01 Welcome

The management of the insurance industry has changed greatly due to technological advances, product adaptation and advanced threat management. Today, insurance companies use techniques to anticipate risks more accurately. In addition, regulators have implemented measures to strengthen financial stability, protect customers and promote transparency in the industry. This has generated the need for highly trained business professionals in this field. Aware of this demand, TECH has developed a program that will enable students to become experts in the insurance field. This program is presented in a 100% online format, which provides flexibility to access the content at any time and place, with no time restrictions.

Professional Master's Degree MBA in Insurance Industry Management
TECH Technological University

“

Become an expert in international insurance activity control legislation with this exclusive Professional Master's Degree from TECH"

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class center for intensive managerial skills education.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that balances the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

+100000

executives prepared each year

+200

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

+500

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH students represent more than 200 different nationalities.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (postgraduate learning methodology with the best international valuation) with the Case Study. Tradition and vanguard in a difficult balance, and in the context of the most demanding educational itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a ground-breaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case analyses in academia"

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you education of the highest academic level”

This program will provide you with a multitude of professional and personal advantages, among which we highlight the following:

01

A Strong Boost to Your Career

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of students achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of the company

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional fields.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

You will take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different fields in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

You will be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified teachers from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to study with a team of world-renowned teachers.

04 Objectives

The purpose of this program is for the professionals to acquire the necessary skills and knowledge that will enable them to lead and efficiently manage an insurance company. In this way, the graduates will be able to make strategic decisions, control risks and design and adapt products. All this under a 100% online modality that will allow them to efficiently supervise the distribution of insurance, maintain regulatory compliance and establish solid relationships with clients.

“

You will stand out in a constantly evolving market and expand your legal knowledge in the international insurance field"

**TECH makes the goals of their students their own goals too
Working together to achieve them**

The **Professional Master's Degree in MBA in Insurance Industry Management** will enable students to:

01

Develop specialized knowledge on the implementation and operation of foreign countries' insurers in other countries: (i) within the European Union as well as from countries outside the European Union

04

Delimit the framework for compliance with the insurance activity

02

Develop the peculiarities of the insurance contract

03

Examine the international regulatory framework of the insurance market and its recent evolution

05

Analyze the evolution of insurance

06

Reflecting on the insurance implications of non-sectoral regulations

07

Assess the impact of information security on the insurance legislative framework

08

In this sense, the business professionals will encounter the regulations in the insurance sector, its legal aspects, risk and taxation, and a number of fundamental concepts that will make them an expert in the field once the program is completed.

“

*A study plan tailored to your needs
and designed under the most effective
pedagogical methodology, Relearning”*

Syllabus

One of the main novelties of this Professional Master's Degree is the inclusion of tax matters, as well as the importance of solvency and cybersecurity in the insurance industry. In addition, practical cases of international scope are taught, making it a content of excellence. This program is offered in a 100% online format and will have a large library of multimedia resources such as interactive summaries and specialized readings. Additionally, it gives total freedom to access from any device with Internet connection.

Over the course of 12 months, this program creates a unique and effective learning experience that lays the foundation for a promising and successful future in insurance industry management. In this way, you will cover a wide range of topics relevant to the international insurance industry. In this sense, the students will analyze insurance as a regulated activity abroad and will consider the global context, which will allow them to understand the legal bases that support this activity.

They will also address the relationship between insurance and risk, exploring how this sector evaluates, manages and assumes the risks associated with the policies. It will also delve into global regulatory compliance and corporate governance, highlighting the importance of transparency and accountability in the insurance sector.

For this reason, an exclusive plan has been designed that will be adapted to the professional objectives and will propel the student to excellence in the field of insurance. The program will offer innovative content based on the latest trends, and added to the Relearning method, which will allow the professional to understand complex concepts in less time and more efficiently.

This Professional Master's Degree takes 12 months and is divided into 10 modules:

Module 1	Insurance as a Regulated Activity at the international
Module 2	Legal aspects of insurance. International Context
Module 3	Insurance and Risk
Module 4	Insurance Distribution

Insurance sector</p>		

Module 6. Composition of the Economic Balance Sheet under the Solvency Rules
6.1. Solvency

- 6.1.1. Solvency definition process
- 6.1.2. Comparison of Solvency I vs solvency
- 6.1.3. Scope of Application
- 6.1.4. Solvency structuring
- 6.1.5. Solvency transition measures
- 6.1.6. Solvency regulatory review

6.2. Balance sheet: Assets

- 6.2.1. Asset valuation. (NF13)
- 6.2.2. Intangible assets
- 6.2.3. Finance and operating leases
- 6.2.4. Property, plant and equipment
- 6.2.5. Investments
- 6.2.6. Matching adjustment and replicating portfolio

6.3. Balance sheet: Liabilities

- 6.3.1. Technical provisions. Separation by LOB
- 6.3.2. Calculation of liabilities: as a whole vs. best estimate
- 6.3.3. Calculation of the present value of provisions

