01

Welcome

The implementation of Full System in Lean Manufacturing has revolutionized efficiency and productivity in companies. With a comprehensive focus on waste elimination and continuous improvement, this methodology has managed to optimize manufacturing processes and reduce production times. By integrating all areas and standardizing practices, we have been able to maximize quality and minimize costs. This knowledge must be learned by professionals to approach the various challenges of the labor field, so TECH has launched the following 100% online program, full of audiovisual resources, complementary readings and practical exercises developed with the Relearning methodology.

Postgraduate Certificate in Full System Implementation in Lean Manufacturing.
TECH Technological University

“

A first-rate academic compendium specially designed to bring you up to date in a field with a high professional demand"

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the *Relearning* methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level"

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

To guarantee a rigorous training focused on the demands of the labor field, TECH has combined the best academic content with the innovative Relearning methodology. In this way, as the professional advances in the development of the program, they will acquire, through real cases and simulations, essential knowledge that will lead them to enhance their profile. In addition, you will have access to audiovisual resources and complementary readings, with access to valuable and high-impact information.

“

*Upon completion of this program,
you will be able to lead work groups
and new technological tools”*

**TECH makes the goals of their students their own goals too.
Working together to achieve them.**

The Postgraduate Certificate in Full System Implementation in Lean Manufacturing will qualify the student to:

01

Distinguish the different types of industrial processes in which it is possible to act

02

Develop the tools and techniques used in Lean Manufacturing quality management.

03

Analyze statistical methods of process control and root cause analysis

04

Evaluate organizational, operational and management systems, based on Operational Excellence and High Performance dynamics: LEAN

05

Structure and Content

The syllabus of this program has been designed by TECH together with its team of experts in the business sector. Over the course of 6 weeks, students will be presented with the most up-to-date and rigorous information on Full System Implementation in Lean Manufacturing. The professional will be able to access all this material from any device with an internet connection, at their preferred time and from any place they wish.

“

TECH will present you with the best academic content through innovative, high-impact technologies”

Syllabus

This program is a conglomerate of valuable information that contains the most up-to-date industry knowledge and presents it through audiovisual resources, additional reading material and practical exercises using the Relearning methodology. In this way, students will be able to acquire new skills and improve their professional profile.

During the next 6 weeks, students will have access to study material developed by TECH and its team of professors, which will provide essential knowledge to apply in their professional life.

In addition, the program is offered completely online, allowing students to access the content from any device with an Internet connection, adapting to their own schedule and without the need to travel to a physical location.

In summary, this academic program provides an opportunity designed specifically for those who have prior knowledge or wish to enter the business field in Lean Manufacturing and Full System Implementation. It adapts to the needs of both the student and the company, combining them in a rigorous and updated curriculum.

This Postgraduate Certificate is developed over 6 week and is divided into 1 module:

Module 1

Pull system: implementation of a demand-driven production system to control production and minimize inventory

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Certificate in Full System Implementation in Lean Manufacturing completely online. During the 6 weeks of the specialization, the student will be able to access all the contents of this program at any time, which will allow the students to self-manage their study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Pull system: implementation of a demand-driven production system to control production and minimize inventory

1.1. Pull System. Fundamentals

- 1.1.1. Pull Flow System: the fourth principle of Lean Thinking
- 1.1.2. Push vs. Pull processes
- 1.1.3. Stability, Flexibility, Synchronization, Concentration

1.2. Demand

- 1.2.1. Types of demand
- 1.2.2. Takt Time, Production Time, Lead Time
- 1.2.3. Production + Logistics Contract

1.3. Flows

- 1.3.1. End-to-End: from suppliers to customers
- 1.3.2. Logistics + Production Connection
- 1.3.3. Supply routes

1.4. Machines, Equipment and Lines

- 1.4.1. Logistics train
- 1.4.2. Containers
- 1.4.3. Shelving

1.5. Materials

- 1.5.1. Warehouses
- 1.5.2. Supermarkets
- 1.5.3. Line edge

1.6. Person

- 1.6.1. Pull Flow system managers
- 1.6.2. Logistics and production operators
- 1.6.3. The "Mizusumashi" ("Water spider")

1.7. Information

- 1.7.1. Heijunka (Leveling): Leveling box + Logistics box
- 1.7.2. Kanban
- 1.7.3. Batch Conformer + Sequencer

1.8. Lean Pull Flow System

- 1.8.1. Balanced
- 1.8.2. On-line sequencing
- 1.8.3. Lean support tools: VSM, OEE, Standard Work, One-point-lesson, Andon

