01 Welcome

NFTs have opened up new opportunities for businesses by providing a means for the secure and transparent authentication, ownership, and transfer of digital assets. These unique tokens open up a wide range of opportunities for artists, creators, and companies, allowing them to reap direct financial benefits and establish new ways of earning income. That is why, in order to remain competitive in a digitalized and globalized business environment, it is crucial for executives to understand and take advantage of current trends. Consequently, TECH has developed a 100% online program in a flexible format that will give professionals the opportunity to stay up to date and adapt to the demands of today's market, coordinating these activities with their daily work, as there is no fixed schedule.

Postgraduate Diploma in NFTs
TECH Global University

“

*You will learn about key features and
explore examples of popular NFTs”*

02

Why Study at TECH?

TECH is the world's largest 100% online school of business. It is an elite school of business, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success”

At TECH Global University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"*Microsoft Europe Success Story*", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500 | collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the *Relearning* methodology (the most internationally recognized postgraduate learning methodology) with Harvard Business School case studies. A complex balance of traditional and state-of-the-art methods, within the most demanding academic framework.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH you will have access to the most rigorous and up-to-date case analyses in the academic setting"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects.

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

This qualification has been designed to empower business professionals and provide them with solid, practical knowledge of disruptive technology, enabling them to take advantage of the opportunities offered by the business world. They will learn how cutting-edge technologies work, identify their potential applications in different sectors, and develop effective strategies for implementing them in business, thereby contributing to the growth and success of organizations in a digital and constantly evolving environment.

“

Become an expert in NFTs and achieve your most ambitious professional goals through a unique qualification, only with TECH”

TECH makes the goals of their students their own goals too
Working together to achieve them

The **Postgraduate Diploma in NFTs** will enable students to:

01

Analyze the scope of the Fintech revolution

02

Develop the concept of Tokenization

03

Analyze the tokenization process

04

Identify which projects can be tokenized

05

Establish the advantages offered by tokenization

06

Provide an in-depth understanding of Blockchain technology and its implementation in asset tokenization

08

Apply the most advanced concepts and tools to carry out transactions of tokens and cryptocurrencies in a safe and efficient way

07

Analyze the technical specifications of Tokens and their standards, Blockchain types, security in Blockchain networks, smart contracts, success stories and the advantages and disadvantages of asset tokenization

09

Provide a deep understanding of legal, tax, and security factors

10

Select appropriate platforms and payment methods for each situation

11

Analyze the concept of Security Tokens

14

Identify Utility Token sales

12

Identify Security Token sales

13

Analyze the concept of Utility Tokens

15

Analyze the unique characteristics of NFTs and their impact on various industries

16

Build solid knowledge about NFTs to understand how they are transforming the digital marketplace and the global economy

18

Explore how the trend toward decentralization is transforming the way financial transactions are conducted and how new trends such as DeFi and the tokenization of physical assets are emerging

19

Provide a foundation for tax concepts, token classification, and the relationship between these digital assets and the tax framework and its legal implications

17

Develop specialized knowledge about NFTs in the Metaverse and their use in various fields, from the creation and sale of virtual objects to project financing and digital community governance

20

Analyze the taxation applicable to different types of tokens and how the associated taxes should be declared and calculated based on local and international regulations

05

Structure and Content

This qualification has a high-quality syllabus provided by experts in the field. Students will explore key aspects of digital assets in art and their impact on the industry. The use of certificates of authenticity will be analyzed, and the concept of the Metaverse, its importance, and existing examples will be explored in depth.

“

*You will discover the social impact of NFTs
and how they can create communities”*

Syllabus

Throughout the program, students will have access to interactive teaching materials, case studies, and specialized readings, all hosted in a virtual library that can be accessed anytime, anywhere, without restrictions. In addition, active participation will be encouraged and personalized guidance will be provided for the development of NFT-related projects.

In this way, professionals will explore the fundamentals of NFTs and their impact on various industries, especially in the world of art and collectibles. Throughout the modules, you will learn about the key features of non-fungible tokens, popular examples of unique digital assets, and their value in the market.

In addition, you will delve into the exciting field of virtual authenticity certification, studying how you can guarantee the authenticity of luxury items and avoid counterfeits. Without a doubt, this is a unique journey where you will gain in-depth knowledge about NFTs, their application in various industries, and their potential to transform the digital landscape.

This program will give students the opportunity to connect anywhere from an electronic device with an Internet connection, combined with the Relearning methodology, which will allow them to learn with less effort and greater performance.

This Postgraduate Diploma takes place over 6 months and is divided into 3 modules:

Module 1

NFTs for Art and Collectibles

Module 2

Authenticity Certification with NFTs

Module 3

The NFTs in the Metaverse, DAOs and New Trends

Where, When and How is it Taught?

