The development of ICTs, linked to the growth of e-commerce and the possibilities of Web 4.0, has encouraged the redirection of many businesses, or part of them, towards the digital market. However, this is a complex environment, which requires specific knowledge to ensure the best results and to face the relentless competition. For this reason, the figure of the Marketing and Web Analytics professional has become very important, finding in this field a wide range of job opportunities. In order to achieve the degree of specialization required by the market, the graduate can count on this very complete program. An academic experience that combines theory and practice in a highly enabling program for the mastery of management strategies related to digital business.

tech 06 | Introduction

The web is full of millions of companies that have decided to offer their products and services online, so the great competition that exists turns digital business into a constant struggle to occupy the top positions in the main search engines. Many entities have found in e-commerce an opportunity to continue their activity, something that, with the course of time, has become an increasingly complex task.

That is why the figure of the Marketing and Web Analytics professional has taken a special relevance, since based on their specialized knowledge about the main SEO, SEM and online advertising strategies, they are able to obtain a series of guaranteed results, something impossible through traditional techniques. For that reason, and based on the multiple professional opportunities that the graduate can find in this field, TECH has developed this complete Hybrid Professional Master's Degree in MBA in Digital Business, a program that combines theory and practice in an academic experience of 1,620 hours of the best training.

Thanks to this program, the graduate will be able to expand and update their knowledge on the main strategies of e-commerce and search engine marketing, delving into digital communication and innovation through the technologies that exist today. For this purpose, you will be provided with diverse theoretical and additional material presented in a convenient and accessible 100% online format.

However, despite the quality of the content, the strong point of this program lies in the possibility of taking a 120-hour internship in a large company in the sector. Based on this, the graduate will become part of the agency's team, actively participating in its day-to-day work and making use of the latest and most innovative professional technology in the digital business area. It is, therefore, a unique opportunity to include in your resume a highly capacitating experience that will open many doors in your future career.

This **Hybrid Professional Master's Degree in MBA in Digital Business** contains the most complete and up-to-date program on the market. The most important features include:

- Development of more than 100 case studies presented by professionals in the web analytics sector, as well as by experts in the management and analysis of digital business data
- Its graphic, schematic and eminently practical contents, with which they are conceived, gather scientific and assistance information on those medical disciplines that are indispensable for professional practice
- Creation of campaigns through Addwords, Google Shopping and Social Media for apps or reMarketing
- The best content to know in detail the keys to web analytics through the exhaustive mastery of the main strategies of interpretation and study of data for the correct optimization of websites
- The inclusion of the most effective techniques to achieve a correct optimization of websites, as well as to increase traffic and organic conversions
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection
- In addition, you will be able to do an internship in one of the best companies in the online advertising and marketing sector

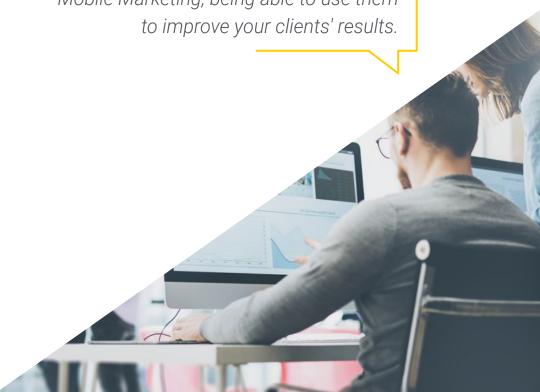

SEO and SEM analytics, measurement strategies, search engine optimization techniques, etc. With this program you will work on all these aspects and many more!"

In this proposed Hybrid Professional Master's Degree, of professional character and blended modality, the program is aimed at updating the administration professionals who develop their functions in the most complex digital environments, for which they require a comprehensive knowledge. The contents are based on the latest evidence in the area, and oriented in a didactic way to integrate theoretical knowledge in administrative practice and web data management, and the theoretical-practical elements will facilitate the updating of knowledge and allow decision making for a correct orientation and job function.

Thanks to their multimedia content developed with the latest educational technology, they will allow the medical professional to obtain situated and contextual learning, which means a simulated environment that will provide immersive learning programmed to train in real situations. This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

This program will bring to your career a distinctive quality, based on the comprehensive knowledge of a booming area such as the one related to digital business.

You will be able to keep up-to-date with the latest and most effective trends in Mobile Marketing, being able to use them to improve your clients' results.

tech 10 | Why Study this Hybrid Professional Master's Degree?

1. Updating from the Latest Technology Available

The most innovative mobile, social networking and e-commerce technologies of the moment will be available to students in this program. In this way, each student will be able to handle them professionally and integrate them into their daily work practice in a fast and flexible way, until they become the most sought-after experts in this area of the business market.

