01 Welcome

Increasing competition, and the political and economic volatility of many markets mean that today's business strategies must be refined and adapted to uncertain situations. This is not an easy task, which is why the figure of the Chief Strategy Officer or CSO is becoming increasingly important. This high-level manager must possess extensive skills in strategic management, organizational behavior, business analytics and planning. All of this confers a high status, both in the workplace and economically. In this program, the manager will have access to the keys and skills necessary to position themselves as a prestigious CSO, accessing teaching material written by leaders versed in the field of strategic analysis. TECH's 100% online methodology guarantees access to an innovative program without having to sacrifice any aspect of the future CSO's professional or personal life.

MBA in Strategy (CSO, Chief Strategy Officer). TECH
Technological University

“

Take a decisive step forward by specializing in the qualities that make a competent CSO stand out the most, taught by the best professionals in the business sector”

02

Why Study at TECH?

TECH is the world's largest 100% online business school. It is an elite business school, with a model based on the highest academic standards. A world-class centre for intensive managerial skills training.

“

TECH is a university at the forefront of technology, and puts all its resources at the student's disposal to help them achieve entrepreneurial success"

At TECH Technological University

Innovation

The university offers an online learning model that combines the latest educational technology with the most rigorous teaching methods. A unique method with the highest international recognition that will provide students with the keys to develop in a rapidly-evolving world, where innovation must be every entrepreneur's focus.

"Microsoft Europe Success Story", for integrating the innovative, interactive multi-video system.

The Highest Standards

Admissions criteria at TECH are not economic. Students don't need to make a large investment to study at this university. However, in order to obtain a qualification from TECH, the student's intelligence and ability will be tested to their limits. The institution's academic standards are exceptionally high...

95% | of TECH students successfully complete their studies

Networking

Professionals from countries all over the world attend TECH, allowing students to establish a large network of contacts that may prove useful to them in the future.

100,000+

executives trained each year

200+

different nationalities

Empowerment

Students will grow hand in hand with the best companies and highly regarded and influential professionals. TECH has developed strategic partnerships and a valuable network of contacts with major economic players in 7 continents.

500+

collaborative agreements with leading companies

Talent

This program is a unique initiative to allow students to showcase their talent in the business world. An opportunity that will allow them to voice their concerns and share their business vision.

After completing this program, TECH helps students show the world their talent.

Multicultural Context

While studying at TECH, students will enjoy a unique experience. Study in a multicultural context. In a program with a global vision, through which students can learn about the operating methods in different parts of the world, and gather the latest information that best adapts to their business idea.

TECH strives for excellence and, to this end, boasts a series of characteristics that make this university unique:

Learn with the best

In the classroom, TECH's teaching staff discuss how they have achieved success in their companies, working in a real, lively, and dynamic context. Teachers who are fully committed to offering a quality specialization that will allow students to advance in their career and stand out in the business world.

Teachers representing 20 different nationalities.

At TECH, you will have access to the most rigorous and up-to-date case studies in the academic community"

Analysis

TECH explores the student's critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

Academic Excellence

TECH offers students the best online learning methodology. The university combines the Relearning method (a postgraduate learning methodology with the highest international rating) with the Case Study. A complex balance between tradition and state-of-the-art, within the context of the most demanding academic itinerary.

Economy of Scale

TECH is the world's largest online university. It currently boasts a portfolio of more than 10,000 university postgraduate programs. And in today's new economy, **volume + technology = a groundbreaking price**. This way, TECH ensures that studying is not as expensive for students as it would be at another university.

03

Why Our Program?

Studying this TECH program means increasing the chances of achieving professional success in senior business management.

It is a challenge that demands effort and dedication, but it opens the door to a promising future. Students will learn from the best teaching staff and with the most flexible and innovative educational methodology.

“

We have highly qualified teachers and the most complete syllabus on the market, which allows us to offer you training of the highest academic level"

This program will provide students with a multitude of professional and personal advantages, particularly the following:

01

A significant career boost

By studying at TECH, students will be able to take control of their future and develop their full potential. By completing this program, students will acquire the skills required to make a positive change in their career in a short period of time.

70% of participants achieve positive career development in less than 2 years.

02

Develop a strategic and global vision of companies

TECH offers an in-depth overview of general management to understand how each decision affects each of the company's different functional areas.

Our global vision of companies will improve your strategic vision.

03

Consolidate the student's senior management skills

Studying at TECH means opening the doors to a wide range of professional opportunities for students to position themselves as senior executives, with a broad vision of the international environment.

You will work on more than 100 real senior management cases.

04

Take on new responsibilities

The program will cover the latest trends, advances and strategies, so that students can carry out their professional work in a changing environment.

45% of graduates are promoted internally.

05

Access to a powerful network of contacts

TECH connects its students to maximize opportunities. Students with the same concerns and desire to grow. Therefore, partnerships, customers or suppliers can be shared.

You will find a network of contacts that will be instrumental for professional development.

