The Professional Benefits of English

English is so universal that nowadays, a minimum command of it is no longer a competitive advantage, but rather an essential requirement in most job offers. A lack of this knowledge closes many doors to better job offers in all kinds of fields of work.

In addition to being the official language of world powers such as the United Kingdom or the United States, English can serve as a working language in international projects, world conferences or any other place where people of all nationalities meet.

Therefore, it is the most commonly used language in major organizations such as the UN itself, the WHO, NATO, the IMF, among many others. To work in any organization that operates at a global level, knowing English is essential, and the higher the level, the greater the opportunities for professional and personal development.
