# 01 Welcome

Optimal management of Financial Products is an indispensable aspect of maximizing the return on investments. Through the appropriate choice and detailed control of these instruments, it is possible to extract great economic benefits in the long term. For this reason, leading companies in the Finance sector require excellent specialists in this field to occupy important positions in order to achieve success in their financial operations. Faced with this situation, TECH has created this program, which will allow students to identify the best investment strategies in equity assets or delve into the management of pension funds and alternative investments. Completely online and without tight schedules will boost their professional growth in this field.

Postgraduate Diploma in Financial Products.  
TECH Technological University

“

*Identify the best strategies for managing pension or alternative investment funds and extract the maximum economic return from your financial operations"*

02

# Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

*TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"*

## At TECH Technological University

### Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

### The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

**95%** | of TECH students successfully complete their studies

### Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

**+100000**

executives prepared each year

**+200**

different nationalities

### Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

**+500**

collaborative agreements with leading companies

### Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

### Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

### Analysis

---

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

### Academic Excellence

---

TECH offers students the best online learning methodology. The university combines the Relearning method (postgraduate learning methodology with the best international valuation) with the Case Study. Tradition and vanguard in a difficult balance, and in the context of the most demanding educational itinerary.

### Economy of Scale

---

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

### Learn with the best

---

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

*At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"*

03

# Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

*We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”*

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

**01**

### A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time

*70% of students achieve positive career development in less than 2 years.*

**02**

*We give you the opportunity to study with a team of world-renowned teachers.*

# 04 Objectives

The Postgraduate Diploma in Financial Products has been designed with the main intention of providing students with state-of-the-art knowledge and skills in this field. Through this academic itinerary, you will delve into the techniques of investment in fixed and variable income assets or in the best strategies to undertake the management of Financial Products. This learning will be guaranteed through the achievement of the following objectives outlined by TECH.

“

*Be able to improve your financial investment decision-making in only 6 months of academic experience”*

**TECH makes the goals of their students their own goals too  
Working together to achieve them**

This **Postgraduate Diploma in Financial Products** will enable students to:

01

Acquire knowledge of the different types of fixed income assets, their valuation and the risks associated with fixed income investment, as well as an understanding of the term structure of interest rates and the risk premium

04

Develop skills in fixed-income portfolio management, both in active and passive investment strategies, and understand the impact of liquidity and other important risks in fixed-income management

02

Become familiar with the primary and secondary fixed-income market, including the issuance of new securities and the characteristics of issuance by public offering and auction

03

Understand the importance of credit rating and the credit rating process carried out by rating agencies

05

Learn about the IPO process and the advantages of going public and stock market operations, and gain knowledge about the functioning and operation of the stock market

06

Study international equity indices in developed and emerging countries and become familiar with thematic and sectoral indices

08

Learn about the different collective investment vehicles, such as mutual funds, SICAVs, real estate investment vehicles, and ETFs, and learn how to analyze and select investment funds

09

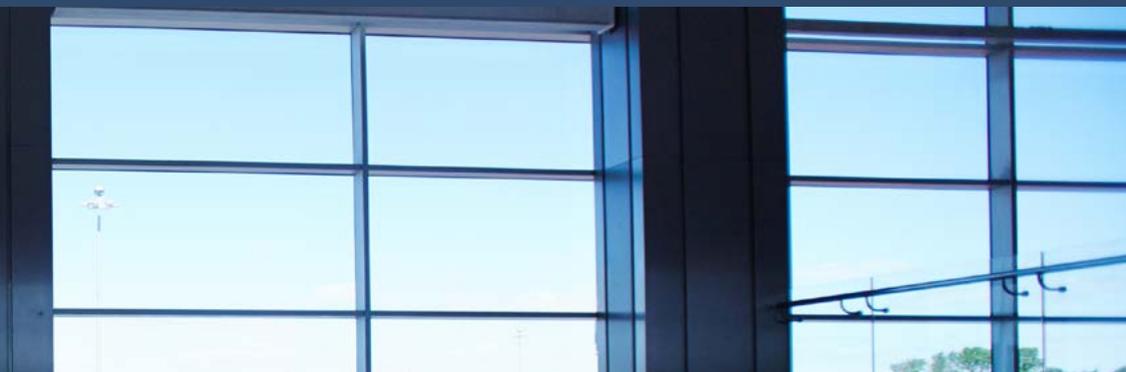

Acquire knowledge about insurance, its classifications, and pension plans and funds, as well as the associated tax incentives, retirement planning, and personal coverage

07

Understand the different schools of investing, including Value Investing and Growth and Quality Investing, and learn how to make investment decisions based on intrinsic and relative valuations

10

Familiarity with investments in banking products and other alternative investments, such as venture capital, commodity-linked products and tangible goods

05

# Structure and Content

The Postgraduate Diploma in Financial Products is taught in a 100% online mode that will enable students to combine their professional and personal obligations with their excellent learning. In addition, its wide variety of textual and multimedia didactic formats will allow you to adapt your study to your academic preferences, fully optimizing your learning.

