01 Welcome

This 100% online university program focuses on blockchain technology and the decentralized finance ecosystem, with a specific focus on Ethereum. Through a variety of multimedia educational resources, from case studies to in-focus videos, students will gain a comprehensive understanding of the architecture and functionality of the Ethereum network and how it has transformed the financial sector. The world of DeFi will be explored, with a detailed overview of the fundamentals, projects and protocols of this innovative technology. For all these reasons, this course is designed to prepare students to take advantage of the opportunities offered by the blockchain and DeFi ecosystem. All this, in just 6 weeks of online study and with the endorsement and academic prestige of TECH, the world's best online university.

Postgraduate Certificate in Ethereum. DeFi Basis.
TECH Technological University

“

With this Postgraduate Certificate you will learn the ins and outs of DeFi finance, a blockchain-based system that eliminates the need for approval on transactions”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the *Relearning* methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve *soft skills* and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

The main objective of this 100% online Postgraduate Certificate is to give students a solid understanding of Ethereum and its role in the decentralized finance ecosystem (DeFi). Through the study of the architecture and functionality of the Ethereum network, students will be able to understand how blockchain technology has transformed the financial industry and how decentralized finance is changing the way business is done around the world. Students will also gain hands-on technical skills in implementing smart contracts and decentralized applications on the Ethereum network, which will equip them to take advantage of opportunities in the emerging world of decentralized finance.

“

At TECH we provide you with the best tools to maximize your educational progress. Do not hesitate and enroll today in this Postgraduate Certificate”

TECH makes the goals of their students their own goals too.
Working together to achieve them.

Postgraduate Certificate in Ethereum. DeFi Basis will enable students to:

01

Generate specialized knowledge about Ethereum

02

Analyze its operation

03

Manage all Ethereum environments

04

Master Ethereum wallets

05

Course Management

The teaching team of the 100% online Postgraduate Certificate dedicated to Ethereum and decentralized finance is composed of experts in blockchain technology and finance. The professors have been carefully selected for their industry experience and in-depth knowledge of Ethereum and DeFi. In addition, professors will be available to provide guidance and support to students in completing assignments and projects. Undoubtedly a unique opportunity to learn from the best.

“

TECH puts at your disposal the teaching of professional experts in decentralized finance and blockchain economics. This ensures that you will always learn from the best”

Management

Dr. Gil de la Guardia, Alberto

- ♦ Founding member of Le Crypto Club
- ♦ Co-director of several university programs related to Blockchain Technology and the Crypto world
- ♦ Doctorate in International Public Law at the Complutense University of Madrid
- ♦ Master's Degree in Financial Studies from CEU San Pablo University
- ♦ Master's Degree in Blockchain Technology and Bitcoin from the European University of Madrid
- ♦ Degree in Law from the University of Salamanca

Professors

Mr. Fernández Belando, David

- ♦ Founding partner of ADNBLOCK
- ♦ IBM *Blockchain Essentials*
- ♦ IBM *Blockchain Foundation Developer*
- ♦ Bitcoin and Blockchain Expert at European University of Madrid (UEM)
- ♦ Information Technology Engineer from the National University of Distance Education (UNED)

06

Structure and Content

The syllabus of this 100% online Postgraduate Certificate focuses on providing students with a comprehensive understanding of Ethereum, smart contracts, tokens and Ethereum networks. Students will learn about the architecture and operation of the Ethereum network, including its consensus protocol, programming languages and development tools. Smart contract design, token creation and network interoperability will also be addressed. The syllabus will include practical examples on how to build decentralized applications and smart contracts on the Ethereum network.

“

This program focuses on security as the basis for success, through the knowledge of the main protocols of the DeFi environment”

Syllabus

This educational program aims to provide students with a comprehensive understanding of the architecture and functionality of the Ethereum network, along with the essentials of decentralized finance.

Students will have the opportunity to study the impact blockchain technology has had on the financial industry, and how decentralized finance is transforming the sector. The Postgraduate Certificate will cover the fundamentals of DeFi, including the projects and protocols that have been developed in the industry.

Through in-depth videos, discussions and practical exercises, the student will acquire technical skills in the implementation of smart contracts and decentralized applications on the Ethereum network.

For all these reasons, this Postgraduate Certificate is ideal for those interested in exploring blockchain technology and decentralized finance, and for those seeking a solid understanding of Ethereum and its impact on the financial industry.

This Postgraduate Certificate is developed over 6 weeks and is divided into 1 module:

Module 1

Ethereum: DeFi Basis

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Certificate in Ethereum. DeFi Basis in a completely online way. During the 6 weeks of the specialization, the student will be able to access all the contents of this program at any time, which will allow the students to self-manage their study time.

A unique educational experience, key and decisive to boost your professional development and make the definitive leap.

