01 Welcome

In the healthcare field, data protection has become fundamental, acquiring a special dimension that determines a specific action protocol. Having professionals who know these procedures makes the difference in any health entity. For this reason, a program has been created that will help interested students to obtain the necessary training to address medical issues, identifying the main problems and the correct treatment of data in times of pandemic. In this way, students will gain access to specialized knowledge that will be essential to improve their professional profile and carry out their work with full guarantees of success.

Postgraduate Diploma in Health Data Protection.
TECH Technological University

“

Detail the peculiarities of the information society service providers as responsible subjects in data protection matters”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the *Relearning* methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04

Objectives

The main objective of this program is to provide professionals with specialized knowledge on the treatment of health information, so that they are able to safeguard personal and confidential data in this area, taking into account current regulations on data protection. A program of great intensity that will be an added value in the training of all students, as it will provide them with the keys to understand the legal aspects related to this field of action.

“

Delve into the phenomenon of social and legal transformation of big data and its impact on fundamental rights”

TECH makes the goals of their students their own goals too.
Working together to achieve them.

The Postgraduate Diploma in Health Data Protection will enable the student to:

01

Obtain the necessary skills to address health issues, identifying the major problems

02

Identify health data, with particular emphasis on sensitive or special data

03

Acquire the necessary skills in the analysis of health data processing

04

Interrelate health data with scientific or biomedical research

05

Understanding the treatment of health data in times of pandemics

06

Detail the legal regime of the rights and freedoms recognized in the main data protection instruments for data subjects in the big data environment

08

Going deeper into the analysis and understanding of the right to erasure (right to be forgotten) and detailing the keys to its procedural exercise

09

Master the applicable legal terminology, to differentiate between related legal figures and to discern the most suitable legal method for the protection of the rights of the interested party in the specific case

07

Delve into the phenomenon of social and legal transformation of big data and its impact on fundamental rights through its temporal and legal progression

10

Identify the weaknesses of the current regulation and the legal challenges in this area in order to anticipate future contexts

11

Broaden knowledge of the legal regime of the civil liability system in data protection matters

12

Deepen in the special characteristics of the claim action and to be able to draft it

13

Detail the peculiarities of the information society service providers as responsible subjects in data protection matters

14

Distinguish the sanctioning terminology of both the RGPD and the LOPDGDD

05

Structure and Content

This Postgraduate Diploma is an intensive program offered in a 100% online format, which will allow students to improve their qualifications in the field of health data protection, through the study of the best theoretical content and the realization of specific case studies. A program developed by a first class teaching team, with extensive experience in the sector and aware of the importance of quality education in this field.

Identify the weaknesses of the current regulation and the legal challenges on data protection to be able to anticipate future contexts”

Syllabus

The Postgraduate Diploma in Health Data Protection of TECH Technological University is a program designed to offer business professionals the most comprehensive knowledge on this subject, so important in today's society due to the current regulations that require the proper use of confidential information.

Throughout 600 hours of study, the students will understand, by means of practical cases, the legal regime of the freedoms and rights recognized in the main data protection instruments. To complement the program, the students will study in depth the current sanctioning regime of the right to the protection of personal data, both the European Data Protection Regulation and the current Spanish Law and the already repealed LOPD, to observe the differences and advances produced in this matter.

A syllabus designed for the students, with an absolutely new didactic material, and that favors self-guided learning thanks to its online format. Therefore, you will not have to worry about complying with a fixed timetable or attending a physical classroom, but you will be free to study wherever and whenever you want.

This Postgraduate Diploma takes place over 6 months and is divided into 4 modules:

- Module 1** Regulatory Framework for Data Protection and Provision of Consent
- Module 2** Study on Health Data as a Special Category of Personal Data
- Module 3** The Rights of Individuals in Data Protection Matters
- Module 4** Civil Liability and Penalties Regime

