# 01 Welcome

Level C1 of a language already indicates a certain command of the language, with a high level of comprehension and fluency. In order to achieve this level, it is essential to have a good command in the oral aspect, even more so when it comes to the Russian language, as pronunciation is so important. For this reason, TECH has prepared this comprehensive program in which the student will practice the most important oral topics of the C1 level in their groups, always following the requirements of the Common European Framework of Reference for Languages.

# Is it Important to Obtain a Language Certificate?

Speaking languages is fundamental these days. On the one hand, tourism is one of the most important forms of leisure, and mastering the language of the country you are visiting can greatly enhance your travel experience. On the other hand, having a language certificate can open doors to job opportunities, scholarships, academic positions, competitive examinations, employment opportunities or simply facilitate various administrative processes. So, this qualification is essential for anyone who wishes to have all those opportunities thanks to their spoken proficiency in Russian, since this university program prepares students to pass the oral component of the C1 Russian exam, according to the Common European Framework of Reference for Languages (CEFR).

“

*The ability to communicate effectively in another language, and accredit it with an CEFR qualification, is an essential requirement for academic and professional development. TECH helps you achieve it with intensive 100% CEFR training”*

## TECH - Technological University

The Common European Framework of Reference for Languages is the only recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH Technological University, we offer you the only intensive program to improve your spoken proficiency in order to guarantee that you will obtain your level certificate based 100% on the CEFR, the only system recognized and accepted in all of Europe.