06

Thoroughly develop business projects

Students will acquire a deep strategic vision that will help them develop their own project, taking into account the different areas in companies.

20% of our students develop their own business idea.

07

Improve soft skills and management skills

TECH helps students apply and develop the knowledge they have acquired, while improving their interpersonal skills in order to become leaders who make a difference.

Improve your communication and leadership skills and enhance your career.

08

Be part of an exclusive community

Students will be part of a community of elite executives, large companies, renowned institutions, and qualified professors from the most prestigious universities in the world: the TECH Technological University community.

We give you the opportunity to train with a team of world renowned teachers.

04 Objectives

This program has been designed with the clear objective in mind of perfecting the manager's skills to strongly support their value proposition as a CSO. To this end, all the theoretical topics of relevance in the development and creation of business strategies will be addressed throughout the syllabus, adequately contextualized with real cases and examples that facilitate learning.

“

You will have full access to complementary readings specifically selected by the teaching team, being able to delve deeper into the strategic issues that interest you most"

Your goals are our goals.

We work together to help you achieve them.

The MBA in Strategy (CSO, Chief Strategy Officer) will enable the student to:

01

Define the elements of strategy as the main foundation of strategic management

04

Develop and implement the most appropriate strategy to meet the company's objectives

02

Acquire knowledge of the different types of strategy that can be implemented in a company

03

Analyze the strategic behavior of an organization at different levels

05

Describe the logic of the strategic management process and the meaning of each of its phases

06

Define the basic relationships of the company with its environment

08

Identify the different growth paths that companies can choose to pursue

09

Apply theoretical knowledge to real situations through case studies

07

Analyze the influence of Stakeholders on the company

10

Encourage an entrepreneurial and creative attitude

Develop strategies and methodologies to carry out decision-making processes in critical or decisive situations

12

Apply appropriate human resources management techniques

13

Develop leadership skills that lead to increased team motivation

14

Apply marketing techniques that boost company visibility

15

Properly manage purchasing and supply chain management

16

Understand the globalized environment in which the company operates and to develop strategies that favor company globalization

05 Skills

In order to guarantee an exhaustive and effective development of the essential competencies in the daily work of a Chief Strategy Officer, TECH has placed special emphasis throughout the program on the acquisition and improvement of the most in-demand soft skills. This leads to a greater emphasis on issues such as talent management, people management and time and effort management, all of which are highly valued competencies for 21st century managers.

“

You will steer your career into the higher realm of operational and business strategy, acquiring the role of CSO with solvency and effectiveness”

01

Explore new business opportunities and focus on innovation and entrepreneurship

02

Carry out the financial management of the company

03

Design and carry out strategic planning that meets the company's objectives and current sustainability criteria

04

Conduct internal and external strategic analysis

05

Develop strategies for risk prevention and control

06

Develop the managerial skills needed to manage all company departments

08

Implement an international strategy to increase the company's profits

09

Design a purchasing and procurement strategy to improve the company's profitability

07

Analyze the company's strategy data

10

Apply coaching and emotional intelligence techniques to manage and promote employee performance

06

Structure and Content

The MBA in Strategy (CSO, Chief Strategy Officer) has been structured following TECH's pedagogical methodology, Relearning, which allows total flexibility when it comes to taking on the course load. Considerable savings are achieved in the number of study hours invested, as the most important strategy and management concepts are acquired in a natural way, with a reiteration of these concepts throughout the program.

“

We put all our resources at your disposal so that you can develop the necessary skills to achieve a successful professional future”

Syllabus

The MBA in Strategy (CSO, Chief Strategy Officer) at TECH Technological University is an intensive program that will prepare you to face challenges and business decisions at a strategic and general management level. Its main objective is to foster your personal and professional growth, helping you to achieve success. The content of this program is designed to promote the development of managerial skills that enable more rigorous decision making in uncertain environments.

Throughout 1,500 hours of study, you will analyze a multitude of practical cases through individual work, achieving a deep learning that will allow you to apply the knowledge learned in your daily practice. It is, therefore, an authentic immersion in real business situations.

This program deals in depth with different areas of the company and is designed to specialize managers who understand strategic management from a strategic, international and innovative perspective.

10.7. Statistical Analysis with R

10.8. Machine Learning for Business Analytics

10.9. Text and Natural Language Mining

10.10. Integration of Tools for Strategy

07

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

TECH Business School uses the Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

This program prepares you to face business challenges in uncertain environments and achieve business success.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch to present executives with challenges and business decisions at the highest level, whether at the national or international level. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and business reality is taken into account.

“

You will learn, through collaborative activities and real cases, how to solve complex situations in real business environments”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They must integrate all their knowledge, research, argue and defend their ideas and decisions.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Our online system will allow you to organize your time and learning pace, adapting it to your schedule. You will be able to access the contents from any device with an internet connection.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our online business school is the only one in the world licensed to incorporate this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Management Skills Exercises

They will carry out activities to develop specific executive competencies in each thematic area. Practices and dynamics to acquire and develop the skills and abilities that a high-level manager needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