TECH gives you the opportunity to complete this Postgraduate Diploma in NFTs entirely online. Throughout the 6 months of the educational program, the students will be able to access all the contents of this program at any time, allowing them to self-manage their study time.

A unique, key, and decisive educational experience to boost your professional development and make the definitive leap.

Module 1. NFTs for Art and Collectibles

1.1. NFTs 1.1.1. NFTs 1.1.2. Key Features 1.1.3. Examples of Popular NFTs	1.2. NFTs and Art World 1.2.1. Changes in the Art Industry 1.2.2. Examples of Art NFTs and their Market Value 1.2.3. NFT Impact in Artists	1.3. NFTs as Collectibles 1.3.1. The NFTs as Collectibles 1.3.2. Examples of Popular Collectible NFTs and their Market Value 1.3.3. NFTs and their Potential to Expand the Market for Collections	1.4. Social Impact of NFTs 1.4.1. Social Benefits of NFTs 1.4.2. NFTs for Communities Creation 1.4.3. Opportunities NFTs Offer to the World of Art and Culture
1.5. Advantages and Disadvantages of NFTs 1.5.1. The End of Counterfeiting 1.5.2. Vulnerabilities in the Security of NFTs 1.5.3. NFTs and Its Impact on the Environment	1.6. Technology behind NFTs 1.6.1. Blockchain and its Role in the Creation of NFTs 1.6.2. Smart Contracts and its Use in the Creation of NFTs 1.6.3. Creation and Verification of NFTs	1.7. Creation of NFTs and Royalties 1.7.1. Copyrights 1.7.2. Secondary Market Control 1.7.3. Transparency and Monitoring	1.8. NFT Markets 1.8.1. Market Platforms 1.8.2. Purchasing Process 1.8.3. Value and Demand
1.9. NFTs in Different industries 1.9.1. NFTs in the Music Industry 1.9.2. NFTs in the Video Sports Industry 1.9.3. NFTs in the Video Game Industry	1.10. The Future of NFTs 1.10.1. Trends in the of NFTs Market 1.10.2. Changes in the Near Future 1.10.3. NFT Impact in Global Economy		

Module 2. Authenticity Certification with NFTs

2.1. NFT concept for luxury goods 2.1.1. Objectives and Needs of the Luxury Sector 2.1.2. Structure of NFTs 2.1.3. NFT-Compatible Networks	2.2. Size of the counterfeit market 2.2.1. Secondary and Parallel Market 2.2.2. Other Anti-Counterfeiting Tools 2.2.3. Size of the Market and Losses Incurred by the Brands	2.3. NFTs as a Guarantee of Authenticity Against Counterfeiting 2.3.1. NFT: The Only Completely Tamper-Proof Solution 2.3.2. Integration of NFTs in Product Certification Chains 2.3.3. Verification of Authenticity Guarantees	2.4. Elimination of double sales with CFNs 2.4.1. Problem of Double Selling in the Digital Sector 2.4.2. Solutions Provided by Blockchain Technology 2.4.3. Smart Contract Modifications to Ensure that Double Sales Cannot Be Made
2.5. Sale and Purchase Process with NFTs 2.5.1. Marketplaces for Authenticity NFTs 2.5.2. Independent Platforms 2.5.3. NFT Management Wallets	2.6. Article Traceability 2.6.1. Product Traceability 2.6.2. Blockchain options for traceability 2.6.3. Traceability Products in Blockchain	2.7. Valuation of NFTs 2.7.1. Tokenomics of Authenticity NFTs 2.7.2. Value of NFTs 2.7.3. Residual Value of NFTs in Consumable Products	2.8. Use Case 1. Watches 2.8.1. Customer Needs 2.8.2. Residence of Product Value 2.8.3. Customer Benefits with the Use of NFTs
2.9. Use Case 2. Bottles of Wine 2.9.1. Customer Needs 2.9.2. Residence of Product Value 2.9.3. Customer Benefits with the Use of NFTs	2.10. Other Possible Cases of Use 2.10.1. Application of Certificates in Other Industries 2.10.2. NFT as certificate in access management 2.10.3. NFT as a Carbon Credit Certificate		