6.4. Balance sheet: Net Assets

- 6.4.1. Valuation of Shareholders' Equity: Basic Shareholders' Equity
- 6.4.2. Valuation of Shareholders' Equity: Supplementary Shareholders' Equity
- 6.4.3. Quality of Shareholders' Equity Tier Equity
- 6.4.4. Minimum Solvency Capital (MCR)
- 6.4.5. Risk map. Standard formula vs. internal/partial model

6.5. Life underwriting risk

- 6.5.1. Underwriting risk in life insurance
- 6.5.2. Underwriting risk in death insurance
- 6.5.3. Underwriting risk in health insurance (life techniques)

6.6. Market Risk

- 6.6.1. Market Risk
- 6.6.2. Interest Rate Risk
- 6.6.3. Equity Risk
- 6.6.4. Real estate risk
- 6.6.5. Spread risk
- 6.6.6. Concentration risk
- 6.6.7. Currency risk

6.7. Non-life underwriting risk

- 6.7.1. Non-life underwriting risk: Premium and reserve; fall and catastrophe
- 6.7.2. Underwriting risk in health insurance (non-life techniques)
- 6.7.3. USP: Own parameters

6.8. Operational risk, credit risk and calculation of the BSCR

- 6.8.1. Operational risk
- 6.8.2. Operational risk calculation methods
- 6.8.3. Introduction to credit risk
- 6.8.4. Operational risk calculation methods
- 6.8.5. Global risk aggregation matrix BSCR

6.9. Intergroup SCR: financial situation

- 6.9.1. Participating entity
- 6.9.2. Related entity
- 6.9.3. Groups subject to supervision
- 6.9.4. Consolidation methods and calculation of the group's solvency

6.10. New standards: IFRS 17

- 6.10.1. Nf 17
- 6.10.2. BBA Method
- 6.10.3. VFA Method
- 6.10.4. PAA Method
- 6.10.5. Transition

Module 7. Solvency: Private Management of the Insurance

7.1. Governance and Risk Management System

- 7.1.1. Fitness and Honorability
- 7.1.2. Conflict of Interest
- 7.1.3. Risk management system

7.2. Internal Risk and Solvency Assessment (ORSA)

- 7.2.1. ORSA Process
- 7.2.2. Significant risks: Stress testing and scenario analysis
- 7.2.3. Description and contents of the ORSA report

7.3. Risk Appetite and Tolerance

- 7.3.1. Considerations for determining risk appetite
- 7.3.2. Methodology
- 7.3.3. Reference Frameworks

7.4. Internal Control and Internal Audit

- 7.4.1. Internal control system
- 7.4.2. Internal audit function
- 7.4.3. Risk Map

7.5. Actuarial Function

- 7.5.1. Organizational Structure
- 7.5.2. Lines of defense
- 7.5.3. Scope of the actuarial function

7.6. Solvency and Financial Condition Report

- 7.6.1. Governance System
- 7.6.2. Risk Profile
- 7.6.3. Valuation for solvency and capital management purposes

7.7. Periodic Supervisory Report

- 7.7.1. Scope
- 7.7.2. Objectives
- 7.7.3. Risks foreseen in the future

7.8. Reporting Models Quantitative - Quarterly

- 7.8.1. Information required for monitoring
- 7.8.2. Taxonomy
- 7.8.3. Periodicity

7.9. Reporting Models Quantitative - Annual

- 7.9.1. Information required for monitoring
- 7.9.2. Taxonomy
- 7.9.3. Periodicity

7.10. Internal Models. Other Considerations

- 7.10.1. Internal Models
- 7.10.2. Captive Companies
- 7.10.3. Review of EU insurance rules

Module 8. Conduct and Supervisory Risk in the Insurance Industry
8.1. General Principles of Conduct and General Reporting Obligations

- 8.1.1. General principles and duties of information
- 8.1.2. Information to be provided by an insurance company

- 8.2.2. Community regulations on information and conduct of business rules
- 8.2.3. International regulations, approximation and examples

8.3. Information prior to contracting

- 8.3.1. Types of sales
- 8.3.2. Non-life insurance
- 8.3.3. Life insurance

8.4. Information prior to the contracting of insurance-based investment products

- 8.4.1. Insurance-based investment products
- 8.4.2. Information on insurance-based investment products
- 8.4.3. Types of sales

8.5. Modes of transmission of information

- 8.5.1. General requirements
- 8.5.2. Distance marketing
- 8.5.3. Special requirements applicable to insurance-based investment products

8.6. Advertising in Insurance

- 8.6.1. General principles and reservation of denomination
- 8.6.2. Advertising of insurance companies
- 8.6.3. Advertising of insurance brokers

8.7. Conflicts of Interest in Insurance Distribution

- 8.7.1. Detection of conflict of interest
- 8.7.2. Conflict of interest policy
- 8.7.3. Procedures for action

8.8. Remuneration and incentives

- 8.8.1. General Principle
- 8.8.2. Concept of remuneration
- 8.8.3. Remuneration and incentives in the case of insurance-based investment products

