01 Welcome

There are a multitude of international institutions that have Spanish as one of their official languages. The UN, the OSCE, the OAS or the EU are some of the organizations where a very high command of this language is highly valued, since it is not in vain that Spanish is the second most spoken language in the world in terms of native speakers. Acquiring a C2 level opens an enormous opportunity to project any career at the international level, since this certification will be decisive when applying for positions of responsibility and to get ahead of possible competitors. This Language Course prepares its students in a fast, precise and thorough way to be able to pass the C2 Level Spanish Exam.

Presentation video

“

Your C2 Spanish certificate will be fundamental to your CV, as you will stand out by being fluent in the second most used native language in the world”

Introduction

Spain, Mexico, Chile or any Hispanic country offers a diversity of opportunities for any foreigner. Their economies, cultures and even gastronomies have a great weight worldwide. Therefore, to travel, live or work in any of these places, you must first perfectly master the language they share: Spanish. For this reason, we have designed this Language Course, which will help students to certify their linguistic level by completing a set of practical exercises designed by native teachers. Consequently, you will not only pass the CEFR exam with excellence, but you will also be able to perfectly understand any conversation in different contexts, as well as express your ideas with absolute clarity.

You will speak Spanish even better than some native speakers thanks to how the teachers have thoroughly and exhaustively developed the program.

You will find individual activities, downloadable PDFs, video summaries and a wealth of useful support material throughout the learning process.

“

It is proven that learning languages increases your Intelligence. Learning a foreign language strengthens the brain's neural networks”

02

Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society. Nowadays, students must have an official certificate that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies only accept candidates who have an official qualification based on the Common European Framework of Reference for Languages (CEFR).

“

The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"

tech 10 | Is it Important to Obtain a Language Certification?

TECH - Technological University

The Common European Framework of Reference for Languages is the only officially recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not officially valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH, we offer you the only intensive Language Course to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

