Introduction

The expert opinion is a basic test that is provided in court, since it is the assessment of a professional on some fact that is brought to trial. This makes it essential for forensic psychologists to broaden their knowledge in this field. You should not miss this opportunity and study at the largest private Spanish-speaking university in the world

“

This program provides you with a sense of confidence in your medical practice, which will help you grow personally and professionally”

Psychology is the science that studies human behavior, tries to give explanations to the behaviors we perform and infers which behavior is more likely to occur under certain circumstances. The specialty of Forensic Psychology studies all this applied to the field of justice.

The objective of the Postgraduate Diploma in Judicial Expertise in Forensics Psychology is to cover a field of research that is booming thanks to the professionals who want to continue their training in this area. This program is intended to provide knowledge about multiple topics that are developed within forensic psychology as well as the explanation and implementation of various questionnaires used in professional practice that help to know the current pathologies in the individual, to be able to make the assessment of them when it is appropriate.

In this program, topics related to the world of forensic psychology and its relationship with the courts will be studied, as well as the assessment of psychological damage derived from accidents, complicated situations, or negligence, among others. Specifically, it has several theoretical blocks where topics such as the definition of forensic psychology and its journey in Spain will be developed, the most relevant aspects in this field, focused on forensic psychological expertise and report together with the emerging assessment of psychological damage as consequences of various procedures, as well as physical damage.

In addition, this 100% online program will allow the student to continue their training while carrying out other obligations in their daily life, since they will be able to organize themselves and choose when and where to study, since they only need a device with an Internet connection. Professionals must join this community of students and will notice how they advance in their career.

This **Postgraduate Diploma in Judicial Expertise in in Forensic Psychology** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ The development of practical cases presented by experts in Forensic Psychology

- ♦ Establish the qualities of the personal damage assessment report, as well as its scope, application, addressee and formal aspects

Take the step to catch up on the latest news in Judicial Expertise in Forensic Psychology"

03

Structure and Content

The content structure has been designed by a team of professionals from the best forensic centers and universities in the national territory, aware of the relevance of current training in order to intervene in situations that require a legal and forensic psychological approach, committed to quality teaching through new educational technologies.

“

We have the most complete and up-to-date educational program in the market. We strive for excellence and for you to achieve it too"

Module 1. Forensic Psychology

1.1. Introduction to Forensic Psychology

Module 2. Judicial Expertise - Psychological Assessment

2.1. Forensic Psychological Expertise

2.1.1. Identifying Injuries

2.2. Identification of Sequelae

2.3. Forensic Psychological Reports

2.4. Quantification of Lesions

2.5. Quantification of Sequelae

“

*A unique, key, and decisive
experience to boost your
professional development”*

Module 3. Judicial Expertise - Physical Damage Assessment

- 3.1. Medical Assessment of Damage to the Person
 - 3.1.1. Damage Repair
- 3.2. Psychological Assessment
 - 3.2.1. Deficiency
 - 3.2.2. Disability
 - 3.2.3. Handicap
- 3.3. Medical and Psychological Evaluation
 - 3.3.1. Other Criminal Damages
- 3.4. Medical and Psychological Evaluation
 - 3.4.1. Other Civil Damages (I)
- 3.5. Medical Assessment
 - 3.5.1. Other Civil Damages (II)
- 3.6. Medical Assessment
 - 3.6.1. Occupational Damages
 - 3.6.1.1. Classification of Accidents
 - 3.6.1.2. Occupational Risk Prevention(ORP)
 - 3.6.1.3. Negligence
- 3.7. The Medical Report in the Valuation of Damage

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvás, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

05 Certificate

The Postgraduate Diploma in Judicial Expertise in Forensic Psychology guarantees students that, in addition to the most rigorous and up-to-date training, they can access to Postgraduate Diploma issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This program will allow you to obtain your **Postgraduate Diploma in Judicial Expertise in Forensic Psychology** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003.
