01 Welcome

Occupational accidents are one of the causes of sick leave of workers with the highest indicators. Not only does it have administrative or economic implications for the company, but it also implies physical or psychological damage to people, usually related to poor management of occupational risk prevention by the corporation. This program is aimed at reducing these risks and promoting the improvement of working conditions, through evaluation, preventive action planning and health surveillance. An educational program that focuses on the ISO 45001:2018 standard and aims to use prevention as a means of management to provide greater safety in the workplace.

Postgraduate Diploma in Integration of Occupational Risk Prevention with ISO Standards
TECH Technological University

“

Specialize your curriculum and stand out as a manager and integrator of occupational risk prevention with ISO standards in organizations”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the *Relearning* methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH you will have access to the most rigorous and up-to-date case analyses in the academic setting"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

This educational plan is aimed at those professionals who wish to distinguish their curriculum through specialization in occupational risk prevention integration. As a management pathway to offer greater safety in the workplace, the expert will be able to offer companies a certifiable international standard, such as ISO 45001:2018, and make them stand out for having a safe and reliable work environment, as well as develop a competitive advantage among other organizations in the sector for good practices in this area.

“

Become a solution for organizations: be an expert by integrating occupational risk prevention and get companies to certify their quality in this area with ISO 45001:2018"

TECH makes the goals of their students their own goals too
Working together to achieve them

The **Postgraduate Diploma in Integration of Occupational Risk Prevention with ISO Standards** will qualify the student to:

01

Develop specialized knowledge on quality and its importance in organizations

02

Develop the keys for the implementation of a quality management system

03

Comply with current regulations and have the minimum documentation required to develop a correct prevention management system

04

Analyze the operational management of occupational risk prevention in order to be able to carry out effective risk prevention management

05

Elaborate an adequate hazard identification and risk assessment in occupational safety and health

06

Focusing the occupational risk prevention management system on the main objective of minimizing occupational accidents and, in addition, prioritizing continuous improvement

08

Interpret and apply the different standards that explain the integration of management systems

09

Analyze the principles on which audits are based and which should prevail during the development of the audits

07

Enable to carry out an aligned policy in all systems that are part of the integration

10

Generate specialized knowledge for the implementation of the audit program in order to carry out audits in the most effective and efficient manner

05

Structure and Content

The management of occupational risk prevention is an area of expertise increasingly in demand, as the regulation of good practices in this area has even led to the development of a specific regulatory framework, such as the 45001:2018 standard, for the evaluation, analysis and prevention of occupational accidents. This Postgraduate Diploma in Integration of Occupational Risk Prevention with ISO Standards responds to this situation by providing quality education to future professionals in the area. For all this, and in order to promote access to quality content, this educational plan is designed by a group of experts and is taught in online mode.

“

In a comfortable, practical and flexible way, get ready to take the professional leap you were looking for and become an expert in occupational risk prevention"

Syllabus

The syllabus is divided into three different sections and focuses, initially, on the process of risk assessment, preventive action planning and health surveillance. Therefore, it could be said that the most important thing is to introduce the student to the subject, which in this case is aimed at reducing occupational accidents and promoting the improvement of working conditions in the factors that affect these conditions.

Subsequently, and based on the high indicators of occupational accidents, another section would focus on delving into the ISO 45001:2018 standard as a management path to provide greater safety in the workplace and offer, to organizations, a certifiable international standard. The student will be able to make companies understand that this regulation implies having a preventive policy appropriate to the risks of workers, which allows reducing accidents by ensuring the commitment and involvement of the entire organization in the implementation.

Finally, this Postgraduate Diploma offers students an overview of how the integration of management systems improves efficiency, drastically reducing the necessary documentation and giving rise to a high-level corporate structure. In addition, this section delves into the functionality of joint audits and develops the idea that the optimization of resources centralized in a single person increases the efficiency of processes.

