# Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society.

**Nowadays, you must have an official qualification** that accredits and recognizes your proficiency in a given language. In fact, many schools, universities and companies **only** accept candidates who have an official qualification based on the **Common European Framework of Reference for Languages (CEFR)**.

“

*The ability to communicate effectively in another language, and accredit it with an CEFR qualification, is an essential requirement for academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"*

## tech 10 | Is it Important to Obtain a Language Certificate?

### TECH Global University

The Common European Framework of Reference for Languages is the **only official system of recognition and accreditation of the student's level**. Although there are other certification systems, these come from private institutions and are, therefore, **not officially valid**. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH, we offer you the only intensive Language Course to obtain your official certificate based 100% on the CEFR, **the only official system recognized and accepted throughout Europe**.

*Learn Spanish and make the most of it by accrediting it with a qualification based on the CEFR.*

*Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate is valid for life.*

“

*We work with the most comprehensive and complete syllabus, with 45 units per level based 100% on the Common European Framework of Reference for Languages”*

# 03

## What Is Level C1?

Level C1 is part of the Proficient User Level, which is further divided into two sub-levels: First and Second Proficient User Levels (C1 and C2).

Level C1 is called Effective Operational Proficiency. What seems to characterize this level is having good knowledge of a broad linguistic repertoire. This allows for fluid and spontaneous communication, as illustrated in the following examples: they express themselves fluently and spontaneously, almost effortlessly. They have a good command of an extensive lexical repertoire that allows them to overcome their deficiencies easily with circumlocutions. There is hardly any noticeable search for expressions or avoidance strategies; only a conceptually difficult topic can hinder the natural flow of their speech.

The discourse skills that characterize the previous band are still evident at Level C1, with an emphasis on greater fluency; for example: is able to select, from a fluid repertoire of discourse functions, the most appropriate phrase with which to begin comments in order to take the floor or to gain time and hold it while thinking; produces clear, fluent and well-structured speech; and has control of organizational structures, connectors and cohesive mechanisms.

**C<sub>1</sub>**

“

*With the C1 level you will be able to communicate on a high level, using all the linguistic resources of the Spanish language”*

What are the C1 Level Skills?

01

Able to understand a wide variety of long and demanding texts and recognize implicit meanings in them

02

Can express him/herself fluently and spontaneously without much obvious effort to find the right expression

“

*Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH”*

03

Can make flexible and effective use of the language for social, academic and professional purposes

04

Can produce clear, well-structured and detailed texts on topics of a certain complexity, showing a correct use of the mechanisms of text organization, articulation and cohesion

- Pre-test activities: in order to consolidate the concepts developed throughout the syllabus by reiterating them.

## Skills-based Practice

---

If the Common European Framework of Reference for Languages establishes the consolidation of a language through the acquisition of skills and bases its tests on these skills, why don't most of the online preparation courses for the level certificate work according to skills? At TECH, you will work on all the skills established by the Common European Framework of Reference for Languages in each of the units through an innovative method that is 100% adapted to European guidelines. In this training program we work according to skills, with more than 500 different activities in order to prepare students to obtain their Spanish C1 certificate.

## Presentation Videos and Objectives

---

The only training program in which you will find detailed objectives and skills per unit in video format explained by a native teacher.

## Summary Videos of Each Unit

---

At the end of each unit, you will find a video summary in which a native teacher will reiterate and emphasize the most important points.

## Video Task

---

Test what you know in a different way, solve our video-task!

## Simulated Learning Scenarios

---

At TECH, we believe in the importance of linguistic immersion to lay the foundations of a language as well as in *storytelling* to favor identification and first-person learning. Therefore, we present you with real and everyday situations with people like you who will face a new language and have to overcome all different kinds of problems. In this training program you will find more than 200 everyday situations, stories and video dialogues recorded by experts and native speakers.

### Specific Virtual Classes for CEFR C1

# Our Methodology

The TECH program is a C1 Spanish Language Course based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method in which the student works intensively and repeatedly on all the contents required by the CEFR, thoroughly preparing them to pass the test.

“

*In no other course will you find pre-test knowledge activation questions, lesson tests, grammar tests, a final test and specific practice of CEFR skills in each unit"*

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's C1 Spanish Language Course offers students a revolutionary method to comprehensively prepare for the level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test. These simulations are developed using state-of-the-art software to facilitate immersive learning.

