Our Methodology

The B2 Spanish Online Conversation Classes program is an intensive course for the Spanish B2 level certificate based 100% on the Common European Framework of Reference for Languages (CEFR). In order to achieve effective learning, TECH bases its teaching methodology on practical work, on carrying out numerous exercises and on the support of native teachers who ensure that each student gets the support and guidance they need.

“

You will not find another program like this one, which allows you to work at your own pace, with native teachers, in small groups and based on specific practice for the CEFR skills in each session”

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's Spanish B2 Level program in oral proficiency preparation offers a method based on real-time interaction and direct communication between teacher and student to prepare for the oral level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

...All of this is enhanced with the best 100% online teaching methodology: Re-learning...

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

Our B2 CEFR oral communication skills preparation program is the only one on the market licensed to use the Relearning methodology, which enhances learning by optimizing the effort/result ratio.

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first in the world licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, Objective, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

Re-learning Methodology

We prevent your motivation from waning and offer you the best learning environment.

TECH's intensive oral proficiency preparation program is based on synchronous communication, in real time, as this type of interaction has been proven to reinforce personal participation, strengthen work interaction, socio-emotional relationships and personal interactions, all of which helps to increase motivation. (Hrastinski, 2008).

*...with a personalized updating itinerary
guided by experts...*

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

Our system will allow you to organize your time and pace of learning by adapting it to your schedule, and access the contents from any device with an internet connection (computer, tablet, smartphone)”

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called “*Neurocognitive context-dependent learning*”, the different elements of our Spanish B2 level preparation course are connected to the context in which the participant will take his or her certification exam in order to guarantee success on the day of the test.

Also learn how to adapt your behavior, reactions, attitude, the messages you convey and your wording to any changes in situation, style and emphasis
- Identify the most important aspects of a variety of common formal and informal oral and written registers, and appropriately use the expressions, pronunciation and intonation of the most common registers with which you are in contact more frequently

“

This program will give you access to numerous activities to reinforce your newly acquired Spanish language skills”

Did you know?

Communicative competence is not merely limited to the knowledge and ability to use the linguistic code, but has other broader dimensions, which place it in direct relation with other competences such as information processing and digital competence, learning to learn, social and civic competence, or cultural and artistic competence.

This implies a cultural immersion that is only possible to recreate in the online format through simulated scenarios, *storytelling*, videos and real situations.

Spanish is the language of the present and the future. Don't miss this opportunity.

The Professional Benefits of Spanish

Spanish is the second most widely spoken language in the world, behind Mandarin Chinese and ahead of English and Hindi/Urdu. Recent forecasts show that English, Spanish and Chinese are inevitably the three languages of international communication for the 21st century.

It is spoken in Spain, in the Caribbean Islands (Cuba and Puerto Rico), in the Dominican Republic, in North America (Mexico), in Central America (Guatemala, Belize, El Salvador, Honduras, Nicaragua, Costa Rica and Panama) and in South America (Colombia, Venezuela, Uruguay, Paraguay, Argentina, Chile, Bolivia, Peru and Ecuador). Spanish is also the second most widely spoken language in the United States.

The Spanish-speaking population represents one of the fastest growing segments in the world, especially in the United States. The Spanish-speaking segment constitutes a huge community that shares products, services and culture; and offers businesses and institutions a truly unique opportunity for growth.

Furthermore, studying Spanish will open many doors at a professional level. Many countries have Spanish as an official language, so there are many jobs in which this can be a fundamental factor.

“

The Spanish powerhouse is in its infancy as to what will happen in the future. Spanish will make Simón Bolívar's impossible dream of uniting all America a reality"

11

Assessment and Certification

The main evaluation objective at TECH is for students to consolidate what they have learned and to be aware of their progress. For this reason, after completing each block, students are shown a report of their results, which visually indicates the skills that they should strengthen.

“

TECH's B2 level oral communication skills program is the only one that also awards you with a university certificate”

Certification

Upon completion of the course, the student will receive a certificate of recognition that will guarantee their preparation to obtain, if the student wishes, the certification of that level.
