International Guest Director

Andrew D. Magalee is an outstanding leader in the field of Nursing and Healthcare Management, with a career marked by his commitment to excellence and innovation. As such, he has served as Director of Nursing for Nursing Staffing and Resource Management at Johns Hopkins Bayview Medical Center, a position of great responsibility at one of the most prestigious medical institutions internationally.

With a strong academic background, including a Master's Degree in Nursing Administration, with a specialization in Pediatric Care, from New York University, he has combined his theoretical knowledge with extensive practical experience. In addition, he has held the position of Director of Nursing at Dartmouth-Hitchcock Medical Center, where he has made a significant mark in improving quality of care and operational efficiency. He has also served as Assistant Manager at Langone Medical Center, New York University.

In addition to his outstanding professional work, Andrew D. Magalee has demonstrated a commitment to academic preparation, having completed bachelor's degrees in both Biology and Nursing at renowned American institutions such as St. John's University and New York University. In this way, his knowledge and skills range from hospital management to the implementation of health technologies, including his extensive background in Human Resources, performance improvement, health insurance, clinical research and emergency management. All of this positions him as an influential and respected figure in the international healthcare field.

Mr. Magalee, Andrew D.

- Director of Nursing, Personnel and Resource Management, Johns Hopkins Bayview Medical Center, United States
- Director of Nursing, Dartmouth-Hitchcock Medical Center, Dartmouth-Hitchcock Medical Center, New Hampshire
- Assistant Manager, Langone Medical Center, by the University of New York
- Master's Degree in Nursing Administration, specialization in Pediatric Care, by the University of New York
- Bachelor of Science in Nursing, by the University of New York
- Bachelor of Science in Biology, St. John's University

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

05

Structure and Content

This program has been designed to meet the academic needs of business professionals who work in the healthcare sector. This way, they are offered a complete syllabus that covers the nursing division, the management of quality and safety, and the new trends in marketing and communication related to the sector, among other topics. Therefore, students will be able to access the multiple theoretical and practical resources available on the virtual campus.

“

Thanks to your management, the teams under your command will be consolidated as great experts in nursing care”

Syllabus

The syllabus of this Postgraduate Diploma in Management in Nursing Services. From the Perspective of Quality, Safety and Society has 3 theoretical modules, aimed at business professionals seeking continuous specialization in this field to develop their daily work with guarantees of success.

Therefore, throughout 450 hours of study, the student will have access to multiple practical resources and simulated cases that will be essential to improve their learning and strengthen the theoretical concepts. In this way, the student will be able to improve their skills in a comfortable way, through exercises that will place them in a real context, being able to apply everything they have learned, later on, to their professional practice.

In order to access all this content, the student will have at their disposal a virtual campus that can be accessed from the moment they formalize their enrollment. For this purpose, they only need to have a computer or mobile device with an Internet connection. This 100% online format will be essential to be able to self-manage their studies with the rest of their daily obligations. Therefore, the professional will be able to choose the time and place that best suits them to continue with their learning.

3.9. The Public Profile of the Health Care Manager and Managerial Staff	3.10. The Interview Process to Apply for a Managerial Position		

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

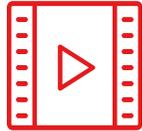

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Our Students' Profiles

The students who choose this Postgraduate Diploma are professionals with academic and work training oriented towards the business field, who have found a professional career opportunity in the health sector. For this reason, they are looking for programs through which they can specialize and reach the level of competence that will allow them to lead successful teams that stand out for the quality of their interventions. Therefore, they will reach the elite of healthcare management thanks to their superior training in this field.
