02

Is it Important to Obtain a Language Certificate?

Language certification is essential in today's world. It is not enough to be proficient in a second language, but it is also necessary to accredit that proficiency so that institutions and companies of all kinds can know the candidate's real level of command of a language. For this reason, this university program is essential for any student who wishes to be able to accredit their oral performance in English according to the Common European Framework of Reference for Languages.

“

A B2 level of English is essential to access different academic programs and high-level jobs. Get it thanks to this university course"

TECH - Technological University

The Common European Framework of Reference for Languages is the only recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH Technological University we offer you the only intensive program designed to prepare you to obtain your official certificate based 100% on the CEFR, the only system recognized and accepted throughout Europe.

03

What Is Level B2?

Level B2 is part of the Proficient User Level, which is further divided into two sub-levels: First and Second Proficient User Independent (B1 and B2).

The first is the ability to maintain an interaction and make oneself understood in a variety of situations; for example: generally understanding the main ideas of extended discussions around them as long as the speech is clearly articulated at standard language level; offers and asks for personal opinions in an informal discussion with friends; expresses in an understandable way the main idea they want to get across; flexibly uses broad, simple language to express much of what they want; is able to carry on a conversation or discussion, but can sometimes be difficult to understand when trying to say exactly what they want; expresses themselves understandably, although pause for some grammatical and lexical planning and some correctness are evident, especially in long periods of free production.

Our Methodology

The B2 English Online Conversation Classes is an intensive preparation course based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test.

“

In no other course will you work at your own pace, with native teachers, in small groups based on practicing the specific CEFR skills in each session and practicing the specific CEFR skills in each unit"

The TECH Method

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's English Level B2 oral proficiency preparation program offers you a method based on interaction and synchronous and direct communication between teacher and student to comprehensively prepare for the oral level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

...All of this is enhanced with the best 100% online teaching methodology: Re-learning...

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

Our B2 CEFR oral communication skills preparation program is the only one on the market licensed to use the Relearning methodology, which enhances learning by optimizing the effort/result ratio.

This methodology, at the forefront of world teaching, is called Re-learning. Our language school is the first licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectives, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

Re-learning Methodology

We prevent your motivation from waning and offer you the best learning environment.

This intensive oral proficiency preparation program is based on real-time communication, as this type of interaction has been proven to reinforce personal participation, strengthen work interaction, socio-emotional relationships and personal interactions, all of which helps to increase motivation. (Hrastinski, 2008).

...with a personalized and expert-led training itinerary...

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone).”

From the latest scientific evidence in the field of neuroscience, not only do we know to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called “*Neurocognitive context-dependent learning*”, the different elements of our intensive English B2 level preparation course are connected to the context in which the participant will take his or her certification exam in order to guarantee success on the day of the test.

Specific Objectives

Sociocultural and Sociolinguistic Competence

- Broaden and diversify your knowledge of the sociocultural aspects of communities where the language is spoken, acquiring a natural and confident manner of speaking that doesn't draw attention to you or lead to you being treated differently to native speakers. Also learn how to adapt your behavior, reactions, attitude, the messages you convey and your wording to any changes in situation, style and emphasis
- Identify the most important aspects of a variety of common formal and informal oral and written registers, and appropriately use the expressions, pronunciation and intonation of the most common registers with which you are in contact more frequently
- Perceive the differentiating characteristics of the Italian language pattern in relation to other widespread or nearby patterns

Linguistic Competence

- Manage a wide and varied repertoire of linguistic resources, including complex syntax and textual grammar, to naturally approach with precision and clarity texts on a vast range of situations and topics, almost without showing you have limited knowledge of what you want to say
- Flexibly adapt to changes in direction, register and emphasis, although hesitations and circumlocutions can still occur
- Efficiently use a variety of connectors and discourse markers to clearly show the link between different ideas and successfully make the speech cohesive in a flexible and efficient way
- Possess good command of linguistic resources with very few mistakes. When using complex structures, especially in discourse development, and even more so in oral communication or in less common situations, there are sometimes cohesion or inappropriate register mistakes, as well as sporadic slips or some "resistant" errors in less commonly controlled situations. In these cases the student will be capable of self-correcting

“

To consolidate all these skills, you will have access to more than 500 lexical, vocabulary and sociocultural activities”

Did you know?

Communicative competence is not merely limited to the knowledge and ability to use the linguistic code, but has other broader dimensions, which place it in direct relation with other competences such as information processing and digital competence, learning to learn, social and civic competence, or cultural and artistic competence. This implies a cultural immersion that is only possible to recreate in the online format through simulated scenarios, *storytelling*, videos and real situations.

English is the language of the present and the future. Do not miss this opportunity.

The Professional Benefits of English

English is so universal that nowadays, a minimum command of it is no longer a competitive advantage, but rather an essential requirement in most job offers. A lack of this knowledge closes many doors to better job offers in all kinds of fields of work.

In addition to being the official language of world powers such as the United Kingdom or the United States, English can serve as a working language in international projects, world conferences or any other place where people of all nationalities meet.

Therefore, it is the most commonly used language in major organizations such as the UN itself, the WHO, NATO, the IMF, among many others. To work in any organization that operates at a global level, knowing English is essential, and the higher the level, the greater the opportunities for professional and personal development.

“

Add English to your resumé and give a powerful boost to your employability in a multitude of sectors thanks to this TECH university program"

11
