01 Welcome

Just In Time is a production model that focuses on developing only the quantity of products that is demanded by customers, in order to achieve zero inventory. This drastically reduces levels of surplus stock, minimizing the possibility of serious economic losses for companies. Given the benefits offered by this system, many companies need highly trained leaders in its management to optimize their productive tasks. For this reason, TECH has created this program, which increases the student's skills in the processes of design and implementation of the continuous workflow or Pull System. This way, 100% online and from home, you will significantly boost your professional growth.

Postgraduate Diploma in Just In Time System (JIT)
TECH Technological University

“

Be able to handle the protocols to implement the Pull System within the company and position yourself as a professional highly demanded by leading organizations”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

The design of this Postgraduate Diploma has been made with the idea in mind to provide its students with the best knowledge and the most advanced skills in the management of the Just In Time System. Through this program, they will be able to investigate the design of processes to generate a continuous work flow or the protocols for the implementation of production systems with stock limitation. Such learning will be ensured by means of the following objectives.

“

TECH's main objective is to contribute to your professional development and to specialize you in the implementation of the Just In Time System in the work environment"

**TECH makes the goals of their students their own goals too
Working together to achieve them**

The **Postgraduate Diploma in Just In Time System (JIT)** will train the student to:

01

Apply the use of VSM to diverse environments, beyond the industrial areas where it is commonly known

04

Design a work plan according to future VSM to be achieved

02

Identify the different value streams that exist within a company

03

Evaluate and diagnose the process through the current VSM

05

Support the use of the different tools contained in the flow creation process

06

Apply the principle of flow creation for materials, machines, information and people

08

Integrate other lean tools into the unit flow

09

Apply the pull principle to all elements of the production flow: materials, machines, information and people

07

Radically eliminate flow inefficiencies

10

Demonstrate how to level, balance and synchronize the different flows

05

Structure and Content

This program is made up of 3 modules with which the student will delve into the most relevant aspects of the Just In Time System in only 6 months. Furthermore, its complete 100% online methodology will enable you to manage your own study time as you wish, in order to fully optimize your learning process.

“

Enjoy a curriculum designed by the best specialists in the area of Lean Manufacturing, who have extensive business experience behind them"

Syllabus

The Postgraduate Diploma in Just In Time System (JIT) has been created with the objective of training students to successfully face all the challenges presented by the field of business production management. Through the knowledge acquired, they will be able to make sound decisions in different contexts of uncertainty and constant change.

Through 450 hours of learning, students will analyze practical business cases both in groups and individually, delving into the intricacies of real business situations and acquiring skills applicable to their day-to-day professional lives.

Through this program, the student will delve into aspects such as the analysis and mapping of the flow of materials and business information, the design of processes to develop a fluid work or the keys to the Pull System. Thanks to this, you will be able to understand the real applicability and operability of the Just In Time System.

In this way, the student will acquire a series of competencies that will enable them to perform a skillful direction and management of business production. All this, enjoying a completely revolutionary educational methodology, being guided by the best specialists in this field and studying through modern multimedia didactic formats.

This Postgraduate Diploma takes place over 6 months and is divided into 3 modules:

Module 1.

Value Stream Mapping: Analysis and Mapping of the flow of materials, information and activities in a process. Flow optimization

Module 2.

Continuous Flow: Process design for smooth and continuous workflows

Module 3.

Pull system: implementation of a demand-driven production system to control production and minimize inventory

Where, When and How is it Taught?

TECH offers the possibility of developing this Postgraduate Diploma in Just In Time System (JIT) completely online. During the 6 months of the specialization, the student will be able to access all the contents of this program at any time, which will allow them to self-manage the study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. Value Stream Mapping: Analysis and Mapping of the flow of materials, information and activities in a process. Flow optimization

1.1. The Value Stream Map. Value Stream Mapping.(VSM)

- 1.1.1. Value stream
- 1.1.2. The value stream map
- 1.1.3. Selection of a product family

1.2. Connection, Strategy and tactics with the VSM

- 1.2.1. The Quality Cost Delivery (QCD)
The customer is in charge
- 1.2.2. Hoshin Kanri, from vision to tactics
- 1.2.3. Visual Management as a mechanism for prioritization and alignment

1.3. Value Stream Map in current status

- 1.3.1. Value stream mapping
- 1.3.2. Symbols used in the design of the Value Stream Map
- 1.3.3. Data Collection

1.4. The timing of a value stream map VSM

- 1.4.1. Takt Time, the rhythm set by the customer
- 1.4.2. Cycle Time
- 1.4.3. Lead Time, the necessary end-to-end time

1.5. The Lean value chain

- 1.5.1. Problem of overproduction
- 1.5.2. Characteristics of a Lean value chain
- 1.5.3. Creation of continuous flow to create Lean processes