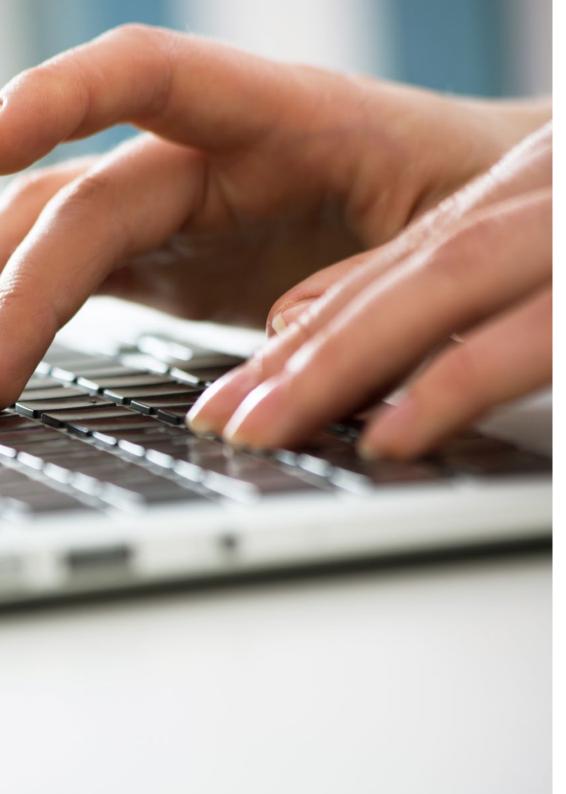

2. Gaining In-depth Knowledge from the Experience of Top Specialists

TECH offers its students the personalized guidance of great experts in the implementation of Digital Business. A group of them will assist them during the theoretical learning of the contents of this Hybrid Professional Master's Degree and others will be in charge of supervising the development of new skills during an intensive internship.

3. Enter into world-class business environments

Under meticulous criteria of excellence, TECH chooses the institutions that will host its graduates for the professional practice of this study program. All the selected institutions have a high prestige, as well as the most innovative technologies in the business market.

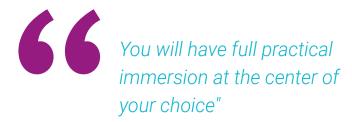

Why Study this Hybrid Professional | 11 tech Master's Degree?

4. Combining the Best Theory with State-of-the-Art Practice

Although this program consists of a large theoretical part, its practical phase is also of vital importance. Through it, and by means of multiple practical learning tools, students will participate in projects that will provide them with the most up-to-date knowledge in the field of Digital Business leadership.

5. Expanding the Boundaries of Knowledge

TECH, the largest digital university of the moment, has a network of agreements and partners of international scope. In this way, its students can access internship centers located in different geographic latitudes and develop competencies based on globalized standards.

tech 14 | Objectives

General Objective

This practical program has been proposed by TECH and its team of experts in Digital
Business in order to provide the graduate with an experience through which to develop
the latest strategies for the creation of new opportunities in existing markets. In addition,
it will serve to understand the competitive environment that today's digital companies
must face, as well as to know in detail the latest and most effective techniques and tools
for the management of SEM and tailored online advertising

Mastering Inbound Marketing and content optimization techniques is now within your reach with this Hybrid Professional Master's Degree"