Module 1. Ethereum. DeFi Basis

1.1. Ethereum Basics

- 1.1.1. Ethereum
- 1.1.2. *Ethereum Yellow paper*
- 1.1.3. How Ethereum Works

1.2. Smart Contracts

- 1.2.1. Analysis of the Main *Smart Contracts*
- 1.2.2. Ethereum Deployment
- 1.2.3. *Smart Contracts* in DeFi

1.3. Tokens

- 1.3.1. ERC20 Tokens
- 1.3.2. ERC720 Tokens (nft tokens)
- 1.3.3. Other Token Standards

1.4. Consensus Model

- 1.4.1. Ethereum Consensus
- 1.4.2. Ethereum from POW to POS
- 1.4.3. POW Impact on DeFi

1.5. Ethereum Networks

- 1.5.1. Main Net
- 1.5.2. Test Net
- 1.5.3. Private Net

1.6. Ethereum Programming

- 1.6.1. Available Compilers
- 1.6.2. *Solidity* Applied to DeFi
- 1.6.3. Ganache and its Utilities

1.7. Ethereum Components

- 1.7.1. Ethereum Virtual Machine
- 1.7.2. Accounts and Addresses
- 1.7.3. Ether the DeFi Currency

1.8. Ethereum DAOs and DAPPs

- 1.8.1. DAOs
- 1.8.2. Dapps
- 1.8.3. Main DAPPs in DeFi

1.9. Oracles

- 1.9.1. The Oracles
- 1.9.2. Oracle Types
- 1.9.3. Oracle Analysis

1.10. Ethereum Wallets

- 1.10.1. Types of Ethereum Wallets
- 1.10.2. Metamask
- 1.10.3. Advanced Use of DeFi Wallets

Don't miss the opportunity and dive into the knowledge of Ethereum and decentralized finance with this TECH Postgraduate Certificate. It is the most complete in the educational scene"

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

08

Our Students' Profiles

The Postgraduate Certificate is aimed at University Graduates who have previously completed any of the following degrees in the field of Social and Legal Sciences, Administration and Economics.

The diversity of participants with different academic profiles and from multiple nationalities makes up the multidisciplinary approach of this program.

The Postgraduate Certificate may also be taken by professionals who, being university graduates in any area, have two years of work experience in the field of Blockchain and economic consulting.

“

The only requirement you must meet to get the most out of this Postgraduate Certificate is to want to master crypto investment models and succeed in the financial environment of digital assets”

Average Age

Between **35** and **45** years old

Andrea Suárez Martín

Economist

"In today's world, keeping up to date and knowing how Ethereum networks work has become crucial for any economist. That is why I enrolled in this course and I highly recommend it. It contains a high-quality syllabus and the teachers are excellent"

09

Impact on Your Career

The cryptocurrency market is booming, so the demand for professionals who master this field, specifically Bitcoin networks, has grown exponentially. For this reason, the graduate who accesses this Postgraduate Certificate will be guaranteed a successful working future within the decentralized digital finance. And the fact is that, having in your resume a distinctive as this program, endorsed by a great university of international prestige as TECH, will allow you to stand out, without a doubt, in any job interview.

“

A program that, thanks to its very high level, will mark a before and after in your professional career as an expert in decentralized finance”

This is the best program to specialize in buying and selling digital assets and increase your earnings considerably. Are you going to let this opportunity pass by?

Are you ready to take the leap?

Excellent professional development awaits you.

Postgraduate Certificate in Ethereum. DeFi Basis of TECH is an intensive program that prepares you to face challenges and business decisions in the field of Economics and Blockchain. The main objective is to promote your personal and professional growth. Helping you achieve success.

If you want to improve yourself, make a positive change at a professional level, and network with the best, then this is the place for you.

The mastery you will acquire of NFT trading will shape you as a reputable crypto professional in today's business environment.

Time of Change

Salary increase

This program represents a salary increase of more than **27.42%** for our students.

10

Benefits for Your Company

This Postgraduate Certificate has been designed to enable professionals to develop the skills of a top-level expert in crypto-economy trading. Thanks to the course, graduates will acquire a unique set of skills that will enable them to act in a feasible, arduous and successful way in any type of situation, including the most complex ones. In addition, you will develop into a highly skilled manager capable of taking on any Blockchain, DeFi and Ethereum related project with confidence and leadership.

“

After completing the assessments of this Postgraduate Certificate you will be positioned as an expert in Ethereum networks. This will propel your company to unprecedented success”

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R & D or business development of your company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11

Certificate

The Postgraduate Certificate in Ethereum. DeFi Basis guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your Postgraduate Certificate without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Ethereum. DeFi Basis** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Ethereum. DeFi Basis**

Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