1.6. Future State Value Stream Map

- 1.6.1. Value stream mapping
- 1.6.2. Symbols used for future design
- 1.6.3. From the future map to the work plan

1.7. Value chain planning and improvement

- 1.7.1. Implementation planning
- 1.7.2. Prioritization of activities
- 1.7.3. Connecting VSM to strategy

1.8. Value Supply Chain Management

- 1.8.1. Mapping of the current state of the Supply Chain
- 1.8.2. Symbols used for its design
- 1.8.3. Design of the future supply chain

1.9. Value Stream Project Management, the Lean Project

- 1.9.1. Peculiarities of a Project vs. a Process
- 1.9.2. The value stream of a project
- 1.9.3. Analysis of the current state and design of the future

1.10. Yokoten

- 1.10.1. Yokoten. Fundamentals
- 1.10.2. The 3 phases of Yokoten
- 1.10.3. Standard Solution Cycle

Module 2. Continuous Flow: Process design for smooth and continuous workflows
2.1. Continuous Flow

- 2.1.1. Flow Creation in the Toyota Production System
- 2.1.2. The Fourteen Principles of the Toyota Way Culture
- 2.1.3. Total Flow Management, the union of Flow Creation and Pull Flow System

2.2. Processes

- 2.2.1. Typology of industrial processes
- 2.2.2. Departments vs. Processes vs. Flows
- 2.2.3. Process integration

2.3. Flows

- 2.3.1. The different types of flows: Materials, Equipment, People and Information
- 2.3.2. Job-shop vs. Flow-shop
- 2.3.3. Turbulent flows vs. Linear flows

2.4. Machines, Equipment and Lines

- 2.4.1. Hardware Reliability as an Essential Element for Flow Creation
- 2.4.2. Jidoka philosophy as an essential element in Flow Creation
- 2.4.3. Monument machine vs. Lean Machine

2.5. Materials

- 2.5.1. Traditional plant layout vs. Lean plant layout
- 2.5.2. PFEP (Plan-For-Each-Part)
- 2.5.3. Batch production vs. One-piece-flow (Continuous flow)

2.6. Person

- 2.6.1. The Internal Customer, concept in a lean environment
- 2.6.2. The role of a lean manager
- 2.6.3. The role of a lean operator

2.7. Information

- 2.7.1. Enterprise Resource Planning System (ERP)
- 2.7.2. Information systems specific to the industrial environment
- 2.7.3. Dashboard, as part of the Daily Management System

2.8. Lean Flow System

- 2.8.1. Muda expulsion in the production process
- 2.8.2. The Autonomous Cell as a lean paradigm
- 2.8.3. Lean support tools: 5S, Visual Management, SMED

2.9. Flow Creation application examples

- 2.9.1. Example of implementation in the automotive sector
- 2.9.2. Example of application in the metallurgical sector
- 2.9.3. Example of use in the food sector

2.10. Creation of Flow: Design, Implementation and Improvement of Production Processes. Practical Application

- 2.10.1. Design for flow creation
- 2.10.2. Implementation of continuous flow
- 2.10.3. Improvement of production processes

Module 3. Pull system: implementation of a demand-driven production system to control production and minimize inventory

3.1. Pull System. Fundamentals

- 3.1.1. Pull Flow System: the fourth principle of Lean Thinking
- 3.1.2. Push vs. Pull processes
- 3.1.3. Stability, Flexibility, Synchronization, Concentration

3.2. Demand

- 3.2.1. Types of demand
- 3.2.2. Takt Time, Production Time, Lead Time
- 3.2.3. Production + Logistics Contract

3.3. Flows

- 3.3.1. End-to-End: from suppliers to customers
- 3.3.2. Logistics + Production Connection
- 3.3.3. Supply routes

3.4. Machines, Equipment and Lines

- 3.4.1. Logistics train
- 3.4.2. Containers
- 3.4.3. Shelving

3.5. Materials

- 3.5.1. Warehouses
- 3.5.2. Supermarkets
- 3.5.3. Line edge

3.6. Person

- 3.6.1. Pull Flow system managers
- 3.6.2. Logistics and production operators
- 3.6.3. The "Mizusumashi" ("Water spider")

3.7. Information

- 3.7.1. Heijunka (Leveling): Leveling box + Logistics box
- 3.7.2. Kanban
- 3.7.3. Batch Conformer + Sequencer

3.8. Lean Pull Flow System

- 3.8.1. Balanced
- 3.8.2. On-line sequencing
- 3.8.3. Lean support tools: VSM, OEE, Standard Work, One-point-lesson, Andon

3.9. Examples of Pull Flow System applications

- 3.9.1. Example of implementation in the automotive sector
- 3.9.2. Example of application in the metallurgical sector
- 3.9.3. Example of use in the food sector

3.10. Pull system: Design, Implementation and Improvement of Production Processes. Practical Application

- 3.10.1. Design of a pull system
- 3.10.2. Implementation of the pull flow system
- 3.10.3. Improvement of information in production processes

Learn in an enjoyable and decisive way through didactic formats such as video or interactive summary"

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The Postgraduate Diploma is aimed at university graduates, diploma holders and university graduates who have previously completed any of the following degrees in the field of Social and Legal Sciences, Administration and Economics.

