01 Welcome

Preserving the values of tangible and intangible heritage is a great responsibility for professionals, who wish above all to keep alive the essence of history, art and culture. Thus, in recent years, due to technological advances, there has been a considerable improvement in the techniques and methodologies used for conservation, where the role of the expert conservator is undoubtedly essential. In this sense, companies are calling for highly qualified profiles that are up to date with the latest developments in this field. For this reason, this program offers specialists an advanced university education, which in only 150 hours provides the necessary learning to delve into the protection plans, materials, resources and analysis used in conservation. This will also be possible thanks to the innovative teaching tools developed by a teaching team that is a reference in the cultural sector.

Postgraduate Certificate in Cultural Heritage Conservation.
TECH Technological University

“

Take a step further in your professional career with this 100% online Postgraduate Certificate in Cultural Heritage Conservation”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (the most internationally recognized postgraduate learning methodology) with the Case Study. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

The completion of this Postgraduate Certificate will lead the professionals to deepen in the most advanced methodologies and techniques currently used in Cultural Heritage Conservation. Thus, at the end of this course, they will be able to effectively promote any project in this line and also achieve brilliant progress in their career.

“

This academic option provides you with the latest conservation methods and techniques, so that you can apply them successfully in your future projects"

TECH makes the goals of their students their own goals too.
Working together to achieve them.

The Postgraduate Certificate in Cultural Heritage Conservation will enable the student to:

01

Know the different methodologies for the diagnosis of the state of conservation of cultural properties

02

Understand the methods of analysis and study of materials and techniques

03

Understand the criteria for intervention in restoration and conservation

04

Identify the main actions for the conservation and conservation and protection of Cultural Heritage of Cultural Interest

05

Use the most relevant materials for the conservation of tangible assets and heritage collections

06

Study the most effective methodology for preventive conservation

05

Structure and Content

The Postgraduate Certificate in Cultural Heritage Conservation has been developed by a team of teachers versed in the area, who contribute their extensive knowledge to the syllabus and guarantee the correct instruction of the professionals who take this course. A study plan taught in 100% online mode, which offers flexibility to students, who can access whenever they wish, from an electronic device to the content hosted in the Virtual Campus.

“

The Relearning system from TECH will allow you to advance in a much more natural way through the content of this Postgraduate Certificate”

Syllabus

This university program has been designed to offer, in only 150 hours, the most exhaustive and advanced knowledge on Heritage Conservation. These keys will provide the professionals with the necessary tools and methods to be able to implement restoration and conservation projects and plans according to the most updated technical criteria.

This will be possible thanks to the 6-week journey through the most innovative content on the steps to follow to maintain the historical and artistic heritage, the functions of a conservator in a museum, as well as the most effective systems used today for the restoration of Cultural Heritage or heritage collections.

To achieve this learning the specialist has video summaries, videos in detail, complementary readings and case studies that can be easily accessed, at any time of the day, from a computer, tablet or cell phone with Internet connection.

In this way, the professionals will be able to deepen in a much more attractive way the main concepts that will lead them to progress in the field of conservation. In addition, thanks to the Relearning method, used by TECH in all its degrees, students will reduce the hours of memorization and study.

The professionals are thus faced with an academic option that will allow them to effectively manage actions aimed at protecting the tangible and intangible heritage of any place that wants to enhance its assets.

This Postgraduate Certificate takes place over 6 weeks and consists of 1 module:

Module 1.

Cultural Heritage Conservation

- 1.10.1. What is Involved and Who is in Charge of Packaging?
- 1.10.2. Packaging of Cultural Property and Heritage Collections and Heritage Collections
- 1.10.3. Transport of Cultural Property and Heritage Collections
- 1.10.4. Manipulation of Cultural Property and Heritage Collections and Heritage Collections

“

Manage any Cultural Heritage conservation project with complete confidence after completing this university program"

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07