“

*The 100% online modality of this program allows you to learn without having to give up your personal and professional obligations”*

## Syllabus

This TECH Postgraduate Diploma has been created with the aim of preparing students to deal competently with the challenges presented by the field of Financial Products management. Through it, they will develop a set of skills that will prepare them to make top-level decisions in this field of Finance.

Throughout 1,500 hours of instruction, students will work individually and in teams to analyze case studies, allowing them to identify completely real and up-to-date business situations.

This program focuses on deepening investment strategies in fixed-income and variable-income assets or on the state-of-the-art procedures to manage Financial Products. In this way, it will enable professionals to understand this branch of Finance from an innovative, strategic, and global perspective.

All this is with the primary objective of enabling students to achieve excellent managerial skills in this demanding sector. In addition, the program's educational quality will be guaranteed by its first-class didactic contents, its revolutionary academic methodology, and its prestigious teaching staff.

This Postgraduate Diploma takes place over 6 months and is divided into 3 modules:

### Module 1

Investment in fixed income assets

- 3.10.2. Commodity-Linked Products
- 3.10.3. Tangible goods

“

*Optimize your learning through a wide range of didactic formats, choosing the one that best suits your study preferences”*

06

# Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”*

*This program prepares you to face business challenges in uncertain environments and achieve business success.*

*Our program prepares you to face new challenges in uncertain environments and achieve success in your career.*

### A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

**“** *You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”*

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

## Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

*Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.*

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

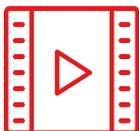

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

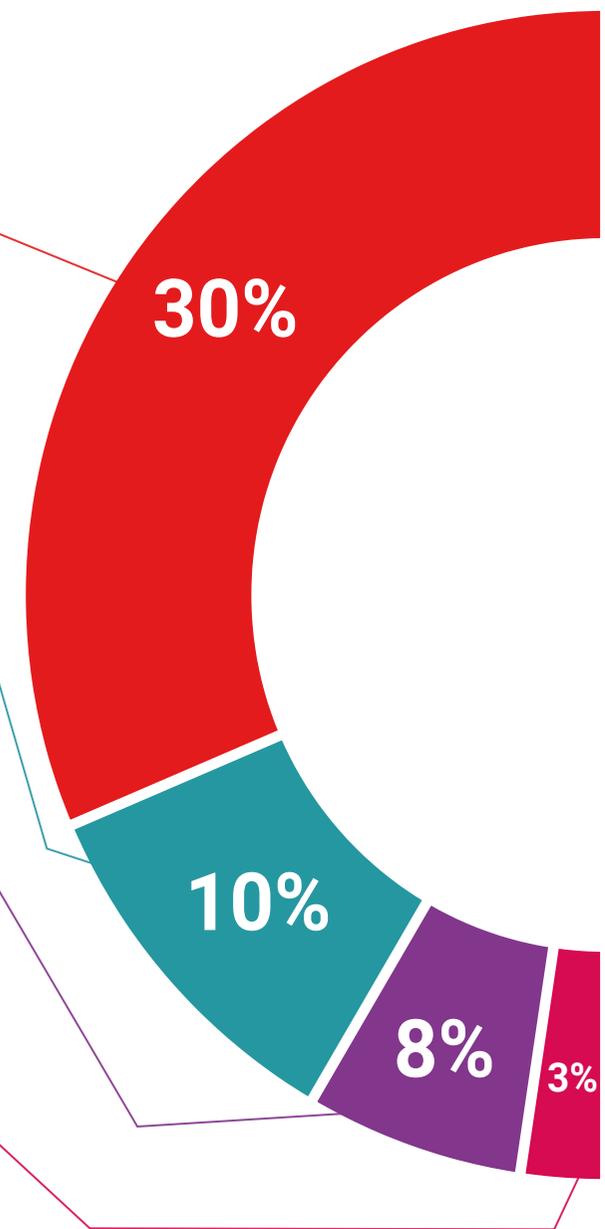

### Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

### Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

# Our Students' Profiles

The Postgraduate Diploma is aimed at Graduates who have previously completed any of the following degrees in the field of Social and Legal Sciences, Administration and Economics.
