Introduction

The labor market is highly competitive. Most job offers include among their requirements a higher level of English, but when you have no previous studies in this Language or the bases are not good, it is practically impossible to access these positions. Therefore, this TECH program aims to provide students with the necessary communication skills to successfully overcome all types of job interviews and, more importantly, to be fluent in English in a professional environment. A learning process that will open the doors to the international job market.

“

Thanks to this program, you will be able to understand and use everyday expressions in a work environment, both orally and in writing"

Nowadays, knowing English is one of the most valued characteristics by employers, who have understood the importance of moving in globalized environments. Speaking English is no longer only necessary for those who wish to work in the tourism sector or in international companies; it is now essential for practically any job. For this reason, many people are looking to learn the language in a simple but, above all, effective way.

Thinking about the current need of many professionals, who are looking for a job and see their opportunities diminished by the lack of knowledge of English, or even those who, even having a secure position, see how to achieve a promotion or a job improvement is almost impossible for the same reason. TECH has decided to create this Master's Degree in Business English. Thanks to this program, the student will enter fully into the study of English in the workplace, to acquire a broad but simple vocabulary that will allow them to successfully pass interviews in that Language, to participate and intervene in meetings and conferences in English in which simple language adapted to the day to day of the position is used, or even acquire knowledge of Legal English, thanks to which they will be able to know the regulations adapted to their work.

Unlike most of the English programs that can be found online, one of the main advantages of this Master's Degree is that it will be taught by a team of native teachers, with virtual lessons and top-quality teaching materials. In this way, students will be able to acquire knowledge and develop their communication skills, preparing themselves for a working world without communication barriers, being able to express themselves in an assertive, direct and clear way, with a standard and varied approach and Language.

Specifically, this program starts from an A2 level of English of the Common European Framework of Reference for Languages (CEFR), but, at the end of the academic year and after successfully passing all assessments, the student will have acquired the appropriate knowledge and skills of a B1/B1+ level. Undoubtedly, a unique opportunity to develop the communicative competences in English, necessary to manage in a professional environment. And, all this, with a Master's Degree 100% online, that the student can study, comfortably, from anywhere in the World.

This **Master's Degree in English for Business**, has the most complete and up-to-date Education program. Its most notable features are:

- ♦ Practical case studies presented by English teachers
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Special emphasis on innovative methodologies for teaching languages
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device , with an Internet connection

If your job requires you to learn to express yourself and speak more fluently in English, don't think twice. This is the program for you"

“

This program perfectly combines the best didactic resources of the moment, so that you can acquire those communicative competences in English that will lead you to professional success”

Learn from a team of native teachers, and develop the Language skills necessary to speak English with fluency.

Learn English easily, from home, completely online.

It includes, in its teaching staff, native English teachers, who pour into this program the experience of their work, in addition to recognized specialists from reference societies and prestigious Universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will deliver an immersive learning experience, programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

02

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