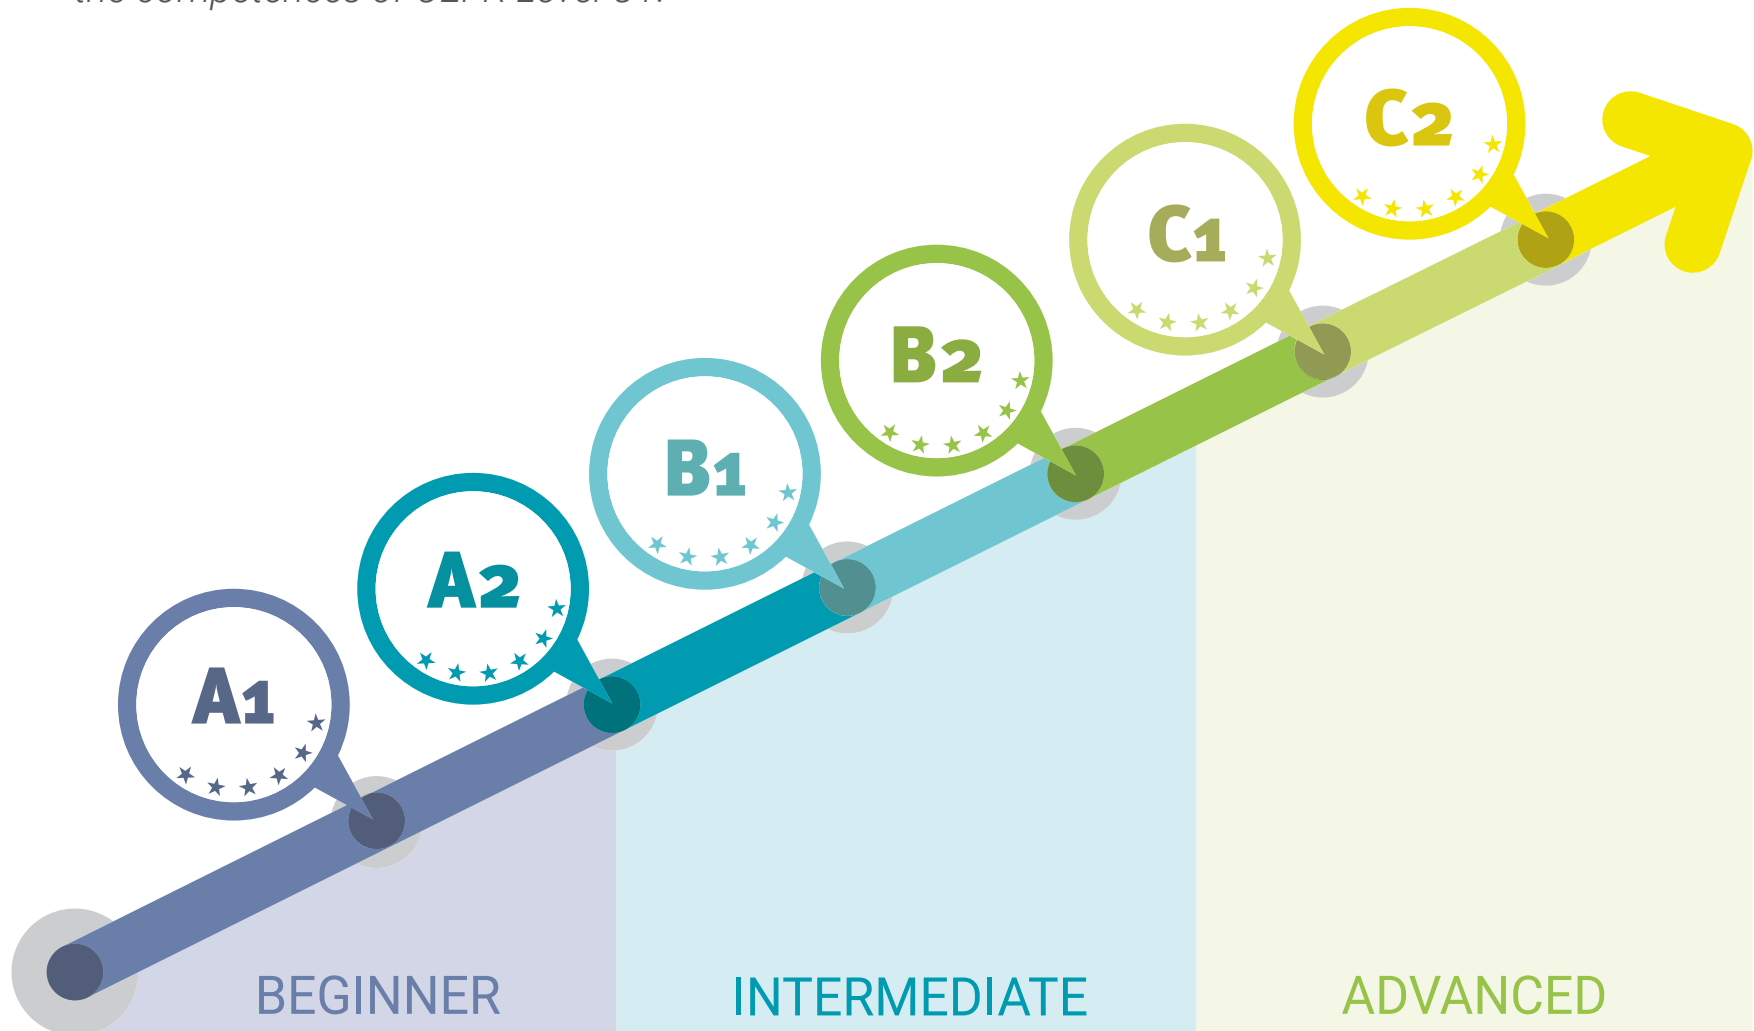

Learn Spanish and make the most of it by accrediting it with an official qualification based on the CEFR.

Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate is valid for life.

You will have a comprehensive and complete syllabus at your disposal in all the competences of CEFR Level C1.

03

What Is Level C2?

Level C2 is part of the Proficient User Level, which is further divided into two sub-levels: First and Second Proficient User Levels (C1 and C2).

Although level C2 has been referred to as Mastery, it does not imply native or near-native proficiency. It is intended to characterize the degree of precision, appropriateness and ease of use in the language that typifies the speech of bright students. The descriptors graded here include: is able, by reasonably employing a wide range of modification mechanisms, to accurately convey subtle nuances of meaning; has a good command of idiomatic and colloquial expressions, and is aware of the connotative level of meaning; knows how to circumvent difficulties so discreetly that the interlocutor hardly notices.

“

In TECH's C2 Spanish Language Course we thoroughly prepare you to obtain your official C2 Spanish language certificate”

What are the C2 Level Skills?

01

Can easily understand virtually everything he/she hears or reads.

02

Can reconstruct information and arguments from various sources, whether in spoken or written language, and present them in a coherent and summarized manner.

“

Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH”

03

Can express him/herself spontaneously, with great fluency and with a degree of precision that allows him/her to differentiate fine nuances in meaning even in more complex situations.

- Final review test: you will work through more than 400 assessment questions to thoroughly prepare for your level certification
- Pre-test activities: in order to consolidate the concepts developed throughout the syllabus by reiterating them.