*...All of this is enhanced with the best 100% online teaching methodology: Re-learning...*

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

*TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.*

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectives, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

*The overall score obtained by our learning system is 8.01, according to the highest international standards.*

**Re-learning Methodology**

In TECH's C1 Spanish Language Course, learning is not a linear process, but rather a spiral (we learn—unlearn (forget) and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 35,000 university graduates with unprecedented success, in fields as diverse as Biochemistry, Genetics, Surgery, International Law, Management Skills or Financial Markets and Instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 42 years.

*...with a personalized and expert-led training itinerary...*

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, discussion forums on, e-mail contact with the technical secretary, chat and video conference).

“

*Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone)”*

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. This way, and in what is called *Neurocognitive Context-Dependent Learning*, the different elements of our English C1 Language Course are connected with the context in which the participant will take their certification exam in order to guarantee success on the day of the test.

*...and all this with the best learning materials at the forefront of technology and pedagogy...*

*Study wherever and however you want: more than 150 downloadable and printable grammar and lexical worksheets and glossaries.*

*"By completing this program I realized that I could aspire to study in Spain, a goal I have pursued since I was a child, but could not complete because I could not master the language. Now, one year later, I am ready to do my C1 Spanish Certification thanks to this Language Course at TECH."*

## Camila Lewis

A student from the Germany

*"It seems surprising to me that I've reached the C1 level in Spanish. I started this challenge only one year ago with the aim of continuing to expand my business into the Spanish market. Now, not only have I achieved that goal, I also have plans to move to Mexico and continue my academic business studies. If you're looking for a comprehensive course, this is definitely your best option."*

# The Professional Benefits of Spanish

Spanish is the second most widely spoken native language in the world, behind Mandarin Chinese and ahead of English and Hindi/Urdu. Recent forecasts show that English, Spanish and Chinese are inevitably the three languages of international communication for the 21st century.

It is spoken in Spain, in the Caribbean Islands (Cuba and Puerto Rico), in the Dominican Republic, in North America (Mexico), in Central America (Guatemala, Belize, El Salvador, Honduras, Nicaragua, Costa Rica and Panama) and in South America (Colombia, Venezuela, Uruguay, Paraguay, Argentina, Chile, Bolivia, Peru and Ecuador). Spanish is also the second most widely spoken language in the United States.

The Spanish-speaking population represents one of the fastest growing segments in the world, especially in the United States. The Spanish-speaking population constitutes a huge community that shares products, services and culture, offers businesses and institutions a truly unique opportunity for growth.

Furthermore, studying Spanish opened many doors at a professional level. Many countries have Spanish as an official language, so there are many jobs in which this can be a fundamental factor.

# Assessment and Certification

The main evaluation objective of TECH's assessment is that students consolidate what they have learned and are aware of their progress. That is why, after completing each block, the student is shown a results report that visually indicates the skills that they should reinforce in the online classes.

“

*TECH'S C1 Language Course is the only one that also awards you with a university certificate”*

*Only TECH will award you, upon successful completion of the course, a university certificate"*

### C1 Spanish training course evaluation tests

The assimilation of the contents is constantly and progressively evaluated. To do so, the student must pass an automatically corrected evaluation test at the end of each module and a final test that covers all the contents of the level.

Its main objective is for the student to consolidate what they have learned and to be aware of their progress, for this reason, after the evaluation test is completed, the student is shown a report of the results.

### Training course evaluation criteria

- Communicative effectiveness: comprehensibility, fulfillment of expected functions, accuracy, sociolinguistic appropriateness
- Interactive and speaking skills: responsiveness and cooperation, coherence of ideas, organization, relevant and sufficient development.
- Use of language: linguistic resources, formal elements of cohesion and fluency
- Formal correction: grammar, discourse cohesion, vocabulary and pronunciation.
- Discursive capacity: coherence of ideas, organization and development.
- Use of language: linguistic expressions, formal resources of cohesion and flexibility
- Formal correction: grammar, discourse cohesion, vocabulary and spelling.

*If you pass our course, you will obtain a C1 Spanish language qualification from TECH.*

The certificate, which indicates successful completion of the course, will state the language studied and the level passed, according to the Common European Framework of Reference for Languages (CEFR).

The certificate issued by **TECH Global University** only provides "pass" or "fail" as grading options, and does not express a numerical grade. Before receiving the certificate, you will be emailed a form to verify your data.

*The CEFR C1 Spanish Language Course is an intensive course lasting a maximum of 4 months.*

## Certification

Upon completion of the course, the student will receive a certificate of recognition that will guarantee their preparation to obtain, if the student wishes, the certification of that level.
