# Introduction

Childhood and youth are stages that determine character and personality. Therefore, going through a situation of social exclusion at this time can condition the rest of a person's life. Educational centers are the main areas of socialization of children and adolescents, as well as an essential agent in the detection of these situations. In this sense, it is necessary for teachers and psychologists to be aware of the latest and most efficient techniques to deal with situations of abuse, lack of resources or *bullying*, among others. It offers the most appropriate solutions to these problems. Specifically designed to provide tools to address social exclusion with sensitivity and solvency. In turn, these contents will be taught in a totally online modality and without timetables, thus favoring personal and work conciliation.

“

*Bullying and sexual abuse are more prevalent in schools than is generally believed. Enroll in this Professional Master's Degree and start detecting this type of situations"*

Educational centers should not limit themselves to imparting certain contents. This is an essential part, but many factors come into play when it comes to education. For example, that the student is in optimal conditions to carry out the learning process.

Therefore, this program offers a comprehensive view of inclusive psychology in all its dimensions. Both from the perspective of the educational institution and the role played by the psychological professional and the family. Providing tools and experiences that can be directly extrapolated to the educational centers of the graduates.

The different modules are taught with an eminently practical approach, supported by the necessary theoretical material. All teachers have extensive experience with cases of different ages and in diverse socio-family and educational contexts. In addition, it must be taken into account that inclusive learning is approached by integrating the situation of each child, their families, as well as the educational institution and the social context.

Finally, this Professional Master's Degree stands out for being fully online, which will allow students to carry out the learning process without leaving aside their work activity, as well as the rest of their daily obligations.

This **Professional Master's Degree in Inclusive Education for Children and Adolescents in Situations of Social Exclusion** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of case studies presented by experts in inclusive education for children and adolescents.

# Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have ***considered it to be one of the most effective***.

“

*Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: A way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

*With TECH the psychologist experiences a way of learning that is shaking the foundations of traditional universities around the world.*

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the psychologist's professional practice.

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method.*

The effectiveness of the method is justified by four fundamental achievements:

1. Psychologists who follow this method not only master the assimilation of concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the psychologist to better integrate knowledge into clinical practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Re-learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

*The psychologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

This methodology has trained more than 150,000 psychologists with unprecedented success in all clinical specialties. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

*Re-learning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: A direct equation for success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current psychology. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: A clear and direct way to achieve the highest degree of understanding.

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: So that they can see how they are achieving your goals.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

# Certificate

The Professional Master's Degree in Inclusive Education for Children and Adolescents in Situations of Social Exclusion guarantees, in addition to the most rigorous and up-to-date training, access to a certificate issued by TECH Technological University.

“

*Successfully complete this training program  
and receive your university certificate  
without travel or laborious paperwork”*

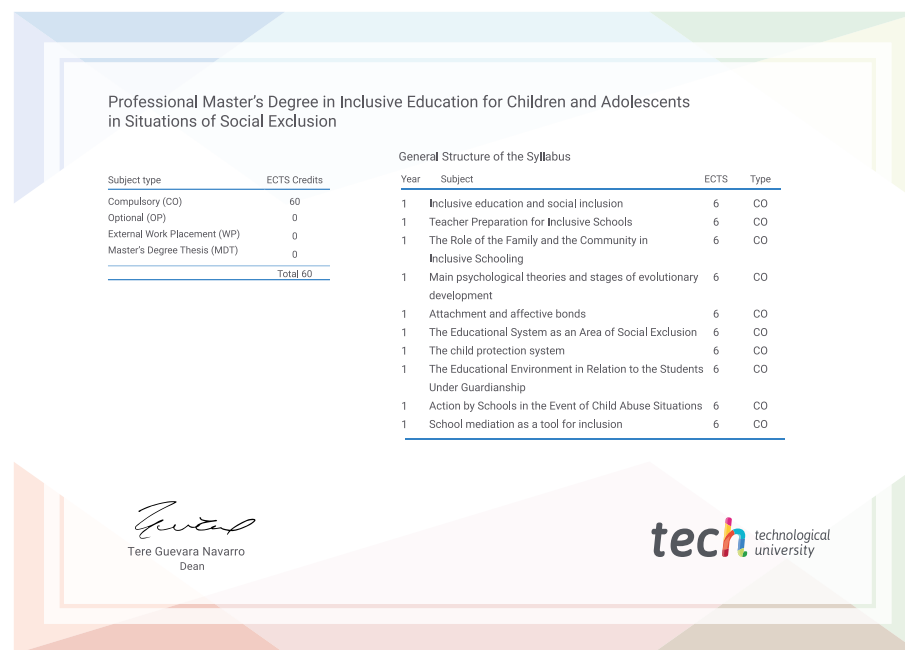

This **Professional Master's Degree in Inclusive Education for Children and Adolescents in Situations of Social Exclusion** contains the most complete and up-to-date program on the market.

After the student has passed the evaluations, they will receive their corresponding **certificate** issued by **TECH Technological University** via tracked delivery\*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Professional Master's Degree, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Professional Master's Degree in Inclusive Education for Children and Adolescents in Situations of Social Exclusion**

Official Number of Hours: **1,500 hours.**

\*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