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Diploma in Health Data Protection completely online. During the 6 months that the specialization lasts, the students will be able to access all the contents of this program at any time, which will allow them to self-manage their own study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Regulatory Framework for Data Protection and Provision of Consent

| | | | |
|---|--|--|---|
| <p>1.1. Historical evolution of data protection law in Spain</p> <p>1.1.1. Article 18.4 CE 1.1.2. LOTRAD 1.1.3. LOPDCP 1999 1.1.3.1. Current LOPDGDD regulations</p> | <p>1.2. The right to data protection as a fundamental right</p> <p>1.2.1. Delimitation 1.2.2. Essential Content 1.2.2.1. Distinction with the right to honor and privacy</p> | <p>1.3. EU General Data Protection Regulation</p> <p>1.3.1. Hierarchy in the source system 1.3.2. Structure of the regulation 1.3.3. Distinction with information society regulations</p> | <p>1.4. Spanish civil data protection regulations</p> <p>1.4.1. LOPDGDD 1.4.2. Essential content of the LOPDDGDD 1.4.3. Digital rights</p> |
| <p>1.5. Introduction to the provision of consent in the field of data protection</p> | <p>1.6. Consent as a legitimate basis for the processing of personal data</p> <p>1.6.1. Free consent 1.6.2. Informed Consent 1.6.3. Specific consent 1.6.4. Unequivocal consent</p> | | |

Module 2. Study on Health Data as a Special Category of Personal Data

| | | | |
|---|---|---|--|
| <p>2.1. The Concept of Health</p> <p>2.1.1. Concept of Health. The right to health as a fundamental right 2.1.2. Concept of global health 2.1.3. From a traditional health system to the so-called "digital health"</p> | <p>2.2. Bioethics Health Personal Data</p> <p>2.2.1. Bioethics and the principles that inform it 2.2.2. Bioethics and health 2.2.3. Bioethics and personal data</p> | <p>2.3. Patients' rights in the personal data environment</p> <p>2.3.1. Patients' rights: healthy and sick 2.3.2. Patients and personal data 2.3.3. Autonomy of will, personal data and patients</p> | <p>2.4. Health Biomedical Research Protection of Personal Data</p> <p>2.4.1. Scientific research and biomedical research and health 2.4.2. Scientific research and biomedical research and personal data 2.4.3. Relevant regulations</p> |
| <p>2.5. Health-related data. Special categories of data</p> <p>2.5.1. Conceptual framework 2.5.2. Legislative Framework 2.5.3. Sensitive or protected data as a modality of personal rights</p> | <p>2.6. Genetic data</p> <p>2.6.1. Conceptual framework 2.6.2. Legislative Framework 2.6.3. Genetic data and personal data. Main doctrinal and practical disquisitions. Right to genetic information versus the right not to know</p> | <p>2.7. Biometric data</p> <p>2.7.1. Conceptual framework 2.7.2. Legislative Framework 2.7.3. Biometric data and personal data. Main doctrinal and practical disquisitions</p> | <p>2.8. Treatment of the category of special or sensitive data</p> <p>2.8.1. Basic principles of the processing of special data 2.8.2. Rights of individuals with regard to the processing of sensitive health data 2.8.3. The issue of profiling</p> |
| <p>2.9. Protection of health data</p> <p>2.9.1. Health data protection. Notes that inform it 2.9.2. Medical History. Its impact on the processing of personal health data 2.9.3. Informed Consent Its impact on the processing of personal health data</p> | <p>2.10. Processing of health data in times of pandemics</p> <p>2.10.1. Global health and personal data processing 2.10.2. Treatment of health data and patients' rights in times of pandemic 2.10.3. Legislative study. Analysis of Order SND/297/2020, of 27 March, which entrusts the Secretary of State for Digitalization and Artificial Intelligence, of the Ministry of Economic Affairs and Digital Transformation, with the development of various actions for the management of the healthcare crisis caused by COVID-19</p> | | |

