01 Welcome

According to the CEFR, the C1 Level implies an effective operational command of the language, which means that a person can speak fluently and naturally in a wide range of professional or social situations. When it comes to English, this opens the door to a world of enormous job opportunities, as this language is used in countless international projects, business meetings and major companies.

TECH has assembled a team of expert native teachers, who have developed all the contents of this Language Course and complemented it with video summaries, practical exercises of all kinds and downloadable content to review and strengthen all the language skills of C1 Level English.

Presentation video

“

You will receive excellent guidance so that you can face the C1 Level exam with maximum confidence”

Introduction

Achieving a C1 level in English requires suitable preparation, because, although it is not a particularly difficult language to master, it is important to know the different intonations and regional differences to perfection. The program's native teachers have placed special emphasis on all these issues throughout the syllabus, with a unique educational methodology in which the student does not have to invest enormous amounts of hours and effort to start obtaining results.

English is spoken in the world's most powerful companies, leading governments and major institutions. Enroll now and aspire to take a remarkable step in your professional future

With a C1 level of English you will far surpass other candidates at lower levels or without such advanced language proficiency

02

Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society. Nowadays, students must have an official certificate that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies only accept candidates who have an official qualification based on the Common European Framework of Reference for Languages (CEFR).

“

The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR program"

tech 10 | Is it Important to Obtain a Language Certificate?

TECH Technological University

The Common European Framework of Reference for Languages is the only officially recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not officially valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH, we offer you the only intensive Language Course to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

