# Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business. However, simply knowing foreign languages is not enough in modern society. Nowadays, students must have an official certificate that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies only accept candidates who have an official qualification based on the Common European Framework of Reference for Languages (CEFR).

“

*The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"*

## TECH - Technological University

The Common European Framework of Reference for Languages is the **only officially recognized and accredited system for assessing a student's level of proficiency**. Although there are other certification systems, these come from private institutions and are, therefore, not officially valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program designed to prepare you to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

*Learn to speak English and make the most of it by obtaining an official qualification based on the CEFR.*

*Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate is valid for life.*

“

*With this program you will have all the content and skills you need to pass the A1”*

03

# What Is Level A1?

Level A1 is part of the Beginner Level, which is divided into two courses: First and Second Beginner Level (A1 and A2). The first course covers the requirements of the A1 proficiency level as established by the Common European Framework of Reference for Languages, the only official system in the European Union for recognizing and accrediting language proficiency and the only certificate that has official validity and is requested by universities, companies, competitive examinations, etc.

**A<sub>1</sub>**

“

*In TECH's Online Conversation Classes program we prepare you thoroughly to obtain your A1 English certificate"*

## What are the A1 Level Skills?

At this level, as defined by the Common European Framework of Reference for Languages, students progress in language skills to develop what are considered "Basic User" skills with the ability to:

*Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH"*

01

Understand and use common everyday expressions and simple sentences to satisfy immediate needs

02

Interact in an elementary way as long as the interlocutor speaks slowly and clearly and is willing to cooperate

03

Introduce yourself and others, ask for and give basic personal information about your address, your belongings, and people you know

Level A1 (Access) is considered to be the lowest level of general language use, the point at which learners can interact in a simple way, can ask and answer questions about themselves, about where they live, about the people they know and the things they have, can make simple statements in areas of immediate need or on very everyday topics and can respond to such questions when they are put to them, rather than simply relying on a very limited, rehearsed and lexically organized repertoire of phrases used in specific situations.

# Our Methodology

The A1 English Conversation Classes program is an intensive preparation course for the English Level A1 certificate based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test.

“

*In no other course will you work at your own pace, with native teachers, in small groups based on specific practice of the CEFR skills in each session and unit”*

## The TECH Technological University method

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's English A1 level oral proficiency preparation program offers you a method based on interaction and synchronous and direct communication between teacher and student to provide you with comprehensive preparation for the official oral level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

*... All of this is enhanced with the best 100% online teaching methodology: Re-learning...*

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

*TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.*

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first licensed to employ this successful method, having managed, in 2015, to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectives, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

*The overall score obtained by our learning system is 8.01, according to the highest international standards.*

**Re-learning Methodology**

We prevent your motivation from waning and offer you the best learning environment.

This intensive oral proficiency preparation program is based on real-time communication, as this type of interaction has been proven to reinforce personal participation, strengthen work interaction, socio-emotional relationships and personal interactions, all of which helps to increase motivation. (Hrastinski, 2008).

*...with a personalized and expert-led training itinerary...*

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

*Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone).”*

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called *“Neurocognitive context-dependent learning”*, the different elements of our intensive English A1 preparation course are connected to the context in which the participant will take their official certification exam in order to guarantee success on the day of the test.

*... and all this with teachers at the forefront of technology and education...*

*Study wherever and however you want: connect with your mobile device and learn with the best native teachers.*

# The Professional Benefits of English

English is so universal that nowadays, a minimum command of it is no longer a competitive advantage, but rather an essential requirement in most job offers. A lack of this knowledge closes many doors to better job offers in all kinds of fields of work.

In addition to being the official language of world powers such as the United Kingdom or the United States, English can serve as a working language in international projects, world conferences or any other place where people of all nationalities meet.

Therefore, it is the most commonly used language in major organizations such as the UN itself, the WHO, NATO, the IMF, among many others. To work in any organization that operates at a global level, knowing English is essential, and the higher the level, the greater the opportunities for professional and personal development.

“

*Add English to your resumé and give a powerful boost to your employability in a multitude of sectors thanks to this TECH university program"*

11

# Assessment and Certification

The main evaluation objective at TECH is for students to consolidate what they have learned and to be aware of their progress. For this reason, after completing each block, students are shown a report of their results, which visually indicates the skills that they should strengthen.

“

*TECH's A1 level oral communication skills preparation program is the only one that also awards you with a university certificate”*

## Certification

At the end of the course the student will receive a certificate of recognition that confirms that they are prepared to obtain official certification for this level.