Module 3. The Rights of Individuals in Data Protection Matters

| | | | |
|--|--|---|---|
| 3.1. The protection of rights and freedoms in Big Data 3.1.1. Preliminary Matters 3.1.2. Big data as a starting point 3.1.3. Legal response to the new scenario | 3.2. The right to data protection 3.2.1. Privacy as an Object of Protection 3.2.2. Regulatory and jurisprudential developments 3.2.3. New European framework for data protection | 3.3. The rights of the data subject (I): general principles 3.3.1. Right to access 3.3.2. Information and Transparency 3.3.3. Right to limitation of processing | 3.4. The rights of the data subject (II): general principles 3.4.1. Right to data portability 3.4.2. Automated decisions and profiling 3.4.3. Privacy by design |
| 3.5. The rights of the data subject (III): The right to be forgotten 3.5.1. The Google case as a <i>leading case</i> 3.5.2. Case law developments 3.5.3. Current Legal Framework | 3.6. The rights of the data subject (IV): The right of suppression 3.6.1. Concept and Legal Nature 3.6.2. Objectives and Contents 3.6.3. Subjects and ownership | 3.7. The rights of the data subject (V): Arch rights 3.7.1. Cancellation 3.7.2. Opposition 3.7.3. Rectification | 3.8. Rights of the data subject (VI): Digital rights 3.8.1. Preliminary Matters 3.8.2. Rights and freedoms of the digital age 3.8.3. Legal guarantees of digital rights |
| 3.9. The exercise of rights 3.9.1. Procedural issues 3.9.2. Active subjects 3.9.3. Passive Entity | 3.10. Limits and Limitations of Rights 3.10.1. General Matters 3.10.2. Collision of rights 3.10.3. The role of case law | | |

Module 4. Civil Liability and Penalties Regime

| | | | |
|--|---|---|--|
| 4.1. The right of redress 4.1.1. Preliminary notes on the right of redress 4.1.2. Uniform protection of the right to data 4.1.3. IPS as responsible parties in the processing of personal data | 4.3. The civil liability regime in the field of data protection 4.3.1. Direct and tort liability 4.3.2. Subjective and joint and several liability 4.3.3. Integral reparation of the damage | 4.4. The claim action 4.4.1. Regulation and standing 4.4.2. Competent Courts 4.4.3. Special reference to class actions |
| 4.5. Infringement regime in the the GDPR (I) 4.5.1. Delimitation of the scope of application 4.5.2. Responsible Parties 4.5.3. Sanctioning entities | 4.6. Infringement regime in the the GDPR (II) 4.6.1. Regulation 4.6.2. Infringements 4.6.3. Infringements with aggravated fine | 4.7. Penalties regime in the GDPR 4.7.1. Types of penalties 4.7.2. Administrative fines 4.7.3. Coercive fines | 4.8. The repealed LOPD 4.8.1. Brief reference to the penalty regime 4.8.2. Infringements 4.8.3. Penalties |
| 4.9. The sanctioning regime of the LOPDGDD (I) 4.9.1. General Matters 4.9.2. Very serious infringements 4.9.3. Serious infringements | 4.10. The sanctioning regime of the LOPDGDD (II) 4.10.1. Minor infringements 4.10.2. Statute of limitations for infringements 4.10.3. Penalties | | |

