02

Is it Important to Obtain a Language Certificate?

Language certification is essential in today's world. It is not enough to simply be proficient in a second language. It is also necessary to accredit that proficiency so that all kinds of institutions and companies can understand the candidate's real level of command of a language. For this reason, this program is essential for all students who wish to be able to accredit their oral performance in Russian according to the Common European Framework of Reference for Languages.

“

A B2 level in Russian is essential in order to access different academic programs and high-level jobs. Achieve it thanks to this university course"

TECH - Technological University

The Common European Framework of Reference for Languages is the **only system that recognizes and accredits the student's level**. Although there are other certification systems, these come from private institutions and are, therefore, not valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH Technological University we offer you the only intensive program designed to prepare you to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

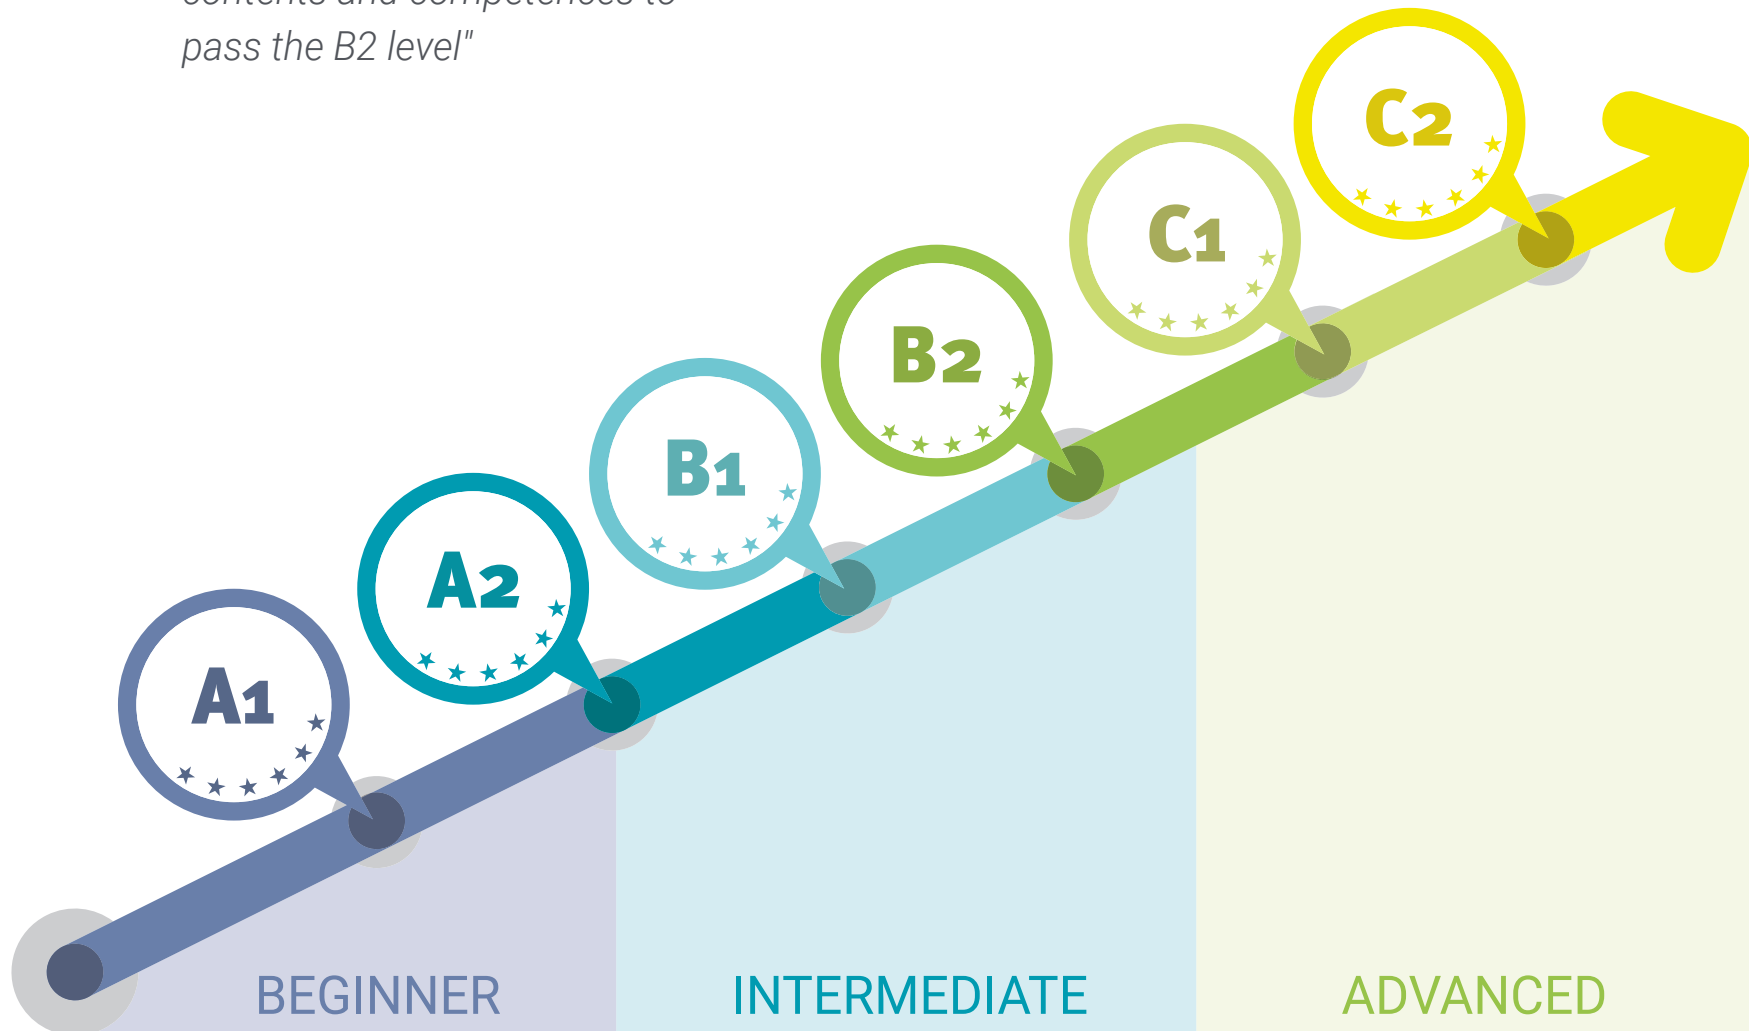

Become fluent in all types of Russian conversations and gain access to important academic and professional opportunities. Enroll now.

With this preparation program you will have all the necessary contents and competences to pass the B2 level”

03

What Is Level B2?

Level B2 is part of the Independent User Level, which is divided into two sub-levels: First and Second Independent User Level (B1 and B2).

The B2 Level has two main features: the first is the ability to maintain interaction and make oneself understood in a variety of situations, for example: learners generally understand the main ideas of extended discussions around them, provided the speech is clearly articulated at a standard language level; offer and ask for opinions in an informal discussion with friends; clearly express in the main idea they want to get across; flexibly use broad, simple language to express much of what they want; are able to carry on a conversation or discussion, but can sometimes be difficult to understand when trying to say exactly what they mean; express themselves understandably, although they pause for some grammatical and lexical planning and some mistake-correcting is evident, especially in long periods language flow.

B₂

“

In TECH's B2 Russian Online Conversation Classes Program, we prepare you thoroughly to obtain your official B2 Russian certificate"

What are the B2 Level Skills?

02

You can interact with native speakers with a sufficient degree of fluency and naturalness, so that communication is effortless for the interlocutors.

“

This program will help you to communicate fluently in Russian at a B2 Level, which will open the doors to numerous academic opportunities”

“