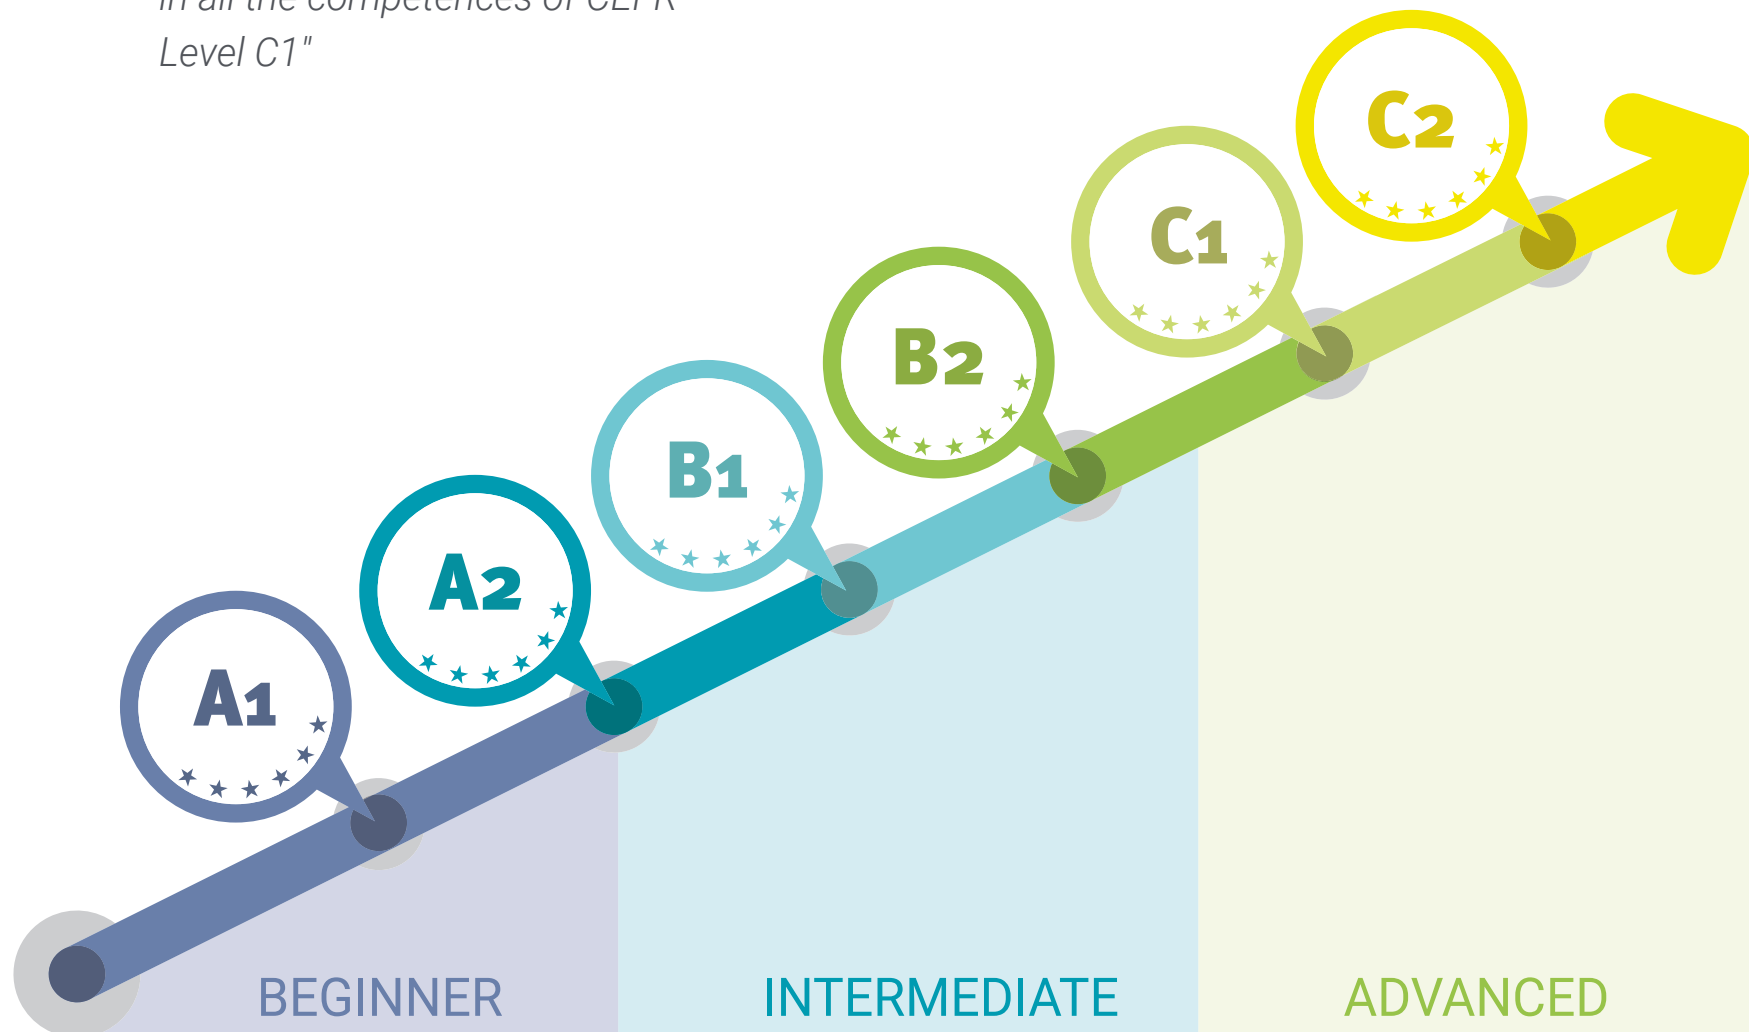

Learn English and make the most of it by accrediting it with an official qualification based on the CEFR

Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate is valid for life

“

You will have a comprehensive and complete syllabus at your disposal in all the competences of CEFR Level C1”

03

What Is Level C1?

Level C1 is part of the Proficient User Level, which is further divided into two sub-levels: First and Second Proficient User Levels (C1 and C2).

Level C1 is called Effective Operational Proficiency. What seems to characterize this level is good access to a broad linguistic repertoire. This allows for fluid and spontaneous communication, as illustrated in the following examples: express themselves fluently and spontaneously, almost effortlessly. Good command of an extensive lexical repertoire that allows them to easily overcome their deficiencies with circumlocutions. There is hardly any noticeable search for expressions or avoidance strategies; only a conceptually difficult topic can hinder the natural flow of their speech.

