Introduction

If a child is not educated in sexual diversity, two things can happen. If they are homosexual, they will spend part of their life feeling different. If they are not, they will tend to discriminate against those who are, until the time comes when they decide what their position will be. This is just one example, but it serves to demonstrate the consequences of an education without a perspective of inclusiveness. For this reason, degrees such as the present one are necessary for teachers to acquire knowledge in this area. In addition to the tools to transmit it adequately to their students. All this, elaborated from the latest theories and research related to the inclusive school so that in this way learning is carried out based on high quality standards. Contents that, in turn, will be available in a 100% online mode and without timetables. Thus favoring the personal and work balance.

“

This program has been developed on the basis of the latest studies on inclusiveness, thus contemplating the greatest number of possible perspectives”

Generating an environment of integration and equality in the classroom is complicated, because at home, each student has received a very different education. That is why it is so important that the teacher's interventions are aligned to certain standards of inclusiveness.

In this sense, TECH has developed a qualification that will allow teachers to acquire knowledge oriented to inclusive schooling. First of all, by reviewing the historical evolution of teacher training. As well as a definition of the challenges faced today along with its legal framework.

Subsequently, it introduces the characteristics, basic principles and objectives of the inclusive school. It also provides the main theories and models. Oriented to teachers' learning and the emotional competences they must acquire.

These contents will be taught in a totally online modality, without timetables and with the syllabus available in its entirety from the first day. This way, personal work-life balance is favored and, therefore, learning is enhanced.

This **Postgraduate Certificate in Teacher Preparation for Inclusive School** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ The development of case studies presented by experts in teacher preparation for inclusive schooling
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

The syllabus includes some success stories so that you can understand the characteristics of a program with an adequate inclusive perspective"

“

In this course you will learn the most effective theories and models, so that you can transmit the equality perspective to your students in an adequate way”

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

TECH teachers will help you internalize the foundations on which the inclusive school is based, so that you do not lose sight of the objective it pursues.

Teacher training has specific criteria. Enroll and find out what they are so that you can effectively internalize the contents.

02 Objectives

Graduates of this Postgraduate Certificate will be prepared to transmit concepts related to inclusiveness to their students. Through the most recent research and the most effective techniques, teachers will be able to learn the basics of the inclusive school. They will also acquire the necessary tools to transmit them correctly. Always, with the objective of generating an optimal classroom climate.

“

In addition to the contents of the program itself, in TECH you will learn techniques to internalize certain elements of everyday life. Thus turning learning into a constant"

General Objectives

- Know the particularities of teacher-oriented learning
- Define the knowledge in inclusiveness that a teacher must have and the methods to achieve it

“

Thanks to TECH you will master emotional intelligence so that you can control the way your students perceive what you teach them”

Specific Objectives

- ♦ Describe a historical evolution of exclusivity in the classroom
- ♦ Interpret the main sources of inclusive scope
- ♦ Analyze the main components for teacher learning
- ♦ Instruct on different models of Inclusive Schooling
- ♦ Inform on legislation pertaining to inclusive education
- ♦ Use tools for learning in the field of exclusivity
- ♦ More effective interpretation of inclusive schooling

03

Course Management

TECH's faculty is composed of professionals trained in teaching other teachers. They have mastered the specific techniques and criteria required. In addition, their experience in the application of inclusive perspectives will enable graduates to extrapolate this knowledge directly to the classroom.

“

The TECH faculty will provide you with their experience in the application of equality perspectives on the part of the student. So you can get an idea of what you will encounter when it's your turn to teach them"

“*The relearning methodology employed at TECH will allow you to conduct learning processes without the need for excessive study hours*”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

*Relearning will allow you to learn with less effort
and better performance, involving you more
in your training, developing a critical mindset,
defending arguments, and contrasting opinions: a
direct equation for success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.