This Postgraduate Diploma is developed over 6 months and is divided into 3 modules:

Module 1

Management of Occupational Risk Prevention in the Organizations

Module 2

Occupational Risk Prevention Management System ISO 45001: 2018

Module 3

Integration of Management Systems

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Diploma in Integration of Occupational Risk Prevention with ISO Standards completely online. Throughout the 6 months of the educational program, you will be able to access all the contents of this program at any time, allowing you to self-manage your study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Management of Occupational Risk Prevention in the Organizations

1.1. Work and Health: Occupational Risks. Risk Factors

- 1.1.1. Prevention Management
- 1.1.2. The Work
- 1.1.3. The Health of Professionals
- 1.1.4. Risk Factors Inherent to the Work Activity
- 1.1.5. Influence of Working Conditions on Prevention Management
- 1.1.6. Prevention Techniques and Protection Techniques
- 1.1.7. Personal Protective Equipment: Functions, Usefulness and Selection for Each Work Activity

1.2. Damages Derived from Work. Occupational Accidents and Occupational Diseases

- 1.2.1. Damage to Health. Occupational Accidents and Occupational Diseases
- 1.2.2. Occupational Accidents: Type I:
- 1.2.3. Accident/Incident Ratio Rule
- 1.2.4. Repercussions of Occupational Accidents
- 1.2.5. Occupational Disease: How to Deal with it Equitably and Sustainably

1.3. Basic Legislative and Regulatory Framework for Occupational Risk Prevention

- 1.3.1. Historical Evolution of the Legislative Framework in Preventive Matters
- 1.3.2. International Legislation and Regulations. European Union Regulations
- 1.3.3. National Regulations
- 1.3.4. Specific Regulations
- 1.3.5. Company and Occupational Health and Safety Obligations
- 1.3.6. Responsibilities and Sanctions. Employee Rights and Obligations
- 1.3.7. Prevention Delegates
- 1.3.8. Health and Safety Committee

1.4. Public Agencies Related to Occupational Safety and Health

- 1.4.1. Public Organizations
- 1.4.2. European Organizations
- 1.4.3. National Organizations

1.5. OHS Management Systems The Model of Law 31/1995

- 1.5.1. Prevention Management According to the ORP Law
- 1.5.2. The Prevention Plan
- 1.5.3. Risk Assessment
- 1.5.4. Risk Planning or Planning of Preventive Activities
- 1.5.5. Health Surveillance
- 1.5.6. Information and Training
- 1.5.7. Emergency Measures
- 1.5.8. Preparation of the Annual Report
- 1.5.9. Audits of the Labor Activity Based on Current Regulations

1.6. Risk Prevention Documentation: Collection, Preparation and Archiving

- 1.6.1. Treatment of the Information Obtained
- 1.6.2. Actions to be Developed Based on the Information Collected

1.7. Operational Management of Occupational Risk Prevention

- 1.7.1. Operational Risk Planning and Management
- 1.7.2. Execution of Prevention Processes
- 1.7.3. Control and Adjustment of Process Performance
- 1.7.4. Prevention System Audits
- 1.7.5. Cost of Occupational Accidents: Contingency, Benefits and Incapacities

1.8. Risks Associated with Health and Safety Conditions. How to Minimize Them

- 1.8.1. Poor Lighting
- 1.8.2. Exposure to Pollutants
- 1.8.3. Noise Exposure

1.9. Risks Associated with the Work Environment. How to Minimize Them

- 1.9.1. Ionizing Radiation
- 1.9.2. Electric Fields and Magnetic Fields
- 1.9.3. Optical Radiation

1.10. Risks Associated with Psychosociology Applied to Work. How to Minimize Them

- 1.10.1. Content, Load, Pace and Time of Work
- 1.10.2. Participation and Control of the Labor Activity