The discourse skills that characterize the previous band are still evident at Level C1, with an emphasis on greater fluency; for example: is able to select, from a fluid repertoire of discourse functions, the most appropriate phrase with which to begin comments in order to take the floor or to gain time and hold it while thinking; produces clear, fluent and well-structured speech; and has control of organizational structures, connectors and cohesive mechanisms.

C₁

“

In TECH's C1 Language Course we thoroughly prepare you to obtain your English C1 certificate"

What are the C1 Level Skills?

01

Can understand a wide variety of long and demanding texts and recognize implicit meanings in them

02

Can express themselves fluently and spontaneously without much obvious effort to find the right expression

“

Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH"

03

Can make flexible and effective use of the language for social, academic and professional purposes

04

Can produce clear, well-structured and detailed texts on topics of a certain complexity, showing a correct use of the mechanisms of text organization, articulation and cohesion

Our Methodology

The TECH program is a C1 English Language Course based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method in which the student works intensively and repeatedly on all the contents required by the CEFR, thoroughly preparing them to pass the test.

“

In no other course will you find pre-test knowledge activation questions, lesson tests, grammar tests, a final test and specific practice of CEFR skills in each unit"

The TECH Technological University method

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

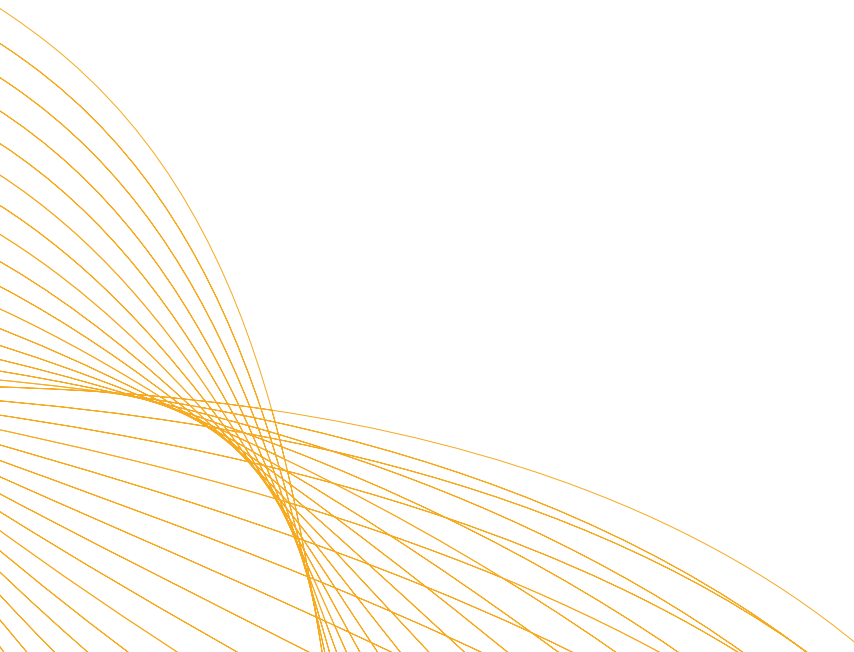

TECH's C1 English Language Course offers students a revolutionary method to comprehensively prepare for the level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the test using mock tests throughout the course.

Through activities, stories and real contexts, students will learn how to solve everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test. These simulations are developed using state-of-the-art software to facilitate immersive learning.

...All of this is enhanced with the best 100% online teaching methodology: Relearning...

Our school is the first in the world to combine storytelling with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step

This methodology, at the forefront of world teaching, is called Relearning. Our language school is the first one licensed to employ this successful method, having managed, in 2015, to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

The overall score obtained by our learning system is 8.01, according to the highest international standards

Relearning Methodology

In TECH's C1 English Language Course, learning is not a linear process, but rather a spiral (we learn, unlearn (forget) and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 35,000 university graduates with unprecedented success, in fields as diverse as Biochemistry, Genetics, Surgery, International Law, Management Skills or Financial Markets and Instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 42 years.

