03

What Is Level B2?

Level B2 is part of the Independent User Level, which is divided into two sub-levels: First and Second Independent User Level (B1 and B2).

The B2 Level has two main features: the first is the ability to maintain interaction and make oneself understood in a variety of situations, for example: learners generally understand the main ideas of extended discussions around them, provided the speech is clearly articulated at a standard language level; offer and ask for opinions in an informal discussion with friends; clearly express in the main idea they want to get across; flexibly use broad, simple language to express much of what they want; are able to carry on a conversation or discussion, but can sometimes be difficult to understand when trying to say exactly what they mean; express themselves understandably, although they pause for some grammatical and lexical planning and some mistake-correcting is evident, especially in long periods language flow.

B₂

“

TECH's objective is to strengthen student skills in a changing, real and multicultural context, and to guarantee their success in passing the level exam.

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called “*Neurocognitive context-dependent learning*”, the different elements of our intensive French B2 Level preparation course are connected to the context in which the participant will take their certification exam in order to guarantee success on the day of the test.

- ♦ Approach extensive conversations on most general topics, even in a noisy environment, in a clearly participatory manner
- ♦ Have conversations with native speakers without unintentionally amusing or annoying them, and without demanding different behavior from them than they would have with a native speaker

- ♦ Conduct effective and fluent interviews, even spontaneously departing from prepared questions, following the thread and giving interesting answers
- ♦ Take the initiative in an interview, and expand and develop their ideas, either with little help or getting it if needed from the interviewer

Specific Objectives

Sociocultural and Sociolinguistic Competence

- Broaden and diversify your knowledge of sociocultural aspects of communities where they speak the language, acquiring a natural and confident manner of speaking, which doesn't attract attention nor leads to special treatment, different to that given to native speakers. Furthermore, gain knowledge of how to adjust your behavior, reactions, attitude, message and wording to any changes in situation, style and emphasis.
- Identify the most important aspects of a variety of common formal and informal oral and written registers, and appropriately use the expressions, pronunciation and intonation of the most common registers that you are most in contact with.
- Perceive the differentiating characteristics of the Italian language pattern in relation to other widespread or nearby patterns.

Linguistic Competence

- Manage a wide and varied repertoire of linguistic resources, including complex syntax and textual grammar, to naturally approach with precision and clarity texts on a vast range of situations and topics, almost without showing you have limited knowledge of what you want to say.
- Flexibly adapt to changes in direction, register and emphasis, although hesitations and circumlocutions can still occur.
- Efficiently use a variety of connectors and discourse markers to clearly show the link between different ideas and successfully make the speech cohesive in a flexible and efficient way.
- Possess good command of linguistic resources with very few mistakes. When using complex structures, especially in discourse development, and even more so in oral communication or in less common situations, there are sometimes cohesion or inappropriate register mistakes, as well as sporadic slips or some "resistant" errors in less commonly controlled situations. In these cases the student will be capable of self-correcting.

"My company has great contacts with some European countries like France and Spain. With Spain the communication is very fluid, but sometimes I feel that it isn't efficient with France. That's why I set out to improve my level of French to avoid misunderstandings. These classes have been a great personal and business decision: I have improved very fast and my company has positively noticed it too."

"My job consists of transporting various products between France and Spain. This has allowed me to get to know France quite well, but I still had problems with the language. I wanted communication to be as smooth as possible, and that could only be achieved by improving my French. The TECH program has adapted very well to my pace of life, and I have already noticed a great improvement with the language. It's what I was looking for: flexibility and a practical approach."

The Professional Benefits of French

French is both a working language and an official language of the UN, the European Union, UNESCO, NATO, the International Olympic Committee, the International Red Cross and various other international legal bodies. French is the language of the three cities where the European institutions are located: Strasbourg, Brussels and Luxembourg.

Together with English, it is the only language spoken across the 5 continents and the only language which can be learned in all countries worldwide. According to the Observatoire de la langue Française, a French language control organization, around 220 million people speak French which puts it in 8th place on the list of most spoken languages on the planet. The Francophonie groups together 68 states and governments. French is the most studied foreign language after English.

Speaking French opens up more possibilities for individuals in the international labor market. Knowledge of French opens doors to French companies in France and abroad, in all francophone countries (Canada, Switzerland, Belgium, Africa). France, the fifth largest trading power and the third largest destination country for foreign investors, is a major economic partner.

Furthermore, speaking French allows you to study in France, in prestigious universities or in higher education business and engineering schools, ranked among the best higher teaching centers in Europe and worldwide. Students who are proficient in French can receive scholarships from the French Government to study a third year of their degree in France in all disciplines, and earn an internationally recognized certificate.

“

French is an international language for food, fashion, theatre, visual arts, dance and architecture. Knowing French gives you access to the original versions of the most famous texts in French and Francophone literature, as well as cinema and music”