- 1.10.3. Organizational Culture: Influence on Risk Management and Prevention

Module 2. Occupational Risk Prevention Management System. ISO 45001: 2018

2.1. Occupational Risk Prevention 2.1.1. Occupational Hazards and Risks 2.1.2. Occupational Risk Prevention Management	2.2. Preventive Techniques and Disciplines. Safety and Industrial Hygiene 2.2.1. Safety At Work 2.2.2. Industrial Hygiene	2.3. Preventive Techniques and Disciplines. Ergonomics and Occupational Medicine 2.3.1. Ergonomics and Psychosociology Applied to the Workplace 2.3.2. Occupational Medicine	2.4. The ISO 45001 Standard: 2018 2.4.1. Implementation of an OSH Management System 2.4.2. ISO 45001. Background, Evolution and Basic Characteristics 2.4.3. High-level Structure of the ISO Standard: Possibility of Integration with Other ISO Standards
2.5. ISO 45001: 2018. Scope of Application 2.5.1. Scope of Application 2.5.2. Terms and Definitions	2.6. ISO 45001: 2018. Implementation Plan 2.6.1. Implementation Plan 2.6.2. Context of the Organization 2.6.3. Scope of the SGSST	2.7. ISO 45001: 2018. Education 2.7.1. Leadership and Employee Involvement 2.7.2. Education 2.7.3. Support 2.7.4. Support	2.8. ISO 45001: 2018. Operation 2.8.1. Operational Control 2.8.2. Emergency Preparedness and Response
2.9. ISO 45001: 2018. Performance Evaluation 2.9.1. Performance Monitoring, Measurement, Analysis and Evaluation 2.9.2. Evaluation of Compliance 2.9.3. Internal Auditing 2.9.4. Management Review	2.10. ISO 45001: 2018. Improvement 2.10.1. Incidents, Non-conformities and Corrective Actions 2.10.2. Continuing Improvement 2.10.3. OSHMS Certification		

Module 3. Integration of Management Systems

<p>3.1. Systems Integration for the Organization</p> <p>3.1.1. Background 3.1.2. Key Points 3.1.3. Fundamentals</p>	<p>3.2. Approach to Management Systems Integration</p> <p>3.2.1. Objectives 3.2.2. Advantages</p>	<p>3.3. Structure of an Integrated Management System</p> <p>3.3.1. Integrated Management Policy: General Aspects 3.3.2. Utility and Importance of Integration in an Organization</p>	<p>3.4. Common Standards for Systems Integration</p> <p>3.4.1. Standard UNE 66177:2005 3.4.2. Standard PAS 99:2012 3.4.3. Standard DS 8001:2005</p>
<p>3.5. Guide for Integration in Accordance with UNE 66177:2005</p> <p>3.5.1. Phases for Integration</p>	<p>3.6. Standard UNE 66177:2005</p> <p>3.6.1. Structure of the Integration Plan 3.6.2. Development of the Integration Plan</p>	<p>3.7. Integration Methods</p> <p>3.7.1. Basic Method 3.7.2. Advanced Method 3.7.3. Expert Method</p>	<p>3.8. Correspondence Between Standards</p> <p>3.8.1. Cross-cutting Elements 3.8.2. Specific Components</p>
<p>3.9. Implementation</p> <p>3.9.1. Responsibilities and Work Team 3.9.2. Effective Follow-up of the Integration Plan</p>	<p>3.10. Documentation of an Integrated System</p> <p>3.10.1. Procedure 3.10.2. Application</p>		

Turn your professional career around and become a reference expert in the field of occupational risk prevention with ISO standards"

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The profile of the student graduating from this program is one who wishes to face new professional challenges and who is willing to assume a position of responsibility in occupational risk prevention. They will be able to implement the ISO 45001:2018 standard and, in addition, become a reference for organizations in this area. You will be able to evaluate, analyze and prevent occupational accidents and safety measures in companies. Therefore, this program is aimed at graduates, post-graduates, engineers and architects who have already started their career in this sector and want to deepen and master the latest developments and market trends.

“

Take safety and occupational risk prevention for companies and corporations to another level with your expertise”