...with a personalized and expert-led syllabus...

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone).”

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. This way, and in what is called Neurocognitive Context-Dependent Learning, the different elements of our English C1 Language Course are connected with the context in which the participant will take their certification exam in order to guarantee success on the day of the test.

...and all this with the best learning materials at the forefront of technology and pedagogy...

"English is, without a doubt, the most important language in my profession. If my level weren't good enough, gaining access to a large number of job offers becomes virtually impossible, so I decided to hone my skills and sign up for TECH's Language Courses. Now I'm about to get my C1 certificate thanks to all the support they give and I'm thinking about studying more languages with them"

Yurena García

A Spanish businesswoman

"When my company started trading online, I realized how important it was to have a good level of English, because we were getting orders in English from all over the world. With TECH, I was able to develop my skills without neglecting my day-to-day work, which was an important factor in significantly improving my success in this new market"

Our Students' Profiles

We know that learning a language isn't easy. Many of us have tried, and failed, for years to consolidate our knowledge and acquire the skills required to obtain qualifications that demonstrate what we have learned. Level exams are complex tests that must be prepared for thoroughly and with good expert guidance.

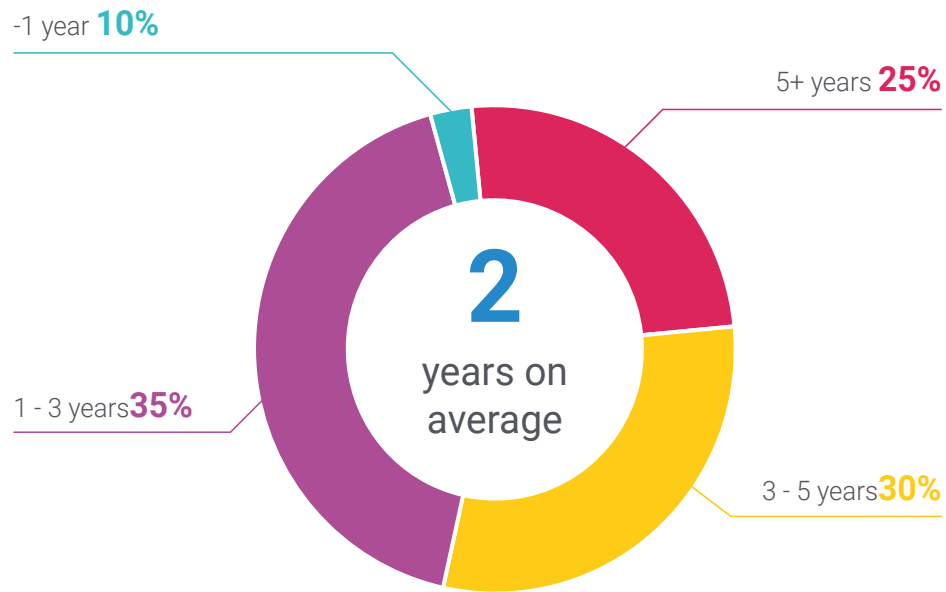

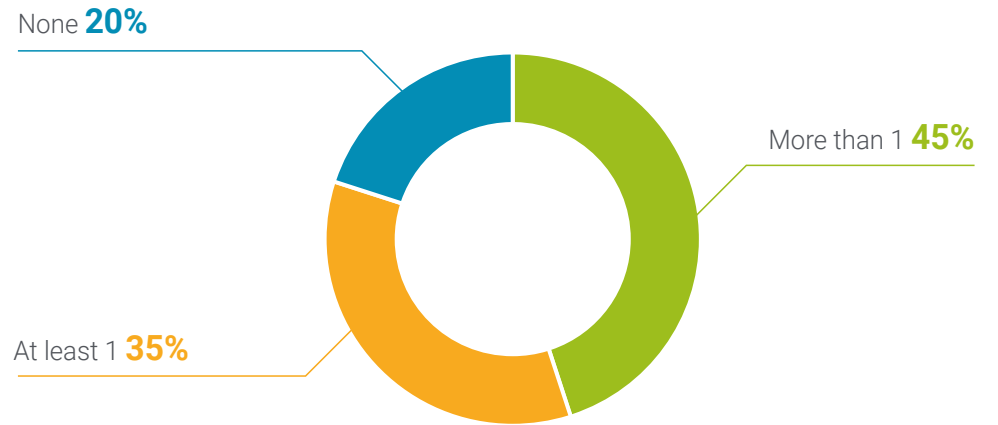

“

Many of our students have previously tried other preparation methods that have led them to lose motivation. At TECH, 9 out of 10 students recommend us”

The Professional Benefits of English

Today, English is a universal language and is almost mandatory at a professional level all over the world, being fundamental in any area of personal or professional life: it is the language used in the economic field, international trade, tourism, diplomacy, industry, etc. Everything is written, spoken and read in English nowadays; it has become the second preferred language in the world. In the globalized world we live in, it is a tool that allows people from all over the world to communicate with each other.

English is the language most widely used as a first or second language, the former by some 400 million people worldwide, while an estimated 2 billion people are learning it as a second language. With this, in less than a decade, English will be spoken by 3 billion people, almost half of the Earth's total population. In this sense, there is no doubt that it will become (if it is not already) a fundamental requirement for accessing a large percentage of job offers, scholarships, university careers, business, etc.