Module 3. The NFTs in the Metaverse, DAOs and New Trends

3.1. NFTs in the Metaverse 3.1.1. Concept of Metaverse. Characteristics 3.1.2. Importance of NFTs in the Metaverse 3.1.3. Examples of Existing Metaverse	3.2. Use of NFTs in the Metaverse 3.2.1. Creation and Sale of Unique Virtual Objects 3.2.2. Immersive Gaming and Entertainment Experiences 3.2.3. Possibilities for Investment in the Metaverse through NFTs	3.3. Economic Impact of NFTs in the Metaverse 3.3.1. Growth of the Industry of NFTs in the Metaverse 3.3.2. Benefits to Creators and Owners of NFTs 3.3.3. Potential of NFTs to Revolutionize the Digital Economy	3.4. DAOs 3.4.1. Definition and Characteristics of a DAO Network 3.4.2. Operation of a DAO 3.4.3. Differences between a DAO and Traditional Companies
3.5. Examples of DAOs 3.5.1. Successful examples of DAOs in the crypto industry 3.5.2. DAOs for Project Financing 3.5.3. DAOs for Digital Community Governance	3.6. Advantages and Disadvantages of DAOs 3.6.1. Advantages of DAOs Compared to Traditional Companies 3.6.2. Disadvantages and Risks Associated with DAOs 3.6.3. Legal and Regulatory Considerations for DAOs	3.7. DAOs and their Relationship with NFTs 3.7.1. Benefits and Challenges of Integrating NFTs into DAOs 3.7.2. Use of NFTs in DAOs 3.7.3. Examples of DAOs that Use NFTs in their Business Models	3.8. The Trend Towards Decentralization - Web 3.0. 3.8.1. Concept of Web 3.0 3.8.2. Differences between Web3 and Web2 3.8.3. Advantages of Decentralization in the Digital World
3.9. Trends in Decentralized Finance - DeFi 3.9.1. Definition of DeFi 3.9.2. Benefits of DeFi over Traditional Finance 3.9.3. Challenges and Risks associated with DeFi	3.10. New Trends with NFTs 3.10.1. Tokenization of physical assets and its relation to NFTs 3.10.2. The Use of NFTs in the Creation of Digital Identities and its Impact on Privacy 3.10.3. NFTs in Sectors such as Education, Health and the Environment		

Become an expert by putting an end to counterfeiting and examining its vulnerabilities and impact on the environment"

06

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule"

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

07

Our Students' Profiles

The Postgraduate Diploma is intended for university graduates with prior degrees in Computer Science, Finance, or Business Administration.

This program uses a multidisciplinary approach as the students have a diverse set of academic profiles and represent multiple nationalities.

The Postgraduate Diploma can also be taken by professionals who, being university graduates in any area, have two years of work experience in the field of Tokenization, NFTs, and digital currencies.

- ♦ Technical Engineer in Computer Systems, University from Alcalá de Henares

09

Impact on Your Career

This Postgraduate Diploma will provide business professionals with a competitive advantage, exciting employment opportunities, innovation and adaptability skills, along with a strategic perspective in the most valuable professional networks in digital environments. By being at the forefront of virtual transformation and understanding the potential of NFTs, professionals will be able to advance their careers to new positions within their companies or on a personal level, thanks to the digital economy.

“

Explore platforms, the purchasing process, and the growing demand for NFTs with the educational materials TECH has available for you”

Are you ready to take the leap? Excellent professional development awaits you

TECH's Postgraduate Diploma in NFTs is an intensive program that prepares you to face business challenges and decisions in the field of Tokenization. The main objective is to promote your personal and professional growth. Helping you achieve success.

If you want to improve yourself, make a positive change at a professional level, and network with the best, then this is the place for you.

Want to know what the future holds for NFTs? You'll analyze market trends, upcoming changes, and their impact on the global economy.

You will delve into how NFTs are revolutionizing different industries, from music to sports and video games.

When the change occurs

Type of change

Salary increase

The completion of this program represents a salary increase of more than **27.19%** for our students.

10

Benefits for Your Company

Thanks to TECH, business professionals will be valuable assets to the organizations they work for. By completing this qualification, they will be able to provide competitive advantages, drive innovation, open up new market opportunities, optimize digital asset management, and provide specialized technical knowledge. This will help companies adapt to the digital economy, differentiate themselves from the competition, and capitalize on the growth of NFTs in various industry sectors.

“

*You will learn about real-world
applications of digital verification
in watches and wine bottles”*

Developing and retaining talent in companies is the best long-term investment.

01

Growth of talent and intellectual capital

The professional will introduce the company to new concepts, strategies, and perspectives that can bring about significant changes in the organization.

02

Retaining high-potential executives to avoid talent drain

This program strengthens the link between the company and the professional and opens new avenues for professional growth within the company.

03

Building agents of change

You will be able to make decisions in times of uncertainty and crisis, helping the organization overcome obstacles.

04

Increased international expansion possibilities

Thanks to this program, the company will come into contact with the main markets in the world economy.

05

Project Development

The professional can work on a real project or develop new projects in the field of R & D or business development of your company.

06

Increased competitiveness

This program will equip students with the skills to take on new challenges and drive the organization forward.

11 Certificate

This Postgraduate Diploma in NFTs guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Postgraduate Diploma issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a diploma for the **Postgraduate Diploma in NFTs** endorsed by TECH Global University, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
