01 Welcome

02

Is it Important to Obtain a Language Certificate?

Speaking languages is fundamental these days. On the one hand, tourism is one of the most important forms of leisure, , and mastering the language of the country you are visiting can greatly enhance your travel experience. On the other hand, having a language certificate can open doors to job opportunities, scholarships, academic positions, competitive examinations, employment opportunities or simply facilitate various administrative processes. So, this qualification is essential for anyone who wishes to have all those opportunities thanks to their spoken proficiency in French, since this university program prepares students to pass the oral component of the C1 French exam, according to the Common European Framework of Reference for Languages (CEFR).

“

The ability to communicate effectively in another language, and accredit it with an CEFR qualification, is an essential requirement for academic and professional development. TECH helps you achieve it with intensive 100% CEFR training”

TECH - Technological University

The Common European Framework of Reference for Languages is the only recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program of preparation for oral communicative competence to guarantee that you will obtain your level certificate based 100% on the CEFR, the only system recognized and accepted throughout Europe.

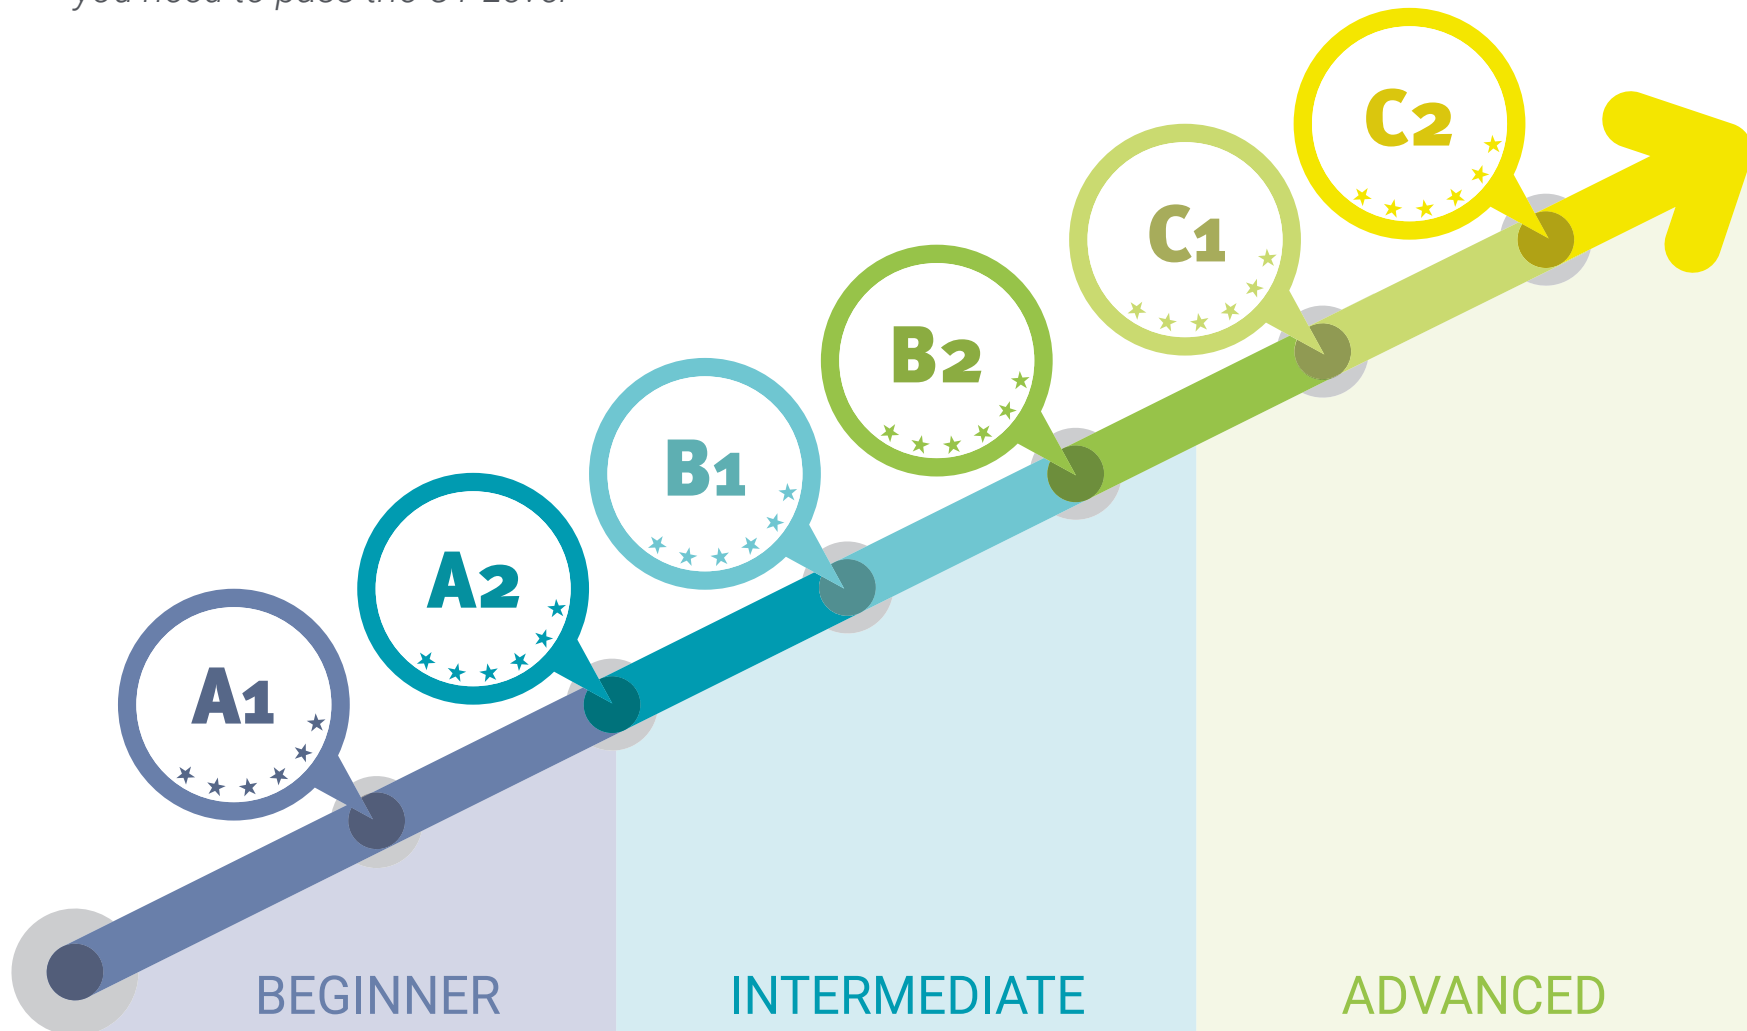

Become fluent in French and make the most of your level by accrediting it with a qualification based on the CEFR.

Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate gives you a certificate for life.

“

With this program you will have all the content and skills you need to pass the C1 Level”

Our Methodology

The C1 French Online Conversation Classes program is an intensive course for the French C1 Level certificate based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test.

“

In no other course will you work at your own pace, with native teachers, in small groups based on specific practice of the CEFR skills in each session"

The TECH Method

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's C1 French Online Conversation Classes program offers you a method based on interaction and synchronous and direct communication between teacher and student comprehensive preparation for the official oral level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

... All of this is enhanced with the best 100% online teaching methodology: Re-learning...

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

This methodology, at the forefront of world teaching, is called *Re-learning*. The overall score obtained by our learning system is 8.01, according to the highest international standards.

Re-learning Methodology

We prevent your motivation from waning and offer you the best learning environment.