English will give us access to a better education and, therefore, the possibility of a better job. Our job opportunities will multiply as soon as we master the language. Whether in governmental areas or in multinational companies, regardless of the field of work, English will always bring advantages when it comes to promotion or access to another job, helping to improve the current employment situation of those who master it.

Another important reason to learn English is that we will be able to access better education, without limiting ourselves to universities or training centers in our own country. It will also give us access to more current and complete information, we will learn about the latest advances and we will be able to access most scientific, academic and technological texts written in English. According to a study, more than 56% of Internet sites are published in English.

“

Today, English is the universal language. It is almost obligatory at a professional level all over the world. It is fundamental in any area of personal or professional life"

Assessment and Certification

The main evaluation objective of TECH's assessment is that students consolidate what they have learned and are aware of their progress. That is why, after completing each block, the student is shown a results report that visually indicates the skills that they should reinforce in the online classes.

“

TECH'S C1 Language Course is the only one that also awards you with a university certificate”

“ Only TECH will award students with a university certificate upon successful completion of the course”

English C1 language course evaluation tests

The assimilation of the contents is constantly and progressively evaluated. To do so, the student must pass an automatically corrected evaluation test at the end of each module and a final test that covers all the contents of the level.

Its main objective is for the student to consolidate what they have learned and to be aware of their progress, for this reason, after the evaluation test is completed, the student is shown a report of the results.

Language course evaluation criteria

- Communicative effectiveness: comprehensibility, fulfillment of expected functions, accuracy, sociolinguistic appropriateness
- Interactive and speaking skills: responsiveness and cooperation, coherence of ideas, organization, relevant and sufficient development
- Use of language: linguistic resources, formal elements of cohesion and fluency
- Formal correction: grammar, discourse cohesion, vocabulary and pronunciation

If you pass our course, you will obtain an C1 English language qualification from TECH

The certificate, which indicates successful completion of the course, will state the language studied and the level passed, according to the Common European Framework of Reference for Languages (CEFR).

The certificate issued by **TECH Technological University** only provides "pass" or "fail" as grading options, and does not express a numerical grade. Before receiving the certificate, you will be emailed a form to verify your data.

The CEFR C1 English Language Course an intensive course lasting a maximum of 4 months

Certification

Upon completion of the course, the student will receive a certificate of recognition that will guarantee their preparation to obtain, if the student wishes, the certification of that level.
