01 Welcome

Studies have shown that senior and important positions are reserved only for those who have a good command of the language used in the company. This means that to work at a high level in companies such as Ferrari, Gucci or Armani requires a perfect knowledge of Italian. In addition, being one of the cultures with the greatest influences in art and history, having a C2 level in Italian also opens a multitude of doors to academic and artistic fields. TECH has relied on a group of native teachers who are experts in the language to elaborate all the contents, guaranteeing the maximum quality and compliance with the CEFR criteria.

Presentation video

“

Having a C2 Level in Italian will open the doors to one of the strongest economies in Europe, leading in the field of fashion and automotive industry”

Introduction

Italy's relevance throughout history has always been high. The birthplace of great artists such as Michelangelo and explorers like Marco Polo, its influence is still felt today in the world of culture and fashion. World famous brands such as Dolce & Gabbana, Gucci or Versace were born in the Mediterranean country. Having a command at a C2 Level, the maximum on the scale established by the CEFR, enables access to the best jobs in Italy and greatly improves employability in other fields such as hospitality or tourism. For this reason, TECH has placed special emphasis on all the contents of the program, providing it with numerous practical exercises with which students will perfect their understanding, fluency and pronunciation.

You will take your Italian language level to the maximum, with a thorough and efficient teaching methodology.

You will have hundreds of different practical exercises to perfect the finer details of Italian, created by native teachers.

02

Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society.

Nowadays, students must have an official qualification that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies **only** accept candidates who have an official qualification based on the **Common European Framework of Reference for Languages (CEFR)**.

“

The ability to communicate effectively in another language and accredit it with an official CEFR qualification is an fundamental requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"

TECH Global University

The Common European Framework of Reference for Languages is the **only officially recognized and accredited system for assessing a student's level of proficiency**. Although there are other certification systems, these come from private institutions and are, therefore, **not officially valid**. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH, we offer you the only intensive Language Course to obtain your **official certificate** based 100% on the CEFR, **the only official system recognized and accepted throughout Europe**.

Learn Italian and make the most of it by accrediting it with an official qualification based on the CEFR.

Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate is valid for life.

“

You will find the main grammar, vocabulary, oral expression and written expression topics required at CEFR Level C2”

03

What Is Level C2?

One of the purposes of the CEFR is to help users describe the levels of language proficiency required by existing examinations and assessment programs in order to facilitate comparisons between different certification systems. Therefore, these levels are a universal scale used to unify and clarify the different language level evaluation systems.

A person's hand is visible holding a white circular sign with the letters 'C2' in red. The person is wearing a colorful plaid shirt. The background features a decorative graphic of many thin, light blue lines that curve across the top of the page.

C₂

“

In TECH's C2 Level Language Course, we thoroughly prepare you to obtain your C2 Italian language certificate"

What are the C2 Level Skills?

01

- Pre-test activities: in order to consolidate the concepts developed throughout the syllabus by reiterating them.

Skills-based Practice

If the Common European Framework of Reference for Languages establishes the consolidation of a language through the acquisition of skills and bases its official tests on these skills, why don't most of the online preparation courses for the level certificate work according to skills? At TECH, you will work on all the skills established by the Common European Framework of Reference for Languages in each of the units through an innovative method that is 100% adapted to European guidelines. In this training program we work according to skills, with more than 500 different activities in order to prepare you to obtain your official Italian C2 certificate.

Presentation Videos and Objectives

The only training program in which you will find detailed objectives and skills per unit in video format explained by a native teacher.

Summary Videos of Each Unit

At the end of each unit, you will find a video summary in which a native teacher will reiterate and emphasize the most important points.

Video Task

Test what you know in a different way, solve our video-task!

Simulated Learning Scenarios

At TECH, we believe in the importance of linguistic immersion to lay the foundations of a language as well as in *storytelling* to favor identification and first-person learning. Therefore, we present you with real and everyday situations with people like you who will face a new language and have to overcome all different kinds of problems. In this training program you will find more than 200 everyday situations, stories and video dialogues recorded by experts and native speakers.

+900+ pages of downloadable study material

+500+ lexical and sociocultural activities

Our Methodology

The TECH program is a C2 Italian Language Course based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method in which the student works intensively and repeatedly on all the contents required by the CEFR, thoroughly preparing them to pass the test.

“

In no other course will you find pre-test knowledge activation questions, lesson tests, grammar tests, a final test and specific practice of CEFR skills in each unit"

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's C2 Italian Language Course offers students a revolutionary method to comprehensively prepare for the level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and guarantee your success in passing the test. To this end, we emulate the official exam using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that

...All of this is enhanced with the best 100% online teaching methodology: Re-learning...

represent an evolution with respect to the simple study and performance of exercises.

TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first licensed to employ this successful method, having managed, in 2015, to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectives, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

Re-learning Methodology

In TECH's C2 Italian Language Course, learning is not a linear process, but rather a spiral (we learn– unlearn (forget) and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 35,000 university graduates with unprecedented success, in fields as diverse as Biochemistry, Genetics, Surgery, International Law, Management Skills or Financial Markets and Instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 42 years.

...with a professional, personalized and expert-led syllabus...

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone).”

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. This way, and in what is called *Neurocognitive Context-Dependent Learning*, the different elements of our Italian C2 Language Course are connected with the context in which the participant will take their certification exam in order to guarantee success on the day of the test.

...and all this with the best learning materials at the forefront of teaching and technology...

"I'm a fashion designer and for me it's essential to have the best materials when I do my work. Therefore, I have to communicate with Italian suppliers if I want to achieve this goal. They often don't speak English as a second language, making the process rather complicated. But since I set out to improve my Italian, this situation has changed over time. Now, I've got my C2 certification, and I can communicate with them almost as if I had lived in Italy my whole life."

Rocío Jiménez

A Spanish Fashion Designer

"I chose Italy as a tourist destination a few months ago and since then I completely fell in love with the country. So much so that I started learning the language to continue my engineering studies there. With this TECH Language Course, I have been able to make rapid progress toward my goal and I'm already close to obtaining the C2 certification."

The Professional Benefits of Italian

Italian is a beautiful and romantic language, the language of ancient medieval thinkers, historical writers, and possesses a unique musicality and conceptual richness in a wide variety of fields. It is the language of Dante, Petrarch and Boccaccio, three great Italian writers, but it is also the language of art, history, science, gastronomy and fashion.

As the birthplace of Latinity, Italy played a decisive role in the diffusion of Latin and the culture of the Roman Empire in the rest of Europe, both in Ancient times and in the ages that followed. Similarly, after the affirmation of the Neo-Latin languages and the constitution of modern linguistic Europe, Italian has had, at times, moments of great importance in the international linguistic context.

Approximately 70 million people worldwide speak Italian (60 million in Italy and around 10 million in the rest of the world). It is the official language in Italy, Switzerland, San Marino and Vatican City. It is spoken, at least in part, in eleven countries, to which must be added some twenty countries with a large Italian community, such as Argentina, Germany, Australia and the USA.

Italian is one of the official languages of the European Union, therefore speaking Italian will open the doors to many international organizations and also the possibility of working in many of the large Italian companies with international presence. The Italian economy is principally based in three sectors, tourism, the automotive industry and fashion.

“

For all these reasons, Italian is found amongst the ten most useful languages in the world and its considered necessary to succeed in the 21st Century.”

Assessment and Certification

The main evaluation objective of TECH'S assessment is that students consolidate what they have learned and are aware of their progress. That is why, after completing each block, the student is shown a results report that visually indicates the skills that they should reinforce in the online classes.

“

TECH'S C2 Language Course is the only one that also awards you with a university certificate”

“ Only TECH will award you, upon successful completion of the course, a university certificate”

Italian C2 training course evaluation tests

The assimilation of the contents is constantly and progressively evaluated. To do so, the student must pass an automatically corrected evaluation test at the end of each module and a final test that covers all the contents of the level.

Its main objective is for the student to consolidate what they have learned and to be aware of their progress, for this reason, after the evaluation test is completed, the student is shown a report of the results.

Training course evaluation criteria

- Communicative effectiveness: comprehensibility, fulfillment of expected functions, accuracy, sociolinguistic appropriateness
- Interactive and speaking skills: responsiveness and cooperation, coherence of ideas, organization, relevant and sufficient development
- Use of language: linguistic resources, formal elements of cohesion and fluency
- Formal correction: grammar, discourse cohesion, vocabulary and pronunciation.

If you pass our course, you will obtain an C2 Italian language certificate from TECH.

The certificate, which indicates successful completion of the course, will state the language studied and the level passed, according to the Common European Framework of Reference for Languages (CEFR).

The certificate issued by **TECH Global University** only provides "pass" or "fail" as grading options, and does not express a numerical grade. Before receiving the certificate, you will be emailed a form to verify your data.

The CEFR C2 Italian Language Course an intensive Progression lasting a maximum of 4 months.

Certification

Upon completion of the course, students will receive a certificate of recognition that will guarantee their preparation to obtain, if the student wishes, the certification at that level.
