01 Welcome

Kaizen is a continuous improvement philosophy in Lean Manufacturing that focuses on eliminating waste and optimizing processes constantly and systematically. It is important because it enables greater efficiency and improves product quality, while reducing costs and increasing customer satisfaction. It also promotes a culture of continuous improvement in the organization and encourages the active participation of employees in identifying and solving problems. In a constantly evolving business environment, it is crucial to stay up-to-date on new kaizen techniques and approaches to ensure long-term competitiveness and success. For this reason, TECH has launched the following program, which includes audiovisual resources, complementary readings and practical exercises developed with the Relearning methodology.

Postgraduate Certificate in Kaizen in Lean Manufacturing.
TECH Technological University

“

You will delve into the statistical methods of Lean Manufacturing Process Control”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the *Relearning* methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level"

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

This program has been designed to bring together the most up-to-date academic content in the industry with a high-impact methodology that enables the acquisition of new knowledge and skills. Therefore TECH guarantees that, after completing the Postgraduate Certificate, the student will have updated their knowledge of Kaizen in Lean Manufacturing, having also acquired new competencies and skills to offer their customers the best business option.

“

You will achieve your goals thanks to the academic tools TECH has for you"

TECH makes the goals of their students their own goals too.
Working together to achieve them.

The Postgraduate Certificate in Kaizen in Lean Manufacturing will enable the student to:

01

Analyze and be able to distinguish the lean philosophy from other approaches to operations improvement

02

Identify any waste in the company's processes

03

Develop the tools and techniques used in Lean Manufacturing quality management

04

Establish the keys to implement and sustain a Kaizen culture in the company

05

Evaluate organizational, operational and management systems, based on Operational Excellence and High Performance dynamics: LEAN

06

Identify production equipment efficiency problems

05

Structure and Content

Having identified the demands and needs of the labor field, TECH and its team of specialists have designed the program's syllabus. This is a high-impact academic compendium that presents up-to-date, cutting-edge information on Kaizen in Lean Manufacturing. This knowledge will be taught over 6 weeks, enough time for the student to be trained correctly through a 100% online format and with the Relearning methodology.

“

You will have access to high-impact audiovisual materials such as interactive videos and dynamic lectures"

Syllabus

This TECH program is an intensive program that prepares you to face challenges and business decisions in the field of Kaizen in Lean Manufacturing. The content is designed to promote the development of managerial skills that allow you to make decisions with greater rigor in uncertain environments.

Over the course of 150 hours, the student analyzes a plethora of practical cases through individual and team work.

It is, therefore, a real immersion in real business situations.

A plan designed for you, focused on improving your career and preparing you to achieve excellence in leadership and business management. In addition to this, it is developed in a 100% online format, easily accessible from any device with internet connection and can be developed in the time of preference of each person.

This Postgraduate Certificate takes place over a 6-week period and is divided into into 1 module:

Module 1

Continuous improvement, Kaizen

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Certificate in Kaizen in Lean Manufacturing completely online.

Throughout the 6 weeks of the program, you will be able to access all the program contents at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Continuous improvement, Kaizen

1.1. Continuous Improvement and Kaizen in Lean Manufacturing

- 1.1.1. Continuous improvement and Kaizen
- 1.1.2. The PDCA/PDSA cycle. Comparison of problem solving methods
- 1.1.3. Encouraging the participation of the entire organization in kaizen

1.2. Implementation of the PDCA/ PDSA cycle

- 1.2.1. Plan
- 1.2.2. Do
- 1.2.3. Check/Study
- 1.2.4. Act
- 1.2.5. Application Examples

1.3. Implementation of "6M" to identify opportunities for improvement

- 1.3.1. Method Analysis
- 1.3.2. Machine Analysis
- 1.3.3. Materials Analysis
- 1.3.4. Measurement system analysis
- 1.3.5. Analysis of the external environment
- 1.3.6. Analysis of the problems generated by People?

1.4. Statistical Methods of Process Control

- 1.4.1. Process control and statistical methods in process control
- 1.4.2. Statistics for process control
- 1.4.3. Common statistical methods in process control

1.5. Causal Analysis: Data Science

- 1.5.1. Ishikawa Diagram
- 1.5.2. 5 reasons
- 1.5.3. Other techniques for root cause analysis

1.6. Application of the 5 S's in continuous improvement

- 1.6.1. Seiri (Classification): Elimination of unnecessary elements
- 1.6.2. Seiton (Order): Workplace organization
- 1.6.3. Seiso (Cleaning): Maintaining a clean and orderly work environment
- 1.6.4. Seiketsu (Standardization): Establishment of standards and procedures
- 1.6.5. Shitsuke (Discipline): Maintenance of standards and continuous improvement

1.7. Continuous improvement and IoT

- 1.7.1. Real-time data collection for process analysis
- 1.7.2. Process automation to reduce variability and improve quality
- 1.7.3. Efficiency improvement and cost reduction through remote process monitoring

1.8. Sustaining the Kaizen culture in the long term

- 1.8.1. Long-term commitment of senior management
- 1.8.2. Integration of Kaizen as part of the company's culture and not as an add-on/ accessory
- 1.8.3. Measuring results and long-term incentives for improvements, adapting them to the organizational context

1.9. Practical examples of continuous improvement in different industries

- 1.9.1. Example in the automotive industry
- 1.9.2. Example in the food industry
- 1.9.3. Example in the construction supply industry

1.10. Future trends in continuous improvement

- 1.10.1. Development of digital tools and platforms for continuous improvement
- 1.10.2. Incorporation of new project management approaches: User-centered design and evidence-based development
- 1.10.3. Incorporating emotional intelligence in continuous improvement

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The Postgraduate Certificate is aimed at Graduates, Diploma Holders and University Graduates who have previously completed any of the following programs in the fields of Social and Legal Sciences, Administration and Economics.

This program uses a multidisciplinary approach as the students have a diverse set of academic profiles and represent multiple nationalities.

Professionals who, being university graduates in any area, have two years of work experience in the field of Kaizen in Lean Manufacturing, can also take the Postgraduate Certificate.

“

A first-rate academic compendium specially designed to bring you up to date in a field with a high professional demand"

Average Age

Between **35** and **45** years old

Salary increase

This program represents a salary increase of more than **27%** for our students

10

Benefits for Your Company

This program contributes to elevating the organization's talent to its maximum potential through the instruction of high-level leaders. In addition, participating in this university option is a unique opportunity to access a powerful network of contacts in which to find future professional partners, customers or suppliers.

“

In the digital era, managers must integrate new processes and strategies that bring about significant changes and organizational development. This is only possible through university training and updating"

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R&D or Business Development of your company.

06

Increased competitiveness

This Postgraduate Certificate will equip your professionals with the skills to take on new challenges and therefore drive the organization forward.

11

Certificate

The Postgraduate Certificate in Kaizen in Lean Manufacturing guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Kaizen in Lean Manufacturing** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Kaizen in Lean Manufacturing**

Official N° of Hours: **150 h.**