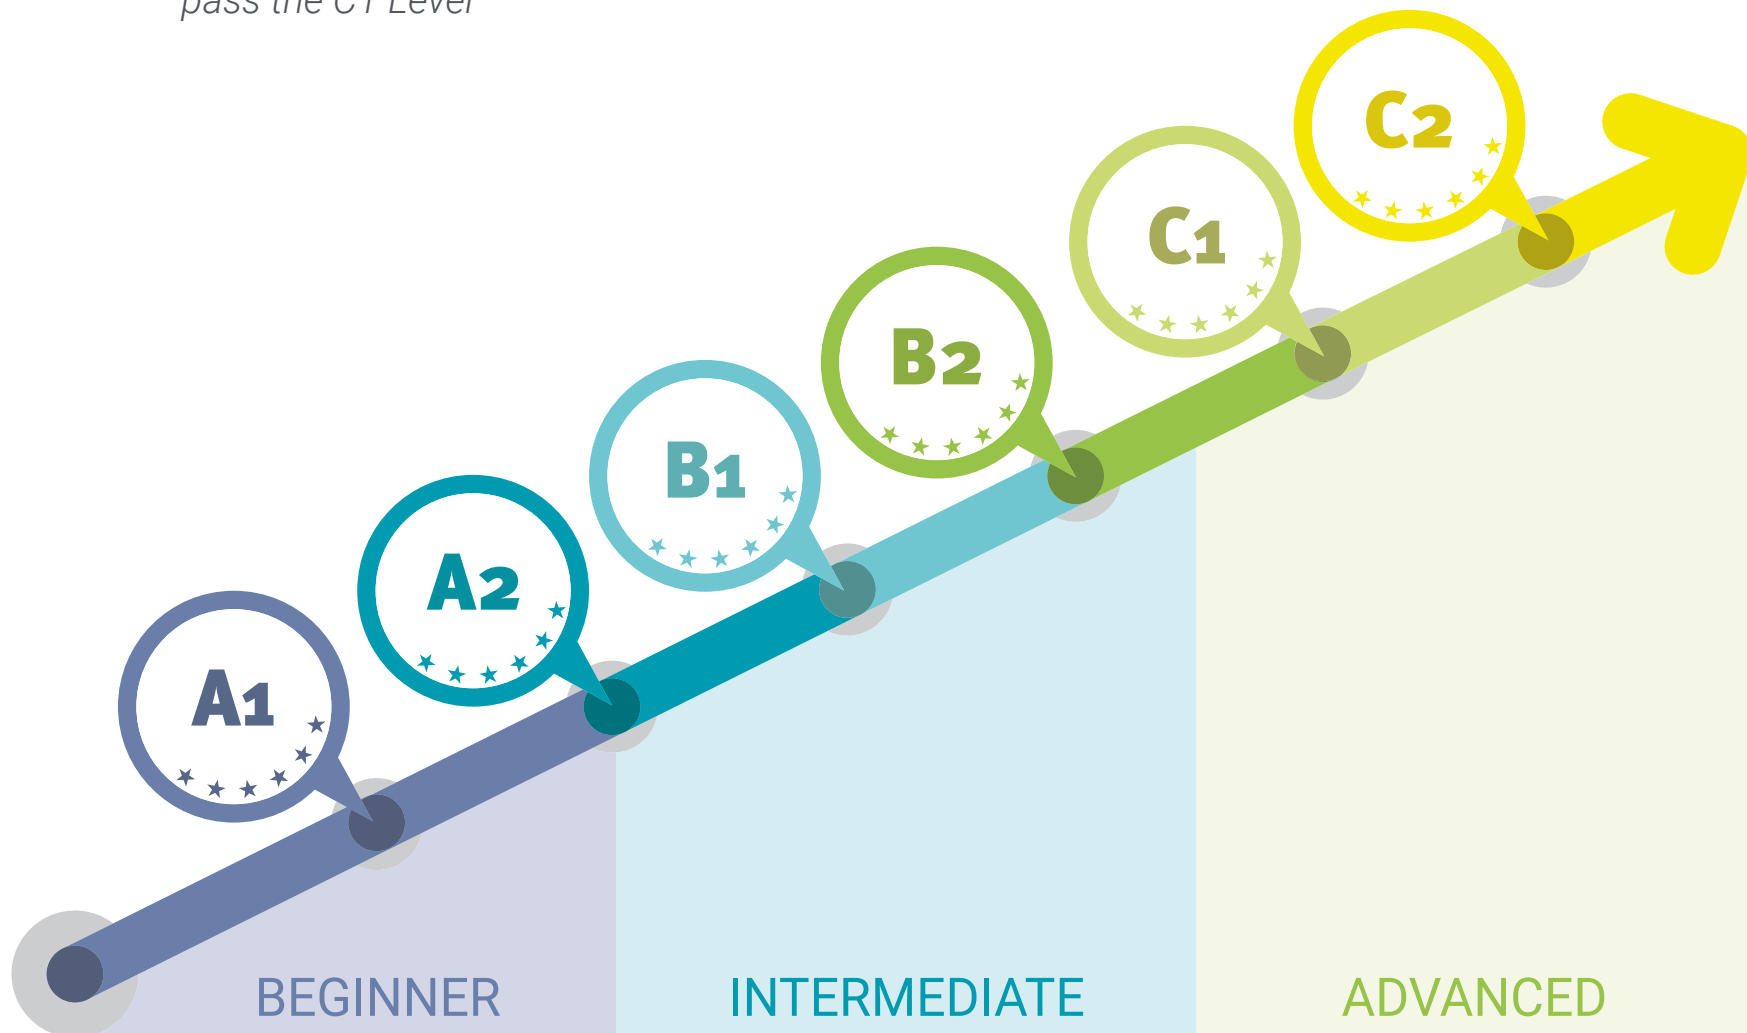

*Become fluent in Russian and make the most of your level by accrediting it with an official qualification based on the CEFR.*

*Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate is valid for life.*

“

*With this program you will have all the content and skills you need to pass the C1 Level”*

03

“

*The C1 level of Russian will allow you to cope in all types of communicative contexts in this language"*

What are the C1 Level Skills?

01

Can understand the main points of clear, standard-language texts on familiar matters, whether in work, study or leisure situations

# Our Methodology

The Online Conversation Classes program for C1 Russian preparation is an intensive course for the Russian C1 level certificate based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test.

“

*In no other course will you work at your own pace, with native teachers, in small groups based on specific practice of the CEFR competencies in each session"*

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's Russian Level C1 Oral Proficiency Preparation Program offers you a method based on interaction and synchronous and direct communication between teacher and student to prepare for the official oral level certification test in a comprehensive way. Our objective is to strengthen your skills in a changing, real and multicultural context and, guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

*All of this is enhanced with the best 100% online teaching methodology: Re-learning.*

Our school is the first in the world to combine storytelling with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

*Our C1 CEFR oral communication skills preparation program is the only one on the market licensed to use the Relearning methodology, which enhances learning by optimizing the effort/result ratio.*

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first in the world licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectify, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

*The overall score obtained by our learning system is 8.01, according to the highest international standards.*

**Re-learning Methodology**

We prevent your motivation from waning and offer you the best learning environment.

TECH Technological University's intensive oral proficiency program is based on synchronous communication, in real time, as this type of interaction has been proven to reinforce personal participation, strengthen work interaction, socio-emotional relationships and personal interactions, all of which helps to increase motivation. (Hrastinski, 2008).

*...with a personalized and expert-led training itinerary...*

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

*Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone)”*

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called *“Neurocognitive context-dependent learning*, the different elements of our intensive Russian C1 preparation course are connected to the context in which the participant will take their official certification exam in order to guarantee success on the day of the test.

*...and all this with teachers at the forefront of technology and education...*

# The Professional Benefits of Russian

Russia is one of the most prominent countries in the world and, therefore, a destination in which to build a good career with the right skills. Regardless of the field of work in which you want to develop your career, it is essential to have a good command of the language to ensure maximum opportunities when applying for a job.

And the fastest and most effective way to master a language is through practicing it orally. Pronunciation in Russian is not simple, but if you practice it regularly, it is possible to manipulate it almost like a native.

For this reason, TECH's Online Conversation Classes have a broad and complete syllabus, divided into blocks for your convenience, in which the student will interact in Russian with other people in small groups, guaranteeing the best possible attention from the teachers.

“

*Develop your professional career in one of the G8 countries and give a decisive boost to your progression with these conversation classes at TECH”*