TECH - Technological University

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's B2 Russian Oral Proficiency Program offers you a method based on interaction and synchronous and direct communication between teacher and student to prepare for the official oral level certification test in a comprehensive way. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

... All of this is enhanced with the best 100% online teaching methodology: Re-learning...

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.

This methodology, at the forefront of world teaching, is called *Re-learning*. The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this way, and in what is called “*Neurocognitive context-dependent learning*”, the different elements of our intensive Russian B2 preparation course are connected with the context in which the participant will take their official certification exam in order to guarantee success on the day of the test.

Specific Objectives

Sociocultural and sociolinguistic competence

- Broaden and diversify your knowledge of sociocultural aspects of communities where they speak the language, acquiring a natural and confident manner of speaking, which doesn't attract attention nor leads to special treatment, different to that given to native speakers. Furthermore, gain knowledge of how to adjust your behavior, reactions, attitude, message and wording to any changes in situation, style and emphasis
- Identify the most important aspects of a variety of common formal and informal, oral and written registers, and appropriately use the expressions, pronunciation and intonation of the most common registers that you are most in contact with
- Perceive the differentiating characteristics of the Italian language pattern in relation to other widespread or nearby patterns

Linguistic Competence

- Manage a wide and varied repertoire of linguistic resources, including complex syntax and textual grammar, in order to approach, with naturalness, precision, clarity and cohesion, texts on a wide range of situations and topics, almost without showing that he/she has to limit what he/she wants to say

In these cases the student will be capable of self-correcting

“

This program will give you access to numerous activities to reinforce your newly acquired Russian language”

Did you know?

Communicative competence is not merely limited to the knowledge and ability to use the linguistic code, but has other broader dimensions, which place it in direct relation with other competences such as information processing and digital competence, learning to learn, social and civic competence, or cultural and artistic competence. This implies a cultural immersion that is only possible to recreate in the online format through simulated scenarios, *storytelling*, videos and real situations

Russian is the language of the present and the future. Don't miss this opportunity.