8.9. Joint selling with non-insurance products

- 8.9.1. Practice of combined and linked sales: information duties
- 8.9.2. Combined sales
- 8.9.3. Related sales

8.10. Product life cycle and governance

- 8.10.1. Insurance product designer
- 8.10.2. Governance requirements applicable to designers. Product Life Cycle
- 8.10.3. Governance requirements applicable to distributors of non-designer products

Module 9. Taxation in the Insurance Industry. Direct Taxes

9.1. Direct Taxation

- 9.1.1. Taxes comprising direct taxation
- 9.1.2. Direct taxation as sustainable value creation (ESG)
- 9.1.3. General and specific regulations for direct taxation

9.2. Taxation of insurance companies

- 9.2.1. Taxation of Insurance Entities. Key Concepts
- 9.2.2. Specialties for insurance companies
- 9.2.3. Declaration in a tax consolidation group with a dominant insurance company

9.3. Accounting: Chart of Accounts for Insurance Companies / IFS

- 9.3.1. Sectoral adaptation
- 9.3.2. Financial statements and premium volume
- 9.3.3. Reflection in corporate income tax liquidation

9.4. Corporate Income Tax I - International Taxation

- 9.4.1. Adjustments to taxable income: technical provisions
- 9.4.2. Offsetting of tax losses: Tax group
- 9.4.3. Capitalization reserve

9.5. Corporate Income Tax II - International Taxation

- 9.5.1. Determination of the total tax liability
- 9.5.2. Deductions and Allowances
- 9.5.3. Limits of deduction and compensations in the future

9.6. Form 200 and 220 and equivalents in other jurisdictions

- 9.6.1. Special features of the Model
- 9.6.2. Annexes and supplementary declarations
- 9.6.3. Deadlines and filing

9.7. Investments in EIGs

- 9.7.1. Relationship with the insurance industry
- 9.7.2. Related tax consultations
- 9.7.3. Return and specific aspects to be taken into account

9.8. Other direct taxation

- 9.8.1. Special features of the fractioned payments of the IS
- 9.8.2. Corporate restructuring
- 9.8.3. Reference value for other direct taxes

9.9. Reporting: relationship with direct taxation

- 9.9.1. SII
- 9.9.2. Country by Country report
- 9.9.3. DAC6

9.10. SI inspections. Key Aspects

- 9.10.1. Key aspects in SI inspections
- 9.10.2. Related transactions
- 9.10.3. Direct taxation in the world. New developments in fiscal year 2023

Module 10. Taxation. Indirect Taxes**10.1. Community Regulations. Origin of the exemption**

- 10.1.1. Value Added Tax in the European Union
- 10.1.2. Directive 2006/112/EC
- 10.1.3. Impact of the exemption

10.2. Limitations on the deduction of indirect tax according to country

- 10.2.1. Indirect tax as a cost
- 10.2.2. Pro-rata and differentiated sectors
- 10.2.3. Minimum deduction

10.3. European Economic Interest Groupings (EIGs)

- 10.3.1. The EEIG
- 10.3.2. EIGs in the insurance sector
- 10.3.3. VAT exemption and its evolution in the Community Environment

10.4. Branching in the Insurance Industry

- 10.4.1. Subsidiary vs. Branch Office
- 10.4.2. Parent - branch operations
- 10.4.3. Practical risks

10.5. Special Regime of the Group of Entities (SRGE)

- 10.5.1. The SRGE
- 10.5.2. SRGE in the insurance sector
- 10.5.3. SRGE vs. EEIG (European Economic Interest Grouping)

10.6. Leasing and insurance

- 10.6.1. Judgment of the CJEU BGŻ Leasing - Case C-224/11
- 10.6.2. Leasing as a contract of a complex nature
- 10.6.3. Insurance formulas in leasing

10.7. Self-insurance

- 10.7.1. Elements of insurance
- 10.7.2. Approximation to the concept of self-insurance
- 10.7.3. Self-insurance and leasing

10.8. International Claims Management

- 10.8.1. Management as part of mediation
- 10.8.2. Evolution in its treatment for VAT purposes
- 10.8.3. Cross-border claims and correspondents

10.9. Contact Center, external collaborators and mediators

- 10.9.1. Contact Center, external collaborators and mediators. Functions
- 10.9.2. Developments in its treatment for tax purposes
- 10.9.3. Practical risks

10.10. Insurance Premium Tax (IPS) in Europe

- 10.10.1. IPS in Europe. Concept
- 10.10.2. Points of Connection in terms of Localization Rules
- 10.10.3. Tax rates in Europe

07

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story"

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

08

Our Students' Profiles

The Professional Master's Degree is aimed at university graduates who have previously completed any of the following programs in the field Finance, Business, The Economy Science Teaching

This program uses a multidisciplinary approach as the students have a diverse set of academic profiles and represent multiple nationalities.

Professionals who, being university graduates in any area, have two years of work experience in the field of Insurance may also take the Professional Master's Degree.

“

You will obtain the necessary skills to make strategic decisions and guarantee business success”