1.9. Examples of Pull Flow System applications

- 1.9.1. Peculiarities of a Project vs. a Process
- 1.9.2. The value stream of a project
- 1.9.3. Analysis of the current state and design of the future

1.10. Pull system: Design, Implementation and Improvement of Production Processes. Practical Application

- 1.10.1. Design of a pull system
- 1.10.2. Implementation of the pull flow system
- 1.10.3. Improvement of information in production processes

You will face real and simulation cases, acquiring a previous knowledge of the requirements of the field"

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The Postgraduate Certificate is aimed at Graduates, Diploma Holders and University Graduates who have previously completed any of the following programs in the fields of Social and Legal Sciences, Administration and Economics.

This program uses a multidisciplinary approach as the students have a diverse set of academic profiles and represent multiple nationalities.

Professionals who, being university graduates in any area, have two years of work experience in the field of Full System in Lean Manufacturing, can also take the Postgraduate Certificate.

“

*At the end of this program you will
be one step closer to your goals"*

"The Postgraduate Certificate in Full System Implementation in Lean Manufacturing has been a transformative experience in my career. Thanks to its practical and up-to-date approach, I was able to acquire the necessary tools to optimize the production processes in my company and achieve a significant increase in efficiency and quality"

08

Course Management

At its highest academic level, TECH has selected for the direction of this Postgraduate Certificate an active faculty with several years of experience in the Implementation of Full System in Lean Manufacturing. These are respected and prestigious professionals from the business sector who, in addition to standing out in their field of action, are recognized for their commitment to the new generations by participating in this professional training program.

“

The best professionals in the area gathered in the same program to provide you with the keys to the Full System in business processes”

Management

Mr. Jover Miravittles, Luis

- ♦ President and Founding Partner Grupo Quarck, S.L. Founding Partner
- ♦ Senior Partner in LOGIXS
- ♦ Vice President of €-Corp. S.L
- ♦ IQS Executive Education Director
- ♦ Associate Professor at IE Business School
- ♦ Coordinator of the Master's Degree in Integral Business Management at the Universidad Iberoamericana in Mexico City
- ♦ Advisor to the employers' association Cecot
- ♦ Chemical Engineer at the Chemical Institute of Sarria (IQS)
- ♦ Master in Business Administration MBA IESE
- ♦ Member of the Hispack organizing committee

Professors

Mr. Josep Antoni Aguilar

- ♦ Founder and President of Actio Crealor Consulting
- ♦ Country Manager of The Kaizen Institute
- ♦ Operations & SCM Consultant
- ♦ Production Manager at Magna International
- ♦ IQS Executive Education
- ♦ Professor in EUNCET Business School
- ♦ Graduate in Business Administration from the University of Lincoln

09

Impact on Your Career

Taking the Postgraduate Certificate in Full System Implementation in Lean Manufacturing has a significant impact on a professional's career, as it provides the skills and knowledge necessary to improve production processes in your company and increase its efficiency. In addition, this university certification is highly valued in the industrial sector, which increases the employability of the professional and makes him or her more competitive in the labor market.

“

This program will not only broaden your professional outlook, but will give you tools for the rest of your career"

Are you ready to take the leap?

Excellent professional development awaits you

TECH's Postgraduate Certificate in Full System Implementation in Lean Manufacturing is an intensive program that prepares you to face challenges and business decisions in the field of Full System. The main objective is to promote your personal and professional growth. Helping you achieve success.

If you want to improve yourself, make a positive change at a professional level, and network with the best, then this is the place for you.

You will develop broad intellectual faculties for business decision making.

You will stand out in a booming sector with great future projection.

Time of Change

Type of change

Salary increase

This program represents a salary increase of more than **27%** for our students

10

Benefits for Your Company

Having a specialist who has completed the Postgraduate Certificate in Full System Implementation in Lean Manufacturing provides numerous benefits to companies. This professional has the necessary skills to identify and eliminate waste in production processes, optimizing efficiency and reducing costs. In addition, their knowledge in the implementation of Lean practices allows them to improve product quality and customer satisfaction.

“

A program that you can take at any time of your choice, without having to meet pre-established schedules”

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The manager can work on a current project or develop new projects in the field of R&D or Business Development within their company.

06

Increased competitiveness

This Postgraduate Certificate will equip your professionals with the skills to take on new challenges and therefore drive the organization forward.

11

Certificate

The Postgraduate Certificate in Full System Implementation in Lean Manufacturing guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Full System Implementation in Lean Manufacturing** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Full System Implementation in Lean Manufacturing**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
