01 Welcome

Transmedia storytelling has allowed users to access multiple related products through multimedia platforms. This has been a key factor in building audience loyalty and involving them in the content. Taking all the benefits of this new way of understanding communication into account, it is necessary to understand that any company that does not adapt to the new times will eventually end up disappearing. For this reason, TECH Technological University proposes this program, where students will learn the ins and outs of a booming profession and be able to implement the appropriate strategies to ensure that their businesses continue on the path to success and stand out in a highly competitive sector.

Postgraduate Certificate in Transmedia Storytelling
TECH Technological University

“

Do you want your company to become one of the most renowned in transmedia communication? With this program, you'll be one step closer to achieving it”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+
executives trained each year

200+
different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

This Postgraduate Certificate in Transmedia Storytelling has been developed with the main objective of offering students specialized knowledge through which they will be able to understand the opportunities offered by this type of discourse in the field of communication. Therefore, at the end of the program, students will be able to direct transmedia projects for different sectors, attracting the public and inciting them to a specific action. Undoubtedly, a program that will mark a before and after in your professional development, that will increase your career advancement options.

“

Applying Transmedia Storytelling to your content will help you to offer a more participative product, which the audience has a lot to contribute"

TECH makes the goals of their students their own goals too.
Working together to achieve them.

This **Postgraduate Certificate in Transmedia Storytelling** enables students to:

01

Manage and know conceptually the field of transmedia Storytelling and understand its relevance in different professional fields (advertising, marketing, journalism, entertainment)

02

Acquire the fundamentals of transmedia creation, from narrative to production, dynamization in social communities and economic monetization

03

Master how transmedia storytelling is constructed and how it differs from traditional storytelling

04

Internalize, with the help of practical examples, the way to achieve audience involvement in a transmedia project

05

Structure and Content

Changes in communication have come to offer the public a higher quality and more specialized product, but also to allow greater interaction with the audience. In this context, the introduction of transmedia storytelling arises, which takes advantage of different media to create more complete user experiences. This program allows students to enter a booming sector, learning the key elements that they can later apply in their own company.

“

Using Transmedia Storytelling will be fundamental to reach a wider audience through different platforms. A technique you will have to use if you don't want to end up at the bottom of the industry”

Syllabus

Today, users have more platforms available to get information or to access advertising or entertainment content. For this reason, it is essential that content is of high quality, in order to attract the public and, above all, to build loyalty. In this context, transmedia content, capable of reaching the user through different media and offering them a more enriching experience, acquires great value.

In this Postgraduate Certificate in Transmedia Storytelling, students will learn about the origins of this concept and how it differs from the traditional formula. In addition, they will understand the importance of promoting the participatory culture that encourages transmediality and understand the fan phenomenon and audience implications. A very comprehensive syllabus that will give you an overview of the sector, essential to developing your own business.

One of the main advantages of this program is that it is taught 100% online, so students have the opportunity to choose when and where to study. This way, having a computer or mobile device with internet connection, you will be able to connect from anywhere in the world, taking advantage of every free moment to delve further into this field. Undoubtedly, students will have all the facilities at their disposal to be able to continue their learning without leaving aside their professional career or their private life.

This Postgraduate Certificate takes place over 6 weeks and it consists of 1 module:

Module 1

Transmedia Narratives

Where, when and how is it taught?

TECH offers the possibility of developing this Postgraduate Certificate in Transmedia Storytelling completely online. Over the course of 6 weeks, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

- 1.9.2. The Public, the Collective, the Crowd
- 1.9.3. Crowdsourcing and Crowdfunding

Understanding fan phenomenon will help you create specific content for them"

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

This Postgraduate Certificate in Transmedia Storytelling by TECH Technological University is aimed, especially, at business professionals who wish to turn their careers around by starting a communication business. Therefore, thanks to this course, they will be able to understand the novelties of this type of discourse, allowing them to apply it in innovative content creation through different formats and platforms.

“

*Reach the communication elite by applying
transmedia storytelling to your creations”*

Study hand in hand with the leading experts in transmedia storytelling”

International Guest Director

Magda Romanska's name is unmistakable in the field of Performing Arts and Media on an international scale. Along with other projects, this expert has served as Principal Investigator at Harvard University's metaLAB and chairs the Transmedia Arts Seminar at the renowned Mahindra Humanities Center. She has also developed numerous studies linked to institutions such as the Center for European Studies and the Davis Center for Russian and Eurasian Studies.

Her lines of work focus on the intersection of art, humanities, technology and transmedia storytelling. Within that encompassing framework, they also include multiplatform and metaverse dramaturgy, and the interaction between humans and Artificial Intelligence in performance. From his in-depth studies on these fields, he has created Drametrics, a quantitative and computational analysis of dramatic texts.

She is also the founder, executive director and editor-in-chief of TheTheatreTimes.com, the world's largest digital theater portal. She also launched Performap.org, an interactive digital map of theater festivals, funded through the Yale Digital Humanities Lab and an LMDA innovation grant. On the other hand, he has also been in charge of the development of the International Online Theatre Festival (IOTF), an annual global streaming theater festival, which so far has reached more than one million participants. In addition, this initiative has been awarded the Second International Culture Online Award for "Best Online Project", chosen among 452 other proposals from 20 countries.

Dr. Romanska has also been awarded the MacDowell, Apollonia and Lark Theatre Playwriting grants from the Time Warner Foundation. She has also received the PAHA Creative Award and the Elliott Hayes Award for Excellence in Playwriting. She has also received awards from the American Association for Theatre Research and the Polish Studies Association.

Dra. Romanska, Magda

- Principal Investigator at Harvard metaLAB
- Executive Director and Editor-in-Chief at TheTheatreTimes.com
- Research Associate at the Minda Center for European Studies in Gunzburg
- Research Associate of the Davis Center for Russian and Eurasian Studies
- Professor of Performing Arts at Emerson College
- Associate Professor at the Berkman Center for Internet & Society
- Ph.D. in Theatre, Film and Dance from Cornell University
- M.A. in Modern Thought and Literature from Stanford University
- Graduate of Yale School of Drama and the Department of Comparative Literature
- Chair of the Transmedia Arts Seminar at the Mahindra Humanities Center
- Member of the Advisory Board at Digital Theatre+

“

Thanks to TECH, you will be able to learn with the best professionals in the world”
