You will develop key
competencies to create
inclusive and sustainable
educational environments”*

04

Teaching Objectives

This Postgraduate Certificate will provide psychologists with the necessary tools to comprehensively address emerging difficulties in learning. In fact, the syllabus will delve into understanding the theoretical, methodological, and contextual foundations that support diversity and inclusion. Additionally, it will enhance the capacity for diagnosis, evaluation, and educational intervention, incorporating innovative pedagogical strategies and the use of active methodologies. All of this aims to ensure that graduates are capable of designing inclusive, equitable, and sustainable educational proposals, adapted to the current challenges of the school environment.

“

You will have access to a 100% online university program that adapts to your pace and professional or personal needs”

General Objectives

- ♦ Understand the theoretical, methodological, and contextual foundations that support diversity and intervention in learning difficulties
- ♦ Analyze the various types of learning difficulties from a critical, integrative, and multidisciplinary perspective
- ♦ Develop skills for diagnosis, evaluation, and educational intervention adapted to the specific needs of students
- ♦ Apply innovative pedagogical strategies that promote inclusion and equity in the school environment
- ♦ Integrate knowledge about the development of language, reading, writing, and mathematical thinking as key components of learning
- ♦ Design inclusive and sustainable educational proposals, based on evidence and adapted to contemporary challenges

Specific Objectives

- ♦ Explore innovative pedagogical approaches focused on inclusion and equity
- ♦ Integrate technologies and active methodologies as facilitating tools for diverse learning

“

With TECH's Relearning system you will not have to invest a great amount of study hours, focusing on the most relevant concepts”

05

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule"

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

06

Teaching Staff

The faculty selected by TECH Global University for this university program has a distinguished track record in the study and management of emerging difficulties and innovative educational alternatives. In fact, this multidisciplinary team brings together professionals with experience in psychology, education, and diversity care, who have participated in intervention projects and the development of inclusive methodologies in various contexts. Additionally, they have collaborated on research into emerging strategies that optimize learning processes and improve the educational response to new social challenges. Thanks to their experience, graduates will receive updated training aligned with the best practices in the sector.

“

TECH will offer you an excellent team of professionals, highly qualified in the educational and psychological fields”

Management

07

Certificate

The Postgraduate Certificate in Management of Emerging Difficulties. Emerging Educational Alternatives guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this program and
receive your university qualification without
having to travel or fill out laborious paperwork"*

This private qualification will allow you to obtain a **Postgraduate Certificate in Management of Emerging Difficulties. Emerging Educational Alternatives** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
