01 Welcome

Scope management of a technology project aims to ensure that the work has each and every element required for successful completion of operations. Therefore, scope management must define and control what is and is not included in the project. To be able to do this, the professional must have a series of specific competencies that will help them to efficiently manage the project and, for this reason, training courses such as these are essential for the student.

The tools that the professional will acquire with the completion of this academic program will add value to the student's curriculum and will make them a highly important asset for both national and international companies.

Postgraduate Certificate in Scope Management in Technology Project Management.
TECH Technological University

“

This academic program will lay the theoretical foundation for you to understand the importance of managing the scope of a technology project”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+
executives trained each year

200+
different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH you will have access to Harvard Business School case studies"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

The academic program that TECH proposes on this occasion aims to provide the professional with a series of competencies necessary for the efficient management of the scope of technological projects. To achieve this objective, a series of topics full of theoretical and practical content have been designed to help students put into action what they have learned. Thus, after the completion of this program, you will know all the aspects that influence the success of a technological project, from the point of view of the scope.

“

TECH's main objective is to help students grow in their professional facet. To this end, we generate quality programs with a special focus on practical application"

TECH makes the objectives of its students its own.
We work together to achieve them.

The Postgraduate Certificate in Scope Management in Technology Project Management will enable the student to

01

Master advanced business management tools to identify and anticipate opportunities, allocate resources and organize information

02

Select, motivate and manage people, make decisions, achieve proposed objectives and evaluate results

03

Provide a global and strategic vision of all operational departments of the company

04

Assume responsibilities and think in a transversal and integrative way to analyze and solve situations in uncertain environments

05

Structure and Content

This academic program is based on the most innovative and complete teaching methodology in the market. To this end, this Postgraduate Certificate in Scope Management in Technology Project Management at TECH will be taught in an online format to provide the student with the ability to study where and when they want. A program that takes place over 6 weeks and is intended to be a unique and stimulating experience that lays the foundation for your success as a Technology Project Manager.

“

You will study from ten intensive subjects that will teach you everything you need to practice in this exciting field"

Syllabus

Scope management of a technology project is understood as all those actions necessary to ensure that the project includes the activities and processes that ensure its viability and compliance. The main objective of project scope management is to define and control what is and is not included in the project.

To address this, the professional must have prior knowledge that enables them to work successfully in the technological area. For this reason, this TECH Postgraduate Certificate focuses on providing the professional with in-depth competencies in terms of the fundamentals to ensure scope management, as well as the planning elements necessary to meet the objectives set by management.

All this will be taught on the basis of high-quality contents, designed in a theoretical and practical format and devised from an innovative teaching methodology based on the acquisition of eminently practical skills.

The syllabus will provide a theoretical deepening in the definition of the elements that influence the management of the scope of a technological project. The requirements, tools and techniques that are of great help in ensuring that the project is carried out according to the standards and the premises of quality and timeliness will be explained.

All this development will be carried out by professionals recognized and valued worldwide. In this way, the student learns from the best in the sector and is provided with the most effective learning system on the market and a stimulating and attractive Academic process.

One of the elements that make this Postgraduate Certificate unique is its 100% online design. In this way, the student will be able to study where and when they want, and always at the pace they desire. In this way we ensure that the student's academic efforts are fully compatible with his or her personal and professional life.

This Postgraduate Certificate takes place over **6 weeks** and is divided into the following syllabus:

Module 1

Technology Project Scope Management

Where, When and How is it Taught?

TECH offers the student the possibility to develop this program completely online Throughout the 6 weeks of the duration of the training, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time...

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Technology Project Scope Management

1.1. Introduction to Scope Management

- 1.1.1. Scope of the Project
- 1.1.2. Scope of the Product

1.2. Fundamentals and Scope Management

- 1.2.1. Basic Concepts
- 1.2.2. Baseline of the Scope

1.3. Benefits of Scope Management

- 1.3.1. Stakeholder Expectation Management
- 1.3.2. Scoop Creep and Gold Plating

1.4. Considerations for Adaptive environments

- 1.4.1. Types of Adaptive Projects
- 1.4.2. Scope Definition in Adaptive Projects

1.5. Planning of Scope Management

- 1.5.1. Scope Management Plan
- 1.5.2. Requirements Management Plan
- 1.5.3. Tools and Techniques

1.6. Gather Requirements

- 1.6.1. Requirements Gathering and Negotiation
- 1.6.2. Tools and Techniques

1.7. Definition of Scope

- 1.7.1. Project Scope Statement
- 1.7.2. Tools and Techniques

1.8. Creation of the Work Breakdown Structure (WBS)

- 1.8.1. Work Breakdown Structure (WBS)
- 1.8.2. Types of EDT
- 1.8.3. Rolling Wave
- 1.8.4. Tools and Techniques

1.9. Scope Validation

- 1.9.1. Quality Vs Validation
- 1.9.2. Tools and Techniques

1.10. Scope Control

- 1.10.1. Data and Information about Project Management
- 1.10.2. Types of Performance Reports
- 1.10.3. Tools and Techniques

07

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: Relearning.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the New England Journal of Medicine have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Business School we use the Harvard case method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a way of learning that is shaking the foundations of traditional universities around the world"

We are the first online university to combine Harvard Business School case studies with a 100% online learning system based on repetition.

A learning method that is different and innovative

This intensive program from TECH Technological University School of Business prepares students to face all the challenges in this area, both nationally and internationally. We are committed to promoting personal and professional growth, the best way to strive for success, that is why TECH uses Harvard case studies, with which we have a strategic agreement that allows us to provide our students with material from the best university the world.

“*You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”*

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Relearning Methodology

Our university is the first in the world to combine Harvard University case studies with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

They will complete a selection of the best business cases used at Harvard Business School. Cases that are presented, analyzed, and supervised by the best senior management specialists in Latin America.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

07

Our Students' Profiles

The Postgraduate Certificate in Scope Management in Technology Project Management is a program aimed at professionals with previous university degrees, who exercise their professional and managerial activity attached to the technological area. In this sense, this Postgraduate Certificate will be ideal for all those professionals who work as technology project managers and want to deepen in the management of the scope of the same.

“

You are just one click away from becoming a TECH student and starting to see your professional dreams start to come true"
