Introduction

The field of communication has many specialties to choose from, especially thanks to the multiple possibilities offered by digital transformation. In this sense, in recent years, the fashion and luxury sectors have been demanding professionals capable of creating a message that attracts young audiences and reinforces the trust of recurring users. Therefore, the person in charge of leading the communications team within any brand or agency must identify opportunities, understand the communication process in all channels, and, of course, identify possible adversities in order to prevent them in time. In this blended program, students will have the opportunity to learn all about this sector, improve their leadership skills, and aspire to professional growth.

“

This program will help you develop a communication strategy that competes within the fashion and luxury industry to attract young audiences to a brand"

Throughout the years, communication has been an indispensable factor for human beings. With the advent of social networks and digital media, the way in which a message is sent and received has been perfected, as the objective is to encourage users to perform a specific action. In this sense, many experts have already determined the indispensable tools to favor the process of telling a story through images and words.

Therefore, this Hybrid Professional Master's Degree in TECH will help the professionals in this sector to analyze the application and study of communication in the field of fashion and luxury. For this, you will first have a 100% online modality, in which you will be able to understand in depth the nature of the message and its basic components. This will allow shaping the information structure of a brand using tools such as *Storytelling*.

This first part relies on the experience of professionals with extensive careers in this sector, such as journalists and fashion and luxury professionals. All of them have worked with various marketing and communications teams, so they are prepared to address issues related to the development of an analysis of current trends or the process of perception and interpretation of the interlocutor.

Throughout the course of the syllabus, the student will analyze a multitude of practical cases to understand and reproduce the communication process effectively, adapting it to each channel, company profile, and target audience. This will be indispensable for writing a press release, blog, or advertising copy that identifies with the brand ecosystem being managed.

After completing the theoretical program, the student will be able to carry out an on-Practice internship in a prestigious agency. Here, you , will carry out a series of activities that will prepare you to face any situation in your daily practice. In addition, you will not be alone, as you will have the support of a specialist attached to the company, who will teach you how to perform the activities of a director.

This **Hybrid Professional Master's Degree in Fashion and Luxury Communication Management** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ Development of more than 100 case studies presented by experts in communication in Fashion and luxury
- ♦ The graphic, schematic and practical contents with which they are conceived, gather Specific information on those disciplines that are essential for professional practice
- ♦ Integral plans for systematized action in the business field
- ♦ Algorithm-based interactive learning system for decision-making in the situations that are presented to the student
- ♦ Practical guides for the use of the main business sciences tools
- ♦ Special emphasis on the most innovative methodologies for the application of communication techniques in fashion and luxury
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is available from any fixed or portable device with an Internet connection
- ♦ Furthermore, you will be able to do an internship in one of the best business centers in the world

For 3 weeks you will be able to perform the activities of a communications manager, implementing CRM to automate the content that is broadcast on social networks"

“

At the end of this hybrid program, you will be able to lead a communications team to develop messages that identify with the ecosystem of any brand"

In this Master's program, of a professionalizing nature and hybrid learning modality, is aimed at updating professionals specialized in Communication who require a high level of qualification. The contents are based on the latest scientific evidence and are organized in a didactic way to integrate theoretical knowledge into your daily practice and theoretical elements. In this way, the theoretical-practical elements will facilitate the updating of knowledge and will allow decision-making in complex environments.

Thanks to its multimedia content developed with the latest educational technology, they will allow the professional a situated and contextual learning, that is to say, a simulated environment that will provide an immersive learning programmed to prepare in real situations. This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

You will be able to generate social impact and manage the public opinion of a brand with ethical responsibility.

You will be trained to make decisions through observation, analysis, interpretation, and action in relation to professional criteria through critical reporting.

02

Why Study this Hybrid Professional Master's Degree?

Communication is the main tool for any business. The development of advanced skills for the design of innovative content strategies and plans, with the mastery of the most updated systems and state-of-the-art information technologies, will allow the professional who completes this program to move up in their work environment. For this reason, aware of the need for experts in the area, TECH has created this Hybrid Professional Master's Degree that will cover the most common areas of communication management in a modern company. To determine what has been learned, it will also lead to 3 weeks of intensive practical training directly with a prestigious national or international company. This will undoubtedly facilitate the student to generate day-to-day work alongside experienced communication professionals in a fashion and luxury company.

“

By taking this program, you will be able to work in an area of high demand in today's labor market"

1. Updating from the latest technology available

The communication director of a fashion and luxury company must have a highly specialized profile. The current boom of advances in advertising and marketing requires a high level of qualification that you will be able to obtain by taking this program. In a 100% practical way, it will bring the student closer to the most modern resources in terms of Information and Communication Technologies to create efficient communication management strategies

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

This program becomes an open door to success thanks to the various professionals involved in its configuration and design, as well as its implementation and follow-up. TECH chooses the best teachers to lead its programs, who, through their experience and active work profile, will keep up to date with new trends through the study material and tutorials

3. Entering first-class Corporate environments

Thanks to the practical part that will be developed to complete the 12 months of training, the student will be able to experience and demonstrate first-hand the advances in communication in the fashion and luxury company chosen for the development of his activity. In this way, you will be able to see the day-to-day work of a demanding, rigorous, and exhaustive area, always applying the latest trends and innovative work methodologies

4. Combining the Best Theory with State-of-the-Art Practice

This program is an innovative proposal that combines two specific teaching systems. The theoretical part is composed of 10 modules of updated content, and the practical part will help you to test the most advanced knowledge from the hands of experienced professionals who will accompany you in your transit through the fashion and luxury company of reference. Therefore, you will be able to enjoy a 3-week sensory experience and interact with great experts in the field, much more than just *Networking*

5. Expanding the Boundaries of Knowledge

TECH opens the doors to new scenarios with this Practical Training anywhere in the world. The professional will be able to develop their knowledge during 3 weeks in a fashion or luxury business center in the area of Communication Management without any inconvenience and with the most advanced examples in situ

You will have full practical immersion at the center of your choice"

03 Objectives

This Hybrid Professional Master's Degree is designed for students to develop the skills that will enable them to understand and implement a communications strategy within the fashion and luxury industry. This is indispensable in such an exclusive sector where more than excellence is demanded. Therefore, you will have a program that remains at the forefront of the academic panorama.