This program uses a multidisciplinary approach as the students have a diverse set of academic profiles and represent multiple nationalities.

The Postgraduate Diploma can also be taken by professionals who, being university graduates in any area, have two years of work experience in the field of Lean Manufacturing.

“

It combines your professional and personal tasks with your learning to perfection"

Average Age

Between **35** and **45** years old

Years of Experience

Sergio Rodríguez

Production Manager

"I decided to take this program with the idea of mastering the intricacies of the Just In Time System, since it was a production model that called my attention and that I wanted to know how to implement in day-to-day business. Thanks to this Postgraduate Diploma, I have been able to reach my goal and continue to grow as a professional"

08

Impact on Your Career

With the idea of providing the highest academic level to its programs, this program is directed and taught by excellent specialists in the optimization of production processes, who have performed their functions in leading companies in different sectors. These professionals are responsible for preparing all the didactic materials that students will have at their disposal throughout the Postgraduate Diploma. Therefore, the knowledge that you will assimilate will be fully useful in your daily practice.

“

Enjoy a program taught by the best specialists in the management of production processes, who will provide you with first class didactic materials"

Management

Mr. Jover Miravittles, Luis

- ♦ President and Founding Partner Grupo Quarck, S.L. Founding Partner
- ♦ Senior Partner in LOGIXS
- ♦ Vice President of €-Corp. S.L
- ♦ IQS Executive Education Director
- ♦ Associate Professor at IE Business School
- ♦ Coordinator of the Master's Degree in Integral Business Management at the Universidad Iberoamericana in Mexico City
- ♦ Advisor to the employers' association Cecot
- ♦ Chemical Engineer at the Chemical Institute of Sarria (IQS)
- ♦ Master in Business Administration MBA IESE
- ♦ Member of the Hispack organizing committee

Professors

Mr. Antoni Aguilar, Josep

- ♦ Founder and President of Actio Crealor Consulting
- ♦ Country Manager of The Kaizen Institute
- ♦ Operations & SCM Consultant
- ♦ Production Manager at Magna International
- ♦ IQS Executive Education
- ♦ Professor in EUNCET Business School
- ♦ Graduate in Business Administration from the University of Lincoln

Mr. Pietro García Sergio

- ♦ Consultant and Director. Lean & Agile. Operations & Strategy Management Consultant
- ♦ Operations and Restructuring Consultant at Adoria Consulting
- ♦ Process and Continuous Improvement Engineer at Kostal Eléctrica
- ♦ Lean Management Professor at LaSalle BCN
- ♦ Operations & Supply Chain professor at the IQS Executive Education
- ♦ Associate Operations Consultant and Professor at the Chamber of Commerce of Sabadell
- ♦ Degree in Industrial Engineering, specializing in business organization and management, Catalunya Polytechnic University

09

Impact on Your Career

The Postgraduate Diploma in Just In Time System (JIT) will be carried out with the idea of providing students with a set of skills that will guarantee them to raise the level of their professional career to the highest level. In this way, they will broaden their horizons and boost their chances for top jobs, and all their efforts throughout the program will be rewarded.

“

TECH has created this program with the premise of favoring your professional growth prospects”

Are you ready to take the leap? Excellent professional development awaits you

TECH's Postgraduate Diploma in Just In Time System (JIT) is an intensive program that prepares you to face challenges and business decisions in the field of Lean Manufacturing. The main objective is to promote your personal and professional growth. Helping you achieve success.

If you want to improve yourself, make a positive change at a professional level, and network with the best, then this is the place for you.

Provide your company with an optimized production model and extract the maximum benefit from your activity.

Increase your salary prospects by taking this Postgraduate Diploma in Just In Time System (JIT).

Time of Change

Type of change

Salary increase

This program represents a salary increase of more than **27%** for our students

10

Benefits for Your Company

The purpose of this program is to train highly qualified leaders and managers to contribute directly to the development of organizations. By completing this Postgraduate Diploma, the student will enjoy a network of contacts in which they will be able to create links with future suppliers, clients or work partners, thus boosting their professional growth.

“

In today's competitive business environment, having leaders trained in the Just In Time System is a guarantee to increase a company's productivity and stand out in its industry”

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R & D or business development of your company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11

Certificate

The Postgraduate Diploma in Just In Time System (JIT) guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Diploma in Just In Time System (JIT)** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Diploma in Just In Time System (JIT)**

Official N° of Hours: **450 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