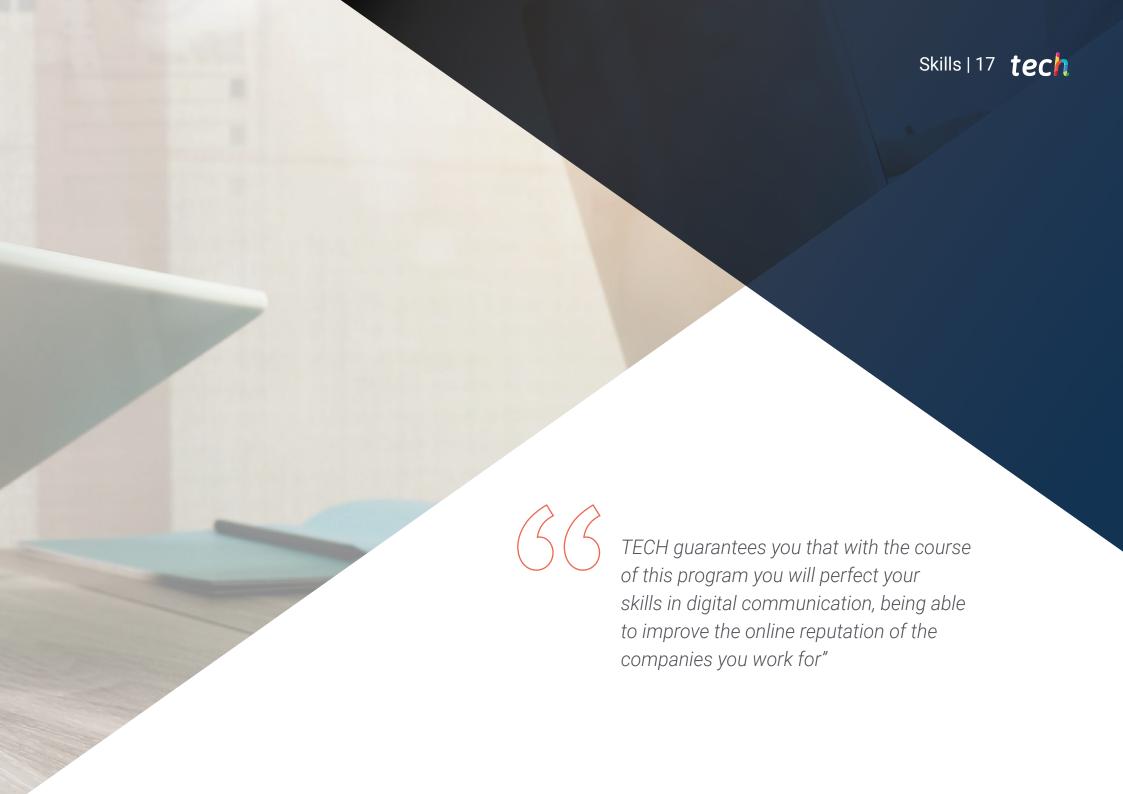

Specific Objectives

- Develop a Business Plan
- Acquire in-depth knowledge of the phases involved in creating a company

- 10.8.4. Augmented Reality

tech 36 | Clinical Internship

This specialized program in the digital business sector is also made up of a 3-week internship in a large company, developed from Monday to Friday and in consecutive 8-hour days with a professional versed in the area, who will act as a tutor during the experience. Thanks to this, the graduate will be able to learn first-hand about the latest developments related to the creation of SEM strategies, as well as the management of customized online advertising.

In this internship proposal, of a completely practical nature, the activities are aimed at developing and perfecting the skills necessary for the provision of an assistance and guidance service that requires a high level of qualification, and which are oriented towards specific training for the exercise of the activity, in a dynamic and highly beneficial environment for their performance and development as a specialist in the area.

Therefore, it is an opportunity that the graduate can not miss if they are looking to implement to their praxis the domain of creating campaigns in AdWords, Google Shopping, Social Media, Apps campaigns or reMarketing. In addition, you will also work on the design of projects related to Web Analytics and digital business optimization.

The practical education will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other training partners that facilitate teamwork and multidisciplinary integration as transversal competencies Design praxis (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

	Implement a content, storytelling and social media strategy
New digital trends to project business	Applying business gamification trends such as Gamification Design Framework
	Implementing Robotics, Artificial Intelligence and Big Data resources to reduce business challenges

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

- 1. TUTOR: During the Hybrid Professional Master's Degree, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.
- **2. DURATION:** The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.
- 3. ABSENCE: If the students does not show up on the start date of the Hybrid Professional Master's Degree, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

- **4. CERTIFICATION:** Professionals who pass the Hybrid Professional Master's Degree will receive a certificate accrediting their stay at the center.
- **5. EMPLOYMENT RELATIONSHIP:** the Hybrid Professional Master's Degree shall not constitute an employment relationship of any kind.
- **6. PRIOR EDUCATION:** Some centers may require a certificate of prior education for the Hybrid Professional Master's Degree. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed
- **7. DOES NOT INCLUDE:** The Hybrid Professional Master's Degree will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

Make the most of this opportunity to surround yourself with expert professionals and learn from their work methodology"

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

tech 48 | Methodology

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

tech 50 | Methodology

Relearning Methodology

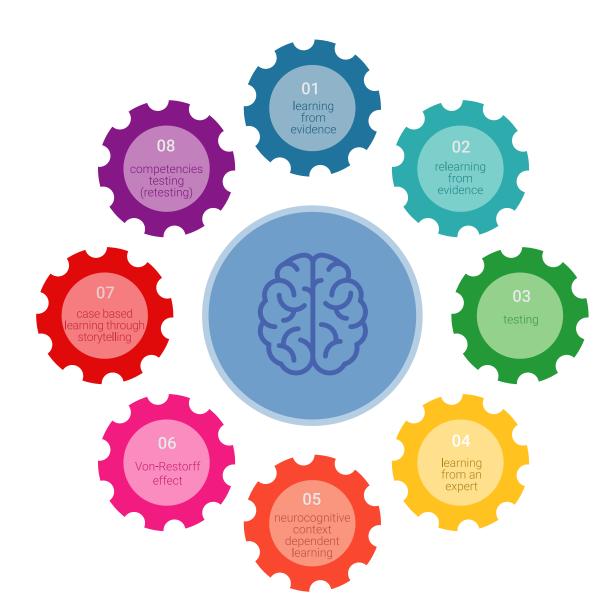

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 51 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

tech 52 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

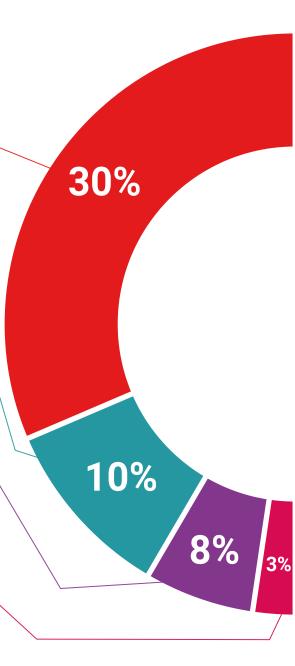

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