Skills-based Practice

If the Common European Framework of Reference for Languages establishes the consolidation of a language through the acquisition of skills and bases its official tests on these skills, why don't most of the online preparation courses for the level certificate work according to skills? At TECH, you will work on all the skills established by the Common European Framework of Reference for Languages in each of the units through an innovative method that is 100% adapted to European guidelines. In this program we work according to skills, with more than 500 different activities in order to prepare you to obtain your official Spanish C2 certificate.

Presentation Videos and Objectives

The only training program in which you will find detailed objectives and skills per unit in video format explained by a native teacher.

Summary Videos of Each Unit

At the end of each unit, you will find a video summary in which a native teacher will reiterate and emphasize the most important points.

Video Task

Test what you know in a different way, solve our video-task!

Simulated Learning Scenarios

At TECH, we believe in the importance of linguistic immersion to lay the foundations of a language as well as in *storytelling* to favor identification and first-person learning. Therefore, we present you with real and everyday situations with people like you who will face a new language and have to overcome all different kinds of problems. In this training program you will find more than 200 everyday situations, stories and video dialogues recorded by experts and native speakers.

+900+ pages of downloadable study material

+500+ lexical and sociocultural activities

1,200+ assessment questions

Specific Virtual Classes for CEFR C2

Our Methodology

The TECH program is a C2 Spanish Language Course based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method in which the student works intensively and repeatedly on all the contents required by the CEFR, thoroughly preparing them to pass the test.

“

In no other course will you find pre-test knowledge activation questions, lesson tests, grammar tests, a final test and specific practice of CEFR skills in each unit"

The TECH - Technological University method

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's C2 Spanish Language Course offers you a revolutionary method to comprehensively prepare for the level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the official exam using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test. These simulations are developed using state-of-the-art software to facilitate immersive learning.

... All of this is enhanced with the best 100% online teaching methodology: Re-learning...

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

Our C2 CEFR preparation course is the only one on the market licensed to use the Relearning method, which enhances learning by optimizing the effort/result ratio.

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first in the world licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectify, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

Re-learning Methodology

In TECH's C2 Spanish Language Course, learning is not a linear process, but rather a spiral (we learn—unlearn (forget) and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 35,000 university graduates with unprecedented success, in fields as diverse as Biochemistry, Genetics, Surgery, International Law, Management Skills or Financial Markets and Instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 42 years.

...with a personalized and expert-led training itinerary...

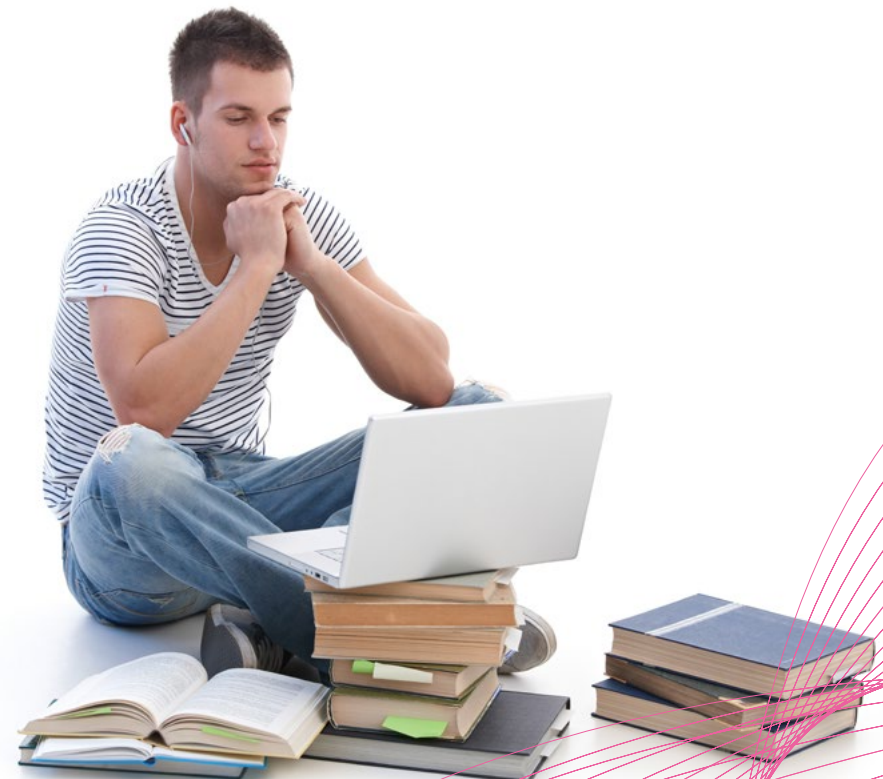

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, discussion forums on, e-mail contact with the technical secretary, chat and video conference).