“

The duality of this program will allow you to perform well in a controlled scenario to design a communications plan to be used in the social networks of a prestigious brand"

General Objective

- The main objective of this Hybrid Professional Master's Degree in Fashion and Luxury Communication Management is to strengthen the student's management and leadership skills in such a competitive sector as fashion and luxury. In this way, you will be able to master the most used communication techniques in the sector in a practical and rigorous way and develop your skills for quality practices

“

The central objective of this program is to help you develop the essential skills to strategically manage fashion communication through a three-week practical stay"

Specific Objectives

- ♦ Have a comprehensive and professional vision of the communication environment in the areas of fashion, luxury and beauty, identifying the particularities of the sector, as well as its impact and repercussion on the business fabric as a whole
- ♦ Acquire basic and advanced knowledge so that the student is able to generate new communication ecosystems in relation to fashion

 - 10.9.3. Integration of the Action Plan into the Strategy as a Whole
- 10.10. Evaluation of the Communication and Strategy Plan
 - 10.10.1. Main Metrics for the Evaluation of the Communication Plan
 - 10.10.2. Advanced Analysis of the Communication Plan
 - 10.10.3. Reformulation of the Communication Strategy

You will experience the difference of learning by doing only in this exclusive TECH program"

07

Clinical Internship

Upon completion of the online program, the student will be able to take an internship in an agency of great relevance in the digital sector. In this way, during 3 weeks of intensive learning, from Monday to Friday, you will be able to carry out various activities to benefit your career as a journalist in this sector.

“

Immerse yourself in a unique experience and learn how different luxury brands carry out their communication plans”

Innovation distinguishes each of TECH's programs. Thanks to its interest in providing updated and useful professional training for immediate career development, it has made possible a new educational model that consists of an internship space that complements the digital curriculum of the Hybrid Professional Master's Degree. Therefore, the student will have the opportunity to choose a company of national or international reference to perform all their skills as a Communication Director for 3 weeks, joining a team of experts that will allow him to get closer to the current dynamics of the sector.

Throughout the practical stay, the student will be able to perform a number of activities, such as identifying the target consumer of a brand, creating content through CRM, establishing an SEO strategy for the web positioning of a brand, evaluating metrics to determine the budget of the communicative actions, as well as other related activities, completing the learning process.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other training partners that facilitate teamwork and multidisciplinary integration as transversal competencies for daily practice (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

Module	Practical Activity
New trends in the development of business strategies in Fashion and Luxury companies	Analyze the consumption behavior of the company's public or target to verify the ideal profile and segmentation
	Apply new trends and test the effectiveness of the company, such as <i>the Hype concept, the Coolhunting theory, and the visual expression of color Coolhunting Science Insights</i>
	Using the Delphi Method for data collection
	Design proposals for the internationalization of the fashion company
	Proposing innovative business models
Development of a communication plan for a fashion and luxury company	Use innovative tools for content creation and paid advertising
	Manage content automation in CRM
	Participate in the launching of flash campaigns and planning of seasonal campaigns
	Use traditional offline and online communication techniques: press releases, news, and advertorials, blogs, digital magazines, or <i>newsletters</i>
	Use transmedia storytelling and <i>Storytelling for content virality</i>
	Propose the communication of the brand towards sustainability and ecology
Application of new communication channels and evaluation methods	Practice the correct choice of communication channel by applying the <i>ForresterResearch Theory</i>
	Employ multichannel strategies within fashion social networks, highlighting Instagram as the predominant network for fashion
	Making innovative proposals through channels such as TikTok and YouTube on fashion and luxury
	Measure results of communication actions and present analytical reports on them
	Perform frequency maps and analysis of the evolution of fashion
Corporate communication and public relations in fashion and luxury companies	Implement tools to promote internal communication
	Use Buffer and Hootsuite to perform Digital Marketing analytics
	Propose a strategic plan for crisis management and perform the analysis of the current briefing
	Establish relationships with institutions, media, or organizations that contribute to the fashion and luxury company
	Use the RACE method for the communication strategy in fashion and beauty

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General conditions of practical training

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned an academic tutor whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Hybrid Professional Master Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: the Hybrid Professional Master Program shall not constitute an employment relationship of any kind.

6. PREVIOUS EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. NOT INCLUDED: the Hybrid Professional Master's Degree will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

Enroll now and advance in your field of work with a comprehensive program that will allow you to put into practice everything you have learned”

09

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

10 Certificate

The Hybrid Professional Master's Degree in Fashion and Luxury Communication Management guarantees, in addition to the most rigorous and updated training, access to a Hybrid Professional Master's Degree issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Hybrid Professional Master's Degree in Fashion and Luxury Management Communication** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding TECH Internship Program issued by TECH Technological University via tracked delivery.

In addition to the diploma, students will be able to obtain an academic transcript, as well as a certificate outlining the contents program. In order to do so, students, should contact their academic advisor, who will provide them with all the necessary information.
