01 Welcome

In the fields of art and collecting, NFTs have enabled digital creators to obtain financial benefits and recognition for their work. Through the implementation of blockchain technology, Non-Fungible Tokens ensure the ownership and authenticity of digital artworks, thus solving a previous obstacle in the virtual environment. With this in mind, it is important for business professionals to not only know how to identify buying and selling opportunities, but also to identify the authenticity of items distributed throughout the digital ecosystem. That is why TECH has developed a 100% online program that allows students to coordinate their daily activities with their learning, as they are not subject to fixed schedules.

TECH Global University

“

*You will increase your digital creativity
and learn about the fascinating world
of NFTs for Art and Collectibles”*

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success”

At TECH Global University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (postgraduate learning methodology with the best international valuation) with the Case Study. Tradition and vanguard in a difficult balance, and in the context of the most demanding educational itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Global University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

The purpose of this Postgraduate Certificate is to provide business professionals with tools and opportunities that they will be able to take advantage of. By acquiring knowledge in this field, professionals will be able to understand and take advantage of the monetization, recognition, and marketing possibilities offered by NFTs, both for digital artists and collectors. In addition, this qualification will allow students to be at the forefront of technological and artistic trends, which can generate new business opportunities and broaden their professional profile in today's market.

“

*You will discover the impact that
Non-Fungible Tokens have on the
art market and their influence on
the digital environment”*

TECH makes the goals of their students their own goals too
Working together to achieve them

The **Postgraduate Certificate in NFTs for Art and Collectibles** will enable students to:

01

Analyze the scope of the Fintech revolution

02

Identify the origin and reasons for the rise of Fintechs

03

Observe the differential value provided by Fintechs

04

Develop the concept of Tokenization

05

Analyze the tokenization process

06

Identify which projects can be tokenized

08

Provide an in-depth understanding of Blockchain technology and its implementation in asset tokenization

09

Analyze the technical specifications of Tokens and their standards, Blockchain types, security in Blockchain networks, smart contracts, success stories and the advantages and disadvantages of asset tokenization

07

Establish the advantages offered by tokenization

10

Apply the most advanced concepts and tools to carry out transactions of tokens and cryptocurrencies in a safe and efficient way

05

Structure and Content

This qualification offers high-level content that will allow business professionals to explore different aspects of the art industry in depth, addressing relevant changes and analyzing specific examples of Non-Fungible Tokens and their value in the market. The application of NFTs in areas such as music, sports, and video games will also be examined in detail.

“

You will discover how Non-Fungible Tokens are expanding the collectibles market and opening up new opportunities in the virtual property market”

Syllabus

The program will offer cutting-edge multimedia resources in a 100% online format, allowing students to access the course from anywhere and at any time, without schedule restrictions that interfere with other daily activities. In addition, the program consists of a syllabus of excellence that provides professionals with the fundamental knowledge to function confidently in the digital environment.

During the 180 hours of this Postgraduate Certificate, participants will thoroughly explore NFTs, highlighting their key features and presenting popular examples of their application. In addition, their influence on the art world will be analyzed, examining changes in the industry and assessing the artistic non-fungible tokens present in the market, as well as their impact on creators.

Their potential as collectibles will also be addressed, presenting notable examples and their value in digital marketing. Finally, the social impact of NFTs will be explored, including their benefits and their ability to create communities.

To achieve this, TECH has developed a program that combines its modality with the implementation of Relearning, which will allow students to acquire knowledge more quickly and effectively. In addition, students will have access to a virtual library available 24 hours a day, making it easy for them to log in to the platform anytime, anywhere.

This Postgraduate Certificate takes place over 6 weeks and consists of 1 module:

Module 1

Art and Collectibles NFTs

Where, When and How is it Taught?

TECH gives you the opportunity to complete this Postgraduate Certificate in NFTs for Art and Collectibles entirely online. During the 6 weeks of the specialization, the student will be able to access all the contents of this program at any time, which will allow them to self-manage their study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Art and Collectibles NFTs

1.1. NFTs

- 1.1.1. NFTs
- 1.1.2. Key Features
- 1.1.3. Examples of Popular NFTs

1.2. NFTs and Art World

- 1.2.1. Changes in the Art Industry
- 1.2.2. Examples of Art NFTs and their Market Value
- 1.2.3. NFT Impact in Artists

1.3. NFTs as Collectibles

- 1.3.1. The NFTs as Collectibles
- 1.3.2. Examples of Popular Collectible NFTs and their Market Value
- 1.3.3. NFTs and their Potential to Expand the Market for Collections

1.4. Social Impact of NFTs

- 1.4.1. Social Benefits of NFTs
- 1.4.2. NFTs for Communities Creation
- 1.4.3. Opportunities NFTs Offer to the World of Art and Culture

1.5. Advantages and Disadvantages of NFTs

- 1.5.1. The End of Counterfeiting
- 1.5.2. Vulnerabilities in the Security of NFTs
- 1.5.3. NFTs and Its Impact on the Environment

1.6. Technology behind NFTs

- 1.6.1. Blockchain and its Role in the Creation of NFTs
- 1.6.2. Smart Contracts and its Use in the Creation of NFTs
- 1.6.3. Creation and Verification of NFTs

1.7. Creation of NFTs and Royalties

- 1.7.1. Copyrights
- 1.7.2. Secondary Market Control
- 1.7.3. Transparency and Monitoring

1.8. NFT Markets

- 1.8.1. Market Platforms
- 1.8.2. Purchasing Process
- 1.8.3. Value and Demand

1.9. NFTs in Different industries

- 1.9.1. NFTs in the Music Industry
- 1.9.2. NFTs in the Video Sports Industry
- 1.9.3. NFTs in the Video Game Industry

1.10. The Future of NFTs

- 1.10.1. Trends in the of NFTs Market
- 1.10.2. Changes in the Near Future
- 1.10.3. NFT Impact in Global Economy

“

With the Relearning method you will learn complex concepts with less effort and more performance”

06

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

07

Our Students' Profiles

The Postgraduate Certificate is intended for university graduates with prior degrees in Computer Science, Finance, or Business Administration.

The diversity of participants with different academic profiles and from multiple nationalities makes up the multidisciplinary approach of this program.

The Postgraduate Certificate can also be taken by professionals who, being university graduates in any area, have two years of work experience in the field of Tokenization, NFTs, and digital currencies.

“

You will be at the forefront of technology and learn about the advantages and disadvantages of NFTs in today's market”
