Introduction to the Program

Startups are a driving force for economic growth and job creation, but they face significant barriers in accessing financial resources. Various studies have shown that public funding and government grants not only facilitate the viability of these ventures, but also foster innovation and competitiveness. Given this reality, professionals need to have a comprehensive understanding of the best strategies for accessing public funds, managing grants, and optimizing the use of financial resources in their ventures. To help them with this task, TECH has developed an exclusive university program focused on public funding and grants for Startups. In addition, it is delivered in a convenient 100% online format.

“

Thanks to this completely online program, you will learn the keys to managing public funding and maximizing the impact of the resources obtained in the consolidation of Startups”

The development of Startups requires a solid funding strategy that combines private and public resources to ensure their scalability. In this regard, governments have implemented various financial support mechanisms such as investment funds and tax incentive programs. However, accessing these resources can be challenging for entrepreneurs due to the complexity of the processes and requirements. Therefore, specialists need to master best practices for submitting successful applications and maximizing the impact of these funds on business growth.

In this scenario, TECH presents a cutting-edge program in Public Funding and Grants for Startups. The syllabus will analyze aspects ranging from the importance of public financing in the entrepreneurial ecosystem to access to international grants and mixed investment funds. The syllabus will also analyze various modern internationalization strategies and European programs such as Horizon Europe. In addition, the course content will explore soft loans, compliance, and auditing in fund management. In this way, students will be able to optimize the acquisition of public resources, structure financing techniques, and ensure the sustainability of their projects in a highly competitive global environment.

On the other hand, TECH offers a 100% online academic environment based on free access to teaching resources. In line with this, it uses its revolutionary Relearning methodology, which consists of repeating key concepts to reinforce knowledge and facilitate learning. Therefore, all experts will need is a device with an Internet connection to access the Virtual Campus. In addition, experts will enjoy a wide range of multimedia resources, including explanatory videos, real case studies, and interactive summaries.

This **Postgraduate Certificate in Public Funding and Grants for Startups** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of case studies presented by experts in Public Funding and Grants for Startups
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

You will master sophisticated internationalization and expansion strategies through public funding"

“

Thanks to TECH's Relearning method, you will be able to assimilate essential concepts quickly, naturally, and accurately”

You will gain skills to efficiently manage deadlines and distribution of acquired funds.

You will have a holistic understanding of key programs such as Horizon Europe and EIC Accelerator.

The teaching staff includes professionals from the field of public Funding and Grants for Startups, who bring their work experience to this program, as well as renowned specialists from leading companies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive learning experience designed to prepare for real-life situations.

This program is designed around Problem-Based Learning, whereby the student must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

02

Why Study at TECH?

TECH is the world's largest online university. With an impressive catalog of more than 14,000 university programs available in 11 languages, it is positioned as a leader in employability, with a 99% job placement rate. In addition, it relies on an enormous faculty of more than 6,000 professors of the highest international renown.

“

*Study at the world's largest online university
and guarantee your professional success.
The future starts at TECH”*

The world's best online university, according to FORBES

The prestigious Forbes magazine, specialized in business and finance, has highlighted TECH as "the best online university in the world" This is what they have recently stated in an article in their digital edition in which they echo the success story of this institution, "thanks to the academic offer it provides, the selection of its teaching staff, and an innovative learning method oriented to form the professionals of the future".

The best top international faculty

TECH's faculty is made up of more than 6,000 professors of the highest international prestige. Professors, researchers and top executives of multinational companies, including Isaiah Covington, performance coach of the Boston Celtics; Magda Romanska, principal investigator at Harvard MetaLAB; Ignacio Wistumba, chairman of the department of translational molecular pathology at MD Anderson Cancer Center; and D.W. Pine, creative director of TIME magazine, among others.

The world's largest online university

TECH is the world's largest online university. We are the largest educational institution, with the best and widest digital educational catalog, one hundred percent online and covering most areas of knowledge. We offer the largest selection of our own degrees and accredited online undergraduate and postgraduate degrees. In total, more than 14,000 university programs, in ten different languages, making us the largest educational institution in the world.

The most complete syllabuses on the university scene

TECH offers the most complete syllabuses on the university scene, with programs that cover fundamental concepts and, at the same time, the main scientific advances in their specific scientific areas. In addition, these programs are continuously updated to guarantee students the academic vanguard and the most demanded professional skills. and the most in-demand professional competencies. In this way, the university's qualifications provide its graduates with a significant advantage to propel their careers to success.

A unique learning method

TECH is the first university to use Relearning in all its programs. This is the best online learning methodology, accredited with international teaching quality certifications, provided by prestigious educational agencies. In addition, this innovative academic model is complemented by the "Case Method", thereby configuring a unique online teaching strategy. Innovative teaching resources are also implemented, including detailed videos, infographics and interactive summaries.

The official online university of the NBA

TECH is the official online university of the NBA. Thanks to our agreement with the biggest league in basketball, we offer our students exclusive university programs, as well as a wide variety of educational resources focused on the business of the league and other areas of the sports industry. Each program is made up of a uniquely designed syllabus and features exceptional guest hosts: professionals with a distinguished sports background who will offer their expertise on the most relevant topics.

Leaders in employability

TECH has become the leading university in employability. Ninety-nine percent of its students obtain jobs in the academic field they have studied within one year of completing any of the university's programs. A similar number achieve immediate career enhancement. All this thanks to a study methodology that bases its effectiveness on the acquisition of practical skills, which are absolutely necessary for professional development.

Google Premier Partner

The American technology giant has awarded TECH the Google Premier Partner badge. This award, which is only available to 3% of the world's companies, highlights the efficient, flexible and tailored experience that this university provides to students. The recognition not only accredits the maximum rigor, performance and investment in TECH's digital infrastructures, but also places this university as one of the world's leading technology companies.