This intensive oral proficiency preparation program is based on real-time communication, as this type of interaction has been proven to reinforce personal participation, strengthen work interaction, socio-emotional relationships and personal interactions, all of which helps to increase motivation. According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called “*Neurocognitive context-dependent learning*”, the different elements of our intensive French C1 level preparation course are connected to the context in which the participant will take his or her certification exam in order to guarantee success on the day of the test.

The Professional Benefits of French

French is both a working language and an official language of the UN, the European Union, UNESCO, NATO, the International Olympic Committee, the International Red Cross and various other international legal bodies. French is the language of the three cities where the European institutions are located: Strasbourg, Brussels and Luxembourg.

Together with English, it is the only language spoken across the 5 continents and the only language which can be learned in all countries worldwide. According to the Observatoire de la langue Française, a French language control organization, around 220 million people speak French which puts it in 8th place on the list of most spoken languages on the planet. The Francophonie groups together 68 states and governments. French is the most studied foreign language after English.

Speaking French opens up more possibilities for individuals in the international labor market. Knowledge of French opens doors to French companies in France and abroad, in all francophone countries (Canada, Switzerland, Belgium, Africa). France, the fifth largest trading power and the third largest destination country for foreign investors, is a major economic partner.

Furthermore, speaking French allows you to study in France, in prestigious universities or in higher education business and engineering schools, ranked among the best higher teaching centers in Europe and worldwide. Students who are proficient in French can receive scholarships from the French Government to study a third year of their degree in France in all disciplines, and earn an internationally recognized certificate.

“

French is an international language for food, fashion, theatre, visual arts, dance and architecture. Knowing French gives you access to the original versions of the most famous texts in French and Francophone literature, as well as cinema and music”

11

Assessment and Certification

The main evaluation objective in TECH is that the student consolidates what they have learned and is aware of their progress. For this reason, after completing each block, the student is shown a report of the results, which visually indicates the skills that they should strengthen.

“
