Index

01
Welcome

This intensive training aims to master the complete administration of servers, both VPS / dedicated servers and development environments, hosting different types of platforms and acquiring fluency in the use of Linux terminals, all of which is absolutely necessary for proper service administration and monitoring. There are no basic concepts; in the administration and preparation of a web server every command line, monitoring process and optimization parameter counts toward correctly operating a complete web service, including hosting external clients within the servers themselves. Throughout this program, students will also develop one of the most important parts of the administration involved, the security and backups, a fundamental security aspect on the Internet.

Postgraduate Certificate in Web Servers
TECH Technological University

TECH's value proposition is shaking the foundations of traditional business schools. It offers you the best specialization at the best price"

02
Why Study at TECH?

TECH es la mayor escuela de negocio 100% online del mundo. Se trata de una Escuela de Negocios de élite, con un modelo de máxima exigencia académica. Un centro de alto rendimiento internacional y de entrenamiento intensivo en habilidades directivas.

TECH es una universidad de vanguardia tecnológica, que pone todos sus recursos al alcance del alumno para ayudarlo a alcanzar el éxito empresarial"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+ executives trained each year

200+ different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+ | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH you will have access to Harvard Business School case studies"

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

"

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve *soft* skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04
Objectives

With this high-level training, professionals will find a unique opportunity to improve in a field of great importance, since they will learn how to develop a website correctly. In this way, they will become professional experts in different branches, so they will be able to control all areas of the company.

> *You will specialize in Web Servers under the guidance of professionals with years of experience in the sector and with the most innovative educational methodology"*

**TECH makes the goals of their students their own goals too.
We work together to help you achieve them**

The **Postgraduate Certificate in Web Servers** trains students to:

01 Establish a strategy for a web environment under development and production

04 Develop backups and a secure environment against external attacks

02 Install and manage a complete web hosting service

03 Fully optimize production web hosting services

05 Identify and solve problems and adversities in real environments

06 Develop a real high availability working environment

07 Determine the necessary parameters to create a cloud hosting service

08 Examine the different versions of operating systems that best suit your needs

09 Determine a web administration environment focused on external customers

10 Set up configurations for private/public networks

11 Create a complete hosting service for any type of website or platform

12 Examine security settings for anti-malware, viruses, brute force attacks and others

13 Analyzing a high security backup system with redundancy

14 Identify and solve problems in real environments

Structure and Content

TECH has designed this high-level training to fulfill the specialization needs of business professionals who wish to expand their knowledge toward website management, a booming field that demands qualified professionals. Thus, this Postgraduate Certificate will allow them to acquire specific knowledge that they can immediately apply to their work practice. And, to do so, they will use a totally online methodology so they can balance their studies with the rest of their daily obligations.

All the subjects and areas of knowledge have been compiled in a complete and absolutely up-to-date syllabus, in order to bring the student to the highest theoretical and practical level"

Syllabus

The Postgraduate Certificate in Web Servers at TECH Technological University is an intensive program that prepares students to face challenges and business decisions on a national and international level. Its content is designed to promote the development of managerial skills that enable more rigorous decision-making in uncertain environments.

Throughout 150 hours of study, students will study a multitude of practical cases through individual work, which will allow them to acquire the necessary skills to successfully develop in their daily practice. It is, therefore, an authentic immersion in real business situations.

This program deals with the different areas of a company in depth, and it is designed for managers to understand web servers from a strategic, international and innovative perspective.

A plan designed for students, focused on their professional development, which prepares them to achieve excellence in the field of information security management and administration. A program that understands your needs and those of your company through innovative content based on the latest trends, and supported by the best educational methodology and an exceptional teaching staff, which will provide you with the skills to creatively and efficiently resolve critical situations.

The program is carried out in six weeks and is divided into one module:

| Module 1 | Web Server Administration |

Where, When and How is it Taught?

TECH offers its students the opportunity to take this program completely online. Throughout the six weeks of training, they will be able to access all the program contents at any time, allowing them to self-manage their own study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Web Server Administration

1.1. Selecting a Work Environment
1.1.1. Operating Systems (Windows or Linux)
1.1.2. Distribution Differences

1.2. Installing and Configuring the Work Environment
1.2.1. Installing VirtualBox for Windows Development Environment
1.2.2. Installing Linux Visual Environment

1.3. Command Terminal
1.3.1. Directories and CHMOD Permissions
1.3.2. Service Analysis
1.3.3. Problem Detection and Analysis / LOGS
1.3.4. Resource Monitoring
1.3.5. Editors and Administration Commands

1.4. Networks
1.4.1. IP Theory and ISO/TCP Models
1.4.2. IP Utilities and Commands
1.4.3. Network and File Configuration
1.4.4. SCP, FTP, SAMBA, NFS Protocols and Services
1.4.5. DNS Service Installation and Configuration

1.5. Installation and Control Panels
1.5.1. Selecting an Adequate Control Panel
1.5.2. Installing cPanel
1.5.3. Installing Plesk
1.5.4. Installing Directadmin

1.6. Installing Core Web Services
1.6.1. Installing Apache
1.6.2. Installing Mysql
1.6.3. Installing MariaDB
1.6.4. Installing PHPmyadmin
1.6.5. Installing Exim / Dovecot

1.7. Optimizing Web Services, Databases and Email
1.7.1. Installing Nginx
1.7.2. Optimizing Apache
1.7.3. Optimizing PHP / PHP-FPM
1.7.4. Optimizing Mysql
1.7.5. Optimizing Exim

1.8. Backups in Production Environments
1.8.1. Backups
1.8.2. Planning a Secure Environment
1.8.3. Automating Backup Copies Systems
1.8.4. Data Redundancy and Security/Replication
1.8.5. Optimizing Secure Environments

1.9. Security
1.9.1. Dedicated/Virtual Server Security
1.9.2. Installing Monitoring Tools
1.9.3. Installing Firewalls
1.9.4. Anti-malware/Anti-virus Systems
1.9.5. Anti-Spam Mail

1.10. Problem Solving and Eventualities
1.10.1. Service Stop
1.10.2. Disk Errors in Production Environments
1.10.3. Monitoring and Delegating Services
1.10.4. Web Migration/Databases/e-mail/Files
1.10.5. Hacked Web Resolution
1.10.6. e-mail Problems
1.10.7. Server Not Responding (Rescue Mode)
1.10.8. Administrating and Monitoring Disc Space
1.10.9. Nmap and Tracert for Network Problem Detection

This program will open doors to a new professional world"

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Business School we use the Harvard case method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

" *At TECH, you will experience a way of learning that is shaking the foundations of traditional universities around the world"*

We are the first online university to combine Harvard Business School case studies with a 100% online learning system based on repetition.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This intensive program from TECH Technological University School of Business prepares students to face all the challenges in this area, both nationally and internationally. We are committed to promoting personal and professional growth, the best way to strive for success, that is why TECH uses Harvard case studies, with which we have a strategic agreement that allows us to provide our students with material from the best university the world.

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

Our university is the first in the world to combine Harvard University case studies with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

They will complete a selection of the best business cases used at Harvard Business School. Cases that are presented, analyzed, and supervised by the best senior management specialists in Latin America.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Our Students' Profiles

The Postgraduate Certificate in Web Servers is a program aimed at professionals with experience, but who believe in higher specialization as a way of improving on a personal and professional level. A unique opportunity to stand out in a sector with a promising future.