The top-rated university by its students

Students have positioned TECH as the world's top-rated university on the main review websites, with a highest rating of 4.9 out of 5, obtained from more than 1,000 reviews. These results consolidate TECH as the benchmark university institution at an international level, reflecting the excellence and positive impact of its educational model.

03 Syllabus

The syllabus will explore everything from the importance of public funding in the entrepreneurial ecosystem to strategies for accessing international grants and investment funds. It will also cover support organizations for startups, European programs such as Horizon Europe and EIC Accelerator, and soft loans with preferential terms. In addition, students will analyze the grant application process, compliance strategies, and audits. All of this will enable them to optimize access to financial resources, minimize risks, and ensure the sustainability of their projects.

“

You will delve into the interpretation of regulations related to Public Funding and accountability”

Module 1. Public Funding and Grants for Startups

- 1.1. Public Funding for Startups
 - 1.1.1. Importance of Public Funding in the Entrepreneurial Ecosystem
 - 1.1.2. Differences between Public and Private Funding
 - 1.1.3. Public Funding Lines for Startups
- 1.2. International Organizations Supporting Startups
 - 1.2.1. International Support Organizations and Their Role in Startup Funding
 - 1.2.2. Internationalization Strategies
 - 1.2.3. Main International Organizations Supporting Startups
- 1.3. Soft Loans and Other Public Funding Instruments for Startups
 - 1.3.1. Soft Loans and Other Public Funding Instruments. Key Aspects
 - 1.3.2. Funding Lines with Preferential Conditions
 - 1.3.2. Success Stories in the Use of Public Funding
- 1.4. Access to International Public and Mixed Investment Funds for Startups
 - 1.4.1. Public-private Co-investment Fund for Startups at the International Level
 - 1.4.2. Access to International Public and Mixed Investment Funds for Startups
 - 1.4.3. Success Stories in Combining Public and Private Funding
- 1.5. Application Process and Management of International Public Aid for Startups. Documentation
 - 1.5.1. Key Points for Preparing Documentation
 - 1.5.2. Managing Public Grants at the International Level
 - 1.5.2. How to Maximize the Probability of Obtaining International Funding
- 1.6. Challenges and Common Mistakes in International Public Funding for Startups
 - 1.6.1. Frequent Mistakes in Applications. How to Avoid Them
 - 1.6.2. Deadlines and Efficient Management of Funds Obtained
 - 1.6.3. Guide to International Public Funding for Startups
- 1.7. Case Studies and Best Practices in Public Funding for Startups
 - 1.7.1. Analysis of Startups that have Successfully Used Public Funding
 - 1.7.2. Replicable Strategies for Accessing Public Resources
 - 1.7.3. Case Study of a Financial Simulator

“

You will apply advanced financial management tools, ensuring the efficient use of funds and accountability to regulatory bodies”

04

Teaching Objectives

Through this program, experts will have access to the most modern strategies for managing Public Funding and Grants for Startups. In this sense, students will develop advanced skills in identifying government funding opportunities, preparing successful applications, and optimizing resources. As a result, professionals will be able to design techniques to maximize fundraising, comply with regulatory requirements, and efficiently manage the capital obtained to drive business growth.

“

You will assess combined Financing strategies, integrating grants with other sources of capital to enhance the scalability of the Startup”

General Objectives

- ♦ Analyze the characteristics and differences between Startups and traditional companies
- ♦ Delve into the different funding strategies available to Startups in their various stages of development, understanding their characteristics, advantages, and challenges
- ♦ Examine the fundamental differences between business angels and venture capital as sources of funding for Startups
- ♦ Master the structure and fundamental characteristics of the search fund model
- ♦ Develop strategies for effective project presentation
- ♦ Learn about the legal tools that allow for a balance of shareholder control between founders and investors
- ♦ Explore the relevance of the appropriate legal structure for the successful development of a Startup
- ♦ Identify the key elements of a successful IPO
- ♦ Manage strategies to maximize the value of a startup
- ♦ Identify the advantages and risks of ICOs and STOs
- ♦ Use useful tools to help you build lasting relationships with investors

Specific Objectives

- ♦ Assess funding opportunities in European programs
- ♦ Examine the different types of aid offered by public entities: different types of grants, soft loans, one-off aid, etc.

“

You will learn through multimedia resources in formats such as explanatory videos and interactive summaries, which will completely enliven your learning experience”

05 Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule"

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

06

Teaching Staff

TECH's goal is to provide the most up-to-date and comprehensive programs available in the educational field. To achieve this, it carries out an exhaustive process to select its teaching staff. As a result, this program benefits from the collaboration of the best specialists in Public Funding and Grants for Startups. These professionals have extensive work experience, having participated in the management of public funds, the design of financing strategies, and the optimization of resources for Startups. In this way, students will immerse themselves in an experience that will allow them to take a leap forward in their professional careers.

“

You will be advised at all times by the teaching team, made up of professionals with extensive experience in Public Funding and Grants for Startups”

Management

Ms. Segura García, Paula

- ♦ M&A Legal at Crowe Legal and Tax
- ♦ Master's Degree in Business Law from Esade Ramón Llull University
- ♦ Bachelor's Degree in Law from Esade Ramón Llull University

Professors

Dr. Grigorián Keheaián, Levón

- ♦ Partner in Banking & Finance at Crowe Legal y Tributario
- ♦ Vice President of the Shareholder Institute
- ♦ Representative of Enterprise Armenia
- ♦ Lawyer at Cuatrecasas
- ♦ Doctorate in Law from Pompeu Fabra University