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

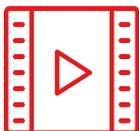

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

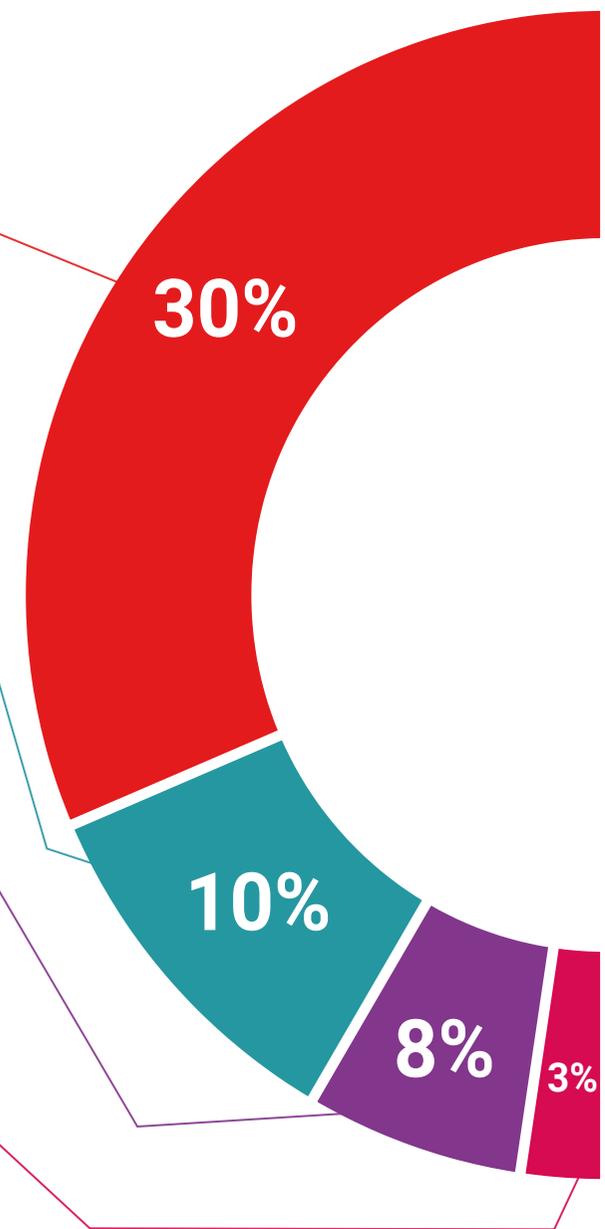

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

This program is aimed at a student profile that seeks continuous improvement in their training with high-level curricula. Professionals who understand the importance of updating their knowledge to advance their careers and who need to specialize in healthcare data protection to be more effective in their daily practice, avoiding any possible risk that could jeopardize the confidentiality of employee, patient or provider data.

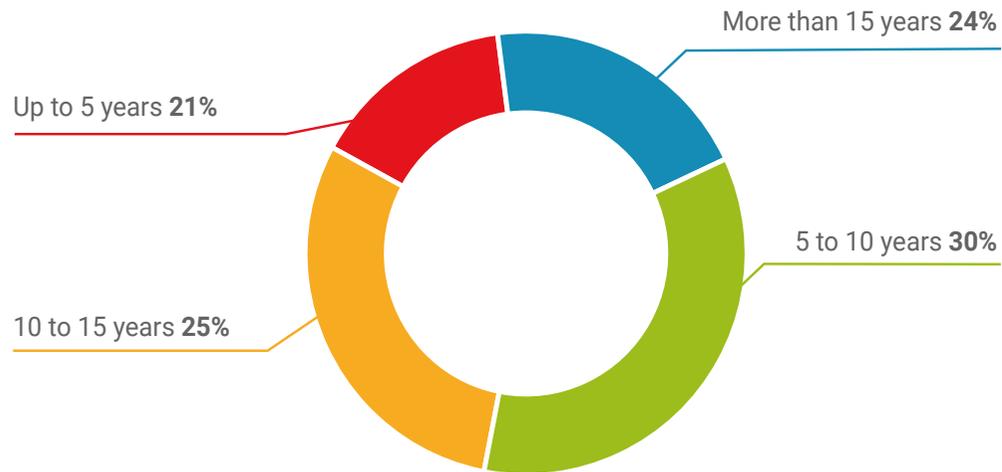

“

Learn the treatment of health data in times of pandemic and take your career to the next level, taking into account the current landscape”

