Presentation video

“

Make a positive change on a professional and personal level by certifying your A2 level of Spanish with TECH"

Introduction

Most Spanish language schools and academies offer traditional teaching, based on the repetition of simple linguistic structures with no connection to properly structured content or concrete skills. However, teachers and psychologists believe that the best way to stimulate language learning is not to subject the learner to formalized, linear learning - for example, with rote learning - but rather, to encourage imagination and learning through sensory exploration in order to be able to understand and interpret what is around us.

This allows the brain to work and learn a second language in the most natural way possible, in the same way that we learned our mother tongue. Thus, TECH offers you Spanish A2 Individual Conversation Classes with university professors, who are native speakers and who will provide you with common and specific communicative situations, 100% online and in a personalized way. In this way you will thoroughly understand the structure of the Spanish language and be able to hold conversations at an expert level, knowing that you have the quality guarantee of a prestigious university.

With TECH it won't be difficult for you to learn another language. Our intensive and personalized classes are a complete success. Come and try for yourself!

02

Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society.

Nowadays, students must have an official qualification that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies **only** accept candidates who have an official qualification based on the **Common European Framework of Reference for Languages (CEFR)**.

“

The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"

tech 10 | Is it Important to Obtain a Language Certificate?

TECH - Technological University

The Common European Framework of Reference for Languages is the **only officially recognized and accredited system for assessing a student's level of proficiency**. Although there are other certification systems, these come from private institutions and are, therefore, **not officially valid**. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program designed to prepare you to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

Finally learn to speak Spanish fluently and make the most of it by obtaining an official qualification based on the CEFR.

Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate gives you a certificate for life.

“

With this preparation program you will have all the necessary contents and competences to pass the A2 level”

03

What Is Level A2?

Level A2 is part of basic User Level, which is divided into two sublevels: First and Second Basic User Level (A1 and A2).

This level includes most of the descriptors that expose social functions, such as: knowing how to use the usual forms of greeting and addressing others politely; greeting people, asking how they are and being able to react to news; getting along well in very brief social exchanges; knowing how to ask and answer questions about what they do at work and in their free time; knowing how to make an invitation and respond to it; discussing what to do, where to go and preparing for an appointment; being able to make an offer and accept it.

Here you will also find descriptors on how to function in social life: being able to carry out simple transactions in stores, post offices or banks; knowing how to get simple travel information; using public transport (buses, trains and cabs); asking for basic information, asking and explaining how to get to a place and buys tickets; ordering and providing everyday goods and services.

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's A2 Spanish Oral Proficiency Preparation Program offers you a method based on interaction and synchronous and direct communication between teacher and student to prepare for the official oral level certification test in a comprehensive way. Our objective is to strengthen your skills in a changing, real and multicultural context and, guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

...All of this is enhanced with the best 100% online teaching methodology: Re-learning...

The Professional Benefits of Spanish

Spanish is the second most widely spoken language in the world, behind Mandarin Chinese and ahead of English and Hindi/Urdu. Recent forecasts show that English, Spanish and Chinese are inevitably the three languages of international communication for the 21st century.

It is spoken in Spain, in the Caribbean Islands (Cuba and Puerto Rico), in the Dominican Republic, in North America (Mexico), in Central America (Guatemala, Belize, El Salvador, Honduras, Nicaragua, Costa Rica and Panama) and in South America (Colombia, Venezuela, Uruguay, Paraguay, Argentina, Chile, Bolivia, Peru and Ecuador). Spanish is also the second most widely spoken language in the United States.

The Spanish-speaking population represents one of the fastest growing segments in the world, especially in the United States. The Spanish-speaking segment constitutes a huge community that shares products, services and culture; and offers businesses and institutions a truly unique opportunity for growth.

Furthermore, studying Spanish will open many doors at a professional level. Many countries have Spanish as an official language, so there are many jobs in which this can be a fundamental factor.

“

The Spanish powerhouse is in its infancy as to what will happen in the future. Spanish will make Simón Bolívar's impossible dream of uniting all America a reality".

11

Assessment and Certification

The main evaluation objective at TECH is for students to consolidate what they have learned and to be aware of their progress. For this reason, after completing each block, students are shown a report of their results, which visually indicates the skills that they should strengthen.

“

TECH's A2 level oral communication skills preparation program is the only one that also awards you with a university certificate”
