Introduction

Around 450 million people worldwide suffer from a mental or behavioral disorder at some point in their lives. These figures show the importance of having highly qualified professionals who are constantly renewing their knowledge. This 100% online program delves into the psychotic entity today, the new studies and lines in this area of mental health. A teaching modality that allows the psychologists to access without fixed schedules to all the multimedia content available to take this university program at any time they wish.

“

Delve into the new challenges of mental health professionals in the approach to psychotic disorders”

This Postgraduate Certificate is aimed primarily at mental health professionals who wish to keep abreast of the latest developments and scientific studies in the field of psychotic disorders. An update that allows the psychologist or psychiatrist to approach from a multidisciplinary model therapeutic treatments in patients suffering from these mental illnesses.

The students, during the six weeks of this university program, will acquire updated knowledge in this area of mental health from a teacher with extensive experience in high-level academia and in medical practice in the field of psychology in centers and hospitals of reference.

This teaching offers the professionals a recent look at psychotic disorders, delving into the different connotations that psychotic disorders have in different cultures and genders, the involvement of the psychiatrist and psychologist in the application of the latest existing treatments, as well as the current legal regulations and how they influence certain aspects related to this type of pathology.

The 100% online modality allows students to delve into recent developments in disorders such as schizophrenia, delirium or hallucinations in a simple and practical way. All you need is a device with an Internet connection to access all the content provided by this university education at any time of the day and from anywhere. In this way, students can combine their work responsibilities with the scientific advances that have been made in recent years in these entities.

This **Postgraduate Certificate in Psychotic Disorders Today** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of practical cases presented by experts in Psychology and Psychotic Disorders
- ♦ Graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Deepen with this Postgraduate Certificate in scientific advances in substance use and the correlation of psychotic disorders"

“ *A program that gives you a new look at psychotic disorders and the gender perspective*”

The program's teaching staff includes professionals from sector who contribute their work experience to this program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professionals with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professionals must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the students will be assisted by an innovative interactive video system created by renowned experts.

Access the new lines of research on schizophrenia, delusions and hallucinations with this Postgraduate Certificate.

Address the new conceptualization of Psychiatric with a professional with extensive experience in mental health.

02

Objectives

During the course of this Postgraduate Certificate, the mental health professionals will delve into the latest debates on psychotic disorders and recent scientific advances that address pharmacological and psychotherapeutic treatment in certain patients. The family environment, the socio-cultural environment, gender and its influence on mental illnesses will be some of the key points where students will delve into and acquire knowledge of new approaches. The simulation of practical cases will facilitate the updating of this knowledge, so that it can be applicable in their daily work with their patients.

“

The practical approach of this course will give you access to useful content that can be directly applied in your practice”

General Objectives

- ♦ Delve into the current classification of Psychotic Disorders in the different manuals: DSM-5 and ICD-11
- ♦ Consolidate the fundamental clinical aspects of Psychotic Disorders
- ♦ Gain knowledge about the evolution of Psychotic Disorders over time
- ♦ Identify the different types of Psychotic Disorders, their clinical characteristics and diagnosis
- ♦ Delve into the different diagnostic techniques and their new developments in Psychotic Disorders
- ♦ Perform a correct diagnostic approach to Psychotic Disorders
- ♦ Master the different pharmacological and psychotherapeutic approaches to Psychotic Disorders
- ♦ Detail and know the bio-psycho-social influence of Psychotic Disorders in children and adolescent, adult and elderly stages
- ♦ Learn about new approaches to intervention in the rehabilitation of schizophrenia and psychotic disorders
- ♦ Delve into new lines of scientific research in psychotic disorders

Specific Objectives

- Enable the student to discuss new issues and debates on Psychotic Disorders
- Update the cultural and gender aspects and their influence on the approach to psychotic disorders
- Deepen in the legal aspects concerning psychotic entities

“

Delves into the health policies and legal aspects concerning psychotic entities”

03

Course Management

TECH maintains a philosophy based on quality teaching and accessible to all. For this reason, TECH has selected a professional with extensive experience in Psychiatry for this Postgraduate Certificate. She also has extensive experience as a teacher in specific higher programs in the field of psychiatric medicine and high level. The students have the support of a professional who is close to the reality of health personnel who must attend and apply the latest techniques in the treatment of people with psychotic disorders.

“

TECH provides you with a quality education thanks to the specialized teaching team with extensive experience in each area"

Management

Dr. Soto Laguna, Marta

- ♦ Psychiatrist Expert in Anxiety Disorders
- ♦ Psychiatrist at Enova Medical Center
- ♦ Author and co-author of book chapters related to Psychiatry
- ♦ Co-author of articles for scientific journals
- ♦ Speaker at congresses and conferences in her specialty
- ♦ Master's Degree in Legal Psychiatry from the Complutense University of Madrid

04

Structure and Content

The syllabus of this Postgraduate Certificate has been prepared by a highly qualified professional in the field of psychiatric medicine. In the 150 hours of teaching load of this 100% online program, students will delve into the change in approaches to the psychotic entity and the social paradigm, the evolution of women in mental health, new studies and the change in the conceptualization of "Psychiatric" from the point of view of recent authoritative voices and ideological proposals. The Relearning system, based on the reiteration of content, will be fundamental for students who wish to renew their knowledge and consolidate their knowledge.

“

Multimedia content, specialized readings and the Relearning system will make it easier for you to renew your knowledge"

Module 1. Psychotic Disorders Today

- 1.1. The Psychotic Entity and its Shift of Focus in the Social Paradigm
- 1.2. Gender Perspective in Psychotic Disorders
 - 1.2.1. The Evolution of Women in Mental Health
- 1.3. Current Approach to Psychotic Disorders in Mental Healthcare
 - 1.3.1. New Studies
- 1.4. The Cultural Influence on the View of the Psychotic Spectrum
- 1.5. Internment of Psychotic Disorders
 - 1.5.1. New Conceptualization of "Psychiatric"
 - 1.5.2. New Voices and Ideological Proposals
- 1.6. The Law and Psychotic Disorders
 - 1.6.1. Mechanical Restraint and its Peculiarities in Mental Health
- 1.7. New Social Policies in Mental Health and their Impact on the Psychotic Spectrum
- 1.8. Multidisciplinary Model in the Therapeutic Approach to Psychotic Disorders
- 1.9. New Perspectives and Diagnostic Approaches in the Psychotic Spectrum
- 1.10. Future Challenges
 - 1.10.1. Current Lines of Research in Psychotic Disorders

“

A 100% online program that shows you new perspectives and diagnosis in the psychotic spectrum"

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

The Postgraduate Certificate in Psychotic Disorders Today guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Psychotic Disorders Today** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Psychotic Disorders Today**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.v