Manuela Gonzales

Data protection officer in a hospital

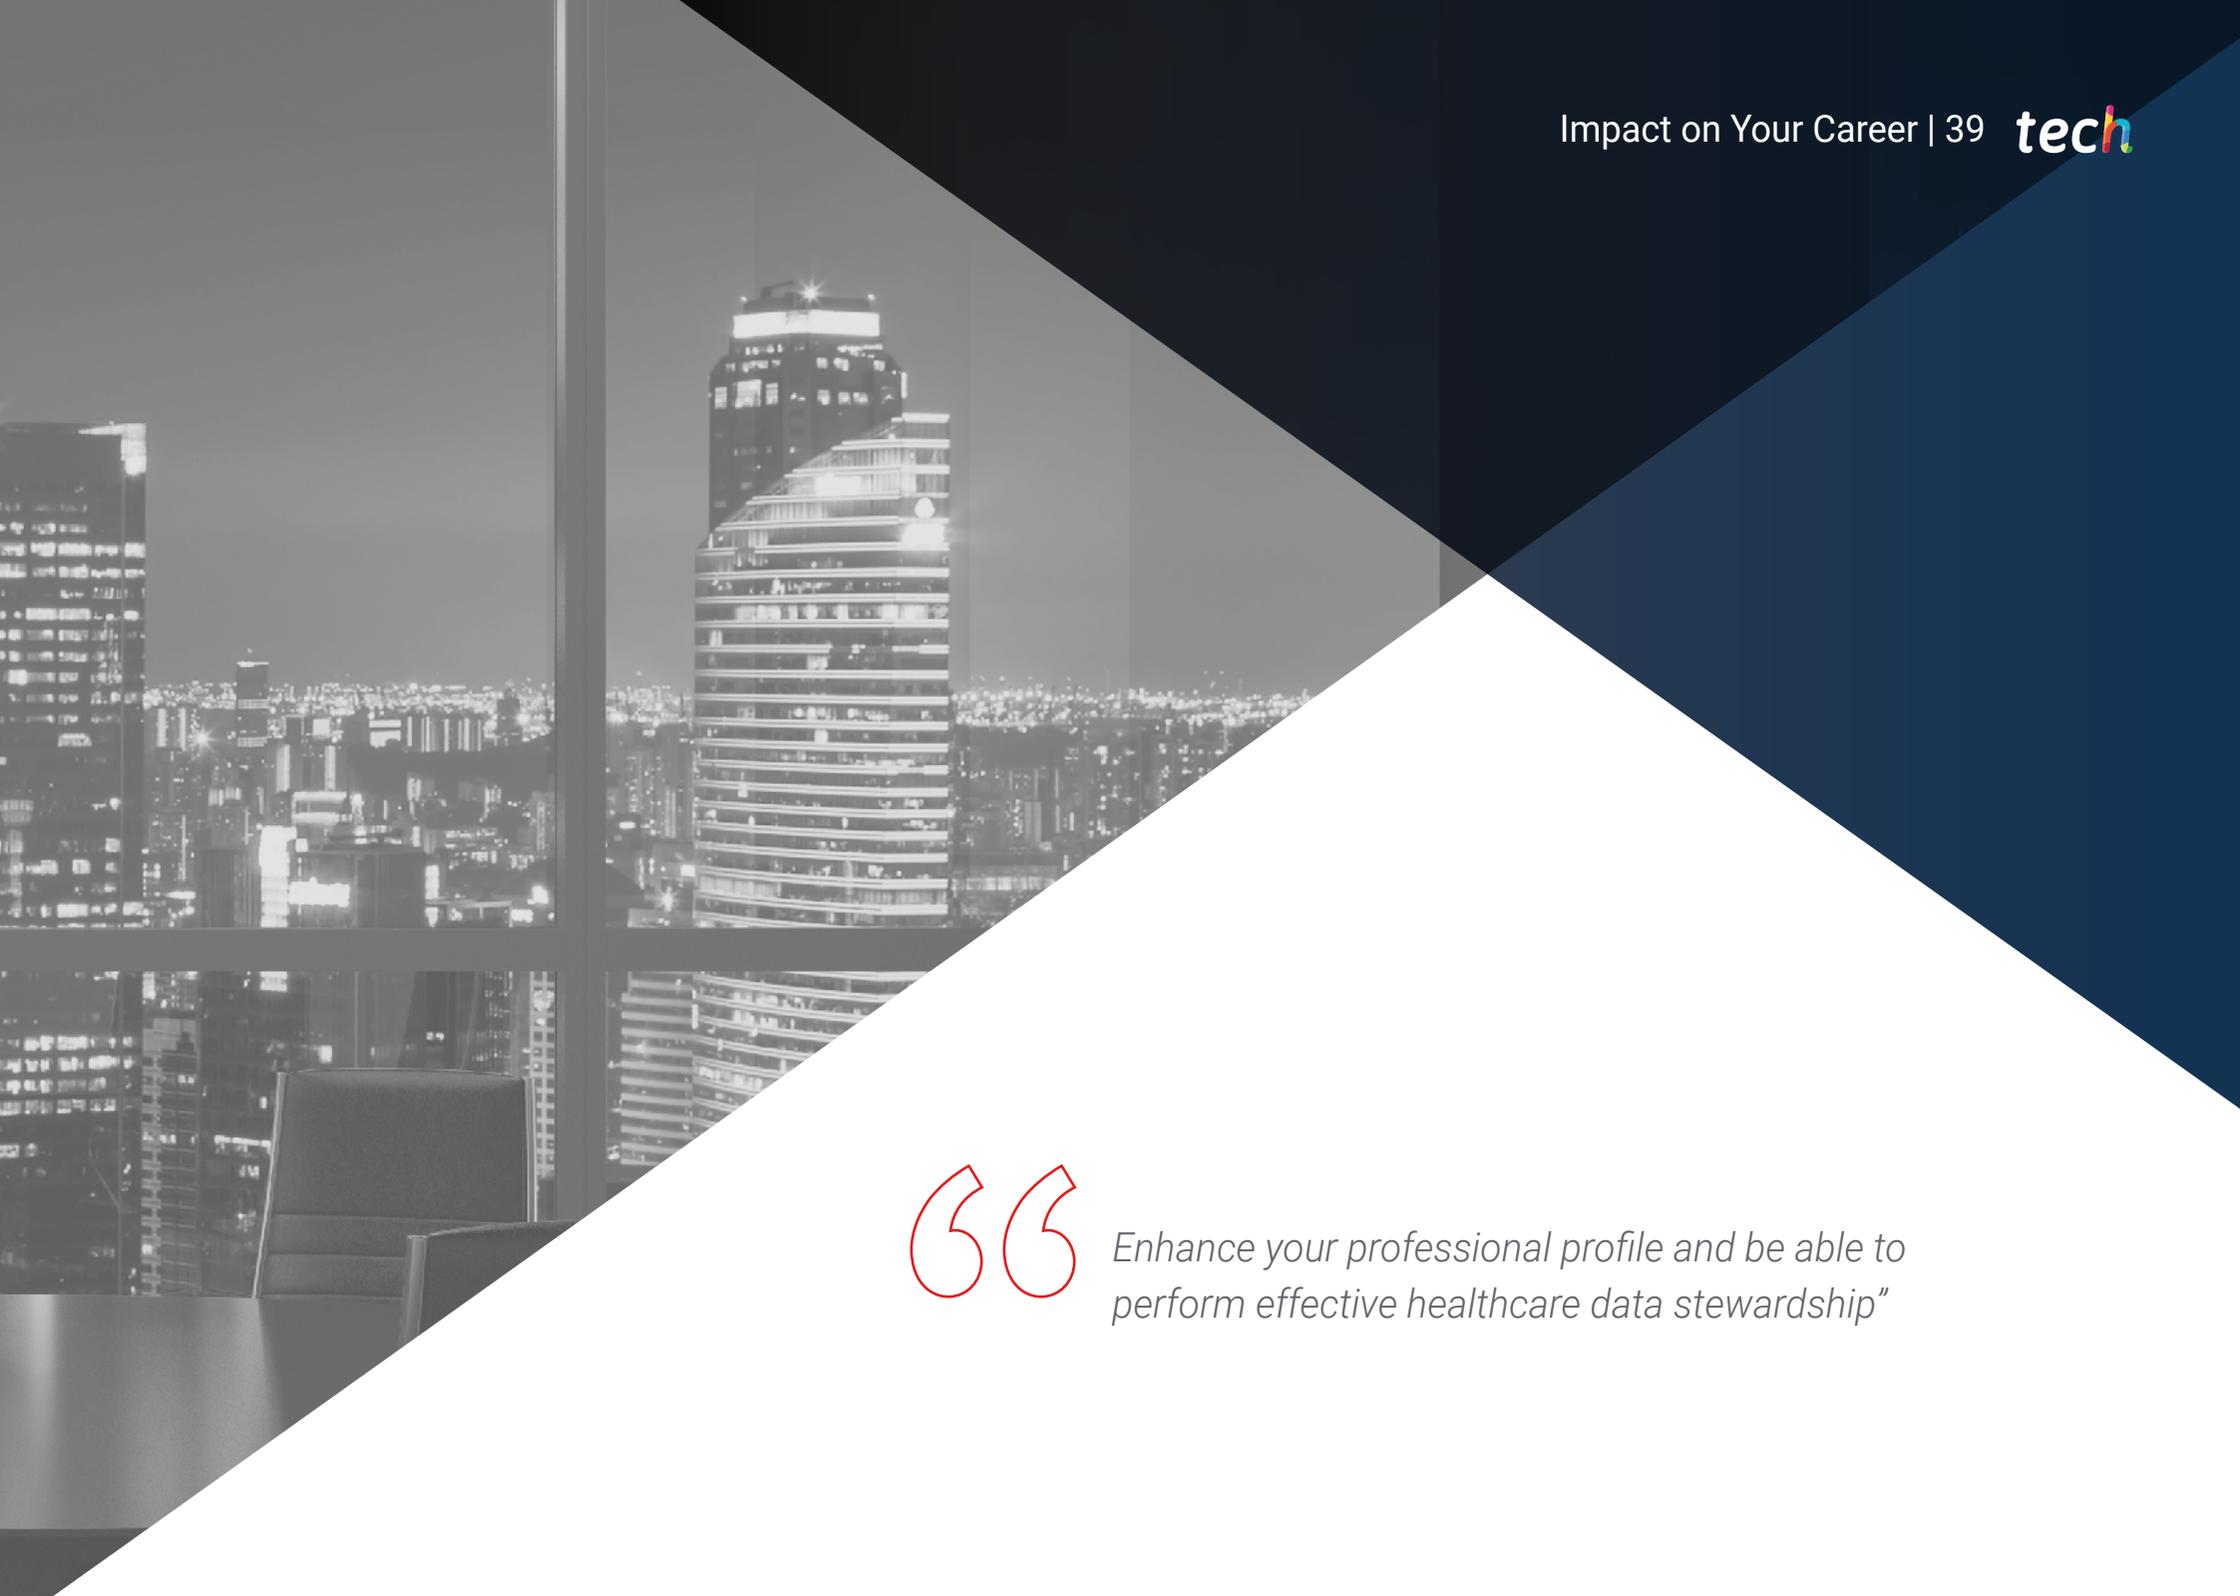

"Working in the healthcare sector has its difficulties. Being a data protection officer, it is essential that I have the right knowledge about the laws and tools used to protect users' information. This Postgraduate Diploma has become an excellent source of learning to enhance my career"

08

Impact on Your Career

Business professionals must adapt to the new times and, nowadays, data protection has arrived to lead the way. Therefore, the effort they put into this program becomes a professional and, of course, personal investment. The ultimate goal of carrying out this great effort should be to achieve professional growth in the students' field of interest.

“

Enhance your professional profile and be able to perform effective healthcare data stewardship”

Are you ready to take the leap? Excellent professional development awaits you