“

Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone).”

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called *Neurocognitive context-dependent learning*, the different elements of our intensive English C2 preparation course are connected to the context in which the participant will take their official certification exam in order to guarantee success on the day of the test.

...and all this with the best learning materials at the forefront of technology and pedagogy..

"My company offered me a transfer to one of our Spanish subsidiaries. I had a basic command of the language, but I knew I needed to improve my level if I wanted to continue meeting professional goals, so I decided to study this Language Course. It was a total success, how close the teaching staff were in resolving my doubts was vital for me to stay motivated. I recommend it to all those who are looking for a program that will really help them to go up a level."

Analise Durandt

Marketing Manager at a French Company

"The Spanish culture always attracted me, to the point that it was clear to me that I wanted to study there. I had a good level of Spanish, but I noticed that I got lost in more technical conversations or in informal settings, which prompted me to improve my level. This TECH Language Course helped me a lot to understand the vicissitudes of the Spanish language and now I can proudly say that I have a C2 Level in Spanish as endorsed by the CEFR."

Our Students' Profiles

We know that learning a language isn't easy. Many of us have tried, and failed, for years to consolidate our knowledge and acquire the skills to required to obtain qualifications that demonstrate what we have learned. Level exams are complex tests that must be prepared thoroughly and with good expert guidance.

“

Many of our students have come from other preparation methods that have led to loss of motivation. At TECH, 9 out of 10 students recommend us”

The Professional Benefits of Spanish

Spanish is the second most widely spoken native language in the world, behind Mandarin Chinese and ahead of English and Hindi/Urdu. Recent forecasts show that English, Spanish and Chinese are inevitably the three languages of international communication for the 21st century.

It is spoken in Spain, in the Caribbean Islands (Cuba and Puerto Rico), in the Dominican Republic, in North America (Mexico), in Central America (Guatemala, Belize, El Salvador, Honduras, Nicaragua, Costa Rica and Panama) and in South America (Colombia, Venezuela, Uruguay, Paraguay, Argentina, Chile, Bolivia, Peru and Ecuador). Spanish is also the second most widely spoken language in the United States.

The Spanish-speaking population represents one of the fastest growing segments in the world, especially in the United States. The Spanish-speaking population constitutes a huge community that shares products, services and culture, offers businesses and institutions a truly unique opportunity for growth.

Furthermore, studying Spanish opened many doors at a professional level. Many countries have Spanish as an official language, so there are many jobs in which this can be a fundamental factor.

“

The Spanish powerhouse is in its infancy as to what will happen in the future. Spanish will make Simón Bolívar's impossible dream of uniting all America a reality".

Eduardo Lago, Director of the Instituto Cervantes in New York

Assessment and Certification

The main evaluation objective of TECH'S assessment is that students consolidate what they have learned and are aware of their progress. That is why, after completing each block, the student is shown a results report that visually indicates the skills that they should reinforce in the online classes.

“

TECH's intensive C2 Language Course is the only one that also awards you a university certificate"

“

Only TECH will award you, upon successful completion of the course, a university certificate”

C2 Spanish training course evaluation tests

The assimilation of the contents is constantly and progressively evaluated. To do so, the student must pass an automatically corrected evaluation test at the end of each module and a final test that covers all the contents of the level.

Its main objective is for the student to consolidate what they have learned and to be aware of their progress, for this reason, after the evaluation test is completed, the student is shown a report of the results.

Training course evaluation criteria

- Communicative effectiveness: comprehensibility, fulfillment of expected functions, accuracy, sociolinguistic appropriateness
- Interactive and speaking skills: responsiveness and cooperation, coherence of ideas, organization, relevant and sufficient development.
- Use of language: linguistic resources, formal elements of cohesion and fluency
- Formal correction: grammar, discourse cohesion, vocabulary and pronunciation.

If you pass our course, you will obtain a C2 Spanish language qualification from TECH.

The certificate, which indicates successful completion of the course, will state the language studied and the level passed, according to the Common European Framework of Reference from Languages (CEFR).

The certificate issued by **TECH** only provides "pass" or "fail" as grading options, and does not express a numerical grade. Before receiving the certificate, you will be emailed a form to verify your data.

The CEFR C2 Spanish Language Course is an intensive program lasting a maximum of 4 months.

Certification

At the end of the course the student will receive a certificate of recognition that confirms that they are prepared to obtain official certification for this level.