The Postgraduate Diploma in Health Data Protection is an intensive, high-value program aimed at improving students' job skills in an area of broad competence. Undoubtedly, it is a unique opportunity to improve professionally, but also personally, as it involves effort and dedication.

Those who wish to improve themselves, achieve a positive change at a professional level and interact with the best, will find their place at TECH.

Take a radical turn in your career thanks to the specialization offered by this program.

Confidentiality is fundamental in the healthcare field. Specialize with this program and be more effective in your daily practice.

Time of Change

Type of change

Salary increase

This program represents a salary increase of more than **25.22%** for our students

09

Benefits for Your Company

Data protection is fundamental in the healthcare field, since absolutely intimate and confidential patient information is handled. Therefore, its use, treatment and custody must be carried out with the highest levels of security. Thanks to this program, students will learn how to handle all types of documents, which will be of great benefit to the healthcare institutions in which they work, achieving greater confidence on the part of all the agents involved.

“

*Become a reference in your healthcare institution
as the person responsible for data protection”*

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R & D or business development of your company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

10 Certificate

The Postgraduate Diploma in Health Data Protection guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Technological University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
laborious paperwork"*

48 | Certificate

This **Postgraduate Diploma in Health Data Protection** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diploma** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Diploma in Health Data Protection**

Official N° of Hours: **600 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
